Or to Jas. B. Chase, 900 *Front St., San Francisco.*

Mollie McCarthy's Death—a Statement from the Veterinary.

Editor Breeder and Sportsman: I see by your paper that it would he only a conjecture on your part why Mollie McCarthy died. I cau tell you, and her case was diagnosed. I had an order from Mr. Cooper to call at the ranch, wheu I got time, to attend to some minor duties on the horses that he had in training. I happened there the morning Mollie was taken sick; they were glad to see me. I immediately saw the mare and pronounced the ailmeut impaction of the stomach, warned them of the dauger, asked if they knew of any cause.

"Oh, yes! We feed harley by the sackful, she is hoss and we expect she ate too much."

Next question—"Are you going to do anything for her?"

Was iuformed that when she was in training she was subject to attacks of colic and a little run generally relieved her, accordingly she got a little run. I told Alhert it would do no good. "Oh, she will he better when she helches." She soon commeuced to helch, hut got no better. I then commenced to plead for the old mare. Alhert aud I went on a tour of discovery to try aud find some sort of an anodyue. Got to the store (there is a store on the place), it was locked up; (so was the man that ought to have kept it open; he tried to shoot one of the hands a day or two previous). Fiually we found the key and secured a little turpentine; on another part of the ranch, a little laudnumn, at least it was marked so. Well, we were hastening off with our prize aud were recalled by Mr. Baldwiu aud iustructed to try soda and vinegar, it never failed. More time lost; had to wait to see what virtue there was in vinegar and soda, soon found out it was no good. Gave turpentine and laudnumn, got relief; afterward gave large dose of oil and salt but had nothing left to ease the pain or stop the fermeutation now going on. I told them under the circumstances the case was hopeless. At 3 o'clock p. m. Mr. Baldwin arrived on the scene, gave iustructions to have done what could he done. Dispatched a hoy to Los Angeles for remedies. I think a man ought to have been sent. It took the hoy five and a half hours to make twenty-six miles on an old gray mare. I blamed him to have been gone so long—"conld not do the distance faster." Gave a dose of the medicine, no relief; Mollie will have to die nnless the oil moves the impaction. I have given np nearly all hopea. Now commence on the part of the stable hands, active and death dealing nostrums, ginger, mustard, three tahlespoonfuls of this and that, stuff and molasses and I don't know what. At 2 o'clock a. m. I wrapped a hlanket round me and lay down in a straw stack close to Mollie. At 3 o'clock Albert took her to the track, gave her three miles, hrought her back; she was breathing easy; woke me up to inform me of the fact. I got up and took in the sitnation at a glance, the stomach was ruptnred, Mollie had run her courae. I waited till daylight, hastened me from the scenes of the last eighteen honrs. I could not hear to see her. die. Some demon mutilated her fair form, of course for curiosity. If it were in the interest of science, some scientific society ere this would have conferred a leather medal on him from his wonderful discovery that Mollie McCarthy died from hots.

Los Angeles, April 4, 1883. J. Cooper, V. S.

The Nevada State Agricultural Society held its annual meeting at Reno last Saturday. W. R. Chamberlin, Jno. B. Williams, Jacoh Stiner, A. A. Longley and Al White were elected trustees for the ensuing year. The annual report recounts the many misfortnnes that overtook the society last year, and recommends that in case it is decided to hold an exhibition thia season the date he fixed earlier than has heen the practice heretofore. The financial exhibit shows an even balance of receipts and expenditures effected hy the Secretary, Nate Roff, who, as the statement shows, advanced $1 55 to make the husiness come ont even. No action was taken as to the fnture intentiona of the society.

W. M. MURRY, Agent,
Sacramento Racetrack.

THOROUGHBRED STALLION

X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam, Columbia, also by imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland,
or 508 Montgomery street.

ANTEEO.

DARK BAY COLT, NEAR HIND FOOT WHITE: FOALED MAY 5th, 1879; bred by Joseph Cairn Simpson, Oakland, California.

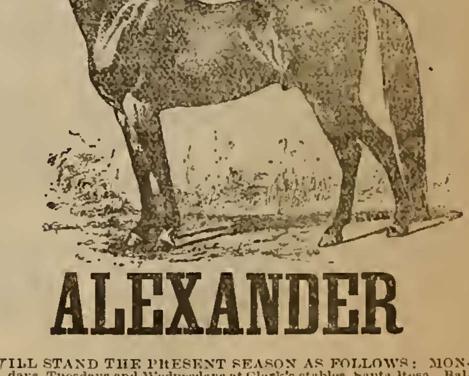
The Fast Trotting Premium Stallion



ALEXANDER

WILL STAND THE PRESENT SEASON AS FOLLOWS: MONdays, Tuesdays and Wednesdays at Clark's stables, Santa Rosa. Balance of time at Fashion stables, Petaluma.

Alexander is by Geo. M. Patchen Jr., the sire of Sam Purdy (2:20½) Starr King (2:22) and Vanderlynn (2:22). Dam Lady Crelin, by a son of Brown's Bellfounder, by imported Bellfounder. For full description, see Breeder and Sportsman of Sept. 9, 1882.

Of Alexander's get Tommy Dodd has a record of 2:24, Reliance 2:22¼, Nellie Patchen 2:27¼, Eudora 2:31½, Inauguration three miles in 7:29—last mile in 2:26, Sonoma Boy 2:37. Alex. Button proved by his performance in 1880 to be one of the best three-year-olds which have ever appeared in any country. He won the stake for three-year-olds at the State fair, beating Belle Echo, Annie Laurie, Len Rose and others, winning the first, third and fifth heats and making a dead heat with Annie Laurie in the fourth; time, 2:31¼, 2:30, 2:29, 2:30¼, 2:35. At the fair of the Santa Clara Valley Association at San Jose he won, beating Belle Echo and Len Rose; time, 2:28¼, 2:30¼, 2:33¼, 2:31½. Belle Echo won the first heat. He won at Stockton, beating Honesty, Len Rose and Upright in straight heats; time, 2:32, 2:33¼, 2:32¼. In 1881, as a four-year-old, Button made a record of 2:28¼ over the Santa Rosa track. Dot Craig, by Alexander, has a private record of 2:29.

The Frasier team took first premium at the Sonoma and [illegible] District fair; also at Oakland for best carriage team.

Mares left at the City Front stables, San Francisco, will [illegible]

For further information apply to

T. T. UNKLE[illegible]

Pacific Coast Blood Horse Association.

A POSITIVELY RELIABLE "FLY-BACK"

HORSE-TIMER

And Accurate Time-piece Combined.

STEM WINDER AND STEM SETTER.

In heavy Gold Open-face Cases, price $55
In heavy Silver Open-face Cases..... 27

[From the Jewelers' Circular.]

"The Centennial chronograph (fly-back) or horse-timer, recently introduced by Messrs. Cross & Beguelin, is, regardless of price, one of the most substantial and accurate pieces of timing mechanism we have seen. This timer is constructed on scientific mechanical principles that must excite the admiration of every intelligent watchmaker, and it will doubtless become universally popular."

Sportsmen & Pleasure-Seekers.

THE

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY THEIR LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Front in abundance can be obtained from the several streams in the vicinity of Monterey, and the best shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING ESTABLISHMENT

OF THE

"HOTEL DEL MONTE,"

IS UNSURPASSED.

A SPACIOUS SWIMMING TANK

(150 x 50 feet)

FOR WARM SALT WATER, PLUNGE AND SWIMMING BATHS,

ELEGANT ROOMS

For Individual Baths with DOUCHE and SHOWER facilities,

MAGNIFICENT BEACH

Of pure white sand for SURF BATHING, Etc., Etc.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ

IS VIA THE

Southern Pacific Railroad,

(Broad Gauge), and the

SANTA CRUZ RAILROAD.

☞ At PAJARO, the SANTA CRUZ R. R. connects daily with Trains of the S. P. R. R.

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets o any description issued by this Company will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggagemen. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞ In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle checked and carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

T W E N T Y

Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23½; another with a record of 2:26, made in 1882; another with a record of 2:28¼, and a grandson with a three-year-old record of 2:23½, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20¼ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15¼ to 2:27½. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23½ to 2:28¼, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¼, by Happy Medium Jr.; and Carrie B, 2:28¼, by Elial G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON, AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address

WILLIAM T. WITHERS,

2-13y1 Lock box 392, Lexington, Ky.

YERBA BUENA

JERSEYS AND GUERNSEYS

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

THE KENNEL.

The Dog Show.

No mattsr what enterprise is set on foot there can always bs found some folks to throw cold water on it. "The management is not what it should bs, ths programme is not exactly the thing, soms one is going to make soms money out of it, this man or that man should have been consulted and was not, the affair is run by a little clique," or perhaps it is allegsd in advance that the schems is found to be a failure, and all good psople had bstter lst it alone. Thsse ars ths stock phrases of the chronic objectors. Thsy are heard about the church fairs, agricultural fairs, horss races, athletic games, rowing matches and every spscies of enterprise, and it was not to bs expected that the dog show could pass off without having ons or mors of thess objections urged against it. The promotsrs of the show expected this and would have been disappointsd, though agreeably so, if it had not come. Tbsy had former experiencs to guide them and they made up their minds before thsy started the show that no small share of adverse criticism would fall their way. Expecting this they do not object to it, but right there the line has to be drawn. Thsy don't mind being called a little prejudiced cliqne who have gotten up a show to make money, but tbsy do object to having any one say in advance that the promisss thsy have made to the public will not be kept and that they will not live up to the spirit as well as the lstter of their published programme. What they promise is to award prizes for the best dogs in each class according to the judgment of the gentlemen who have been selected as judgss. They further promise that noue of the judgee shall bs in any way interested in the ownership of any dog exhibited for competition. Thess promises will be kept to the letter and the one or two persons who have said that it was of no use to enter their dogs because the judges themselvss would have doge in the show under assumed names ars, to say ths least, etating what is not a fact and what is worss, they are saying it in a cowardly and unmanly way. They cannot surely appreciats ths gravity of the charge or they would not dare to make it about gentlemen who, though not rich, stand as high in thie community as the best; whose characters have never been touched by the breath of reproach or scandal, and to whose faces no man dare impnte improper motivss. The fact is, the persons who started the story finding no word of truth to urge against the show, went to work and out of the whole cloth fashioned a good, big lie. They gave the lis a pair of wings that it might fly abroad and with their own breaths started it out on its travels, trusting that it would find lodgment in the minds of men. Of those persons who built this lie it is safs to predict that whsn the judges thsy have maligned are engaged in deciding the merits of the celestial harpers at the annual competition, under the management of a celestial advisory committee, they will be engaged in trying to cool their awollen tonguee by licking the furuace bars in the infernal regiona. To aettle thie matter once and for all time it ia enough to eay that one of the jndges has no doga except an old bitcb he will not exhibit, and the other judgea will put their dogs on exhibition for exhibition only, and not to compete for prizea. They will be simply shown for the benefit of such visitors as might like to aee what kind of dogs the jndgee chose for themaelvea.

The Pittsburg dog ahow just now closed waa, generally speaking, a success, though in moet of the non-sporting classee the entry list would bave been conaidered qnite small in San Francieco. Our old friend Colonel Stuart M. Taylor took first prize for champion field epaniel Benedict. No awarda were made for champion English setters, extra champion Irish setter bitchee, champion Gordons, Gordon puppies, cbampion cockers, foxhound bitchea, emooth St. Bernarda and King Charles. In addition to tbe sixty-eeven regular prizes, fifty-two apecial prizes were given by the townepeople. The miscellaneous prizee were taken by a couple of great Danea and a Leonberg. Major J. M. Taylor judged the sporting doge and James Mortimer the non-eporting. Ae uaual, their awarda did not satisfy all, but the managers were eo pleased with their work that they presented each of them with a handsome gold-headed cane and Major Taylor witb a cup for hia daughter.

Several subscribere are informed that the standard of judging laid down by Stonebenge in hie work on tbe dogs of the Britieh Ielea will govern the competitions at the bench show.

The Napa Coursing Club proposes giving a coursing match abont May 1, if enitable grounds for running can be eecured.

The Bench Show.

The nnmbsr of entries daily coming in to ths secretary shows that the people of this coast are as mnch intersated in ths various brseds of ths canine race as our brethrsn in tbe East. The sportsmen ars coming forward liberally, and a fine display of hunting dogs will be shown. They have learnsd a good deal since the last show, but as Mr. Mason, the judge of sporting dogs in the Washington show, recsntly observsd, botb exhibitors and spectators and the press have much to lsarn yst. If that be the cass in ths East where bench shows are so frequent and ths finest specimsns of the kind exhibited, it cannot bs but that the dog owners and fanciers of this coast have much to learn, and should not be disappointed if every dog exhibited should not obtain a prizs. Ths managers havs endsavorsd to select gentlemsn for judgss who ars as capable as any they could select, and thsy have no othsr snd in view than to obtain correct decisions as to the bsst dog—that is, dogs, with thoss characteristics which most deserve perpetnation. Consequently, the dogs which come most nearly to the rules laid down by Stonehenge will bs awarded the prizes. Not that we have expert jndges to go by the rule of ths thumb—and use ths taps line only—for who would think of measuring the Venus of Medicis, or ths Apollo Belvedere, but when two dogs are so nearly equal in apparent symmetry, color and general features, then a measurement will determine the sxact proportion and dsvelopement of the important elements going to make the perfect dog. Of courss, conditione will also be considered—a good dog shown in bad condition will lose points thereby, and an inferior dog in fine bench show condition will havs much in his favor. One of the objects of a bench show is to show in what fine condition cars, washing and grooming will get a dog. Ws hops to ses some purs Laveracks exbitsd and ses how they will compare with ths Llewellins and field trial dogs. Ws sxpect a fine display of the fine greyhouuds for which this coast is so famous, and hope to see as fins a show of St. Bernards and ths larger kinds as we had at the last show. Tbe managers of the ehow intend to spars no pains nor expense to make all ths necessary arrangemente for the comfort of ths dogs, and they hope that ths public will duly appreciate thsir efforts by supporting exhibition.

J. K. L.

A Stickler for Pedigree.

EDITOE BREEDER AND SPORTSMAN: I tbink tbe men in charge of the bench show make a great mistaks when thsy do not count on psdigree more than they do. I understand a dog, or a mongrsl, or a cur, stands as much show to win a prize as a thoroughbred does, if he is sntered in the same class with a thoroughbrsd, if he can show up and look as well as the thoroughbrsd. Now I think this is all wrong. Ws not only want to sncourags the looks of our California dogs but ws should encourags the breeding of dogs and keep improving them.

Now, for instance, I know of a half pointer and half setter; it is only a half breed, remember, but ia as fine a looking pointer as I ever saw. Now it would look fine, wouldn't it, for some one to enter tbis dog in the bench show as a pointer and receive first prize in the pointer class? I tbink it would encourage men very little to pay big prices and import the best thoroughbred pointer that can be got at great expense. It would be very discouraging to meu owning thoroughbreds to see a half breed win, and after tbe balf breed poiuter has won, what ia he good for in the field? Or what use is it to breed from such dogs? I eay a pedigreed dog should figure a little ahead of a mongrel. Such doinge as this keep out a number of fine bred dogs and let in more acrubs.

EXCELSIOR.

Pedigree ia only valuable to show that a dog ie deecended from a strain that bas shown valuable qualities. Unless the pedigree can be traced back to some celebrated stock it is valueless, and of course euch pedigreee must be accompauied by proof of authenticity. In tbe case mentioned any man who knowe the leaat about pointers could eee tbe evidence of crosa breediug in a dozen ways, easy to see but bard to deacribe.

At the requeat of a number of gentlemen who will exhibit dogs at the coming show thsre will be held, on aome day to be named by the management, an auction of any dogs whose ownere deaire to aell them. Many people will doubtless attend the show in the hopes of beiug able to buy a good dog, and it will afford buyers and sellers an excellent opportunity to come together. Tbe presence of so many experts ae will be at the ahow will give buyers a chance to compare opinions, acrutinize pedigrees and secure information tbat is of value in choosing a dog.

BASE BALL.

Championship Playing.

The third game of the championship season at the Recreation Grounds on Sunday was attended by a largs number of interested spectators. Since the commencemsnt of the seasou, the attendance has materially increased and bids fair to rival the olden time games when base ball was the popular sport on this coast. As was naturally to be expected, the players presented a much bettsr front, and in conseqnencs the gams at times was exciting and hotly contested. Tbe managere of the grounds have exhausted every means of snsuring a good in and out field, until the whole area presents an unusually smooth and unbroksn surface. It is to be regretted that the teams composing the league ars not mors svsnly matched, as, judging from the games thus far played, the Redingtons are wosfully handicapped in the rscs for championship honors. With this notable exception the other clubs have sufficient material to make the games at lsast interesting both to the players and to the spsctators. The Redingtons are generally weak at the bat and still weaker in the field. In fact the individual members of the club are too light-waisted in every respect for good ball-tossers, and ars still further untit by lack of experience for a positiön in the California League. Their throwing is bad, tbeir fielding uncertain, and their general knowledge of the gams sxtremely limited. This was plainly apparent during the second inning on Sunday, when several egregious errors wsre committed by the fislders, aspecially in the cass of the second baseman and the short stop of the Redingtons. The third bag was hugged by a runner, one man out, when the batter struck sharply to short, and the runner from tbird started home on an easy jog. Ths short stop instead of fielding homs whsn he could easily havs prevented a run if not actually putting out ths runner, threw low to first and after all allowed the striker to reach secoud, and a run which should not have been scored as tbe next batters went out in rsgular order. In the third inning the error was reversed by both the short stop and second baseman of the same team. Two men had been put out on the Niantic sids, a runner holding third and ths other bases being clsar. Ths batter struck to sscond, and the baseman instead of fielding in his own good time to first and thereby concluding the inning, fislded home, to intercspt tbe runner from third who immediately returned to his bag, the batter in tbs msan time making his second. Tbs nsxt striksr fortunately for the Redingtons went out and thus savsd them from ons or possibly two runs. Tbess ars errors of judgment of which any neophyts sbould with rsason be ashamed of and it is not at all surprising tbat tbe Redingtons are the laughing-stock of those who know the rudiments of ths national game. In otber rsspects it is sxceedingly ludicrous to witness the mannsr in which they chase fly or foul balls. As was prsviously statsd in tho BREEDER AND SPORTSMAN, base hits are freely chalked by the scorers which any other team would record as puts-out. Their pitcher actually throws the ball from over his head, and in so doing pitches (?) in and out of positiou with no regard for the rules governing hia play. The very opposite cau ho said of Sweeny, pitcher for the Niautics, whose delivery and fielding are in pleasing contrast to that of his rival. His delivery ia rapid, accurate and effective. His efforts are ably secouded behind the bat by Lawtou, who, by the way, is coming to the front as a crack catchor. The fielding of the Niautics all round is satisfactory and tbeir batting heavy. Their base running is uniformly good. It ie worthy of note that the aunexed score would, under other circumstancce, indicate a good game, but as the playing was done principally by one eide, and the errors of the other improperly scored, tho totals are in somo respecte faulty:

Tbe Haverly and California Clube play to-morrow.

Mambrino on Shoeing.

The following article, copied from the *Breeder's Gazette*, is a candid statement of the belief of the writer, and if others would follow in the path he marks out, it would not be very long ere the question would be better understood. Mambrino is willing to give all the pedal appendages that appear to have merit a fair trial, and this is all we ask in relation to the use of tips. Elsewhere we have signified the estimate of the value we place on the management of the feet and legs of horses, and the importance of a thorough ventilation of the whole subject. Benefit cannot follow denial, when the denial consists in words without logic to sustain, or in vague expressions and attempts at wit. Should others find the same good result to follow the use of tips as has been the case in our practice, it will have more weight in the general opinion than chapters of conjecture and volumes of quotations from the writings of those who never instituted one experiment to test it. We shall await with interest the further trials of Mambrino, as there is no one of our acquaintance who will more carefully scrutinize the effects on the action.

In one respect he is in error regarding the paternity of the trio which could trot faster in tips than shoes.

Two of these were by A. W. Richmond—San Diego and Columbine—the other, Avola, by Alhambra. The Electioneers are Anteeo and Antevolo, the former never having worn a shoe on his fore feet, and the other is now wearing his second set of tips, and as yet has never had iron or steel on his hind feet.

Now as we have so frequently stated the claim is not made that, as our few colts have done well, necessarily all horses can trot fast in them, and though our present belief is that a very large majority of horses will show that their action is not prejudicially effected, and with (in some cases) the assistance of toe-weights, it will be found after a thorough test that this view will be sustained.

But there is little necessity for adding to the article of Mambrino, and we are sure that our readers will welcome it for the information contained :

It is not my intention at this time to inflict upon your readers a long dissertation upon the science of shoeing the trotting horse. I will leave that for those more skillful in this really mystic art. I propose simply to make a few practical suggestions which experience has taught me the value of and which may prove beneficial to others.

There are as many theories of shoeing almost as there are horseshoers and owners. We have those who fancy tips; we find also many opposing their use. We have the advocates of the English concave shoe, while we find many admirers of the convex shoe. Then we have the bar shoe, the heavy shoe, the light shoe, and shoes to prevent faulty action of all kinds—interfering, forging, knee knocking, speedy cutting, to make the horse extend, to shorten his stride, shoes for spreading, and not a few styles or forms whose office virtually is to create contraction.

Then we have the advocates of paring out the sole of the foot, leaving the bars prominent, giving the so-called "handsomely dressed foot." We have also those who oppose all cutting away of the sole. One advocates leaving a long toe to both the forward and hind feet, another a short toe and high heel.

There may be conditions when all the above theories may be adopted advantageously. We will refer to them hereafter.

Tips seem to have disturbed the troubled waters of discussion recently, and we find that we unwittingly have been drawn into the discussion, so we will allude to tips first. The California Breeder and Sportsman has been publishing some very interesting articles on the uses of tips, written by the editor, giving his readers the benefit of his practical experimenting with their use upon his own horses, extending over a period of several years. The result of his experimenting has made him a warm advocate of their use, even for track purposes. We wrote Mr. Simpson, expressing the pleasure the perusal of his able and valuable articles had given us, stating at the same time that we had received great benefit from the use of tips on different occasions, extending over a period of nearly twenty years, and also remarked: "I do not wish to be understood that all feet are suited to their use, as there are many low-heeled horses that need the protection from concussion that a good substantial shoe furnishes." Also, that I did not look for them to go into general use for road or track work; for not one horse in fifty but requires more weight to balance his action than can he put into a tip.

Mr. Simpson, commenting upon the above statements, thinks they must have been simply the expression of an opinion and not based upon practical experience; he then assures us that his tests upon low-heeled and flat-footed horses have proven most satisfactory, introducing one or more subjects experimented upon that seem to demonstrate the practical worth of tips, even upon the low-heeled and flat-footed horses. The first statement was carelessly and thoughtlessly made, for upon reflection we remember that upon one occasion, at least, we did derive material benefit from the use of tips on a low-heeled horse. He had been slightly lame at intervals for several months, had been rested, had been blistered, but was still occasionally lame. Resorting to the use of tips the horse rapidly improved and was apparently entirely sound when sold. Hearing nothing to the contrary the average horseman would conclude he continued a sound horse.

The second statement was likewise an opinion only, without the basis of practical test and rather broadly stated, too. We have, however, upon several occasions worked young things (we call two and three-year-olds young things in this section of the country) in tips, as we, after short trials, uniformly found full shoes upon the subjects, we would naturally infer that improvement had hardly been satisfactory in the use of tips and shoes substituted. We do not remember of working any aged horse for speed with tips, but as we wrote Mr. Simpson, we have used them on road horses with satisfactory results, and always have resorted to them for contraction, and the various forms of foot lameness, and so far as we are concerned consider them indispensable in restoring a contracted foot to a healthy condition, i. e., where structural change has not taken place and the foot is susceptible of improvement. Mr. Simpson is quite right when he states that he thinks we were not justified in the statement that not one horse in fifty but required more weight than could reasonably be put into a tip. As we have before remarked, it was simply an expression without much reflection. Mr. Simpson states: "Our experience has shown three that could trot faster with tips than with full shoes, and as the trials were restricted to that number, we have yet to find an instance which was not in favor of the tips." The statement based upon practical tests of Mr. Simpson is certainly entitled to more consideration than the theories or opinions of anyone. Mr. Simpson has certainly been most fortunate in his selections of subjects upon which to experiment; one of them, in fact, a yearling only, trotting a mile without even tips in 3:02. Had this performance occurred but a few years ago the sporting and breeding press of the country would have made it the text for many an interesting article. His three subjects make a strong argument for tips, but don't they also reflect great credit on their sire, Electioneer? That he transmits to his colts pure trotting action, that enables them to attain to such a remarkable degree of speed without the assistance of artificial weight, making them natural trotters, in fact, is one of the grandest qualities of this noble young sire. We have handled many colts but do not call to mind one that was much of a bare-footed, or so-called natural trotter; none but would trot much faster after being shod.

We are, upon reflection, inclined to think that there are many fast trotting horses that might trot as fast with tips and toe weights as when wearing the regular shoes. We sold a mare two years ago that seemed to increase her speed as weight was reduced, and weight certainly was reduced as speed increased. She formerly had worn twenty-four-ounce shoes, both forward and behind, which gave a perfect harmony of action or poise. We are quite positive that this mare could have trotted faster in a four-ounce tip than with a seven-ounce shoe. We have a second Almont now that wears a very light shoe—possibly the best four-year-old we ever owned. If our faith gets strong in May we will try him in tips. He will be jogged in tips in April, as is my usual custom with my horses that are to be worked for speed development later in the season.

We must say, however, that we consider the proportion that would trot faster with tips than with shoes—well—problematical.

The objection raised to tips by many, that they cause undue strain upon the tendons and pasterns, we consider purely conjecturel and imaginary. Making the tip of uniform thickness, leaving the heel unrasped, cutting and rasping away the sole and wall of the foot equal to the thickness of your shoe, you preserve the same angle of the foot as when shod with a full shoe, and as we have less weight to carry we have less strain upon the tendons of the horse. With all due deference to all the distinguished professors of the veterinary colleges in England and France, quoted by the *Turf, Field and Farm*, in opposition to tips, we would say that in this discussion we consider the practical experience of Mr. Simpson or any other intelligent horseman entitled to far greater consideration than the mere opinions or theories of anyone, be he a V. S. or M. D. and V. S. If we have a very sick horse we call in the veterinary, but who thinks of consulting his "vet" to learn how the horses should be shod to secure the highest attainable rate of speed at the trotting gait? In fact, what do the distinguished English and French professors of veterinary science know of the demands of the American trotting horse, comparatively unknown in those countries? Shoeing and manipulating the weight upon the feet, both forward and behind, is the most potent factor in the development of the great majority of fast trotters. Ordinarily the head controls the feet, but in the development of speed in not a few instances we find the skillful trainer causing the feet to control the too highly organized head.

In conclusion we will say that while we for many purposes indorse the use of tips, we cannot give our unqualified adherence to the principle for turf purposes. We may be entirely wrong and possibly we may be wholly converted when our faith is strengthened by practical tests.

Blue Bull as a Sire.

A correspondent of the Breeder and Sportsman complains that none of the Eastern sporting papers acknowledge any merit in the Blue Bull family; and accounts for the fact by reason of Wilson's never paying the aforesaid papers. It is evident the correspondent is not an assiduous reader of Eastern sporting journals, or he never would have made such a statement. The *Sportsman* has from time to time expatiated upon the merits of Blue Bull as a trotting sire, without Mr. Wilson or his successor being obliged to make a draft upon his check book. This assertion of the Breeder and Sportsman's correspondent is ridiculous. It cost the late Wm. Rysdyk nothing—save for advertising bills—to let the world know the greatness of his horse; nor did George Wilkes nor Almont need such assistance. Blue Bull now stands second as a sire in the great 2:30 list, with twenty-six of his get, twelve of them with records below 2:25. When the early history of this horse is called to mind, his success in the stud seems more wonderful. Blind, undersized, crippled, serving mares of all strains of blood, this former teaser to a Jack gives to the world a numerous family of trotters. With the exception of Elsie Good out of a mare by Alexander's Abdallah, Blue Bull has none of his get in the 2:30 list out of a trotting-bred mare. Why his prepotency? From what source did he derive his power to get trotters? In his youthful days he paced fast until he broke his leg. Many of his get were pacers converted to the trotting gait, and others trotted naturally. In breeding he was a plebeian. His sire was Pruden's Blue Bull, by Merring's Blue Bull, a coarse work horse with the pacing action. None of the dams of these horses were known to be of other than cold blood. Blue Bull, therefore, unlike Volunteer, Daniel Lambert, George Wilkes, Almont and other great sires, had no trotting blood to help him win his way, although, in spite of numbers, we would not class Blue Bull with those just mentioned. To his pacing blood he is undoubtedly indebted for his fame. That habit of action he transmitted as a rule to his get, and it is by reason of the necessity of converting that gait we do not class him with the sires that get natural trotters as a rule. Will Cody, Silverton and Elsie Good as campaigners stand well, and would do credit to any sire, nor is the list of Blue Bulls exhausted yet. No other horse in the list stands as he does. He is unique, a great exception to the rule. Like Bogus Hunter and Conklin's Abdallah, Blue Bull may be regarded as an "accidental" sire, with a representation in the list. The probabilities are that his powers died with him. None of his sons have as yet distinguished themselves in the stud, nor has any of his daughters given a 2:30 trotter to the list.—*New York Sportsman*.

There is to be a half-mile and repeat running race for a purse of $50 at Soledad on May 1, open for all horses owned in Monterey county.

TURF AND TRACK.

The Paris Mutuels—Gen. Abe Buford Discourses Thereon.

Now that the campaign of 1883 is upon us, and on which so many millions of money will be staked, it will not be out of place to discuss the different modes of betting now in vogue on the various grounds of the jockey clubs in the country, by inquiring into the practices, as well as the rules and regulations governing this betting. As men and women, too, will bet on a horse race, as well as on the future price of grain, it becomes the duty of the press to protect the public, as far as it is in their power, by exposing the fraudulent manipulations and practices, if any, in the bucket shops or on the jockey club grounds. By reference to the sermon delivered in Brooklyn, N. Y., by the Rt. Rev. DeWitt Talmage, which was styled by the *Courier-Journal* a Buford sermon, the different styles of betting on a horse were elaborately and minutely explained. On reading this sermon we were struck with the great familiarity the reverend gentleman evidently possessed on the subject, and concluded, with strong reasons to prove the conviction, that he had gained this complete knowledge of the subject by actual experience. Be that as it may, he most assuredly understood the subject, and if ministers and Christians will occasionally "lay a wager," it becomes the duty of all turf editors to see they are not taken advantage of. In the same sermon referred to it was gratifying indeed to find that so grand a man as Talmage fully indorsed the liberal position taken by General Buford on the question of church and turf. On a horse race there are several styles of betting—the auction pools, book-betting and French mutuals, the most elegant and fashionable of which is the French mutuals, as at many of the most popular racing points you can see the first ladies of the land sending their maids of honor or escorts to purchase a few French mutual tickets. It is this style of betting that we wish to investigate just now. There are used in this betting a number of machines or boxes, that are built for the express purpose, with some little machinery about them—a crank, an indicator and a face, on which is placed all the names of the horses that are to run in the race. There are usually from two to a half dozen machines in operation at the same time, all of which are under the command and management of a gentleman who is styled the French Professor. His command of this brigade of machines is as arbitrary as that of a general in the army over a brigade of troops. The sale of tickets usually begins an hour or so before the race. At each machine stands a man to receive the money paid for tickets, and to turn the crank when a ticket is sold. As fast as the tickets are sold the crank is turned, and the indicator shows the number of tickets sold. When the sale of tickets is stopped all the numbers in all the machines are added together. This gives the total number of tickets sold. Multiply this number by five, which is the usual price of a single ticket, and you have the amount of money in the machines, which amount is to be divided by the persons buying the winning horse, minus the percentage allowed to the Professor. Should there have been one ticket on the winning horse, then the purchaser gets all the money in the machines minus the percentage. Should there have been ten tickets sold, then the holder of each ticket will get one-tenth of the amount in the machines minus the percentage. When the numbers indicating the number of tickets sold on each horse are not interfered with, and left in sight of the public until the official decision of the race is made by the judges, there is no trouble, and all is fair and just, and the turning of the crank sounds as nice to him who has purchased the winning tickets as the tingling of a wedding bell. But it is said to be the case that sometimes, a few moments before the race is run, the Professors, or an expert for them, may close one or two of the machines, when no one is noticing the indicator, which tells the number of tickets sold, and continue to sell on the others. The public not knowing the number of tickets sold in the closed machines, gives them a chance to do their manipulating. For instance, should a horse win a race on which were sold five tickets, and the manager report ten sold, he will get just one half the money in the machines, thus placing it in his power to manipulate the machines greatly to his advantage. When the race is being run you may sometimes see an expert—as was the practice in France, and caused the abolishment of this system of betting in that country—figuring very industriously with all the numbers out of sight, and the public waiting until the result of the race is announced and his figuring finished, before they can learn the number of tickets sold. When the sale of any of the machines is stopped, the report of the indicator should immediately be placed on a blackboard. The officers of the Coney Island, Baltimore and Long Branch clubs, and perhaps others, require the numbers indicating the tickets sold to remain in the machines all the while, exposed to the public, to whom they belong, until after the race is decided and announced from the stand. Any interference with the machines after the sale of tickets begins is indicative of interested manipulation. It was the abuse of this most elegant and gentlemanly way of betting or laying a wager that induced the turf officials of France to drive these machines from their club grounds and abandon this system of betting, and, as an ounce of prevention is worth a pound of cure, we are induced to make these suggestions in due time. The liberal gentlemen of America, both Christian and sinner, are fond of this great national sport, and when they attend the races they must get up a little excitement, so they bet a little, and when they are satisfied that all is fair, and the race and betting are on the square, they come again, and go home happy, win or lose, and there is no trouble with the church, especially if they win.

A Lexington correspondent of the *Courier-Journal* reports that there are eighty-eight horses in training at Lexington belonging to the following stables: N. Armstrong's, John Loud's, Owens & Co.'s, J. A. Grinstead's, R. F. Johnson's, T. H. Stevens & Co.'s, Wallace McClellan's, John G. McFadden's, C. Speagle's, J. Murphy's and George Cadwallader's. Of the eighty-eight, thirty-five are two-year-olds. The same writer says that Cardinal McCloskey has grown very little during the winter, that he stands a trifle over fifteen hands and that "a majority of the horsemen here (Lexington) pronounce him too small to be able to defeat such horses as Drake Carter or Ascender over a Derby Course."

On the Copperopolis track on the 5th and 6th of May next there will be several races run. The first will be a dash of 600 yards, free for all, for a purse of $25, entrance, $5, to follow the purse. The second race on the succeeding day will be a dash of a quarter of a mile for a purse of $50, entrance $7 50, free for all.

There are seventeen horses in training at the Petaluma track.

CHICAGO STAKES FOR 1884.

List of Entries for all the Closed Events—A Grand Showing of Nominations.

We are indebted to D. L. Hall, Secretary, for the following list of nominations to the stakes of the Chicago Association for 1884–5 :

The Illinois Derby (1884).

A sweepstakee for three-year-old colte and filliee (foale of 1881); $50 entrance, $25 forfeit, with $1,000 added, $200 of which to second; one mile and a half.

1. Wiley Bucklee' b c Hannibal, by Harkaway—Lizzie Vic.
2. Wiley Buckles' b c Harpoon, by Harkaway—Sonligbt.
3. Jno. A. Winkle'e b c Tenstrike, by Ten Broeck—Mamie Grey.
4. W. L. Scott'e b f Ninana, by King Alfoneo—Maggie Hunter.
5. W. L. Scott'e br g Tunie, by Algerine—Oleaster.
6. W. L. Scott'e br g Simoon, by Algerine—Nannie H.
7. W. L. Scott'e b f Voila, by imported Billet—Belle Palmer.
8. B. McClellan'e ch c Blaet, by Aristides—Collen Bawn.
9. D. T. Pulsifer's ch c King Robin, by imported King Ban—Booty.
10. D. T. Pulsifer's ch f Hanap, by imported King Ban—Haz'em.
11. Whitten Bros. b g Wild Roee, by West Roxbnry or Lochiel—Melrose.
12. Theo. Winters' ch c Prince of Norfolk, by Norfolk—Marion.
13. Theo. Winters' ch f Callie Smart, by Norfolk—Mattie A.
14. Ed Corrigan's b f, by Longfellow—Catina.
15. Ed Corrigan's b c Ten Full, by Ten Broeck—Full Cry.
16. N. W. Kittson's b c Ruchiel, by Alarm or Reform—Sabina.
17. N. W. Kittson's ch c Theodorue, by Alarm—Theodocia.
18. N. W. Kittson's ch c imported Donald A, by Scottish Chief—Algebra.
19. R. C. Pate'e b c King Kyrle—by imported Kyrle Daly—Gilliflower.
20. R. C. Pate'e gr c Last Dance—by War Dance—Fanny Moore.
21. R. C. Pate's ch g—Envoy—by Enquirer—Satinet.
22. R. C. Pate'e ch g Embargo, by Enquirer—Funny Mattingly.
23. R. C. Pate'e b g Endymion, by Enquirer—Bergamot.
24. R. C. Pate'e gr g Empire, by Enquirer—Alice Murphy.
25. R. C. Pate'e b f Carrie C, by Enquirer—Glentina.

5. W. L. Scott's br g Tunie, by Algerine—Oleaster.
6. W. L. Scott'e br g Simoon, by Algerine—Nannie H.
7. B. McClellan's ch c Blast, by Aristides—Colleen Bawn.
8. D. T. Pulsifer's ch c King Robin, by imported King Ban—Booty.
9. Whitten Bros.' ch g Butter Bird, by West Roxbury or Lochiel—Buttercup.
10. Theo. Winters' ch c Prince of Norfolk, by Norfolk—Marion.
11. Ed Corrigan's b c Ten Full, hy Teu Broeck—Full Cry.
12. N. W. Kittson'e b c Ruchiel, by Alarm or Reform—Sabina.
13. N. W. Kittson's ch c Theodorus, by Alarm—Tbeodocia.
14. N. W. Kittton's ch c imported Donald A, by Scottish Cbief—Algebra.
15. N. W. Kittson'e ch c Perilous, by Alarm—Delight.
16. T. J. Nichols' ch c Waldo, by Wanderer—Glycerine.
17. R. C. Pate's b c King Kyrle, by imported Kyrle Daly—Gillflower.
18. R. C. Pate's gr c Last Dance, by War Dance—Fauny Moore.
19. R. C. Pate's ch g Envoy, by Enquirer—Satinet.
20. R. C. Pate's ch g Embargo, by Enquirer—Fanny Mattingly.
21. R. C. Pate's b g Endymion, by Enquirer—Bergamot.
22. R. C. Pate's gr g Empire, by Enquirer—Alice Murphy.
23. R. C. Pate'e b g Longwey, hy Longfellow—Sally Morgan.
24. Ben Howard's ch c Venture, by Commerce—Sallie Roberson.
25. Ben Howard's ch c Dan Voorheee, by Harry Hill—Maggie Bruce.
26. Ben Howard'e br c Masac, by imported Rapture—Belle.
27. Henry Johnson'e br c Brazil, by imported Billet—Maria.
28. T. J. Megibben'e ch o Ascalon, by Springbok—Astora.
29. T. J. Megibben's ch c Audrian, by Springbok—Alme.
30. T. J. Megibben's b o Strickland, by Springbok—Lorena.
31. Morris & Patton's b g Volate, by Voltigeur—Ate.
32. Wm. Cottrill'e ch c Buchanan, by imported Buckden—Mre. Grigsby.
33. Wm. Cottrill'e ch c Ensign, by imported Buokdeu—Bannerette.
34. R. C. Rowett's b c Conkling, by Hyder Ali—Lilac.
35. R. C. Rowett's br c Hyder Abad, by Hyder Ali—Kitty.
36. J. B. Rodes' ch g Royal Arch, by Fellowcraft—Bonnie May.
37. Malone & Franklin's b c Exploit, by Enquirer—Fanny Malone.
38. Chae. L. Hunt'e br or b c Appanoose, by Charlie Howard—Alatoona.
39. Wm. Mulkey's b c Jim Carlile, by Lucifer—Susie Mariner.
40. J. A. Grinetead'e ch c by imported Kyrle Daly—Cordelia.
41. J. W. Loud'e b g Richard L, by Lever—Optima.
42. Clifton Bell'e b cThe Ute, by Trump—Southern Belle.
43. Jae. T. Williams' ch c Bob Miles, by Pat Malloy—Dolly Morgan.
44. E. J. Baldwin'e b g by Rutherford—Maggie Emerson.

The Northwestern Stallion Stakes (1884).

For colts and filliee then three yeare old (foals of 1881); $100 entrance, $50 forfeit; $20 if declared out January 1, 1784; $35 if declared out May 1, 1884, with $1,500 added, of which $200 to second, $100 to third; one mile and a half.

Conditione—In order to make colte and fillies eligible to thie etake, the eire muet firet be eutered by the ownere or othere, at the price of hie laet seaeon (eiree now dead or retired, at the price of their last seaeon), ae the nomination of no colt or filly will be accepted, unlees the sire ie repreeented in euch eubecription. Of the amount thue subscribed, $300 to tbe nominator of the eire of the winning horee, aud $200 to the uominator of the sire of the second horse, balance to go with tbe amount added by tbo cluh. Nominatione for eiree to close ae above, April 2, 1883. Nominatione for colts and filliee to close August 15, 1883.

1. Wiley Bucklee' Harkaway, by Enquirer—Rurica.
2. W. L. Scott'e Algerine, by Ahd-el-Kader—Nina.
3. Whitten Broe.' Lochiel, by imported Bonnie Scotland—Bonnet.
4. Whitten Broe.' Weet Roxbury, by imported Balrowuie—Columbia.
5. Bell & Lefevre'e Trump, by Weet Roxbnry—Nora Worth.
6. W. G. Harding's Enquirer, by imported Leamington—Lida.
7. W. G. Harding'e imported Great Tom, by King Tom—Woodcraft.
8. Theo. Winters' Norfolk, by Lexington—Novice.
9. A. Hankin's Aristidee, by imported Leamington—Sarong.
10. N. W. Kittson'e Alarm, by imported Eclipee—imported Maud.
11. T. J. Nichol'e Wanderer, by Lexington—Coral.
12. T. S. Megibhens' Springbok, by imported Auetralian—Hestor.
13. B. G. Thomae' imported King Ban, by King Tom—Atlantis.
14. Jonee & Hakes' Barney Williame, by Lexington—Volga.
15. Wm. Cottrill'e imported Buckden, by Lord Clifden—Consequence.
16. R. Rowett'e Hyder Ali, by imported Leamington—Lady Duke.
17. I. G. Wynne's imported Brigadier, by Monarque—Sweet Lucy.
18. Wm. Mulkey'e Lucifer, by imported Leamington—Lady Motley.
19. Wm. Arnett's Ramadan, by War Dance—Hegira.
20. E. J. Baldwin'e Grinstead, by Gilroy—sieter to Ruric.
21. Palo Alto Stock Farm's Flood, by Norfolk—Hennie Farrow.
22. Palo Alto Stock Farm'e Shannon, by Monday—Hennie Farrow.

The Northwestern Stallion Stakes (1885).

For colts and filliee theu three yeare old (foale of 1882); $100 entrance, $50 forfeit; $20 if declared out May 1, 1884; $35 if declared out May 1 1885, with $1,500 added, of which $200 to second, $100 to third; one mile and a half.

Conditione—Same as the "Northwestern Stallion Stakes" of 1884 (see above). Nominatione for sires to close April 2, 1883. Nominatione for (yearling) colts and filliee to close August 15, 1883.

1. Wiley Buckle's Harkaway, by Enquirer—Rurica.
2. W. L. Scott's Algerine, by Abd-el-Kader—Nina.
3. Whitten Brothers' Lochiel, by imported Bonnie Scotland—Bonnet.
4. Whitten Brothere' Renown, hy West Boxbury—Nora Worth.
5. Whitten Brothers' West Boxbury, by imported Barowuie—Columbia.
6. Bell & Le Fevre's Trump, by West Boxbury—Nora Worth.
7. W. G. Harding'e Enqnirer, by imported Leamington—Lida.
8. W. G. Harding's imported Great Tom, by King Tom—Woodcraft.
9. Theo. Winters' Norfolk, by Lexiugton—Novice.
10. Theo. Winters' Joe Hooker, by Monday—Mayflower.
11. A. Hankins' Aristides, by imported Leamington—Sarong.
12. Jas. Brien's Foeter, by Lexington—Varonica.
13. N. W. Kitteon'e Alarm, by imported Eclipse—imported Maud.
14. T. J. Nichols' Wanderer, by Lexington—Coral.
15. F. B. Harper's Longfellow, by imported Leamington—Nantura.
16. F. B. Harper's Ten Broeck, by imported Phaeton—Fanny Holton.
17. T. J. Megibben's Springbok, by imported Anstralian—Hester.
18. B. G. Thomas' imported King Ban, by King Tom—Atlantis.
19. B. G. Tbomas' Fellowcraft, by imported Australian—Aerolite.
20. B. G. Thomas' Lelape, by imported Leamington—Pussey.
21. Wm. Cottrill'e imported Buckden, by Lord Clifden—Conesquence.
22. R. Rowett's Hyder Ali, by imported Leamington—Lady Duke.
23. S. Ecker'e Chariton, by Pat Malloy—imported Sunny South.
24. J. G. Winne's imported Brigadier, by Monarque—Sweet Lucy.
25. I. A. Grinstead's imported Thunderstorm, by Thunderbolt—Kilam.
26. J. B. Prather's Faustus, by Enquirer—Lizzie G.
27. Wm. Arnett'e Ramadan, by War Dance—Hegira.
28. E. J. Baldwin's Grinstead, by Gilroy—sister to Ruric.
29. Palo Alto Stock Farm'e Flood, by Norfolk—Hennie Farrow.
30. Palo Alto Stock Farm's Shannon, by Monday—Hennie Farrow.

Blood in the Trotter.

In a Chicago publication of December 23 I find the following: "Judge Walter I. Hayes of Clinton, Iowa, has bought the highly bred four-year-old mare Casella, by Mambrino Bashaw, dam by Simpson'e Blackbird, second dam hy young Eclipse, son of American Eclipse, for a brood mare." And again, January 27: "The mare Belinda, by California Blackbird (record 2.22), dam by Bouquet."

It now becomes tbe painful duty of the pastor and elders to try Brother Hayes on two distinct charges, the most serioue of which ie hie denial of his conversion, and secondly for withholding the truth; but, inasmuch as his works fully justify hie faith, he can doubtlese be reiustated iuto full communion by expressing due penitence for his siue. He eays that no late-day thoroughbred has bad auy great effect on our trottere outside of Grey Eagle, American Eclipse, Simpeon'e Blackbird, and, mildly, imported Trustee. I wish your readers to bear in mind that thie is the etatement of a very astute lewyer, who stande no less than three stallions for public patronage. The Judge eaye that Simpeon's Blackbird was followed by eone of the great race mare Fashion, Bonnie Scotland, imported Australian, Van Waggouer, imported Leamington, Lexington, imported Monarch, imported Scythian, etc., still not one of them has made the ehgbtest good impression on the trotting or roadster horse interests of Iowa, and, further, that every one of them had vaetly better opportuniitee than Blackbird. The following lines by the immortal Burne are applicable to the whole human race, from tbe judge on the bench to the night scavenger:

> But och mankind are unco weak,
> And little to be trusted;
> If "self" the wavering balance shake,
> It's rarely right adjusted.

If the Judgee' etatement that all of the horses he has named (and they are certainly of tbo choicest etraine) were largely patronized upon the ordinary maree of the State without any good effect whatever, not even as roadsters, it leavee tbe whole country powerlees to improve their horse etock. Hae the judge undertaken the herculean taek of conviucing all the world and the rest of mankind that of all the thoroughbrede of modern timee all ability to transmit [illegible] the trot wae centered in tbe get of Simpeon'e Black [illegible] bacauee he happene to own about all there ie left o[illegible] Has he yet to learn that we are indehted to Boston and [illegible]

less son, Lexington, for the greatest marvels of speed and bottom the world has ever seen in Maud S, Jay Eye See, Nutwood, Noontide, Nutbourne, Clingstone, etc., etc.; to imported Margrave and Potomac for Edwin Thorne; to imported Yorkshire and imported Whip, for Bleck Cloud; to Woodford and imported Consternation for Trinket, to Gano for Lady Thorne and Mambrino Patchen; to Woodford for Woodford Mambrino and Wedgewood, to Bonnie Scotland for Scotland and Dan Donaldson, and so I could continue and fill a column of your valuable space. To tell your readers that so many of the grandest horses in the world were largely crossed with the common mares without improving the stock in any perticular, is simply monstrous, and would not be corroborated by any respectable testimony in his own State. Simpson's Blackbird was one of the grandest horses that ever stood in any State of the Union, had immense substance, which, with his one Messenger cross, indnced a very few to petronize him, and only one of his sons, I believe, was kept entire. Blackbird was almost wholly of Diomed blood; he had no less than seven direct Diomed crosses in strictly thoroughbred lines. Omitting the one out-cross he was in round numbers seven-eigbths Diomed, and one-eigbth Messenger, throngh his great grandsire, American Eclipse. Had he been seven-eighths Messenger, he would have been as good a horse no doubt, but no better. Does the Judge know that his fine horse, Almont Rattler, has six to eight direct Diomdd crosses? He has several not remote crosses of the great raceborse, Grey Eagle, to say notbing of the thoroughbred crosses through Brignoli, Stockbridge Chief, Pilot Jr., etc., etc., which accounts for his beanty and finish—the breading of Almont Rattler suits me well; a colt from him and a mare nearly or qnite thoroughbred I should prize highly. It is not against horses like Almont Rattler, Volunteer, Edward Everett, Jay Gould, Mambrino Patchen, Alcantara, Mambrino Russell, American Clay, Almont, and a few others that the war is being waged, but the thousands of scrub stallions scattered over the country, chiefly of Hambletonian descent out of scrub mares, which have become a greater pest than the plagues of Egypt. The importation of horses and mares from France alone has cost the country scores of millions of dollars, but was a good investment. France is now reaping the fruits of a law which has been in full force in that country for several centuries, I believe, making it a penal crime to use any stallion for stock purposes that had not been inspected and licensed by the general government; and to my mind it is clearly the duty of Congress to enact a similar law at once, and make it national, then to appoint a board of thoroughly competent inspectors, who like the Father of our Country could turn a deaf ear to all attempts at bribery, all pleadings and entreaties to spera the worthless scrubs, said committee to be composed of the following: Editor *Turf, Field and Farm*, Joseph Cairn Simpson, Farmer William Jackson, and "myself" as chairman, then to be empowered to employ the necessary number of smart young "horse doctors" with the most approved instruments. I think we would incapacitata the thousands of worthless scrubs for further mischief at a pretty lively rate. Then, as fast as practicable, replace them with sixteen hand, rangy, thoroughbred sires, and thereby breed marketable horses. Farmer Jackson, in a recent letter, says: "If I wanted to breed a trotter, I would select a good open-gaited mare and put her to a good open-gaited thoroughbred horse." That simplifies matters so that the greatest dunce in the land can understand it. Amateur breeders have been befooled by this "trotting family" humbuggery quite long enough. It may not be known to all of your readers that notwithstanding that no thoroughbred horse has had any trial in the trotting stud, that the best average time by three seconds is to the credit of the immediate get of thoroughbred sires. If breeders could only grasp the fact that the chances of getting a trotter under the most favorable conditions are only two and a half per cent, they would breed with reference to getting carriage and saddle horses in the event of failure to get a trotter; but heretofore every desirable quality in the noblest of animals is subordinate to the one idiotic idea of getting a trotter.

Hark Comstock is one of the fairest of writers. His communication in the February number of *Wallace's Monthly* is a most admirable prodnction—not a single sentence nor line denoting the partisan or "ax to grind," but treats his enbject with admirable fairness; but, as was to be expected, it didn't suit the old philosopher. Hence his chapter of slush and lies in the number following.

Another writer has a deep feeling of mingled pity and shame for "poor Hark" not to have discovered that the "top" crosses of "top" trotting right on "top" hasn't crushed Maud S and others. That is precisely what "poor Hark" has discovered, that it not only crushed the "thoroughbred nonsense," but crushes the horse also to the exact extent that it is infused, as was abundantly shown during last season's campaign. The wriggling and wriggling of the writers in that journal to get round the truth really provokes a smile.

I have seen many of the old time trots, including the seven-beat race between the peerless Lady Suffolk and Lady Sutton, at Centerville course, in 1849; and many a time has my blood boiled at witnessing the abuse heaped upon the gray beauty by that monster in human shape, Dave Bryant; as beautiful as a gazelle and brimful of the blood of grand old Messenger; died full of years and honors without a pimple—no Hambletonian "gum" in those legs.

In regard to Dexter, I have not met a person in five years who believes he was sired by Rysdyk's Hambletonian, but Dictator doubtless was.—*Lexington in Turf, Field and Farm.*

At New Orleans, on the 11th, the Cottrill Stakes were won by Drake Carter. It was a dash of a mile and a half, and as the winner of the Cottrill last year subsequently won the Kentucky Derby, the result was looked upon as giving a line for that event. Last year Green Morris won the Cottrill with Apollo after he had been beaten by Anglia for the Pickwick. This year Green Morris won the Pickwick with Drake Carter, and notwithstanding the penalty of seven pounds, which brought Drake Carter's weight up to 109 pounds, Carter was not only the favorite over the field, but he won the race in a canter by ten lengths in 2:52, with Cassidy's Campanini second, Carter & Co.'s Beechenbrook third, and Telford and Centennial following. After the race there was quite a demand to back Drake Carter (who is by Ten Broeck) for the Kentucky Derby, but so quick were the odds cut down that but little money was got on. Of course, to win the Derby, Carter will have to run faster than a mile and a quarter in 2:12 and a mile and a half in 2:52, but those who have seen him take his work say that by the 22d of May he will not only be much faster than he has shown himself to be, but that, if pushed, he will run the Louisville mile and a half well down in the "thirties."

Arnold Dobie's great trotter Monroe Chief will be sold at auction at the Woodard & Brassfield sale at Lexington, Ky., next Tuesday.

Capital Turf Club.

The entries to the spring meeting of the Capital Turf Club closed last Monday with the following nominations:

No. 1. Half mile dash for two-year-olds:
J. & H. C. Judsons' b f by Wildidle—Susie W.
E. J. Baldwin's ch f by Grinstead—sister to Clara D.
P. Sebentbaler's b c Philip S, by Leinster.
Jno. Mackey's b f Mileta, by Lever—Malta.
Jno. Mackey's b f Mariposa, by Monarchist—Helitrope.
W. L. Pritchard's cb f by Bazaar—Tibbie Dunber.

No. 2. Three-quarter mile dash, free for all:
Jno. Mackey's b m Premium, by Castor—by St. Lonis.
W. L. Pritchard's ch c by Bazaar—Minerva.
Stemler & Ayers' b g Joe Howell, by Bonnie Scotland—Eva Shepherd.
Geo. Howson's b h Jim Dougles, by Wildidle—by Norfolk.
Geo. Howson's b f Auguste E, by Wildidle—by Norfolk.

No. 3 failed to fill and the club have substituted a purse $150, free for all, heats of a mile.

No. 4. Pacing, 2:30 class.
J. T. McIntosh's red Ackerman.
C. Schluter's Prince.
N. McDonald's Buzzy.
J. Greely's Grey Frank.

No. 5 for two-year-olds failed to fill. That, with No. 6, referred to a committee.

No. 7. One and a quarter mile dash for three-year-olds.
E. J. Baldwin's b c Gano.
W. L. Pritchard's cb c by Bazaar—Minerva.
Geo. Howson b f Augusta E.

No. 8. Heats of 1½ miles.
J. H. & C. Judson's May D.
E. J. Baldwin's Lncky B.
H. L. Samuel's Jennie G.
Jno. Mackey's Duke of Monday.
Stemler & Ayers' Joe Howell.
Stemler & Ayers' Fred Collier.

No. 9. Selling race failed to fill; club snbstituted three-quarter mile dash and repeat. Purse $200, $25 to second; entrance free.

No. 10. Trotting, three minute class, Sacramento county horses.
Jno. Mackey's Zulu.
Jas. Tonbey's r g By Berlin.
W. M. Murry's b h Danger.
J. W. Cox' b h Mack.
G. Valensin's ch m Fawn.

No. 11. Trotting, 2:30 class.
Henry McConn's b m Sadie S.
P. J. Williams' h g Colonel.
C. D. Cowan's ch g Long John.
Jas. Linden's d g Buck.

No. 12. Three-quarters mile dash for two-year-olds.
J. & H. C. Judson's blk colt, John A, by Monday—Lady Clere.
J. & H. C. Judson's b f Nelson, by Wildidle—Susie W.
E. J. Baldwin's ch f by Grinstead—Josie C.
Jno. Mackey's Maleta.
Jno. Mackey's Hirondelle.
W. L. Pritchard's ch f by Bazaar—Tibbie Dunbar.

No. 13. One and one-eighth miles, free for all.
J. & H. C. Judson's May D.
E. J. Baldwin's b c Gano.
H. L. Samnels' Jennie G, by Wheatley—Black Maria.
Stemler & Ayers' Fred Collier.
Stemler & Ayers' Joe Howell.
Geo. Howson's Augusta E.

No. 14, two and a quarter miles dash, failed to fill. Referred to committee which will probably make a post stake or two-mile and repeat trot.

Entries to substituted races close May 7.

Oregon Colt Stakes.

The following are the nominations for the Two-year-old Breeder's Stake Race, to take place at the Oregon State fair this fall.

1. Jey Beach's b f Almonette, by Altamont—Favorite, by Post's Hambletonian.
2. Same b c Onecs, by Altamont—Belle Price, by Doble.
3. Same b f Hattie M., by Altamont—Ribbon, by Vermont.
4. C. A. Hogoboom's b f by Navigator—nnknown.
5. Wm. Frazer's br c Hickorywood, by Rockwood—Old Kate, mother of Broker.
6. T. G. Richmond's s f Hattia B, by Napper—Pathfinder.
7. Charles Russall's b c Metropolitan, by Echo—a black mare by Ten Broeck.
8. R. E. Bybee's b f Lena S, by Rockwood—Kate, by Blue Mountain Boy.
9. J. T. Apperson's bl f Black Bess, by Rockwood—Old Kate, by Paul Jones.
10. C. H. Mack's b c Albicore, by Alwood—by Milliman's Bellfounder.
11. Same b f Souvenir, by Alwood—by Milliman's Bellfounder.
12. L. B. Lindley's ch c Fred Hambleton, by Hambletonian Mambrino—Springfield Maid.

The following are the entriee in the three-year-old Breeders' Stake at Oregon State Fair for 1883:

1. Jay Beach's b f Venita, by Almont—Theora, by Cassius M. Clay Jr.
2. Capt. Flavell's gr c Chance, by Romero—unknown; nominated by C. Smiley.
3. C. A. Hogoboom's bl c Harry, by Dead Shot—by Goodyke.
4. L. Godard's b c Ben, by Kisber—Minnie.
5. Jos. Bucbtel's b f Cesnola, by Altamont—by Varmont.
6. T. G. Richmond's br f Sadie R, by Hambletonian Mambrino—by Bure horse.
7. Chas. Russel's b c Metropolitan, by Echo—a black mare by Ten Broeck.
8. J. A. Porter's Orange Blossom, by Orange County—by John Siloy.
9. H. S. Hogoboom's bl c Tyro, by Altamont—by Post's Hambletonian.
10. H. S. Hogoboom's b c Standard Bred, by Alwood—by Milliman's Bellfounder.
11. C. H. Mack's br f Au Revoir, by Alwood—by Millimen's Bellfounder.
12. C. H. Mack's b f Adelaide, by Alwood—by Milliman's Bellfounder.
13. L. B. Lindsey's br g Woodson, by Hembletonian Mambrino—Mollie Welch.
14. L. B. Lindsey'e rn f Cora H, by Kisber—by Pathfinder.

The associated press dispatches of the 18th says that the City and Suburben bandicape was won by Royster, Lowland Chief second, Sweethread third. P. Lorillard's Sachem finished fourth.

The Victoria Trotting Club.

Since writing the editorial in relation to the great trot et Melbonrne, the *Sportsman* of the 21st of March has been received, containing the following account:

On Saturday afternoon the Victorian Trotting Club held their "Cup Day" meeting, as on this occasion the 500 sovs. purse, the greatest trotting event ever attempted in the colonies, was decided. The attendance was very large, the stand being crowded to excess, and a very large proportion of those present were ladies, who seemed to enjoy the sport immensely. As usual now et Elsternwick, the programme included racing and jumping events, and this plan assisted meterially in drawing together the biggest essemblage ever seen at eny of the meetings of this clnb. In the Hnrdle Race, Malone, the rider of Blue Bell, received some serious injuries throngb the mare falling.

The following are the particulars of the racing:

PURSE OF 500 SOVE.

Mile heat. Best three in five.
Mr. J. H. Whiting's ch h Honesty, 6 yrs., by Priam, dam by Chieftain (W. Parker)..... 1 1 1
Mr. E. R. Dean's b h Ajax, aged, by Whipple's Hambletonian—Ashcat (Sheppard)..... 2 3 3
Mr. J. A. Roberts' g h Len Rose, 6 yrs., by A. W. Richmond—Barbara (Mulholland)..... 3 2 2
Mr. J. J. Miller's b h Contracter, aged, by Ajax—Lady Godeley (M. Griffin)..... dist

Betting. First heat—5 to 4 on Honesty, 6 to 4 against Len Rose, 3 to 1 against Ajax. Third heat—3 to 1 on Honesty.

First Heat.—They were got away to a fair start, of which Ajax and Len Rose got whatever advantage there was. They led round the turn where Honesty commenced to move forward, and by the time they had reached the quarter post was close up with the leaders, Contractor being evidantly outpaced from the start. Along the backstretch Ajax was more than a couple of lengths ahead of Len Rose, next to whom came the favorite, going well within himself, and by the time they had just passed the half post, had passed the grey, and lay second; and here Ajax broke, but quickly recovered. There was little between them coming up the side, but at the the three-qnarter post Ajax was still in front, and led into the straight, with Honesty pressing him hard. A furlong from home, Ajax spoilt his chance by breaking, and Honesty came home under the wire a winner by about seven yards, Ajax being second, Len Rose third, and Contractor, who was never dangerous, distanced. Time, 2:30¾.

Second Heat.—After several attempts, Honesty and Len Rose got off together, Ajax getting the worst of the start. Honesty, trotting in grand style, led round the turn and to the quarter post, where Len Rose spurted, but broke instead. The favorite continued in the lead to the half-mile post, whara Len Rose and Ajax went up to his wheels. He continued in the lead to the three-quarter post, where they were all together, but Honesty again forged ahead, and led into the straight, but at the turn he broke, thus allowing Len Rose to pass him. At the distance Parkar called on the favorita, and, coming away in grand style, he gradually caught Len Rose, and passed under the wire a splendid winner by a neck only. Ajax was third, twenty yards off. Time, 2:33½.

Third Heat.—Honesty got about a yard the best of the start, and as the other two continually broke, he came in an easy winner, a dozen yards ahead of Len Rose, who was second, Ajax being again third. Time, 2:33½.

The following races took place over the Elsternwick Course on February 26:

Maiden trot, of 25 sovs., and sweepstakes of 1 sov. each for starters; second horse to receive the sweepstakes. Open to all colonial-bred horses that have no record or have never won an advertised trotting race. Two miles.
Mr. G. Milsom's ch g Dick Goldsbrongh, by Yellow Jack..... 1
Mr. W. Bland's rn m Wasp..... 2
Mr. W. Rose's br m Bess..... dis

Dick Goldsbrough, who trotted splendidly, went to the front at once, and stayed there, winning easily by ten lengths.
Time—6:03.

Purse of 50 sovs., added to a sweepstakes of 2 sovs. each for starters. For 2:45 class; second horse to receive 10 sovs; mile heats; best three in five.
Mr. J. J. Miller's b h Contractor, by Ajax—Lady Godley (M. Griffin)..... 3 1 2 1 1
Mr. J. C. Hall's br h Granger, (H. L. Sheppard)..... 1 4 3 2 2
Mr. J. A. Robert's b m Sylph, (A. Mulholland)..... 4 3 1 3 3
Mr. C. Colbath's b h Von Moltke Jnn., (T. M'Lellan)..... 2 2 4 4 4
Time—2:46½, 2:43¾, 2:46, 2:48½, 2:48¾.

Fred Archer was in bad luck at Lincoln. He had four mounts without a win. Bnt he rode a winner at Kempton Park on Monday, so that his first mount in 1883 was a win. At Liverpool on Thursday and Friday of the same week he rode three winners. The honors of the week were, however, carried off by C. Woods, who rode two winners at Kempton Park on Monday, four at Lincoln on Tuesday and Wednesday, including the winner of the Lincoln Handicap, and one at Alexandra Park on Friday.

Barrett, who rode Greek Maid, had his collar bone fractured when she fell after her collision with Aranza in the race for the Lincoln Handicap. Loates, the rider of Aranza, is said to have reported that Aranza trembled like an aspen leaf during the twenty minutes' delay at the post in consequence of several false starts.

The race for the Stamford Stakes at the York spring meeting was won by Seward, Moonstone second, Leotina third. J. R. Keene's Crown Point came in last.

The Sacramento Coursers.

We have received the record of the late meet of the Sacramento Coursers at Whitcomb's ranch. The running resulted as follows: First ties, Amy Howard beat Kitty Wells; Fly beat Nelly; Snow Ball beat Bradley; Phil Sheridan beat Paddy Ryan; Nelly beat Jnno; Maud beat Modoc; Ruler beat Sally Black; Maggie beat Prince.

Second ties, Amy Howard beet Fly; Snow Ball beat Phil Sheridan; Nelly beat Maud; Ruler heat Maggie.

Third ties, Amy Howard beat Snow Ball; Ruler beat Nelly.

Fourth ties, Ruler beat Amy Howard.

Ruler, owned by Thos. Waite, was awarded first money, $40; Amy Howard, owned by Mike Howard, second money, $25; Nelly, owned by Dennis Moroney, third money $15, and Snow Ball, owned by Alexander Hall, fourth money, $10. Joseph Powers was chosen judge, Tom Durworth and H. Green stewards and Andy Larkin slipper. The decisions gave general satisfaction and the meet was characterized by sport and good feeling.

An auction sale of wool will be held at Willows, Colusa county, about May 1, at which time the spring clip will all be in store, and the auction plan will give buyers an even chance.

The copious rains have brought on the feed so well that Lux & Miller have given over the idea of sending their cattle to eastern Oregon for pasturage.

ROWING.

Jack Largan's Luck.

San Francisco oarsmen take much interest in the reports of Jack Largan's doings in Australia. Jack, after heating the Australians, Laycock and Pierce, on the Thames, came to America in search of a long-lost brother, and dropped down softly among the San Francisco scullers. The Long Bridge men not knowing the celebrity of the visitor were disposed to think lightly of his aquatic ability. The general opinion of the unrecognized champion was that he was some vaunting Australian of the Jim Roche stripe, who generally sculled with his jawbone whenever he wished to show to the best advantage. Largan did not say much of his own powers, but talked a good deal about men he had seen, and his appearance in a racing shell was looked for with curiosity. One day the English champion having borrowed a shell from the Pioneer house and took a spin down to the ferry. There was an immense commotion among the Long Bridge men as soon as the suspected Australian-Anglo-Hibernian oarsman's athletic form was seen hounding over the waves. Bob Goble unhooked his marine binocular which has been focussed on every aquatic celebrity from the venerable Rip VanWinkle of Long Bridge oarsmanship to the new star of hope that is dawning on the horizon of the world of dry goods. After a careful survey of the masquerading champion the cheery landlord shut up his binocular with comment "won't do," and the reassurred scullers on the bridge went off to their clubs to write challenges to the lightly esteemed stranger. When Largan landed and was hauling his shell up the bridge, Mr. Goble volunteered him several words of advice. "You will row pretty well if you practice for a few years," said the genial landlord. "Well, I ain't been much in a boat you know," replied the modest champion of England. "I could see that at once," responded Mr. Goble. "You don't reach enough, and you dip too deep, but that's from being nervous, when you get used to a shell you may get over that." "Do you think I'll be able to row a bit if I practice?" anxiously inquired the victor of Laycock and Pierce. "Oh, I don't know. I've seen even worse scullers than you pick up and get so they could set a shell. There's Pat Brannan and Tom Murphy and President Growney. If you keep on you may do well and be able to give one of them a run." The champion of England thanked Mr. Goble warmly for his kind words of encouragement and lugged away his shell to the boat house. When the identity of the English champion became established Mr. Goble like a man of nerve stuck to his opinion that Largan was anything but a good sculler, though the critical landlord showed no anxiety to back either Mr. Murphy or Mr. Growney against the stranger. Largan's luck in Australia rather goes to show that Mr. Goble's opinion was not altogether erroneous. The English sculler has been worsted in every race except one—the "all-comers' pair-oared race" at Sydney in February last. The race was rowed in skiffs of 100 pounds, and was won by Largan and Laycock, Lynch and Trickett being second and Messenger and Ward third. In the "all-comers single-scull race" Messenger won; Largan and Beach were the other competetors, and the water was so rough that Largan, who was rowing in a borrowed shell, withdrew, Beach's boat swamped and Messenger only succeeded in rowing the full distance by atretching his legs over the side of his boat and paddling along. In the champion's race which followed, Trickett beat Laycock by several lengths.

Pacific Rowing Association.

On Tuesday last the Pacific Rowing Association met and organized permanently. Delegates were present from the Alert Boat Club of Vallejo, the Dolphin, Golden Gate, Pioneer, Ariel and Sonth End Cluba of this city. H. W. Fraser of the Dolphin Club acted as chairman. The committee which was appointed to find out whether the Masonic Committee on Sports would give a regatta during the Triennial Conclave reported that the matter had not been settled. The association, in adopting a constitution, was nnable to decide whether it would be advisable to adopt the accepted definition of an amateur as "one who has not entered into an open competition for a public stake of public moneys, or for gate money, or under a fictitious name, or with a professional for a prize, or where gate money was charged, nor has at any period of his life tanght or pursued athletic exercise as a means of livelihood." This would shut out about nine-tenths of the rowing men. The only important business transacted by the association was the adoption of an article making it unlawful for any club to admit a person who had been suspended or expelled by another clnh. The racing rulea of the old Pacific Amateur Association were adopted with a few slight alterations. It is a rather funny piece of business for a lot of old played-ont professionals who can win no more races in the professional ranks to try and organize an amateur association. If the association mean bnsiness, it must adopt the accepted definition of an amateur. Any other course will be ridiculous. We are in favor of an amateur association of bona fide amateurs, bnt are opposed to the formation of a hybrid organization of real amateurs and anide professionals who have been several timea reinstated in the amateur ranks, and are always willing to row for a atake if it ia dollars to centa on their winning. It is needless to particularize such persons. Every oarsman knows them.

No one can accuse San Francisco oarsmen of being lukewarm in their support of a local champion. Since Peterson began to show auch speed in his training the hopea of hia many admirers have risen until he is now looked on by the Long Bridge men as another Hanlan. Every day that he geta into hia boat their imaginationa conjure upan exciting picture of a three-mile race with Peterson paddling easily homewarda and McInerney, the Eastern acnller, puffing along a mile in the rear with his tongue and his eyes bulging out of hia diminiahed head.

During the week the committee from the Amity Boat Club of Stockton has been viaiting this city in quest of boats. From what we hear it ia not unlikely that the committee will get all the old and worthless boats it wants. It ia rather a risky husiness for country visitors to drop into one one of the Long Bridge clnhs and buy the boats offered at low prices. A good boat ia always worth a good price, and the boat that one can get for a mere nothing is generally worth that mnch.

M. Price received an affectionate letter yesterday from Jack Largan, the' English champion sculler. Largan states that his had luck in Anstralia was dne to aicknesa. He had a rough time of it, and waa to have etarted for England on March 31. He will row on the Thames in the Chinnery regatta. He eent H. Price of the Pioneer Club a very handsome pair of eculle.

A Decaying Organization.

Pioneer Rowing Clnh, which for many years kept the lead in aquatic affairs in California, has hecome almost comatose. The dust is gathering on its racing craft and except a change takes place very soon it will, like the St. George Club and other once prosperous organizations, be numhered as one of the things that were. Success in racing is essential to the prosperity of any club, and the Pioneers have, in their recent contests, heen very unfortunate. Much of their had luck was due to their indiscreet helief that the reputation of their club would carry them through. While the other clubs were working hard to insure victory, the Pioneers took their training as a sort of necessary superfluity that would have no effect on the race. Their bitter ill-fortune has taught them hetter, hut the difficulty now is to get a crew together to train. The club is entirely lacking in the harmony of feeling that conduces to such success as the Ariel Club is likely to attain. An unfortunate affair, which led to the expulsion of several membera a year ago, demoralized the clnh, and it has never recovered from the effects of that ocrurrence. Some months ago the trouhle was renewed hy the attempt of one of the expelled members to obtain admission to the clnh. He was hlackhalled, hut persisted in his candidacy, and at a elimly attended meeting of the clnh recently held, accomplished his purpose. There is some feeling over the event and the clnb is not likely to profit hy it. It is questionable taste for a clnh to expel a member, twice reject his application for readmission, hlackhall him once, and then elect him. It is also very questionahle taste for anyone to accept membership under such conditions.

The Ariel Boat Clnb is now the most flourishing of all the clubs at the South End. The membership has greatly increased and the new accessories have stimulated the activity of the organization. The club is now capahle of putting forward at least two first-class four-oar crews and ready, if opportunity offer, to do so. The latest enterprise of the clnh was the addition of a commodious and comfortable meeting room. As soon as the club had determined to enlarge its accommodations it went to work with a will and in a few days the rcom was ready for occupation. The Ariela have worked their way to their present condition of prosperity by sheer pluck and perseverance and they deserve all the success that can attend their efforts.

Hanlan says that he will be able to get to 152 pounds very easily and will row at about that with Kennedy. The latter takes but one pull a day and then rows over eight miles. He walks seven more. Hanlan walks about fourteen miles a day and rows twice, covering five miles at each pull. Professional oarsmen in the East look on the race as already aettled in favor of Hanlan. They think that Kennedy has no show and knows it, hut that he hopes to make some repntation by giving the champion a good race for two miles. This is not exactly a cheerful prospect hut it is about as good as that which Trickett and all the others had.

By some mischance McInerney's boat has been delayed and on Thursday she was still on the railroad instead of being on the water with the Eastern sculler in her. Peterson's friends are much enconraged by the delay of the Lowell man's craft and if it stays on the cars another week will lay odds of 3 to 1 on "Mac'a" defeat. Both men are looking well.

The English professional ex-champion, Harry Kelly, has been especially engaged, says a London correspondent of a Boston exchange, to train an amateur crew at Berlin, Germany. The Germans will, when ready, proceed to London, afterward journeying to this country.

ATHLETICS.

A Creditable Exhibition.

On Wednesday evening, at Golden Gate Hall, the Golden Gate Athletic Club gave its second exhibition. The club is new bnt vigorous and judging hy the excellence of the exhibition is the nucleus of an organization that may become a formidable rival of older and more pretentious clubs.

The exercises began with a performance on the parallel bars by Thos. Strohm of Los Angeles, W. J. O'Connor, Jos. Petersen, W. T. Welch, Jos. Connolly, J. Lynch, A. Loeher, W. Stone and T. J. Pettit. Mr. Strohm was visiting San Francisco on business and kindly gave his services at the request of Mr. Pettit. Although out of practice, he did some remarkable feats. The performances by the other members were creditable.

A aong by John Hartnett and club-awinging by Hiram Patterson followed and furnished agreeable variety.

W. J. O'Connor gave a fine exhibition of dumb-bell lifting and raised the 116-pound bell in a manner that aroused the astonishment of the critics.

Josh Davis sang several comic songs and brought down the house by a burlesque on "For Goodness Sake Don't Say I Told You."

The sparring between the feather weights, L. P. Ward of the Olympic Club and D. I. Mahoney, of the Golden Gate Club, was next on the programme and was watched with interest as Ward is a veteran while Mahoney is a novice. The youthful hoxer proved to be remarkably quick and well able to hold hia own with the Olympic Club champion. The novice ia very quick on his feet and uses his left hand well but has a bad habit of rushing within striking distance on a rally, withont doing anything. He haa a good idea of avoiding husineas and with aome practice and coaching should become a very clever feather weight sparrer.

W. T. Welch gave an exhibition of club-awinging.

Walter Goldsmith, a youthful comedian, showed decided talent for comio singing and recitation.

The sparring between the middle weights, D. Dillon, Olympic Club, and W. T. Welch, Golden Gate Cluh, ahowed that the Olympic Club man has not improved his form. He was hardly as quick as he was a year ago. Welch overmatched his opponent in size and weight and hitting power. With practice he will become a good hoxer. Though classed as a middle weight he evidently belonged to the heavies. He is rather slow on countering.

The remainder of the interesting programme conaisted of club-swinging by W. J. O'Connor, a very creditable exhibition, Dutch recitation by Mr. Johnson, wrestling, collar and elhow, by P. Tormey and W. J. O'Connor, hitch and kick, D. I. Mahoney, Jas. Connolly and W. J. O'Connor. Tormey waa much smaller than O'Connor and it was expected that he would he easily vanquished. He proved, however, to be a veritable Tartar and threw his muscular antagonist twice in clever style. He alipped down in a most palpable manneron the third bout. He won the third fall easily. The exhihitiou was thoronghly enjoyed by the large and highly reepectable audience.

O'Leary Overwhelmed.

The following account of the six-day walk between O'Leary and Edwards is from the Sydney *Mail* of March 19:

The six days' pedestrian contest in the Exhibition Building for £200 a side, hetween O'Leary, the champion walker of America, and Edwarde, the champion long distance walker of Australia, was hrought to a termination on Saturday, in the presence of several thousand persons, Edwards winning easily by 23 miles. When O'Leary allowed Edwards to make over 100 miles in the first 24 hours, and then increase the lead to 20 miles at the end of the second day, it was thought that he merely allowed Edwards to go ahead, and that he would overtake him as the end of the week approached. From a statement made by O'Leary's trainer, it appears that he was siezed with illness on the first day which he could not succeed in throwing off during the match. He struggled gamely, hut had to retire from the track so often that Edwards had ample time to take things easy and reserve all his strength in case O'Leary would attempt to force the pace on the two last days. When the end of the fifth day was approaching, Edwards (who knew nothing of O'Leary's indisposition) expected the American champion to make an effort; as no effort was made hy O'Leary to decrease the distance on Saturday morning, Edwards felt that he was the winner, and that O'Leary was not himself. By mutual consent the match was brought to a close at a 10:45. Shortly hefore that time the rival pedestrians indulged in some fast spurts, to the delight of the crowd, some of whom gave vent to their enthusiasm hy yelling in the most fiendish fashion. Edwards made several unsuccessful efforts to pass O'Leary, and at last he succeeded in doing so, and in nearly overlapping him in a very short space of time. The distance done in the 142¾ hours by Edwards and O'Leary respectively were 373 miles and 350 miles. The distance traversed hy the contestants falls a long way helow expectations, and the hackers of either man would have wagered at the start that at least 450 miles would have been recorded by the winning man in six days. In nearly all of his six days' matches, O'Leary has strided over 500 miles. At the conclusion of the walk, Mr. F. D. Hamilton of Melhourne, the stakeholder in the match, addressed those present, and stated that O'Leary had been unwell during the whole of the contest, and though he had been defeated, there were some friends of the American champion in Sydney who would back him to walk Edwards again over the same distance. Edwards, who then appeared, thanked the pnblic for the liberal manner in which they had patronised the match, and regretted that it had not been a closer affair. As a refutation of the injury which it is alleged the system sustains through these long distance walking matches, Edwards offered to submit himself at once for examination at the hands of any medical man who might he present, and to illustrate that he had not suffered loss of physical power through his exertions he was prepared to walk any man in Sydney for twenty-four hours within seven days' time. Before retiring Edwards expressed his regret at O'Leary's indisposition. O'Leary then briefly retnrned thanks for the sympathy which had been expressed for him. Though there was a plentiful display of green ribbons among the spectators, three hearty cheers were given for the Queen, and notwithstanding the manifestations of the loyalty and the fact that the Headquarters hand played the national anthem twice in about a quarter of an hour, no disorder occurred. The stakes will be paid over at Hunt'a Oxford Hotel on Wednesday night, when prohahly another match will be arranged.

Preparations for the Olympic Club Spring Meeting.

The spring meeting of the Olympic Athletic Club, which occurs on Decoration Day at the Oakland grounds, promises to be an unusually interesting affair. A long list of events has been carefully selected, most of which are open to amateur clubs. A departure has been made from the stereotyped programmes of former meetings, in which the spectators were obliged to sit patiently through a number of events better calculated for the gymnasium than the field, and in consequence the various meetings were stripped of that general interest which should prevail in order to make them thoroughly acceptable and successful. It is proposed to make the handicaps liberal enough to insure close and exciting races, and the selection of judges will be made by the clnbs represented according to the numher of their members entered. With the co-operation of the bicycle clubs in this city and across the bay, the wheel will be fully championed by prominent riders in both long and short races, so as to give everybody an opportunity of participating. Without disparaging the importance of running races at an athletic meeting it is well known that the spectators take a great interest in bicycle runs, and if they are properly arranged so as to relieve the monotony of a long programme by alternating with running events the day'e aport will be assured. Another feature of the meeting is that the events have been announced early enough to give intending contestants ample time to prepare for such races aa they propose to enter for, by this means allowing no ground for the usual complaint that it was impossible to get in trim. A list of the events has been sent to the various athletic and cricket clubs, so that there is every reason to believe that the field will he large. The Merion Cricket Club is desirous of having a walking match included, but as the programme is already of considerable length, it is hardly prohable that the reqnest will be grauted. The grounds are in excellent condition and quite favorable for a good time. Ae has been previously stated the track is as amooth as a billiard table and the field is covered with thick grass. At last accounts the clube were proposing to make arrangements for permission to practice there. Thus far the following clubs have signified their intention of participating in the meeting: Olympica, Golden Gate, California Univer-aity, California Athletic and Lacrosse and the MeriouCricket Clubs.

We have received from Chas. D. Irons, the manager of the late walk at Truckee, a copy of an affidavit made hy the jndges certifying that Harriman began at 7 p. m., on Friday, April 6, 1883, and euded on Saturday, April 7, 1883, at precisely 11:58:30 p. m.; that they kept a tally sheet score on which each lap was marked in figures; that, in addition, a dial score was kept registering each and every lap; that the track as measnred shows that thirty-two laps were reqnired to conatitnte one mile, aud that Chas. A. Harriman did actually walk 121 miles and 7 laps; that the time occupied in performing said distance was 23:58:30; that he did not leavo the track for any purpose whatever during the said hours; that the walking was a square heel and toe walk, and that Mr. Chas. A. Harriman performed the distance in a manner perfectly just and fair. Accompanying is a copy of an affida[illegible] by the parties who measured the track, who certify t[illegible] 165 feet and 1 inch in circumference. Conequen[illegible] man walked 121 miles aud 385 yarda.

HERD AND SWINE.

Shorthorns as Dairy Cattle.

A friend of the writer's overheard a discussion among his children npon the meaning of tha word "amateur." One little fellow nndertook to explain. "You see," said he, there's the professional, who knows all about it, and there's the amateur, who knows nothing about it." "No," interposed his hrother, "you're wrong, he's called a connoisseur." It is the misfortune of "the Shorthorn interest," in England, at least, that the choice of the public has been led by too many gentlemen of the latter class. During the reign of fashion, such terms as "exquisite sweetness," applied to the cow or heifer; "consummate grandeur," to the bull; and "indescribably charming quality," "tubular form" (as if you could see through, looking from either end), and a great many other mawkisb and nnmanly terms used in descriptions of either cow or bull, were tha stock-in-trade of the Shorthorn connoisseur, travelling, note hook-in hand, among such of the herds as had owners ambitious of his critiques. This itinerant dealer in literary sugar-candy held his head quite too high to look nnderneath a cow for such a thing as a bag, and was quite ahove mean questions as to the ability of the bull's dam to yield any return for her keep heyond her noble son himself, in whose imposing presenca it was impossible to think of such trifling incidents of his calfhood as the cost of his fostermother and her keep.

The fashion fever culminated with us between seven and eight years ago; snd after a few ineffectual efforts to fan tha dying flame, the writers of the same class became suddenly and severely practical. They began to inform ns that the Shorthorn had been utterly ruined by the gigantic folly of recent times—folly to which they or their class (they forgot to tell ns) had eagerly ministered. The last error of these superficial critics was worse than the first. As they had formerly failed to take cognizance of useful properties, they readily failed to take cognizanca of useful work, done against the stream of fashion, and although apart from its influence. While their dainty descriptions had found fit audience, the steady-going workers, some with fashionabla materials, were breeding herds of great beef-making Shorthorns, and of deep-milking Shorthorns that could grow plenty of beef too.

A herd of the kind last mentioned is to be fonnd at tha historical abbey town of St. Albans, tha site of ancient Verulam (theme of a stanza in Spencer's "Ruins of Time,") and resting place of our great Francis Bacon, Baron Verulam, improperly called by the world Lord Bacon. Anything like a notice of the herd wonld be, of course, out of place here, and is by no means necessary to my object, which is to show, by one of many examples befora ma, what the highly-hred Shorthorn can do, and is doing, for tha dairy. Of the breeding of tha cattle, I need only say that they are of various pedigree families, including Bates, Knightley, and other blood which used to be termed fashionable; and that one of the stock bulls is a son of the Hon. M. H. Cochrane's (Canada) second Duke of Hillhurst, from a cow of ona of Mr. Bates' families. These remarks will sufficiently inform the reader that the Shorthorns whose dairy produce we are about to consider ara bona fide representatives of the improved hreed, and not the common Shorthorns of our markets and fairs. The herd is kept for the purpose of supplying St. Albans with milk. The proprietor, Mr. Edwards, who received the diploma of the British Dairy Farmer's Association for dairy farm records, has kept and circulated statistics of the yield of his cattle, not as anything extraordinary, but as showing the form in which such records may be conveniently kept, and the doings of a pure-bred Shorthorn herd, selected with good average judgment, and managed in the ordinary way as dairy cattle. As the pith of these statistics may be interesting to American readers for purposes of comparison, I have gone carefnlly over the tables prepared by Mr. Edwards, worked ont from them a few averages, etc., and extracated any particulars which struck me as worth repeating.

The milk is regularly submitted to a professional analyst, whose reports npon the dairy produce of the entire herd are givan monthly. The help of the analyst is no essential part of a system of recording dairy produce, but it has been usefully added in this case. Each cow's produce is given in tabnlar statements, which supply references to the pages of pedigrees annexed to the tables in the form of a catalogue, the nama and exact date of birth of each cow being given also in the tables, with her date of calving and the numher of days she continued in milk from that date, but not farther than the close of 1882, when most of the cows and heifers which had calved at various times in the year were still milking. The aggregate quantity of the milk of each cow in imperial quarts, tha average daily quantity, in the same measure, the percentage of cream and the percentage of fat have columns in the table. There is not, however, as in the tables prepared by Mr. Hosley, npon which I sent you some notes last month, any column for the weight of milk. This, in Mr. Hosley's tables, is a valuable point, as it enables ns to ascertain the average weight of the milk of Jersey cows; and it would be interesting, and more than interesting, vary useful, to know, from as many different sources as possible, tha proportionate weight and measure of tba milk of all dairy breeds. Some of our dairy authorities lay down rules applicable to milk in general, but these rules are subject to considerable variation, according to the proportions of fat, mineral substances, and other constituents of milk. From the reports of Mr. Elkins, tha analyst, it appears the average quality of tha milk of the whola of the St. Albans dairy herd varies little throughout tbe year. Tha ranga of tbe proportions of water and all aolids is from 86.46 water and 13.54 solids, to 87 water and 13 aolids, or an axtreme variation of acarcely more than one-half per cent. Butter, ranging from 3.98 to 4.20, averagas 4.05 per cent, and mineral matter .675. The averaga percentage of cream of tha entire herd ia 12, varying from 6.50 to 19.

The heifers have tables distinct from those of tha cows. One of tha beifers, curiously enough, is exactly the same aga as one of the cows, and older than threa of the cows, having doubtless failed to breed as early as most of her companions; whila tha cows in question must have hred their first calves at unusually early ages to have becoma mothers again, and taken their placea among the cowa of ages equaled or exceeded by the aga of a heifer not far beyond tha average. Two of these cowaabow a low average yield of milk—a fact not aurprising when wa considar tha drain upon their systems befora maturity, and the want of aufficient rest before that drain is renewed; but, upon the other hand, it must be added that tbo other two young cows are both considerably above tho average in quantity and quality of milk. The two which are greatly below the average in quantity (each scarcely more than one-half the average), are a little helow tbo averaga in quality.

The tables, unfortunately, from the fact already mentioned, that they close while many of tho cows and heifars were in milk—some indeed not having long calved—are incomplete aa regards the trial of each cow and heifor hy her full yield. The herd is a self-perpetuating one, the heifer calves being kept and reared to supply the places of tha cows, and a draft sold when the farm becomes over-stocked; a few bulls also kept for several months and sold for stock purposes. It comprises, at the present time, 68 females of all ages, of which 40 cows and heifers, or, to be more exact, cows 29 and 11 heifers, were in milk in some part of 1882, and consequently appear in tha tables. Tha records ending with that year cut short the doings of 20 cows and 10 heifers, or three-fourths of the milking portion of tha herd. The future records of the same dairy, if published, will ba interesting as showing how long each cow and heifer remained in milk, and what her yield was, in quantity and quality, to the last. As it is, only ten animals (nine cows and one heifer) finished within the year's records their conrse of milking. Those nine cows averaged 249 days in milk, and yielded in that time 21,000 quarts, averaging 2,333$\frac{1}{3}$ over the entire period, or ahont 9 2-5 quarts each daily. The one heifer whose full time of milking comes within the record was in milk 280 days, and gava 1,722 quarts, or a daily average of about 6$\frac{1}{8}$. It is remarkable that the nine cows whose full time is included, and whose averages, therefore, cover the fag-end of their milking, when the yield, for some time, was probably not more than a quart or two daily, the average of the entire herd, including themselves and those cows which were still in milk at the end of the year, one of which had calved only 22 days, another 59 days, another 86 days, and others longer periods.

One cow had been in milk 320 days, and continued so at tha close of the year. Sha was evidantly not one of tha deepest milkers, although a good "holderout," as our English farmers term it, for she had averaged only eight quarts daily (a fair average over so long a time), making a total of 2,560 quarts, while the two cows placed immediately above and below her in the tables had, respectively, milked for 280 and 308 days, yielding 3,676 quarts, or 13$\frac{1}{3}$ daily, and 3,627, or 11$\frac{3}{4}$ daily. The average length of time that each cow milked, covered by the records of tha whole herd, was 208 days, and the average daily yield of each cow in that time, 8 2-5 quarts, making a total of 50,746 quarts from the 29 cows. The 11 heifers average 135 milking days within the records, ane 6$\frac{3}{5}$ quarts each, daily; and the total yield of the 40 cows and heifers, each milking on an average 188 days, and giving 8 quarts daily, is 60,386 quarts. These figures, of course, do not mean that 188 days in the year is the average length of time tbat Shorthorns can milk, or that these particular Shorthorns do milk. Three of the cows, as we have seen by the numbers of days, calved within the last three months of the year; altogether, four cows and seven heifers, or more than one-fourth of the milking portion of the herd, calved within the last four months; so that, as before remarked, the tables are incomplete as regards the doings of most of the animals individually. The ages of the cows at the close of 1882 varied from 3 years and 9 months to 12 years, and of the heifers, from 2 years and 7 months to nearly 4 years. The average age of the heifers at calving was 2 years and 9$\frac{1}{2}$ months.

The increase of dairy records in England is quite a feature of the day. The wonder is, that they have not been adopted much sooner. In most other businesses, the books are supposed to show how matters stand, while that business, which is the means of supplying a large and highly important part of tha people's food, and which needs, for successful results, the closest attention to innumerable minutiæ has taken its chances under the rule of guessing. The change does not come a day before it was due.—*Wm. Housman, in Live Stock Journal.*

Opportunities for Further Importations.

A wide range of sorts to select from affords one of the very best guarantees of continued interest in the introduction of improved breeds of cattle. No taste need go unsatisfied, and by testing the several kinds, side by side, the points in which each excel will be made apparent, and they will stand or fall as these tests result favorably or otherwise. Many will never be entirely satisfied nntil these tests are applied, and, by all means, let them take a wide range and make tham thorough. The United States Consul at Florence, Mr. Schnyler Crosby, reports officially regarding the large, white Italian cattle, a breed said to have been bred for centuries with great care in Tuscany. The cattle ara described as white, no mention being made of any variation from this, or of their having any marks, except those mentioned below.

In size, they are large, the weights at various ages baing given as follows: Calves at six months, 330 to 450 lbs. At one year, 880 to 1,000 lbs.; value $100. Heifer at one year, 880 to 1,000 lbs. Bull at two years, 1,550 to 1,750 lbs.; valne $200. Bull at three years, 1,800 to 2,200 lbs.; value $250. Ox at three years, 1,850 to 2,250 lbs. Cow at three years, 1,250 to 1,500 lbs.; value $150. Thesa prices represent the values of fair animals, prices being higher or lower according to merit. They are represented as excellent in the yoke, ready fatteners, making excellent beef, but of very moderate merit for dairy purposes. The bnlls commence serving at two years old, and are retained as sires till four, and sometimes five years old, and ara nsed as breeders till aight or ten years old.

Heifers as well as steers are broken to the yoka at about two years, and kept at work till seven or eight years old, when they ara fed for the butcher. The bulls, when separated from the herd at four years old and fed, gain as much as 140 pounds in a month, according to the report. These cattle are described as having very long and straight backs, and well rounded bodies; neck very thick; head light and clear cut, with short and thin horns; ears long, the inside being flash colored; legs rather large and placed well under the body; tail short, and black at the tip; dark upon tha muzzle, and a dark strip extending from muzzle along the back to the rump, where it ceases, and appears again at tip of tail. The hair over the body is silver white, and very abundant. We ara told that they can ba brought to New York for $50 per head, the shipper putting up tha stalls, and giving all care and feed, water alone being suppliad hy the owners of the steamer. It would appear that these Italian cattle are similar to the white wild cattle of the parks, with certain variations, caused naturally by selection and domestication. Possibly some readers will put tha query, whether or not these centurias-old Italians, with small, short horns, are not, in part, the progenitors of tha Shorthorn.—*Live Stock Journal.*

Dr. Loring, Commissioner of Agriculture, has done a good thing in inviting Dr. D. E. Salmon to Washington, to conduct a series of experiments upon inoculation as a means of preventing tba spread of contagious diseases of farm stock. Dr. Salmon has peculiar qualifications for work of this natura. A man of fine aducation, being a graduate of Cornell University, he has for years made a specialty of investigations of this character, and, from his amiuent fitness for this work and his earnest devotion to it, we confidently look for valuable results.

The Demand for Well-Bred Stock.

The demand for improved or well-bred stock has been exceptionally good for tha past few years. Breeders have little reason to complain. If they have selected a breed, tha merit of which has been proved, and against which there has been no special prejudice, and have bred fairly good animals, they have been able to sell them at prices which left a fair profit. Will this demand continue? In the immediate future, yes, certainly. Probably some changes of public opinion may he found this year as compared with last year, but all the indications point to a year of good demand for almost every class of good stock. Horses, cattla, sheep and hogs; tha heavy draft and the roadster horse; the heef and the dairy cow; tha sheep for mutton and the sheep bred chiefly for wool, and the hog of good size and form, whether he he called by this or that name. Looking forward for a series of years we may safely predict marked changes. There will be times of comparative depression, and times of unusually buoyant markets. There is little danger of over-supply for many years to come, and on an average there will be a profitable trade in good stock.

We have an enormously large country, and wa are to have more and more attention given to the rearing of animals. Large as is tha number of pure-bred animals of various breeds, they form but a small percentage of the total number of our animals. It is not to be expected that the majority of farmers will become breeders of pure-bred stock. Many of them have little taste for the work and many of them hold—oftentimes correctly—that they can make more money by using well-bred males on common or "grade" females, than by keeping all their stock pure-bred. We do not know of a region in which there is not still some demand for well-bred stock by general farmers, however long such stock may have been kept in the neighborhood. Oftentimes the demand has increased with the number of breeders in a given area.

American breeders are fortunate in having a great field now being rapidly developed in the farther West. Vast numbars of well-bred animals, especially of cattle and sheep, hava been taken from the older States to be used in improving the poorer stock on the plains. And this demand is not soon to cease. Clear-headed men are wisely preparing themselves to take the best possible advantaga of this market, by establishing breeding farms near these great plains. Their enterprisa is almost sure to be well rewarded; but they will not, for many years at least, be able to fully supply thie line of demand. Breeders in the central Western States, especially, will find those at work in the farther West looking to them to supply them, in good part, with needed new or hetter blood.

Especially do we think we see clear indications of a reasonably uniform good demand for practically useful animals of the various classes, although their pedigrees may not be of tha most fashionable. There will, in all probability, be less fluctuation in the demand for these "plainly bred" animals than for the fashionably bred ones. With less prospect for making large sums in breeding them, there is also less danger of loss. The intelligent farmer who carefully selects a stock of animals of any good breed, well adapted to his region; who avoids exceptionally high prices in his purchases and extravagance in his management, may as certainly expect to make a fair profit from rearing animals for sale to he used for breeding purposes, as if he rears animals for the general markets. —*Breeder's Gazette.*

How to Restore the Vigor of Aged Bulls.

An aged bull that has become slow and an uncertain breeder can be restored to his activity and be made sure again by the following treatment: When the weather is fit for stock to run, stake him out, changing location often, and as soon as there is a tolerable bite of grass, withdraw all grain ration; he will take lots of exercise if cattle are in sight; he will get very thin, but he will be active and sure. An aged bull that had been over-fat and had got vexatiously slow and very uncertain, was so treated by the writer last season. The picket rope was long, with a swivel or two in it, and was snapped into the ring in his nose. He got very thin, but waa strong and as active as a cat. He served 101 cows, 22 of which came back for second service, and only three failures to get with calf were reported. "A single swallow does not make a summer," and similar treatment might not alwaya work so well, but the treatment has more than a singla success to commend it. Exercise, fresh soil from day to day, with fresh grass, loss of fat, pure air—all potent remediea for sterility—recommend it. The bull gets much of the benefit of a free range, without exerting himself by serving cows more than once in one heat. This practice of staking out bulls by their rings prevails in some European countries, and it is a cheap and easy way to manage them. A fence stout enough to inclose a bull is very expensive, especially if space enough is desired to do tha animal any good.—*M. T. G., in Breeder's Gazette.*

Sales of Ayrshires.

Mr. Geo. Bement of Redwood City has recently effected the following salea:

To J. B. Lewis, Lakeville, Sonoma county, red bull Lindo, by General Sherman, 2,091 A. R., dam Linda Pearce, 4,511 A. R.

To Carter & Gilmore, Los Angeles, bull Macbeth, by Melancton Callaghan, dam Lady Merryton, 2683 A. R. Bull Malcomb, by Archie, dam Maggie. Heifer Highland Maid, by Melancton Callaghan, dam Highland Lassie. Heifar Stellinita, by Adonis, 2,089 A. R., dam Stellina, 4,519 A. R. Calf Gerald, by Newton, dam Stellinita.

Do not waste the blood during hog-killing time. It is a valuabla and excellent fertilizer, containing nearly 30 per cent of organic matter, as well as being exceedingly rich in nitrogen. Even the hair is of some value. When we consider that the quantity of blood that comes from a pen of eight or ten hogs is very large, some estimate may he made of its value by weighing that taken from a single one, which will be surprising, especially when we state that farmers buy it in their fertilizers at the rata of two cents per pound.

Doctors Disagree.

EDITOR BREEDER AND SPORTSMAN, *Dear Sir:* I see a notice of the death of Mollia McCarthy in your valuabla paper and the man Cooper, or Cowper, as his right name is, who said she died of impaction of the stomach, is as much mistaken as the man that said sha diad of bots. There is no such disease as impaction of the stomach; the word impaction don't apply to the stomach; he can't find it in any dictionary, aither veterinary or medical. O C. BALDY, V. S.

Oakland, April 18.

THE GUN.

Gun Notes from Vacaville.

EDITOR BREEDER AND SPORTSMAN: The Vacaville Sportsman Club only has been organized one year. It has a membership of thirty-two good, solid members, and they are trying their utmost to protect the game of Solano county. Hearing last week of parties killing deer, they at once procnred an officer, and will send him in the mountains for one week to try and catch the rascals that would shoot a deer at this season of the year. Deer are being killed in Napa county every Sunday, but the V. S. C. don't go or don't pretend to go outside of their own county. But we think Napa county should have a few white men that would see that the game laws are enforced; bnt they only grunt, growl and complain that game is getting scarcer every season. Their district attorney, I am told, takes no notice whatever of violations of the law. Only a short time ago, I think in March, he was informed that there was a fish trap on Milligan creek. He took out his knife, and after whittling a while, said: "Well, I guess I can't do anythiug with it." Nice state of affairs, ain't it?

Now, our clnb don't ask for any pie yet; but, at the same time, who was the first one to suggest the protection of quail eggs? It came from this little clnb. And who sent the petition that passed what few game laws we have left? It was got up by the V. S. C., signed hy Solano's best citizens, and sent to the Senate, and we are told on good authority if this petition had not arrived, our chances wonld have heen very slim for what game laws we have. Three to one if it had not been sent, we would now have no game laws at all. We worked hard for it, and we got a little protection for the game.

A few members of the clnb met on the 15th inst. for practice at five clay pigeons, twenty-one yards rise, $1 entrance. The shoots came out thus:

FIRST MATCH.

F. Bassford	0 1 1 1 1—4	A. R. Long	0 0 0 1 1—2
J. Dobbins	1 1 1 0 1—4	J. M. Bassford Jr.	1 1 0 0 1—3
S. Dobbins	1 0 1 1 1—4	H. Bassford	0 1 0 1 1—3
E. Whithy	0 1 1 0 0—2		

Ties decided on second match.

SECOND MATCH.

F. Bassford	1 1 0 1 1—4	S. Dobbins	1 1 1 0 0—3
J. Dobbins	1 0 1 1 1—4	J. M. Bassford Jr.	0 0 1 1 1—3

First and eecond money divided by F. Bassford and J. Dobbins.

The third match was a freeze-ou, $1 entrance; won by F. Bassford 3; S. Dobbins, 2, H. Bassford 1, J. Bassford 1, J. Dobbins 0.

FOURTH MATCH.

H. Bassford	1 1 0 1 1—4	S. Dobbins	0 0 0 0 w
F. Bassford	1 1 1 1 1—5	J. Dobbins	0 1 0 w
J. M. Bassford Jr.	0 0 1 1 1—3	Dr. Barbour	1 1 1 1 1—5

Divided by Dr. Barbour and F. Bassford.

FIFTH MATCH.

H. Bassford	0 1 1 1 1—4	S. Dobbins	0 1 0 0 0—1
F. Bassford	0 0 1 1 1—3	J. Dobbins	0 1 1 1 0—3
J. M. Bassford Jr.	1 1 1 1 1—5		

Won by J. M. Bassford Jr.

SIXTH MATCH.

H. Bassford	1 1 0 1 1—4	S. Dobbins	1 1 0 0 0—2
F. Bassford	1 1 1 1 1—5	J. Dobbins	1 1 1 1 1—5
J. M. Bassford Jr.	0 1 1 1 1—4		

Divided by F. Bassford and J. Dobbins.

The clnb has its regular shoot for the medal on the 28th.

Vacaville, April 16. X. X. X.

Ventura Gun Club.

The Ventura Rod and Gun Club commenced a series of clay pigeon practice shoots last Sunday when the following scoree were achieved:

FIRST MATCH.

Vickers	0 0 1 0 0—1	Shaw	1 0 1 1 0—3
Foulks	0 1 1 0 1—3	Goodwin	1 1 1 1 0—4
Sheldon	0 1 0 0 1—2	F. Sheldon	1 1 0 1 0—3
Reily	0 0 0 0 0—0	Bonestel	0 1 0 0 1—2
Chrisman	0 1 0 0 0—1	Kaisier	0 1 1 0 0—2
Charlebois	0 0 0 1 1—2	T. Chrisman	0 0 1 0 0—1
Total	9	Total	15

SECOND MATCH.

Chrisman	0 0 0 1 1—2	Charlebois	1 0 1 1 1—4
Kaiser	1 1 1 1 1—5	Goodwin	1 1 1 0 1—4
Foulks	1 1 1 1 1—5	Shaw	1 0 1 1 0—3
F. Sheldon	0 0 1 1 1—3	Sheldon	0 0 1 0 0—1
T. Chrisman	1 0 1 1 1—4	Vickers	0 0 1 1 0—2
Bonestel	0 0 1 1 0—2	Reilly	0 0 0 0 1—1
Abbott	0 0 0 0 0—0	Abbott	0 0 0 0 0—0
Total	21	Total	15

THIRD MATCH.

Kaiser	1 1 1 1 1—5	Foulks	1 1 1 0 1—4
Goodwin	1 1 1 1 1—5	Charlebois	0 0 0 1 1—2
Chrisman	0 1 0 0 0—1	F. Sheridon	0 1 0 1 0—2
Shaw	0 1 0 1 1—3	Vickers	0 1 1 1 0—3
Sheldon	0 0 1 0 1—2	T. Chrisman	1 1 1 0 1—4
Reily	0 0 0 0 0—0	Abbott	0 1 0 0 1—2
Total	16	Total	17

Gilroy Rod and Gun Club.

At the regular monthly meeting of the club, the Committee on Arrangements for the meeting of the State Sportsmen's Association made a partial report, but requested further time to complete the preliminaries. The committee contemplates entertaining the members of the S. S. A. with pigeon and blackbird shooting on May 4, and a picnic and clay pigeon ahooting on Saturday, at Sargent's Station, five miles from Gilroy. Mr. Pyle of the Committee on Field Trials requested fnrther time to report, as the secretary had been in communication with the Eastern Field Trial and National American Field Trial Clnbs, respecting rules for governing field trials and had not received their replies.

It is the intention of the Gilroy Club and people of Gilroy to extend all the courtesies and hospitalities in their power to entertain their sporting friends and visitora from San Francisco and all parts of the State. They hope also to show them that the members of the Gilroy Club are not parlor sportsmen, and while they do not succumb to any clnb in their desire to carry out the true objects of a sportsmen's association—the legitimate protection of game and fish—they can, when necessary, handle a gun with any of the best shots in the State.

The Lincoln Gun Club held its first shoot at Colma Station on the line of the Southern Pacific on Sunday. Three clnb medals were provided which will be awarded to those making the best average scores. The shooting waa hardly up to the standard.

The Cosmopolitans' Shoot.

Last Sunday the ahove named clnb held their second shoot of this season at San Bruno. The attendance was principally membera, which with a few spectators numbered about seventy-five pereone. The shooting under the California State Sportsman's rules, twenty-one yards rise, five plnnge traps and the use of only one barrel. The day was as lovely for the sport as could he wished, with just enough wind to clear away the smoke and not enough to he objectionahle. Twelve pigeons each were shot at for the four clnb medals and a sweepstakes purse that was made up hy the twenty-two men who entered. Mr. Tallant stepped to the stake first and scored a miss on an easy right-qnartering bird and followed np a string of "duck eggs" till he reached his fifth hird, when he withdrew. He did not do as good shooting as he does sometimes. Mr. Funcke coming next promised to make a clean score, hut on his eighth round a low, swift flying terra cotta colored bird, so to speak, was thrown from the trap, and Mr. Funcke fell from grace hut killed all the rest of his birds and secured the second prize medal and second money. Mr. Putzman scored ten birds in good style, his seventh bird dying just outside of bounds. Mr. Lachman's first bird fell only six inches outside of the eighty-yard flags and he lost his mnth by retrieving the wrong hird on the three minute time limit; otherwise, his score stands among the best made. Mr. Johnson, who is more than an average shot, missed his first and lost his third by the latter dying out of bounds; but he stopped all his remaining hirds very cleverly. The champion of the clnh, Frank Maskey, dropped all his twelve birds, giving him a clean score, the first prize and first money. The bets on Maskey's shots were $5 to $1, and on the rest of the good shots ran about $2 and $3 to $1. At 12 o'clock, and the eighth round, the shooting stopped while the shooters were making clean, or rather greasy scores on Mr. Cunningham's roast heef and ham sandwiches. After lunch four straight misses were made at the traps as the following scores show:

Tallant	0	0	0	0	0	w									— 0
Funcke	1	1	1	1	1	1	0	1	1	1	1—11				
Edwards	1	0	C*	1	1	1	1	1	1	1	0	1— 9			
Rix	1	1	1	1	0	1	0	0	1	1	1	1— 9			
Golcher	1	1	0*	0	1	0	1	0	1	0	0	0— 5			
Putzman	1	1	1	1	1	1	0*	0	1	1	1	1—10			
Buckely	0*	1	1	0	1	1	1	0	1	0	1	1— 8			
Ferguson	1	1	0	1	1	1	0	1	0	0	1	1— 8			
Brown	1	1	1	0	0	1	1	1	1	0	1	0— 8			
Young	1	1	1	0	0	1	1	0	1	1	1	1— 9			
Lachman	0*	1	1	1	1	1	1	1	0	1	1	1—10			
Maskey	1	1	1	1	1	1	1	1	1	1	1	1—12			
Johnson	0	1	0*	1	1	1	1	1	1	1	1	1—10			
Pierce	1	0	1	0	1	1	1	1	1	0	1	1— 9			
Card	0	1	0	1	1	1	1	0	1	1	1	1— 9			
Graham	1	1	1	1	0	1	1	1	1	0	1	0— 9			
Rover	0	1	1	1	1	1	1	1	0	1	1	0— 9			
Cain	0	1	0	0	1	0	0	0	w				— 2		
Shorten	1	0	1	0	0	1	0	0	0	0	0	1	1— 5		
Browell	0	1	1	1	0	1	1	1	0	0	0	0— 5			
Liddle	1	1	0	1	1	0	1	0	1	0	1	0— 7			
O'Brien	0	0	1	0	1	0	1	0	1	0	1	0— 5			

(* Died out of hounds.)

As seen, three came in for a chance for the third and fourth prizes on scores of ten hirds each. The ties were shot off at three pairs of birds each, eighteen yards rise, resulting in Lachman winning the third and Johnson the fourth medals. The score at double hirds stands:

Putzman	0	0	0	1	0	0—1									
Lachman	1	1	0	1	1	1—5									
Johnson	0	0	1	1	w	—2									

The result of the shoot gives Frank Maskey the first prize medal and first money of the sweepstake, $8; score, twelve birds. C. P. Funcke, second medal and second money, $6; score, eleven birds. Mr. Lachman third medal and third money, $4; score, ten birds; and Fred Johnson fourth medal; score, ten hirds. These medals were won at the previous shoot by the same men. Messrs. W. L. Ayre and T. A. Pearson were the judges and Dr. Knowls the referee; Mr. Price officiated as trapper; all of these positions the gentlemen filled to the satisfaction of those interested. After the match one or two unimportant little sweepstakes matches were shot, hut neither money nor scores were very large. Only oue thing occurred to mar the pleasure of the day, and that can be remedied in future, if this, and all other clubs, would strictly prohibit the promiscnous shooting of hirds aronnd the grounds. One of these shots might cause an endless amonnt of trouble.

A Good Hunting Trip.

A good etory of a hunt, by two of our local huntsmen, has just come to light. In fact it was too good to keep, although the principals intended at first to keep it dark. Two weeks ago Mr. Ed Ladd and M. L. Hall started out bright and early Sunday morning in a wagon with the intention of bringing home a wagon load of the frisky rabbit and toothsome sqnirrel. So implicitly did they rely on their prowess as marksmen that they ignored the shotgun bnt with a couple of sporting rifles, high hopes and a pack of six dogs they went forth to the fields of slaughter and conquest.

After roaming around for a time they finally saw a small, insignificant cotton-tail rabhit sitting near the edge of a patch of sagebrush. Instantly both rifles belched forth their leaden messages of death; the rabhit looked anrprised, but sat atill and made no comment. Again the two riflemeu fired and the rabhit only jumped upon a pile of earth to get a better view of the situation. After shot at no less than ten times and not being hit, Mr. Cottontail hopped into his burrow to take a nap. About this time the dogs began to get wiud of the fun and started after the rabhit, which was now calmly sleeping, so hunters and dogs went to work to dig the innoceut animal out. After an hour'a hard work, the dogs got the poor rabbit by that portion of his anatomy that weut iuto the ground last, and ont the rabbit came. That evening two weary hunters, six tired dogs and a horse, more tired than all the rest, came into towu. The hunters exhibited as the fruits of their day's work, one poor little rabbit whose hams were sadly mutilated—aud nothing more.

A Good String of Shots.

The followiug is a score made by Ed Hovey last Saturday at Shell Mound Park. The shooting was done with a Winchester rifle, with open aights, and aix-pound pull of trigger, on the 200-yard target. Tho score ahows 90 per cent, or at the rate of 452 points to 100 shots, which is above the average shootiug. The shooting was done offhand and stands:

5	5	4	4	5	4	5	5	4	5	46
5	4	5	5	5	4	5	4	5	5	47
5	4	4	4	4	4	4	4	5	5	43
5	5	4	5	4	5	5	3	5	4	45
5	4	4	4	5	5	4	5	4	5	45
										226

To-morrow the California Club will hold their second regular shoot at San Bruno. After the cluh shoot a match arranged between Mr. T. A. Pearson and Mr. Swan, the painter, for $2 50 a side, fifty pigeons, Hurlingham rules, will he shot off. As both of these gentlemen are good shots, eportsmen are somewhat in doubt as to which is the most advisable side on which to stake their money.

A fifty-hird match is arranged between Mr. A. E. Burbank and Mr. James. This match is for money and sport combined, and will take place in the near future.

THE RIFLE.

Oakland Riflemen.

Last Sunday at Shell Mound Park the followiug scores were made at 200 yards by members of Company A, Oakland Guard:

Lieut. J. S. Green	4 5 4 4 5 5 5 4 5 4—45 4 5 4 5 4 4 4 4 4 4—42 5 4 4 4 4 4 4 5 4 4—42 5 4 4 5 5 4 3 3 4 5—42 3 4 4 4 4 5 5 5 4 4—42	213
Corp. S. Crawford	5 4 5 4 5 5 5 4 4 4—45 4 3 5 5 4 4 4 5 5 4—43 4 4 5 4 4 5 4 4 3 4—41 4 4 5 5 4 5 4 5 5 4—44 4 4 5 4 4 4 4 4 4 4—41	214
Priv. Chas. Waltham	4 5 5 4 5 4 5 5 4 5—46 4 4 4 4 4 5 4 4 4 4—41 4 4 4 4 4 4 4 5 4 4—41 4 4 4 4 4 4 5 5 4 5—43 5 3 4 4 4 4 4 4 4 5—41	212

On Sunday, April 22, a match will be shot at Newark by teams of six men each, hetween Company A of Oakland aud Company B of San Jose.

Carver and Bogardus.

Dr. Carver and Capt. Bogardus have been traveling over the country shooting matches at clay pigeons, under contract to the Clay Pigeon Company, the central idea of the tour being to advertise these substitutes for live birds. Capt. Bogardus admits now that Dr. Carver is the hetter shot, heing quicker with the first barrel and fully equal to the Captain with the second. The following are the scoree of the shoots thus far held:

	Bogardus.	Carver.		Bogardus.	Carver.
Chicago	63	72	Peoria	92	98
St. Louis	69	85	Terre Hante	95	99
Cincinnati	79	85	Indianapolis	97	98
Kansas City	75	89	Dayton	94	94
St. Joseph	52	91	Columbus	93	75
Omaha	90	94	Pittsburg	95	94
Council Bluffs	96	96	Philadelphia	95	96
Des Moines	97	100	Jersey City	91	98
Davenport	89	95			
Burlington	99	99	Totals	1,663	1,759
Quincy	92	100			

To-morrow the San Francisco Fusileers, Company C, Second Regiment, N. G. C., will hold their twelfth annnal picnic and shooting tournament at Shell Mound Park. Aside from the company shooting there will he a public target and eight cash prizes offered. These prizes run from $1 to $20 and all riflemen are invited. As this is a military affair ouly the U. S. Springfield with open sights and six pound pull of trigger will he allowed. A pleasant time is anticipated.

J. E. Klein, of the firm of Klein & Carr, is organiziug a Citizen's Pistol Team to compete for the pistol trophy now held by one of the pistol teams of Capt. Douglas' division. The police have already won this trophy twice and on the third time it is won hy one team it hecomes the permanent property of the winners.

The Rifle Team of Company O, First Regiment, was over last Sunday at Shell Mouud and made very good practice scores. This team will enter for some of the prizes offered by the California Rifle Association. To-morrow they will have their last practice, as the spring meetiug is close at hand.

A USEFUL ARTICLE.—Rawson's U. S. Army Suspensory Bandage is, as the cut connected with the advertisement elsewhere clearly shows, a complete relief and support, and should be in general use. It is self-adjusting, and displacement ie impossihle. It counteracts nervous teusion and other ills that mankind is heir to. Sold by all druggists. Can he sent hy mail safely. Addreas S. E. G. Rawsou, patentee, Saratoga Springs, N. Y.

A friendly match between two roadsters trotting under saddle, dash of a mile, will be decided at the Bay District track to-morrow morning. The match has heeu brought about hy a difference of opinion between the patrons of the Fashion and St. George stahlea aa to which establishment has the faatest roadster. Taylor will represent the Fashion and Commodore will appear for the St. George. A stake of $250 a aide has been put up. No pools will be sold, but a large amount of money will be betted at private hands, and a goodly company of gentleman road riders will be present to witness the settlement of the controversy.

It is wonderful how eaay it is to gentle and accustom a weanling to harness as compared with the work if delayed until older. A small haruess made to fit them, a little skeleton cart with straight-out shafts, and a level path, complete the necessities. A few daya in the stable with bit and harness, then a few days of education out of doors without the cart, aud then ten or a dozeu times hitched up with from half a mile to two miles of gentle drive, gives the heat fouudation possible for a safe and well-broken horse.

The Sonoma Agricultural Park Association Directors met Saturday, and elected as officers for the year: Wyman Murphy, Presidcut; Isaac De Turk, Vice-Presidcut; James O'Meara, Secretary, and George P. Noonan Treasurer. Important chauges will be made in tho organization and its management of the yearly mcetings at the Park grounds.

A circular has beon iaened by M. F. Tarpey of Alameda, calling the attention of wool growers to the necessity of organization for the protection of tbe wool interests. A call ia made for a conveution of tho wool growers in California, to be held in Sacramento during the fair week in Septembo next.

Charles Weightman, better known as Natator, the man [illegible] has been eugaged for the ceasou hy J. P. Wonderlich [illegible] meda, as an expert teacher and exhibition awimmer.

JOSEPH CAIRN SIMPSON, - - - EDITOR

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 29 Warren street is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, Saturday, April 21, 1883.

TROTTING AT MELBOURNE.

The great trot for a purse of $2,500 came off at Melbourne, Australia, and resulted in a victory for Honesty. The steamer sailed so soon after the race that the intelligence is very meager, and excepting a telegram in Sydney *Mail*, there is nothing in the papers regarding it. A letter from the driver of Honesty is also very brief, the second heat being the only one he describes. The first was won in 2:30¼, and in the second he writes: "Honesty made a break at the three-quarter pole and it looked very much at if Len Rose would win the heat, but I measured my distance and made up my mind that if Honesty did not make another break I could beat him, so I made a drive for the heat and won by a head." He gives the time 2:33 and of the third 2:32½, differing from the paper, which has it 2:30, 2:33¼, 2:33½. There were four starters, Honesty, Ajax, Len Rose and Contractor, the latter distanced in the first heat. As all three of the placed horses were bred in California there must follow a better appreciation of our stock than there was som years ago. The writer appears to have some doubts about selling Honesty for a price that will induce parting with him, and as Startle was sold at auction for £195 it seems dubious. There is little question that trotting snorts received a backset from the actions of some who accompanied the horses, and until that baneful influence is overcome there is small chance for improvement. Granger, a big, fine-looking horse by imported Hercules, that was taken out in company with Startle, sold for £200. There were three handicap races on the same day, which shows that there was not trotters enough to fill the bill. The track was very soft in places and this militated against fast time. The attendance was good.

From a passenger on the steamer we learn that Honesty was sold tho evening before she sailed, and as he was entrusted with a bill of exchange of £1,000 to give tho owner, the presumption is that a fair price was realized. With care in the future there is not a particle of doubt that trotting in Australia will be supported, and that there will be a demand for the trotting horses of this State.

YEARLING SALES IN KENTUCKY.

The advertisements of the Elmendorf and Runnymede sales appear in this number, but up to date the catalogues have not come to hand. It is probable that we will receive them in time for purchasers to make selections, and commissions entrusted to either Colonel S. D. Bruce or General A. Buford will insure the same attention as though the buyers were present. Both of these gentlemen are eminently qualified to carry out the wishes of those who entrust them with their business, and instructions will be followed to the letter, while the commissions are moderate. Geo. W. Bowen's Runnymede sale takes place on the 18th of May, D. Swigert's at Elmendorf the 19th of that month, so that there are three weeks before it is absolutely necessary to mail letters from here. The stock at both places is of the highest breeding.

"KEEP COOL."

Such is the advice of the *Turf, Field and Farm* in an editorial in that paper of the 7th inst., and without doubt the writer was hugely in earnest when he penned the article. As he acknowledges, we are not posseseed of a very hasty temper, but there are occasions when "forbearance ceases to be a virtue," and when there is a persistent determination to "misrepresent," a man must have a good deal of putty as well as "placidity" in his composition to answer in milk and water terms. Following the plan which has been observed all through this controversy, we append the last article, and all we ask in return is that the *Turf, Field and Farm* make an acknowledgement that the charge that "Mr. Simpson now quotes us as having said that tips broke her down," was a misconception and that such a statement he never made. If on the presentation of the evidence this reasonable request is not complied with, we will be forced to the conclusion that there is a settled purpose to "misrepresent." The article which called out this last manifesto was published in the *Breeder and Sportsman* of March 24, and in place of the words quoted and emphasized by being printed in italics, were the following: "It completely upsets the first position taken by the *Turf, Field and Farm* that the wearing of tips on Algath should have broken her down." It will readily be seen that this is widely different from the language given, and we cannot "characterize our own statement" as being unwarranted and feel certain that our readers will indorse us in holding fast to its correctness, albeit there is a slight change of phraseology. In the *Turf, Field and Farm* of December 15, 1882, there was an interesting description of a visit to Kentucky, and among other notable equines "interviewed" was the great three-year-old filly Algath, and in which are these sentences:

> She wore tips on her forefeet in all her races, *and it is a wonder they did not break her down*, because they are the worst thing that a trotter, young or old, can wear, especially on a hard track. Mr. Davie thinks that she could have trotted in 2:20 at Chicago, the day she made her record of 2:25½, had weather and track been good. On her return to Glenview she was timed a half mile in 1:08.

In order that our contemporary may have the testimony before it a copy of the paper of the date is sent, and with a feeling of implicit confidence that the charge will be withdrawn, and the wrong impression removed. That the phrase "should have broken her down" was justified by that "it is a wonder they did not break her down," none will dispute, and so we "hand fast" to it.

Now to the question of "filling page after page" with with dissertations about tips and their effect on the feet and legs, and also on the fast trotting action, we deem the subject eminently worthy of all the space that can be allotted. There is a unanimity of opinion among men who have made a study of horses and their management, that the feet and legs are the most difficult part of the animal economy to keep in proper condition, and any scheme that can be devised to render this easier will be welcomed. If tips can be shown to be injurious, prove it. Not by quoting from obscure or obsolete authors, not by the opinions of those who have never given them a trial, but rather by advancing arguments sustained by physiology of the parts, or the results of experiments conducted in a proper manner and after the lapse of sufficient time to make the test a fair one.

We occupied page after page of the *Turf, Field and Farm* with essays on the breeding, rearing and training of trotters at a time when we were not connected with that journal, and they were acceptable. The articles were written after a good deal of study and practice, and though in many respects we have changed the views held at the period when they were written, there was merit enough to sustain several editions after portions of them were published in book form. Were these essays in complete accordance with the advance of the science at the present day, we would still consider the object of tips and cognate matters of far more importance. By cognate matters we mean the best method of keeping the feet and legs of horses in the best condition possible with the requirements of the uses to which they are put.

If this is to be accomplished by wearing shoes of any particular pattern, by cutting the horn, sole, frog and bars away, by artificial mechanical contrivances to "spread the foot," by soakings, poultices and ointments, by giving other than a natural bearing from the shoe projecting at the heel, in all reason let us have it. It does not meet the wants of this age of *thinking* to write about what has been done by "balancing" without giving information wherein the balancing consists. It is true that there was one much-vaunted teacher, who enjoined secrecy on his pupils, though that system has been exploded for years. It may be that others follow the plan of holding their knowledge too valuable for the common mind, and after the method of the ancient philosophers, only impart it to a few favored pupils. This may be the case of the editor of the *Turf, Field and Farm*, and esoteric insight guide him in his denunciations, while he is bound to advance other arguments to sustain his position, no matter how frivolous. When offered a free ticket to a course of lectures which others had to pay $200 for, one of the conditions being secrecy, we thanked the man who so kindly proffered the present, but declined it on the ground that we did not desire to know anything regarding horses which we were not free to write and talk about. This leaves an untrammeled pen, and we are happy to say that as long as we can handle it, any question bearing on the welfare of the horse will be duly considered if it takes hundreds of pages to present it in a light to be properly understood.

A manager of a paper determines what will be the most acceptable to his readers, and we have not the least desire to offer counsel directly, or by inuendo, of how he shall occupy the space. But so long as we retain control of the *Breeder and Sportsman* anything pertaining to breeding, rearing, training, or the management of horses will receive due attention if even it necessitates the curtailment of the space allotted to "the world of sports:" "One topic" well handled is oftentimes more welcome than a conglomeration of sporting news. That information and sport are properly blended we leave to the readers of this paper to determine, and as their verdict so far has been favorable, there are sanguine expectations that it will be so in the future.

In the first article, that which was published in the *Turf, Field and Farm* of December 15, there was nothing said about Algath being a little sore, and the "exact words" are given in the extract. It was afterwards that that claim was made and the "first position" was as stated.

We cannot follow Mr. Simpson's example in filling page after page of our paper with articles on tips. However interesting that subject may be—and it is an interesting subject—the *Turf, Field and Farm* cannot confine itself mainly to one topic. We take a broader view of the world of sports.

Our articles on tips have been indorsed by every trainer, every breeder and every horseman with whom we have conversed. Of course some horses can be worked in tips, just as some horses can be worked barefooted; but to suppose that all horses can be trotted in races, from one end of the country to the other, in tips, is absurd, and every trainer that we have talked with so considers it. We may say of horses' trotting in tips as Dr. Johnson said of women preaching: "Sir, a woman preaching is like a dog walking on his hind legs. It is not done well, but you are surprised to find it done at all."

The jocose reference which we made to our old friend's nationality he seems to have taken in earnest, and talks fluently and with an air of injured innocence, about "misstatements," "misrepresentations," "garbling," etc.—all of which we were unconscious of. We did not intend so to disturb his equanimity; nor can we now follow him in that style of writing, although we do not lack material for doing so. For instance, in one of our articles we stated that the driver of Algath admitted to us that the tips made her a little sore. These were our exact words. Mr. Simpson now quotes us as having said that tips broke her down. As the mare never was broken down, nor anything approaching it, and we never said so, we should like to know how Mr. Simpson, when he regains his usual placid temper, will characterize his own statement. Surely, he would not "hand fast" to it!

QUEER CONCLUSIONS.

The Eastern papers commenting on Major Rathbone's connection with Palo Alto have come to some singular conclusions.

The latest is that as the gentleman had been wealthy and occupied a prominent position in the world social he must have met with reverses.

We are pleased to state that in all respects Major Rathbone stands as well as he ever did and that there is not a shadow of truth in the speculations of the writers. Having a great fondness for horses, at the request of Governor Stanford, he accepted the trust of looking after the horse interests during his absence, and his "commission," which we have seen, was an order to the employes there to follow his directions the same as if given by the owner.

Major Rathbone, so far as the horse management goes, takes the place of Governor Stanford while he remains in the East. But if he was duly installed as superintendent we cannot see why the duties should be incompatible with wealth and position. Were the choice offered we would rather be at the head of such an establishment than president of a railway, if even we were thoroughly competent to manage the affairs of the corporation, and should far prefer the position to that of Governor of California, or Mayor of New York. Fortunately people have different tastes, so that the various places in the world are better filled than if there was a general scramble for what are considered high places. Not long ago a writer in a prominent daily paper gave President Arthur's son the pride of place over all the youth of the country, his main reason being that he could dance with a princess. We recognize the value of pedigree in the human race as well as in racehorses, trotters and others which are dignified with the right to a genealogical tree, but a pedigree clear and undisputed to the "royal mares" is of little value unless there is personal merit behind it.

PROGRAMME SALT LAKE JOCKEY CLUB.

There will be plenty of time to reach Salt Lake after the close of the races of the Capital Turf Club, and those which have engagements at Chicago will have abundant space between June 2 and 23 to reach their destination. It is a very convenient stopping place, and in our estimation better for the horses than if they were carried through with delays at Ogden and Omaha which could only be utilized as rests. The programme will be found in the advertising columns, and it is certainly very favorable taken together, though there are minor features that we do not understand.

For instance, No. 11, Railroad Handicap, gives the owners the privilege of naming the weights they will run under without other conditions than are found in regular purses. It certainly does away with one of the most disagreeable things in connection with handicaps, viz.: the faultfinding with the imposts and the railings at the handicapper. But an owner of the best horse, and who had control of a light rider, could settle the race before the start, unless some accident occurred.

There is a clause in the conditions which is rather ambiguous. It reads: "Walk-over by any one horse entitles him to half the stake money, and all of the forfeited money, and all plate or cup added." This cannot be construed to mean that if stakes are put up, and for some cause the horses should not start, that money would be divided between the club and the horse starting, as that is "forfeited" as much as if the declaration was made in time to get off for the lesser amount.

There are nineteen races set for the five days, thirteen running and six trotting. The running is well arranged for different ages, and at various distances, and the classification for trotting ranges from 2:30 to free-for-all.

The trotters that intend going East for the Chicago trotting meeting can take a part as well as the racehorses and with the same advantages. Those which have already commenced the journey have engagements that will preclude them from participating, but others might make the trip and return before the opening of the California circuit. The purses for the 2:30 and free-for-all classes are liberal enough to induce owners to send their horses, especially if there is a good show to win, as the Salt Lake folks have confidence enough in their home horses to give them liberal support. Probably an arrangement can be made whereby the trotters can accompany the racehorses that far with a good deal of reduction in the expense. Should there be a carload of racehorses destined for the East, another might be made up of those which are to take part only at this meeting and return home after it is finished.

The trip can scarcely fail to be pleasant, as we hear the most flattering accounts of the hospitality and fair-dealing of the citizens of Salt Lake who are connected with the management of the club affairs, and the officers are so well and favorably known in California that testimonials are not necessary.

The advertisement gives all the information that is necessary, only do not forget that the entries close on Saturday, May 5.

QUEER BETTING.

Betting in St. Louis on the Kentucky Derby is five to one on Drake Carter, six to one on Leonatus; and for the Lonisville Cup, two to one on Thora, three to one on Boatman and four to one on Checkmate.

The above is cut from a daily paper, and if it is correctly given the bookmakers will have a grand thing of it, and the backers of horses suffer a terrible downfall. For instance, should the bookmaker resolve on a $1,000 book, he need not try to get further around than to lay against the two favorites. Should Drake Carter win he will have $6,000 to pay a loss of $1,000, and if Leonatus is the favored one, there will be $5,000 to liquidate his $1,000 lost. If any other should carry off the "blue ribbon" $11,000 are his profits. The cup is not quite so favorable and yet to lay against the trio of favorites at the rates given he must stand $4,000 to the good. The probable explanation is that "against" was meant in place of "on." At least that would be more in accordance with the latest advices.

THE CAPITAL TURF CLUB.

As will be learned from the advertisement some of the purses of the Capital Turf Club did not fill and others are substituted, the entries to which will close on the 7th of May. The substitutes are in place of No. 3, heats of a mile, for all ages, purse $150, entrance free, and in lieu of No. 9, heats of three-quarters of a mile, purse $200, $25 to second horse, in which the entrance is also free. As will be seen from the entries published elsewhere, the other purses filled well enough to insure a fine meeting, and with its usual liberality the club has taken measures to supply the lack. Owners should certainly do their part in aiding the club, as it is of vast importance to them that the efforts to keep up a spring meeting in Sacramento should be sustained.

THE RACES TO-DAY.

We have been delayed writing about the opening day of the Pacific Coast Blood Horse Association until the last minute in hopes to come to some definite conclusion about the weather. The paper goes to press Friday at 1 p. m., and now at 11 a. m. the prospects are favorable for the best kind of a day for the races. The northwest wind and the sun will dry the track rapidly, and though it may be a trifle heavy, it will be safe and "fast" enough to show good time. The horses are all at the course and those we have seen are looking admirably well. The races this afternoon cannot fail to give satisfaction, and those who consult the advertisement will learn that never before has there been such a lot of two-year-olds brought together on the California turf as are engaged in the California Stakes. It is sure to be one of the most exciting events of the season and those who do not witness the contest will miss one of the greatest races ever seen in this country. Then in the Hearst Stake such cracks come together as Joe Howell, Premium, Jim Douglas, Atalanta, Grismer and others. In the Winters Stake, Gano, the crack three-year-old of the year, will put in an appearance with those that will make him gallop. The hurdle race finishes the sports of the afternoon and the bill is so complete that the most exacting will have little chance to find fault.

The trip to the Oakland Trotting Park is short and pleasant. Those who like to "look around" before the races commence can take the noon boat from the foot of Market street; those who desire to economize time, the 1 p. m. The association is noted for punctuality and promptness with which the races are dispatched so that there will be no danger of getting home too late for dinner. From the present indications there will be a very large assemblage and this the racing prospects ensure.

ENTRIES GENTLEMEN'S DRIVING PARK.

From the following it will be seen that the purses offered by the Gentlemen's Driving Park Association, Morrisania, New York, have met with liberal support. California is represented in three of them, 2:19, 2:21, and free-for-all. In the first Romero meets a strong field, and, should he be so fortunate as to win his position, will be established as one of the most promising young horses of the day. In the 2:21, Overman and Director have a better show, and in the free-for-all the interest will be centered in seeing how fast the competitors of St. Julien can make him trot. Fannie Witherspoon is considered to be one of the foremost trotters of the day, and far more dangerous than her record (2:18¾) shows. It is somewhat singular that Goldsmith should have preferred putting Romero in the 2:19 to the 2:20:

Class 2:19—Dan Smith, Lady Pritchard, Rosa Wilkes, Adele Gould, Josephus, Captain Emmons, Minnie R, Romero and John S. Clarke.

Class 2:20—Lem, Douglass, Big Fellow, Montreal Girl, Frank, Stephen G, Stonewall, Valley Boy, Toronto Chief, Billy Button, Don, Golden Girl and Bronze.

Class 2:21—Helene, Dan Smith, Overman, J. P. Morris, Naiad Queen, Brandy Boy, Gladiator, Buzz Medium, Joe Bunker and Director.

Class 2:30—Nellie Bryant, Ripton, Rutland, Amelia C, Lizzie Almont, Breeze Medium, Lady Tucker, Billy Bad Eye, Sir Harry Pelham, Ray Gould, Fannie Irwin, Howard Jay, Fidies, Polly B, Madeline, Sleepy Jack, Dixie Sprague, Roddy Boy and Wilkes.

Three-Minute Class—Frank G, Christine, Edith C, Majolica, Sir Harry, Don Carlos, H. B. Winship, Pearl, Daisy, Stride Away, Slim Jim, Daisy Eye Bright, Bay Tom, Quilberta, Judge Davis, Fenner, Katie G, Bess H, Robin Ruff, Belle Medium, Ward Medium, Billy G, Pilgrim, Phallas and Captain Raoul.

Free-for-All Class—St. Julien, Hopeful and Fannie Witherspoon.

Five-Year-Old Class—Phil Thompson, Lucy Genert, Butterfly, Bronze and Jay Eye See.

Answers to Correspondents.

Dave, Sacramento:

Jim Donglas, br h, foaled 1878, by Wildidle. First dam (sister to Tom Atchison) by Norfolk; second dam May G, by Ashland; third dam Lola Montez, by Grey Eagle (see Bruce's American Stud Book, Vol. 1, page 666).

Jim Donglas' wins are as follows: At San Jose, October 5, 1881, won a sweepstakes for two-year-olds, three-quarters of a mile, beatimg Fred Collier, Sophie B, Belshaw, colt by Shannon, and Jack Mannix. Time, 1:17¾. At San Jose, September 26, 1882, won a sweepstakes for all ages, one mile, beating May D, Nighthawk and Bob. Time, 1:43½. At Bay District Course, San Francisco, November 11, 1882, won a purse for all ages, three-quarters of a mile, beating Premium, May D, Garfield, Forest King and Jim Renwick. Time, 1:15. At same conrse, November 23, 1882, won Flash Stakes for all ages, one-half mile, beating Jim Renwick, Garfield, Premium and Lou Spencer. Time, 0:50½. His eastern engagements as far as we kuow are at Chicago in the Board of Trade Handicap, one mile and a half, to be run Saturday, Jnne 23, and the Summer Handicap, one mile and an eighth, to be run Friday, June 29. He may bave others of which we are not advised. Yon can obtain particulars by applying to George Howson, at the racetrack, Sacramento, or to George Densdale, Woodland.

M. Bros, Kohala, Hawaii:

The jockey you inquire about has not been expelled in California but is now in good standing.

Will you inform me, through your paper, whether horses entered in the three-minute class at Sacramento (in which the first entry closes on May 15) can start in the race if, at any time after May 15, they gain a record below three minutes? Respectfully yonrs, C. F. Taylor.

Marysville, Cal., April 18, 1883.

Yes, eligibility in this case dates from the day of entry.

A. Z., Healdsbnrg:

James Lick, gr h, foaled 1870, bred by Charles Branson, Mount Holly, New Jersey, by Homer. Dam the Springer mare, by Harker's Buster, son of imported Buster. Dam of Harker's Buster was by Black Messenger, son of imported Messenger.

Homer, by Rysdyk's Hambletonian, dam by Rattler, grandam by imported Consternation. Rattler by Abdallah—by Messenger Duroc. Consternation by Confederate—Curiosity, by Figaro.

The above is the pedigree as given by Wm. Hendrickson, who brought James Lick to California. He never got a trotter that we know of.

FISH.

Trouting.

Some of the most enthnsiastic anglers of this city have laid aside their rods and lines, and declare that they will not be used again this year. Persons who have been both to the north and south say that the streams are still too mnddy and high from the effects of the last rains, and where the holes and pools do show any signs of clearness there are plenty of lines dropped in by those who live in the vicinity of the creeks, and so the poor city chap has no chance either to fill his basket or tell a passable story. It is some satisfaction for us to mention a few of those who have met with any sncess. Mr. J. H. W. Riley and Jos. E. Shane last Thnrsday were at the Lagunitas, and caught 140 and 130 trout respectively. There were at the same time fifteen other anglers on the creek, bnt their luck did not compare with that of Messrs. Riley and Shane. The fish were not very large, though some weighed a ponud. A gentleman from this city at this creek caught fifty-five fair sized trout last Saturday. Two gentlemen on the Paper Mill creek, on the same day, hooked 155 good trout. Several parties have of late fished in the Lagunitas reservoir, and of conrse done well, but as fishing in these waters is only allowed on week days, the Sunday anglers are deprived of any sport in this quarter.

Next week the Shane brothers intend to take a fishing trip to the south. They will probably go down to some of the streams near the old Carmel Mission where they will remain for several days. Several parties of anglers will fish in the streams in the Santa Cruz monntains next week. Most of these parties will be gone several days and they will take their camping ontfits with them. Monntain trout are said to be large and plentifnl in these streams.

From the Briny Deep.

As predicted in onr last issne, the fishing in and aronnd the bay has been exceptionally good this week, and those who have been ont have met with more than averge luck. The fish in gensrl are about a month behind the run of last year. Perch are being canght from the bridge near Saucelito. A great many flounders are being taken from the same place, and they are of large size, many weighing four ponnds. On the ocean shore perch, sea tront, cabersones and black rock-cod are plentifnl. Last Snnday a gentleman from this city, Maxwell by name, caught over ten pounds of these fish, beside a neat string of seven eels. A few days ago smelt began to run along the Saucelito shore, when they stopped very snddenly, and there have been but few taken siuce. The smelt were of good size, and the Italian fishermen expect the run to begin again. Large smelt were also taken from the Oakland wharf. Several parties fishing at Long bridge say that qnite a nnmber of perch were taken together with flonnders that ran from two to five ponnds. Last Snuday Dr. Bogert, near Sancelito, canght over ten ponnds of fine fish. Frank Denning also took over ten pounds of black rock-cod, cabersones and sea tront, while Frank Atwood caught a fifteen-pound basketful of black rock-cod principally. The fishing for the next week or ten days will not be very good, owing to the nnfavorable condition of the tides.

Rock eel fishing receives considerable attention of late. They are principally found in the vicinity of Lime Point, Angel Island and abont Saucelito. Horshoe Cove is freqnently the scene of activity consequent npon the presence of a nnmber of anglers who have been iudnced to turu their attention to this sport because of their failure to find choice trout streams. An excellent story is told at the expense of a prominent merchant in this city, who for the past two months has been a regular visitor to the Saucelito shore, where he claims to have enconntered a monster rock eel. All endeavors to land the fish have been ineffectual and in the attempts some twenty large-sized hooks have been lost, not to mention broken rods, lost sinkers aud parted lines. He had the good fortune to raise the enormous eel up to the surface of the water ou one occasion and was satisfied from a glauce that he had fonnd an able adversary to deal with. He represented the head as being fully five inches in diameter. With a view of finally landing his celship, the gentleman has taken the precantion to have a hard laid cottou line, extra heavy size and commonly used for cod fishing, in addition to strong steel hooks and a short, thick bamboo rod. He is determiued on feasting ugon the mighty eel.

Holmes of Pawtucket, the champion amateur sculler, has retired. Holmes has been a remarkably fast sculler. Of thirty-one races in which he participated he won twenty. He began rowiug nine years ago aud was defeated. His most creditable victory was ou the Seekonk river near Providence, Juue 17, 1880, when in a three-mile turning race he defeated George Gaisel of New York, W. Murray of Portsmouth, Ed Hayden of Boston, J. Buckley of Portland, J. Laing of Montreal and T. C. Murphy of Boston. He rowed the distauce in very rough water in 22:44. The prize was a vase given by the Hop Bitters Co. and cost $600. In Augnst of the same year he rowed with Woodbury as mate three miles in 20:8 the fastest amateur double scull time on record. At Rockaway, Long Island, October 4, Gaisel beat him in a single-scull race. On the 4th of July, 1881, he won the two-mile single-scull race at Lowell in 14:18. In September, 1881, he won the National Association prize for one aud one-half miles straightaway in 9:0½. At Saratoga Lake, August 23, 1882, he won the single-scull race open to all amateurs, [illegible] three miles with a turn, defeating Kirby, Dempsey, [illegible] ton and others in 21:16, the fastest on record for au [illegible]. Some of his numerous tropoies are very valnable.

Grilse not Young Salmon.

Mr. John Anderson, a prominent fish culturist of Scotland, in a letter to Seth Greene says:

On reading your able reports I see many things to admire, and really you have done wonders. But two things I see omitted from your reports, viz., the regularity and stages that the salmon enter our rivers during the season. From experience and observation, I find there are five distinct runs of salmon from the sea to the rivers annually—two of grilse and four of trout.

The winter, spring, summer and autumn, and last, though not least, the greyschule run of salmon. Then the early and late grilse. Then the winter, spring, summer and autumn trout. All are different in size and appearance, and if you liked to have the particulars I could with pleasure send them to you.

Have you in your great experience studied the salmon question in all its parts? I hold a very particular view from many of my fellow countrymen here.

It has always been said and considered that the grisle is the young of the salmon; but in my investigation I have proved them not to be. They are, no doubt, nearly allied, but different. Perhaps this to you may seem something new; but a few in this country are beginning to change their views, from what they have seen and heard. Indeed these fish so nearly resemble one another that the assertion takes one by surprise. But if you have not already, look carefully into it and you will find a few distinctive marks between these fish, to prove what I allege.

All salmon, as a rule, obtained in our rivers from one and one-half pounds weight up to seventy-six pounds, have the distinctive mark; viz., an oval scale and a crescent tail. The grilse from one pound up to twenty-four pounds, as I have seen them weigh, have a diamond scale and a mackerel tail. In some of our rivers forty years ago it was no uncommon thing to see, in a morning's fishing, among 300 to 400 grilse, thirty to forty fish, all about fifteen pounds and sixteen pounds weight. But from a cause I cannot explain, for the last thirty years few have been seen above twelve pounds during the first season, although you can detect them the second year with the same distinctive marks, weighing twenty to twenty-four pounds, although the latter are called by the fisherman, salmon, in order to obtain a few pence more per pound.

Perhaps you may have observed and wondered why part of the so-called salmon fry seek the sea, while others choose to remain in the ponds. This I have found to be the fact, through those sent to captnre salmon for spawing purposes. This is invariably done in winter and perhaps in cold and frosty weather, when everything is done in a great hurry, and the men do not take time to examine whether the fish canght is a salmon or grilse, and all the ova goes into the hoxes together. Then when ready the salmon fry start on their sea journey much earlier than their neighbors.

An English Favorite.

A commissioner of the London *Sportsman* recently visited Malton, where William I'Anson's Highfield training stahle is located. He thus describes the three-year-old colt Chislehurst, who is the first favorite for the Two Thousand Guineas: He is now the best three-year-old in the establishment, and it is not very long odds against his being the best of his age in training. He is certainly not so big nor so lengthy as The Prince, but he may probably wear longer on his limbs than the latter, alheit no man can say that these superb looking thoroughbreds show the least symptoma of nnsoundness in any part of their frames for the present. The first I saw of Chislehurst this morning was while being led by Beaumaria, the three-year-old brother to Beanclerc, in a sharp canter of three-quarters of a mile. He then had a spell of walking exercise, and I noticed with pleasure that his forelegs were quite free from all the objectionable "rags" in the shape of "cloths" tightly sewed on the forelegs as aupports for frequently what are weak hack ainews. Of conrse he did not wear handages of any kind for positively "soft limha," nor "ankle hoots" to prevent him from hitting one leg with the foot of the other; in fact, there is no weakness of any kiud ou any of the limhs of the son of Beauclerc, and I ahonld certainly think he will, according to all human foresigbt, stand firmly through hia preparation for the Two Thousand Guineas. After cantering once only Beanmaris led him a nice ateady gallop over about one mile and a furlong, and a better mover I would not desire to see tban the now favorite and my selected champion for the great race over the Rowley Mile. After returning from exercise I examined him thoroughly in the stahle, and can aay that he is sufficiently forward in conditiou for the present to be quite ripe on the day of the race. I think Chislehurst aud The Prince will turn out to be the two best horses for the Two Thonaand Guiuens, and while I give the Malton colt the preference for the Newmarket race I tbink the man will he very lucky who owns a horse to heat Blanton's champion for the Derby.

A Cough, Cold or Sore Throat should not be neglected. BROWN'S BRONCHIAL TROCHES are a simple remedy, and will give immediate relief. Price 25 cents.

The Breeder and Sportsman is THE Turf Sporting authority of the Pacific Coast.

Third Day, Tuesday, July 17.

No. 7. Purse $2,500, 2:17 class, with $500 to the winner of the fastest heat if better than 2:14.

No. 8. Purse $2,500, open to all pacers, with $1,000 to the winner of the fastest heat if better than 2:11¼.

Fourth Day, Wednesday, July 18.

No. 9. Purse $2,500, 2:30 class, with $500 to the winner of the fastest heat if better than 2:22.

No. 10. Purse $2,500, 2:21 class, with $500 to the winner of the fastest heat, if better than 2:17½.

No. 11. Purse $2,500, 2:25 class, with $500 to the winner of the fastest heat if better than 2:20.

Fifth Day, Thursday, July 19.

No. 12. Purse $2,500, three-minute class, with $500 to the winner of the fastest heat, if better than 2:27.

Special—Five thousand dollars is set aside for a special purse on this day. Terms and conditions to be announced hereafter.

No. 13. Purse $2,500, 2:20 pacing class, with $500 to the winner of the fastest heat if better than 2:14.

Sixth Day, Friday, July 20.

No. 14. Purse $2,500, 2:35 class, with $500 to the winner of the fastest heat, if better than 2:23.

No. 15. Purse $3,000, open to all five-year-olds and under, with $500 to the winner of the fastest heat if better than 2:18.

No. 16. Stake $1,000, three-year-old class (closed on March 1, 1883, with 25 nominations), with $500 to the winner of the fastest heat if better than 2:21.

Seventh Day, Saturday, July 21.

No. 17. Purse $3,000, open to all horses which have not trotted better than 2:14 previous to January 1, 1883; subscribers to enter their name and post office address; the horse to be named at 8 o'clock p. m. of Saturday, July 14, the first day of the meeting, when the last 5 per cent will be due and payable; with $1,000 to the winner of the fastest heat, if better than 2:10¾; five subscribers to fill.

Special—Five thousand dollars is set aside for a special purse on this day. Terms and conditions to be announced hereafter.

CONDITIONS.

All the above purses (except Nos. 6, 8 and 13 pacing) are for trotting, and are divided, 50 per cent to the first horse, 25 per cent to the second horse, 15 per cent to the third horse and 10 per cent to the fourth horse.

Mile heats, best three in five, in harness, and to the rules of the National Trotting Association, except as hereafter specified.

Entries in all purses close on Tuesday, May 1, 1883.

Entrance fee 10 per cent of purse, as follows: Two and one-half per cent cash, which must positively accompany the entry; 2½ per cent on Friday, June 1, and the remaining 5 per cent, from those who start, at 8 o'clock p. m. of the evening previous to the race, at the secretary's office, 116 Monroe street, Chicago. No entry will be accepted or considered unless the 2½ per cent cash accompanies the same, nor will any entry be allowed to compete unless the second payment of 2½ per cent is made or mailed on or before 11 o'clock p. m. of Friday, June 1, 1883, and any entry on which the final payment of 5 per cent is not paid at 8 o'clock p. m. of the evening previous to the day set for the race shall be considered drawn, and will not be permitted to start, but no entry shall be held or liable for any amount beyond the first payment of 2½ per cent, but failure to pay either of the payments when due shall be considered as a withdrawal, and shall disqualify the entry for competing in the race. It is the intention to place the whole matter of entrance on an absolutely cash basis, and no deviation from the rule will be allowed in any case or in any particular. No entrance is charged on the extra money offered for fast time in the several races.

N. B.—The special purses will be announced from time to time, as they are decided on. In arranging them consideration will be given to Maud S and St. Julien, who are barred by their records from entering in the class races; to a stallion race, should one be deemed advisable; to double teams, and to trotting with running mate.

For further particulars and blanks, and in making entries, address D. L. HALL, Secretary, 116 Monroe St., Chicago.

NATIONAL ASSOCIATION OF Trotting-horse Breeders

Programme of Trotting Stakes for 1883.

Race No. 19. Consolation race; purse $250, for horses that have not won a race during the meeting; beaten allowances; 1½ miles.

CONDITIONS.

Running races will be governed by the rules of the Chicago Driving Park.

Trotting and pacing races by the rules of the National Trotting Association.

All entries will close May 5, 1883.

Entrance fee of 10 per cent in all club purses. Running with three or more to enter; two or more to start. Trotting and pacing races, five or more to enter and three or more to start. In all cases the entries must be inclosed in sealed envelope and addressed to the secretary, and plainly state name, age, color and sex of horse, name of sire and dam (when known) and name of owner. For all races colors of rider must be given with the entry. No entries accepted unless accompanied by the money, and under no circumstances will any conditional entries be received. Walk-over by any one horse entitles him to half of the stake money and all of the forfeited money and all plate or cup added.

Any horse distancing the field, or any part thereof, will be entitled to first money only.

The association claims the right to interlace heats of different races whenever it may deem it expedient. It also claims the right to postpone on account of bad weather.

STALLIONS.

THE CELEBRATED TROTTING STALLION

ERWIN DAVIS

WILL MAKE THE SEASON OF 1883 AT OAKLAND TROTTINO park.

DESCRIPTION.

Erwin Davis is a beantiful mahogany bay with very black points and one hind foot white; 15 hands high; of superior good disposition and fine trotting action.

PEDIGREE.

Erwin Davis was sired by Kentucky Hunter (Skenandoah) by broken-legged Kentucky Hunter (the sire of Flora Temple) by Ferguson's Kentucky Hunter, by old Kentucky Hunter, by Highlander. Erwin's dam was Lost Diamond, by Vermont Hambletonian.

TERMS.

Twenty-five dollars for the season, payable at the time of service. Good pasturage at $5 per month. No responsibility for accidents or escapes. For particulars apply to

JOHN ROGERS,
Oakland Trotting Park.

TROTTING STALLION

Eugene Casserly.

SIRE OF SWEETBRIAR, 2:26¼; NAPA QUEEN, 2:38¼; ROCKwell, 2:39; Bill Woodward, 2:40; Smoothbriar, two-year-old record 2:57; May Day, two-year-old record 2:59½. Will make the season of 1883 at Oakland on Thursdays, Fridays and Saturdays and at Walnut Creek Sundays, Mondays, Tuesdays and Wednesdays. He was sired by General Taylor, dam Jennie by Lexington. Terms $30 for the season. Good pasturage at reasonable rates. No responsibility for accidents or escapes. Address

THOMAS S. BREMNER.
Seventeenth street and Telegraph Ave.,
Or J. M. Heinold, 1426 San Pablo Avenue, Oakland.

THOROUGHBRED STALLION

X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam, Columbia, also by imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteco. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wanauita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland,
or 508 Montgomery street.

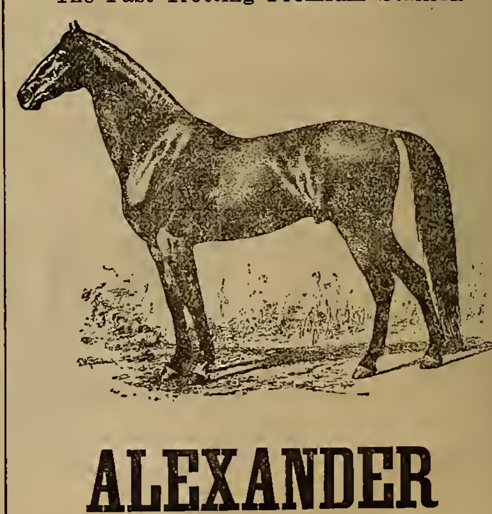
STALLIONS.

THAD STEVENS.

THIS THOROUGHBRED HORSE WILL BE AT AGRICULTURAL Park, Sacramento, for the season commencing Feb. 1 and ending the 1st of July next. Good pasturage for mares will be provided at $3 per month. For terms and particulars apply to or address

W. M. MURRY, Agent,
Sacramento Racetrack.

The Fast Trotting Premium Stallion



ALEXANDER

WILL STAND THE PRESENT SEASON AS FOLLOWS: MONdays, Tuesdays and Wednesdays at Clark's stables, Santa Rosa. Balance of time at Fashion stables, Pelaluma.

Alexander is by Geo. M. Patchen Jr., the sire of Sam Purdy (2:20½) Starr King (2:22) and Vanderlynn (2:22). Dam Lady Creim, by a son of Brown's Bellfounder, by imported Bellfounder. For full description, see BREEDER AND SPORTSMAN of Sept. 9, 1882.

Of Alexander's get Tommy Dodd has a record of 2:24, Reliance 2:22½, Nellie Patchen 2:27½, Eudora 2:34½, Inauguration three miles in 7:29—last mile in 2:26, Sonoma Boy 2:37. Alex. Button proved by his performance in 1880 to be one of the best three-year-olds which have ever appeared in any country. He won the stake for three-year-olds at the State fair, beating Belle Echo, Annie Laurie, Leu Rose and others, winning the first, third and fifth heats and making a dead heat with Annie Laurie in the fourth; time, 2:34½, 2:30, 2:29, 2:30¼, 2:35. At the fair of the Santa Clara Valley Association at San Jose he won, beating Belle Echo and Len Rose; time, 2:28¼, 2:30¼, 2:33¼, 2:31¼. Belle Echo won the first heat. He won at Stockton, beating Honesty, Len Rose and Upright in straight heats; time, 2:32, 2:33½, 2:32½. In 1881, as a four-year-old, Button made a record of 2:26¾ over the Santa Rosa track. Dot Craig, by Alexander, has a private record of 2:29.

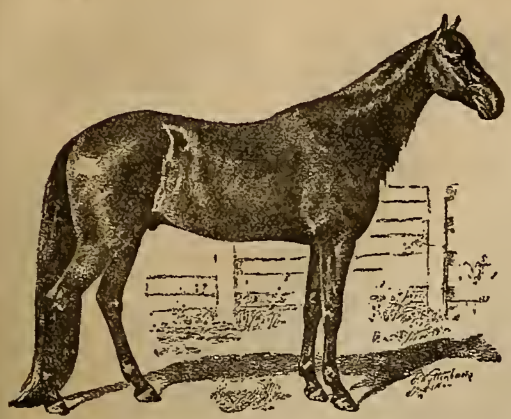
The Frasier team took first premium at the Sonoma and Marin District fair; also at Oakland for best carriage team.

Mares left at the City Front stables, San Francisco, will be forwarded. For further information apply to

T. T. UNKLESS, Petaluma.

STALLIONS.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2:21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Columhus. Woodford Mambrino hy Mamhrino Chief, his dam Woodhine by Woodford, a thoronghhred son of Koscinsko.

Woodford Mambrino is recognized to he the best son of Mamhrino Chief. His own record is 2:21¼, and there are a large number of his get in the 2:30 list. Among them: Abhottsford, 2:21¼; Convoy, 2:22¼; Magenta, 2:21½; Lady McFatridge, 2:29; Dacla, 2:29¼; George A. Ayer, 2:30.

Besldes those having puhlic records, he is the sire of the two celebrated mares owned hy Robert Bonner—Manetta and Malice. Manetta, wlth a running mate, and harnessed to a road wagon, trotted two miles in 4:27¼, and Malica trotted a trial, on the same track, a mile in 2:19¾. Woodford Mamhrino is also the slra of Princeps, the sire of Trinket; record, 2:14. Woodhine ls also the dam of Wedgewood, record, 2:19. Young Columbus, the slre of the dam of Abbottsford, has nine of his get ln tha 2:30 list, so that on both sides of tha house thera are notahia performers. Ahhotsford is a rich rosewood brown, 15¾ hands, and of very high form. His get are very promising, his danghter Jasmine having won the Embryo Staka for yearlings ln 1881, and avery one which has hean put in training has shown good speed.

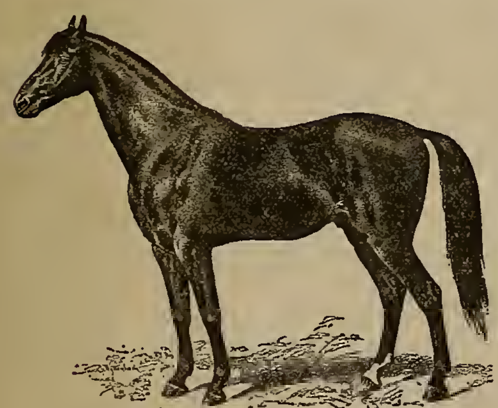
TERMS.

Seventy-five doilars the season, to he paid befora removing tha animal. Mares not proving in foai can he returned tha following season free of charga. Good pasturage at reasonahia rates, and extra pains taken, hut no liability for accidents or escapes.

LOCATION.

Abbotsford will maka the ensuing season, 1883, on the ranch of S. B. Whippie, Esq., San Mateo, season commencing Fehruary 15th and ending Juna 1st, 1883. For full history sea tha issna of BREEDER AND SPORTSMAN of August 5th, 1882.

GEORGE BAYLIS, Agent, San Mateo, Cal.



MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (walghing at this date 1,260 ponnds) combining the Hambletonian and Mamhrino stralns and also several thoroughbred crosses. His colts demonstrata that he possesses in an emlnent degrea the same facuity of transmitting tha family qualities to his offspring which pnt Georga Wilkes in the front rank as a slre of trotters.

☞ George Wilkee has twenty representatives in the 2:30 list, of which 10 hava records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or hetter.

Will maka the ensuing season, beginning February 1st, 1883, at STOCKTON.

In pntting the prica by the season at tha iow figure of $40 tha owner does not acknowledge, thereby, any inferiority on the part of this horse to any other sire of Trotters. **IRVIN AYRES.**

THE **Centennial Chronograph**

A POSITIVELY RELIABLE "FLY-BACK"

HORSE-TIMER

And Accurate Time-piece Combined.

STEM WINDER AND STEM SETTER.

In heavy Gold Open-face Cases, price $55
In heavy Silver Open-face Cases..... 27

[From the Jewelers' Circular.]

"The Centennial chronograph (fly-back) or horse-timer, recently introduced by Messrs. Cross & Begnelin, is, regardless of price, one of the most substantial and accurate pieces of timing mechanism we have seen. This timer is constructed on scientific mechanical principles that must excite the admiration of every intelligent watchmaker, and it will doubtless become universally popular."

TO

Sportsmen & Pleasure-Seekers.

THE

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY THEIR LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING ESTABLISHMENT

OF THE

"HOTEL DEL MONTE,"

IS UNSURPASSED.

A SPACIOUS SWIMMING TANK

(150 x 50 feet)

FOR WARM SALT WATER, PLUNGE AND SWIMMING BATHS.

ELEGANT ROOMS

For Individual Baths with DOUCHE and SHOWER facilities.

MAGNIFICENT BEACH

Of pure white sand for SURF BATHING, Etc., Etc. THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ

IS VIA THE

Southern Pacific Railroad,

(Broad Gauge), and the

SANTA CRUZ RAILROAD.

☞At PAJARO, the SANTA CRUZ R. R. connects daily with Trains of the S. P. R. R.

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets of any description issued by this Company will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggagemen. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle checked and carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt Agt.

☞S. P. Atlantic Express Train via Los Angeles Yuma, etc., leaves San Francisco daily via Oakland Ferry, foot of Market Street at 9:30 A. M.

P. A. FINIGAN, San Francisco.

HAVING CONDUCTED SOME OF THE MOST successful sales, notably those of Messrs. Whipple, Colgrove, Dietz, Coutts, Dougberty, Newland & Hammond, Daniel Cook and others, we feel assured of our ability to give satisfaction in all business intrusted to our care. Sales will be made in all cities and counties in the State. We have in contemplation a series of combination or breeders' sales, similar to those so successfully held at the East. We will be pleased to enter into correspondence with parties desiring to participate in such sales. Private purchases and sales of improved live stock of all descriptions will be made on commission and stock shipped with utmost care. Several fine ranches at private sale. Purchases and sales made of land of every description.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

T W E N T Y

Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23¼; another with a record of 2:26, made in 1882; another with a record of 2:28¼, and a grandson with a three-year-old record of 2:23¼, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20¼ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15¼ to 2:27¼. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23¼ to 2:28¼, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¼, by Happy Medium Jr.; and Carrie B, 2:28¼, by Elial G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

YERBA BUENA

JERSEYS AND GUERNSEYS

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

Trotting Action.

In the article pnhlished last week under the titls of "Tips and Trotting Action," the stride of Abe Edginton was partially analyzed, and a promise given that comparison would be made between that when drawing a snlky and when he was encnmbered with weight on his back. Long before the days of instantaneons photography it was well knowu that a long etriding horss wonld shorten his gait when transfernsd from harness to saddls, and among the old trainers it was a favorite method of overcoming a tendency to "overstriding" and "dwelling." At that time it was conceded that a majority of horses conld trot fastsr to saddle than harnsss. Thie partially followsd from being able to ksep closer to ths inside of the track, and thns save distance on the turns, partially from the vshiclee being heavier than at present, but chiefly from a lack of knowledgs of present methods of controlling the action. But while the fact was patent the minntia was wanting, and it remainsd for the Palo Alto illnstrations to give an insight into the differsncs wnich wsight on the back cauesd. In the previona article there was a brief description of the method the fset were moved when Edginton was hitched to a sulky though it will be necessary to go over the ground again in order to maks ths comparisons. The propelliug hind foot as it left the ground was taken as the initial point, and when that last impulse was given to hurl ths body through the air the other hind foot was under and in close proximity to the fore foot on ths same side. In the pictnre rspresenting the same part of the stride, when the rider was np, ths fore and hind feet in ths air ars mnch farther apart and at no tims ars they close enongh to sndangsr scalping. It is proper to state that in harness the stride was sighteen feet thres inches, in the saddls, ssvsnteen feet six inchss. Presnming that ths horss was nrged to his fastest pacs in both instancee, ths proof of the correctnsss of the old opinione is complets, and hence, while ths strids was shortened, it mnst havs been quicksned.

The photographs also show ths rsason why horses that wsrs mixed in their gait in harnsss trottsd square nnder ths saddls. The feet, from the motion being accelsrated, are nevsr in snch proximity as to endanger the fore foot striking the hoof, coronet or pastern. Before the hind foot has been thruet so far forward as to be in danger, the fors foot has besn slevated enongh to carry it completely out of the way, and thie ia dne to the snergy of the movement sntailsd by the resistancs of the rider. To ovsrcome thie, the fore feet especially ars raised with a qnicksr effort, and the conee-qnence ie that there ie also more bending of the knes. The picture ehowe the npturned fors foot in contact with the chest, or so closs that it appears as thongh it were actually tonching. The main feature, however, ie the distancs between ths fors and hind fest in every portion of ths stride, and thers is no possibls chance of injnry from ths fors foot to any part of the posterior limbs. The hind foot might wonnd the oppoeite hind leg in passing, or the knee or arm of ths fore be strnck, bnt a scalping boot would not bs marked if even it were inches in thickness.

I had one animal that gavs a capital illustration bstween the saddle and the harness, and now that the photographe furnieh ths ksy I can readily nnderstand what was a myetsry at ths time beyond my powere to solve. Thie was the mare Clara G, ownsd by D. A. Gage of Chicago. I saw her trot very faet in her exsrciee nnder eaddle in 1869, when at the eams tims ehs conld not ehow bettsr than 2:50 in harnees. I got her in the spring of 1870, and commencsd driving her in April. The 18th of June the fastsat ahe conld trot was 2:45, and whsn called upon for more speed she wonld hitch and roll terribly. Several diffsrent patterns of ahoes wers tried, and the "rolling motion" proved so far the beat, as in them she trottsd a qnartsr in thirty-nine seconds. This gavs somethiug of ths same action as weight on the back, though shs was still inclined to hitch. It was a work of tims to ovsrcoms this propsnsity, and also a trial of patience, more so from hsr known capacity in the saddls rig. When she did "get sqnared" the improvement was very rapid. The proper wsight of shoes, ths right kind of boots, check-rein of the exact length, and from then there was no tronble. In the fall of 1871 she won the three-minnte race in Buffalo in 2:30, 2:26½, 2:26, coming from ths half-mile pole in the two' last heats in 1:10, and without driving hsr so near ths top of her spesd as to make a break. Aftsr returning homs she trotted at different times, half miles in 1:08, and a quartsr in 32¼ seconds. As the photographs show she went clsar nndsr the saddle, and nntil she acquired the habit of doing so in harnees the fear of injury iucapacitatsd her from showing ths same speed.

The weight of ths rider on the forelegs compels ths qnickensd action, as anyons can easily nnderstand who knows the effsct of carrying a hsavy bnrden on his shoulder, and is also shown by ths action of the Chiness vegetable peddlers. In the latter case the pacs is not only acceleratsd, as there is a different step taken when the basksts are full, and the gait is as nsarly a pace as two lsgs can imitate ths movement of four.

While weight on the back is an advantage to some trotters, and it is held to be essential to racing speed, there must be reasons for the differences. Undoubtsdly the longsr bonnd of the racehorse, a succession of springs, of longer duration, give a jerking motion to the load that operates prejudicially. Whether the stride is shortened or not I am not prepared to eay, though befors long I will instituts sxpsrimsnts to dstermins ths qnestion satisfactorily. Before that is done it is unnscassary to speculate, as conjecturs is worthlsss when thers is an opportunity to make a practical test. Trainsrs of racshorses object to sxercising runners in harnese on the gronnd that it will havs a tsndsncy to ehorten the stride, and I am inclined to think that it nay havs that effect, thongh relieving ths legs, which will more than compensate, in cases where tronbls is apprehendsd, for ths snppossd tendency. Ths fast trotting gait bsing mors nniform, two air flights in ths stride in place of one, ths vshicls is hauled along steadily and with not a particls of the jsrking motion attending the fast gallop.

When Dexter trotted in 2:18 nndsr ths saddls, it wae thsn thonght that it was far beyond ths harnses spssd, but snbsequsnt events provsd that it was an srroneous conclusion. Rollo Golddust was nnquestionably mnch faster with weigbt on his back, and, as Billy Boyce and othsrs havs ehown, ths pacing gait appsars to be favorable for spesd whsn wsight is carrisd. Bnt ae the harnese sfforts of Maud S, St. Julien, Little Brown Jng, Trinkst, Clingstons are so mnch euperior to ths bsst of ths saddle, it ie a fair infsrsnce that in reality the removal of any great incumbrancs on tbe back is favorable to fast trotting.

Ths only illuetration of trottiug nnder the saddle wbich I havs ssen is that of Abs Edginton, and it not only displays a marked variation from that of the eame horse in harnees, but also differs materially from the pictures of otbere. In the work "The Hores in Motion," there ars plates reprssenting, in addition to thoee of Edginton, Elains, strids eightesn feet thrse inchss; Clay, esvsntesn fect six inchee, and Occidsnt, seventeen feet nins inches. Thers ars minor variations among thsm, though none eo markad as thoee betwesn saddls and harness in tbe eams animal. Elains and Occident did not bring ths fors feet into snch close proximity as Edginton and Clay; the picturs of ths lattsr in ths commencement of the air flight ahowing the fors foot in a position to nearly hide the foot on the hind leg, and in the next picture an advance of twelve inches, there was a greater elevation than in the case of Edginton. With Elaine thers is a clear opening, and from ths time the hind foot gives the last impulse until the feet again touch the gronnd there is no danger of intsrference.

In ths silhonettes on snch a small scale even important variations ars hard to observe, thongh in the photograph a magnifying glass brings thsm ont and a littls knowledgs of the action is obtained. Ths importance of closely studying the lsssons which the camera presents is so evidsnt that these articles will bs continued until an insigbt ie obtained. It is a difficult task to make clear explanations without accompanying cuts, necsssitating prolixity which cannot bs avoidsd.

Sales at Fairlawn.

Ths following sales of high-bred trotting stock have been made by Gsn. Wm. T. Withers of Fairlawn Stock Farm since the 12th day of March. Hs returned from a trip to Arizona and New Mexico on the 8th of March and has been eo much sngagsd that he has not had time to report his eales until now :

To John P. Crozisr of Upland, Pa: The dark dappls brown stallion Princs Ali, foaled March 7, 1878, by Almont; dam Alics Drake, by Alexander's Norman; second dam by Pilot Jr.; price $2,500.

To same party: Bay mare Hops, foaled August 25, 1877, by Almont; dam Elsis, by Alexandsr's Abdallah.

The same party had purchased during Gen. Withers' absence the bay filly Ripple, foaled May 12, 1880, by C. M. Clay Jr.; dam Sallis M., by Almont.

To Col. Albert Gridley of Batavia, Ill., the solid bay filly Francisca; foaled Jnly 14, 1881, by Almont; dam Frances Breckenridge, by Sentinel, full brother to Volunteer; second dam by Bayard, son of Pilot Jr.; third dam the thoroughbred mare Luna, by Swigert's Lexiugton: prics $1,200.

To Thomae Starr of Leadville, Colorado: The thoroughbred chestnut filly Arab Maid, foaled in 1881, by Limsstone; dam Arab Girl, by importsd Arab Fysanl; second dam Hopsie, by imported Mickey Free, son of Irish Birdcatcher; third dam the imported Arab mars Loulie, of the pure Koheyls racs of Arabs; price $350.

To John C. Gibbs of Nsw York city: Ths bay brood mare Fanny Patton, foaled in 1870, by Country Gentleman, son of Rysdyk's Hambletonian and bred to Almont Lightniug, son of Almont.

To Rufus Iugalls of Belvidere, Ill.: The black stallion Resolutiou, 16¾ hands high, foalsd April 13, 1879, by Alwood, son of Almont; dam Queen Mary, by Mambrino Chief; price $1,000.

To R. S. Withsrs, Lexington, Ky.: The dark iron grey filly Maggie Almont, foalsd April 25, 1882, by Almont, dam Maggie Keene, by Mambrino Hatcher; second dam Laura Fair (Keene Jim's dam, record 2:19½) by Rattler, son of Stockbridge Chief; price $1,000. Maggis Almont is one of the greateet natural trotters ever foaled and $500 advance has recently besu offered for her and refused by her purchaser.

To Dr. Schwarz of Dayton, Ohio: The bay filly Maggie Msdium, foaled April 29, 1881, by Happy Medium, dam Maggie Kesne, as abovs; prics $1,000.

To George A. Hogg of Fayette connty, Pa.: Ths bay stallion colt Vimont, foalsd April 27, 1880, by Almont; dam Badoura, by Caseius M. Clay Jr. 22; second dam Puss Stedman (Lorelle's dam), by Alexander's Norman; third dam by Toronto, eon of St. Lawrence; price $2,500. Vimont is considered one of tbe very best colts ever bred at Fairlawn.

To Charles G. Wicker of Ticondsroga, N. Y.: The eolid chestnut stallion colt Ksnmore, foaled May 10, 1879, by Almont; dam Tallnla, by Bachman's Mssscnger Duroc; eecond dam Mary Sanford, by Bay Hambletonian, son of Alexander's Abdallah; third dam Lady Sandford (Jay Gould's dam), by Sesley's American Star; Prics $1,500 cash and $1,000 more when Kenmore makes a record of 2:25. Kenmors showed a 2:40 gait when being broken to harnese last summer.

To John Bechman of Bucyrus, O.: The dark bay stallion colt Doncaster, foalsd Sept. 25, 1880, by Happy Msdium; dam ths Headley mare, by Regular, eon of Volunteer; sccond dam Meliesa, by Crockett's Bellfounder; price $1,000.

To Charles E. Watsrs of Minneapolis, Kansas: The black colt Talisman, foaled May 22, 1880, by Cassins M. Clay Jr. 22; dam Queen Vic, by Mambrino Chief; prics $800.

To same party: The grey colt Norman Medium, foaled March 26, 1881, by Happy Medium; dam Alice Drake, by Alexander's Norman; second dam by Alexander's Pilot Jr; price $800.

Winnemncca claims the premium for being ths most extensive cattle shipping station in Nevada, as the annual shipments of beef cattle range from 25,000 to 35,000 head.

OUR NEW YORK LETTER.

Opening of the Southwestern Circuit—Good Sport at the Crescent City.

Tbe regular racing season of 1SS3 began on the 31st at Orleans, and tbe meeting was continued over on the 3rd, 5th and 6th of this month, rain intefering to some extent, however, after the second day, cansing several postponements and a wet track. Large fields of horses, considering tbe early season, were out on the first two days, a result due no donbt to the fine condition of the track, which, at best a slow one in previous years, is now, gauged by the fast time made at the meeting, the fastest conrse south of Kentucky.

Wedding Day's race for the Cotton Exchange Handicap, valne $1,700, is very seldom beaten, even on our fastest tracks, for a mile and a half in 2:37¼, the winner, a five-year-old, carrying 112 lbs., is a good performance, and the field he beat a strong one, for the time of year. Ratber chagrined must have been shrewd Green Morris, who sold tbe winner to his present owner last fall, at little more than half what he (Morris) paid for him at Saratoga last Angust, and for the same price ($1,500) hougbt Ballast of Cadwell, tbrowing in tbe gelding, Creosote, tben on his last legs with consnmption, and the latter snhsequently died. Morris bougbt Ballast with a view to pulling off this same Cotton Exchange Handicap, aud tbe handicapper, misled by the horse's previons poor form at Orleans, let him in light, at 102 pounds. Directly the weights were aunonnced, Ballast ran a trial at the distance with three pounds over weight, in 2:3S½, and the knowing ones, Morris inclnded, considered the race as good as over, for the brother to Bancroft had the best of tbe weights of anything in tbe handicap. Bnt on the Saturday previous Wedding Day came out in great form and from being only the miler, which his old owner, and most others, have all along considered him, demoustrated himself a coming horse at a distance, by winning at a mile and three furlongs, from Fair Count (his full brother), Apollo, Frankie B, Katie Creel, Boulevard, Lizzie McWhirter and several otbers, a good field. The Morris cast-off ran this distance in 2:25¾, a fast race, and at once loomed up as likely to get away with the longer and more valnable event on the following Tuesday. But then be was handicapped to give Ballast, same age, 10 lbs., and had to meet, in addition, some new horses snch as old Sannterer, 114 lbs., Duke of Montalban, (balf hrother to tbe Dnke of Magenta), 105 lbs., Lute Fogle, 107 lbs, etc., and on tbe Monday night previous the pooling was very heavy, Saunterer, Ballast, Pettingill's pair, Wedding Day and Lute Fogle selling nearly even up at the Southern Hotel, in $600 and $700 pools. At the track the race was hotly contested, amid great excitement, and not until the last few rods was the race decided, Wedding Day, under John Spellman's fine riding, getting the verdict by a trifle over a lengtb, Montalban beating Ballast a head. The latter horse ran fully up to his trial and heat it too, bnt the winner was better than anyone supposed. Unfortunately for the party behind this newly discovered "nailer," they have been as much in the dark as anyone as regards their horse's capabilities and he has absolntely no future engagements worth mentioning. Strange to have snch a fast miler, as he was known to be (for he ran at Saratoga last Angust in 1:41¾) and for them not to know he conld stay. Snch are the ups and downs of horse owners, and it only adds the more to the glorious uncertainty of the turf. But Green Morris, if he has got unmistakeahly and badly left in the Wedding Day-Ballast bnsiness, has still a "rod in pickle" left for the boys in his heretofore dark colt, Drake Carter, by Ten Broeck—Platina. I say beretofore a "dark one," for since the Pickwick stakes on the 31st at Orleans he is so no longer, his easy win, ridden by Billy Donobue over a mile and a quarter in 2½ from a field of thirteen showing him to be a dangerons antagonist for tbe best three-year-old in the country. He is now the money favorite for the Kentucky Derby, and he never ran as a two-year-old, thereby adding to his chances of undergoing a severe racing campaign. Morris has heavily engaged him in stakes, at Lonisville, Chicago, Saratoga, Sbeepshead and elsewhere, and bids fair to score a greater success with him tban he did witb Apollo last year.

Tbe first two-year-old racing of any account of the year was run during tbe late meeting, and some good youngsters appeared, the best being Lloyd Daly, by the imported Irish stallion Kyrle Daly out of a Lever mare. Of the other races tbe most notable was tbe first Cup race of 1SS3, the Howard Cup, two miles and a quarter, which was considered a gift for Green Morris' Apollo, bnt the old man got another setback like the Ballast affair. This time it was Pettingill'e Dnke of Montalban wbo "clipped his wings" for him, and althongh heavy hetting at Apollo $600, Montalban $300, Blazee $75, made it look all but over, it was tbe Dnke first, Apollo second, and poor, old, white-faced, knock-kneed Blazes last. Tbe track was heavy, which may account for Apollo's defeat, and a tremendons etorm also on last Saturday laid half the racetrack under a foot of water. However, yesterday racing was resnmed, and five races run, and to-day ended the meeting with the Cottrill Stakes, which Drake Carter won in a gallop. Wm. Eugeman has asked to be, and has been, released by the Lonisiana Jockey Club from the contract he had entered into, to give racing there next winter. From the Crescent City the clans divide, and though the most of the etables go direct to Memphis, Tenn., for the week'e racing beginning on tbe 16th, Pettingill'e, McMabon'e, and otbers go direct to Washington, D. C., and otbers to Nashville and the Kentucky racing centers.

After the meeting at Memphis, Nashville, the Rock City, follows, and her meeting and Gen Harding's sale of yearlinge will bring the time np to the 1st and 2d of May, and after tbat in rapid succession coma Lexington and the Falls City, which latter meeting is expected to be more successful than any epring meeting ever given there.

Gabe Caldwell, the well-known starter and owuer of horses, has had mnch tronble at New Orleans, for his boy, the famons light-weight jockey, injured himself badly a few weeks ago; then he was taken sick with an illness said to be consumption, and the "last straw" was his famous little mare Nina breaking her ankle in tbe heat race on the first day of the meeting. This stable is now entirely broken up, tbe three-year-old colt hy Glengary—Kate Fisher, formerly known as Joe McMahon, having been purchased by that gentleman for $2,500, and renamed Joe Mitchell. The two-year-old brother to Nina also goes to the same stable, and Lenore has been sold back to her old owner, Feland, for $400. In bie misfortunes, Mr. Caldwell has the symyathy of all, with bearty wishes for hie restoration to health. Joe M"rray, the sensational Sheas colt, was in New Orleans with A.sey's other horses on the stable's way north.

The brown eon of Rebel is not very forward in condition. Barnes, the noted light-weight jockey, was recently suspended at New Orleans. He bad made more contracts to ride than he could possihly fill, and the aggrieved owners settled tbe matter by having tbe offender deprived of the privilege of riding at all during the meeting.

Barnes, the horse, Messrs. Dwyer's noted three-year-old, is one day reported as looking hetter than any of his stable companions, and the next few days as absent from his exercise. Certain it is, he did no work during the most of last week, and yet to-day it is stated on good authority that his shrewd owners, having sncceeded in getting on at a good price a large sum that he wins the Louisville Derby, will surely send him to Kentucky in a few weeks. This only bears out your correspondent's freqnently reiterated opinion, in the face of daily statements by the press to the contrary, that the colt wonld be sent West in May, if fit. If he goes, tbe filly Miss Woodford will go along also, for her engagements in tbe Oaks and other races will be worth winning. All the other borses in the stable, except Carly B, are doing well.

Jennie V, the noted gray four-year-old filly hy Waverly, who was reported as doing good work at Sheepshead last week, has bad to be let up again, and it is feared the long-dreaded "hreak down" has come at last. This filly, bronght to Saratoga last snmmer by her breeder, J. A. Grinstead, was one of the fastest animals at the summer meeting of 1SS2, and was sold out of the stable for a good price to the Heffner party. Her legs, however, were always rather "dicky," and when Pearl Jennings and Pinafore beat her at Long Island in September she was retired.

The Saratoga track has lately been covered again with loam, and is expected to he faster than ever this season.

Prospect Park track on Long Island, ahout a mile this side of Sheepshead, has been leased, it is said, by a company of gentlemen, with Col. S. D. Bruce as manager, for the purpose of giving races in opposition to the Engeman party at Brighton Beach. It was generally supposed that the latter people had secured Prospect Park, bnt from this it seems not. The defunct Rockaway project, which I advised yon some time since was not in a very tangible shape, has surprised none except, perhaps, tbose interested for him. Col. Bruce was the only one anybody knew. This new enterprise at Prospect Park is donhtless the outcome of the Rockaway huhhle, and it looks much more feasible, at least on paper.

Brighton Beach is and has been for two or three weeks past in better condition tban any of the island tracks, and the eighty or more horses at present doing their work there are showing the effects of this by their forward condition as compared with those elsewhere.

Tbis week tbe American horses in England again make their bow to the racing puhlic at the Newmarket Craven meeting, and it is to be hoped that no accidents will occur to mar their chances of winning. Before you get this letter the result of tbe Great Metropolitan and City and Suhurban at Epsom will have heen wired to you most likely, and your correspondent feels very sanguine of Mr. Lorillard's success in one or both races. In the long race by the aid of Iroquois or Pinafore, and in the short spin with Sachem or unlucky Aranza, who with only 98 lbs. ought to show her quality, if she has any. Foxhall was heavily backed down to 10 to 1 for the City and Suburban, but cahle dispatches of the last few days say he has receeded to 20's in London, and looks like being "knocked out." Tbe great horse should be seen in public first, and some estimate had of his present form, before being backed for any race. The chances are that he will never qnite regain his high form of '81. Shotover is the English betting favorite for the City and Suburban at 5 to 1, but on pnblic form Scobell, tbe second in the late Lincoln Handicap, should hold her safe, and be tbe most dangerous antagonist of our horses.

The *Spirit of the Times* of this city is certainly endowed with some very "remarkable" correspondents, whose versatility is amazing, especially in "drawing tbe long bow." The Breeder and Sportsman has shown up to well deserved ridicule their Hidalgo from the far Northwest and tbe muzzle should also be applied to their oracular driveller in England, who sends them regular accounts of his "intimacies" with Day, Marsh, the Cannons and other trainers in Albion. In his latest effnsion he speaks of "a joint commission with Tom Cannon on the Lincolnshire," or something similar. This is exceeding rich when it is well known how "close-mouthed" English trainers are, and this one in particnlar, who, when accosted by the inevitable "Plunger" at Newmarket for some stahle information answered him well with: "There is tbe owner of the horse, ask him," a repulse the "Plunger" never forgot. Some of the matter publisbed by the *Spirit* from this correspondent would be ludicrous if it were not so plainly recognized as the vagaries of a decidedly "fresh" individual, who will not sncceed in convincing anyone, certainly not Messrs. Lorillard and Keene, tbat tbe trainers in qnestion take any interest in him or his beyond perhaps the "introdnction of tüeir shoemaker to his tailor," or in other words, kicking him out.

L. E. Myers, the famous runner, has given np his expressed intention of coming to San Francisco this summer to run your athletes a trial on the cinder path. He says now that he will probably go to England instead and run George.

The hilliard tournament at Chicago excited very heavy speculations in this city, and Vignaux' backers fell heavily. The promoters of the May tournament in this city have announced that cnshion caroms will be the game played, not this balk-line business, at which none were at home in the Chicago contest but Schaefer and the Frenchman. Slosson will likely he in the next trial of skill and he will make it that much more interesting.

Mitchell, the new bruiser from "hold Hingland," gave a sparring exhibition at the Rink on Monday night. He is one of the beet sparrers seen here for many a day.

Disappointed hettors here have a new resource in these parts now. A young "dude" by the name of Stanley, who evidently at one time had more money than he now has brains, has eued Cridge & Co., the well-known pool-selling firm, for $1,900, which amount he claims he lost at Coney Island, Baltimore and Washington last fall. That he will have his trouble for his pains is likely euough to he the result of the matter, and meanwhile Mr. S. etands before the public in a very unenviable light, that of a man who takes all he can win but as eoon as he loses cries "stop thief." Such a maxim would cnt two ways as well as one.

Fleetwood Park's June Stakes have closed with between eighty and ninety entries. The Pacific Coast is represented in tbe 2:19 class by tbe gray etallion Romero, who will meet in the race Rosa Wilkee (the recent $11,000 purchase), Capt. Emmons, Minnie R, Josephus, Dan Smith, Adele Gould, J. S. Clark and Lady Pritchard. In the Free-for-all, St. Julien is entered against Hopeful and Fanny Witberspoon. Tbe great five-year-old trotters Pbil Thompson, Jay Eye See and Bronze are also pitted against each other in addition to Butterfly and Lucy Gernent.

Matador, tbe only son of the great Gladiateur in this country, will he included in Mr. Belmont's June sale. A cbance for eomebody to secure an elegantly bred thoroughbred stallion.

Nashville will see the meeting of the great horses Thora and Checkmate the latter part of this month. Both are represented just now as in better form for the time of year than ever before, and party feeling will run high when they meet.

Old "Check" has lately come with a rush in the betting at Lonisville, indicating that the old fellow's legs are apparently all right, which they were far from being last summer and fall. Mr. Reed's mare, however, holds her own in the betting in spite of a statement in the New York *World* a day or two siuce that she had retrograded. This statement was afterwards found out by a little wiring to be erroneons, and it is not the first time that this generally reliable daily has been misled this spring regarding tnrf information published by them as correct. A little inquiry often will save these troublesome, and, to some, startling mistakes.

Bertam, by Kentucky, ont of Bernice, by Stockwell, will be located near Lexington this spring. When Mr. Belmont owned him, he ran some good races and ought to beget good stock.

The three fillies of 1SS0 purchased at Mr. Withers' sale here by Chas. Littlefield turn out to have been bonght for Major B. J. Thomas' Dixiana farm in Kentucky. Two are by Maccaroon and one by Stonehenge.

Croxie (2:19½) will be sent to Kentucky this spring and bred to a son of Geo. Wilkes.

The New York *Sportsman* offers $100 to the person who guesses the winners of the Louisville Derby, Cup and Merchants' stakes. List to be closed May 12 at noon.

The famons trotting stallion Monroe Chief will be sold at auction in Kentucky the latter part of this month. He is a fast and dead game horse, as his mile in 2:1S¼ and two miles in 4:46 show.

The theaters in our metropolis still keep up tbeir attractions. Italian opera at the Academy, Neil Burgess in his side-splitting "Vim" at the Bijon, Willie Edouin's "Bunch of Keys" at the San Francisco Opera Honse, and Mr. Grau's French opera company at the Casino have heen delighting large houses. So is also the case with tbe "Silver King" at Wallack's, and the "Muddy Day" at the Comique. Mr. Boucicault at tbe Star, the Wyndham company at tbe Union Square, tbe "Planter's Wife" at Haverly's, and Barnum's Hippodrome are enjoying large patronage, and the Madison Square theater has witbdrawn that great success "Young Mrs. Winthrop" and produced a new play: "A Rnssian Honeymoon," which scored an artistic triumph last Monday evening. PACIFIC.

New York, April 11, 1SS3.

Queer Blunders.

The following item is going the rounds of the interior press, credited to the Stockton *Independent:*

"Ever since the wonderful horse Occideut flashed like a meteor upon the gaze of an astonisbed world, every endeavor has heen made to trace his pedigree, bnt without avail as to satisfactory results. He was captured in a butcher's wagon first, and this fact was for years all of bis pedigree tbat could be ascertained. The sire of Occident was foaled in this county twenty-four years ago, aud was known as Tiger, by old St. Lawrence. Tiger was also the sire of Black Bill, Fanny Mills, and other noted horses, aud was considered one of the most noted stock horses on the Pacific coast. On Friday, Tiger dropped dead at the Agricultural Park near this city. He died without a strnggle and will probably meet a large line of illustrious ancestors in tbe horse heaven. He was owned by N. C. Culver of Stockton, formerly proprietor of the St. Lawrence livery stables, who has owned Tiger since a colt, and one time was offered $6,000 for him, but refused that snm. His dam was a mare formerly owned hy Alvin Fisher, who sold her for $S00. Tiger has not had a very eventful history, having never appeared on the track, and is only famous from the fact of his being sire to so mauy fast and famous horses."

It is a little singular that a man who is possessed of intelligent enough to conduct even tbe most ordinary newspaper should make such an absurd blunder or series of hlunders as is contained in this extract. It has been copied hy many editors who do know better, if they would think for a moment and not give a carte blanche to tbe shears. Tbe history of Occident is a subject that has been exhaustively treated by the press of the coast. It has been written and rewritten until it is an "old familiar" with all horsemen and has been laid before the public so often that even people who take no interest in the matter could not hut nnconsciously absorb the facts if they bad the capacity of a mule. Tiger may have been the dearly heloved of Mr. N. C. Culver, and possibly a very good horse withal, but his "many fast and famons ones" are to history nnknown, and false credentials are presented when it is claimed that he was the sire of Occident. Occident was not only not a son of Tiger but he is in no way related, not even in the remotest degree as far as known. No, not even an Oregon cousin to the Tiger family. Gov. Stanford's phenomenal trotter has heen traced through all his various changes of ownership back to the very paddock where he was foaled. He was bred by Matthew Shaw of Sacramento, and sired hy Doc, a son of J. E. Miller's paoing stallion St. Clair. Doc was bred hy Charles Lowell, also of Sacramento county, and there is no mystery about the breeding of either Doo or Occident. These facts have been printed and reprinted until they are known to most people and are easily ascertained by those who are not already informed. The turf editor of the *Independent* will do well to get a stud book and some standard literature and read up the subject before he makes any further cluh-footed attempts to talk horse.

The Crime at McGrathiana.

Gen. Ahe Buford makes the hlinding of Onondaga the text for the following desultory disquisition in *Dunton's Spirit:*

We clip the following from the Louisville *Evening Post* of March 29, which comes as a special bit of news from Lexington, the capital of the Blue Grass region.

"There is considerable talk here among horsemen over the putting out of the eyes of Onandaga, Milt. Young's fine etallion. A veterinary surgeon, Dr. Hagyard, was called in, the horse chloroformed and his sight destroyed. The excuse for this cruel treatment is stated to be the horse's bad diepoeition. Dr. Hagyard says he was very vicious, and would jump on any one, even while being caressed. There is talk of having the parties to the act indicted."

We had written an article on the subject of this cruel act on the part of the proprietor of McGrathiana, Mr. Milton Young, and his veterinary surgeon, Dr. Hagyard. But at the suggestion of a cbaritable friend and claiming ourselves to possess, in matters of this character, feelings of great sympathy to our former associates in the turf, we declined, at least for a time, to publish it, thinking that the sooner snch acts were forgotten tbe better it would be for all concerued. Bnt now, as tbe grand jury of Fayette county is about to act, we feel it to be our duty to speak; still we have had many sportsmen and turfmen approach us on the subject, saying it was the duty of all turf papers to ventilate tborougbly the facts, and let the Christian world know the reason for the commission of so unwarrantable an act on so grand and

ꝛohle a horse as Onandaga, whose grand performance upon the turf has given so much pleasure and happiness to man, as well as to fill with gold the repleted folds of the empty pocket-hooks of eo many prond and haughty sportsmen. We thonght that in return for all this grand service there should not he found in the county one single eportsman, and one single veterinary surgeon, who would so far forget the teachings of the Bible and the promptings of the finer feelings of the heart, as to commit so cruel an act upon so grand a horse. To eay the least it is surprising indeed. What would the prince of sportsmen, H. P. McGrath, have said to a vetinary surgeon who should have suggested the idea of the destruction of Tom Bowling's sight, who was the master of the turf of his day, as Onandaga was, and who beyond all question was in temper and disposition far more vicious and even dangerous than Onandaga ever dare be. Poor fellow! doomed by the act of his own friend to spend the remaining days of his life in bitter darkness. You may take my life, hut, Oh, God! spare me my sight that I may enjoy with my master (though I be an animal, still I claim to be nature's nohle animal, the king of heasts, hut not the king of such beasts, as would under any circumstances destroy each other's sight) this beautiful Eden in the hlne grass conntry, created especially by the almighty arm of the great I Am, to promote the pleasure and happiness of the Christian turfman and hie constant and devoted companion, the thoroughhred horse. We have known Mr. Milton Young since his advent upon the turf, where his career has been short, quick and successful. He is quite a clever fellow in his way, and will have his way, provided Dick says it is the right way. Whilst on the turf he never did allow his right hand to know what his left hand was doing, and sometimes hy the movement of one hand his friends might he led a little astray as to the corresponding movement of the other hand. He ought not to he held entirely responsihle for this act; he was douhtless influenced in a very great measure hy Dr. Hagyard, his veteriuary surgeon, who, if I mistake uot, is the same veterinary that at Lexington a few years since, out on the grounds of the racecourse, in performing the operation of castrating a horse, made the fearful mistake of cutting off about four inches of a very important member of his hody, for which ha shonld have been sent to the Lunatic Asylum at Anchorage, that Dr. Gale might have had an opportunity to have choked him to death. In his early life Mr. Milton Young's struggles with adversity were a little hitter, so bitter as to make the sole idea of his life the accumulatiou of wealth, and this idea has prevailed with him to such an extent that his edncation was somewhat neglected and with him the finer feelings of the heart were never cultivated. Hence the commission of this unfortunate act. Should the ghost of H. P. McGrath see the spot that drank the hlood that trickled from the eyes of Onandaga, when his sight was destroyed, the body would rise from the grave, and in a manly way, peculiar alone to himself, spurn with indignity the motive and reasoning that prompted so unwarrantable and barbarous a deed. Milton Young's father, not he, is responsihle for not edncating his son when a hoy. We have often in our own minds contrasted the characters of General N. B. Forest in the field during the war with that of Milton Young on the turf. Both nnedncated meu, hut of very determined characters, and hoth wonderfully successfnl. Forest's idea of war was to fight, and fighting meant killing, so so he could see no great necessity of having to feed prisoners when ratione were scarce. Milt. Young went upon the turf to make money, and is a little like a blue grass farmer, who sent his son to Missonri a few years since, when he said: "My son, I am sending you to Missouri to make money, honestly, if you can, hut hy the eternal God, you must make money.

We are assured that this act on the part of Mr. Yonng and Dr. Hagyard is not approved hy either the sinner or churchman of the hlue grass conntry. We sincerely hope the grand jury of Fayette county will spare our friend, Col. Young, from the mortification of an indictment, as we are satisfied he will do so no more. Having just moved into the blue grass region and gotten into an eagle's nest, he will soon abandon the idea he has carried with him in the practice of hulldosing the crows in the penny-royal county from which he came. Time and tide wait for no man—ead indeed are the changes wrought by the hand of time. That the fame and glory of two such homes as McGrathiana and Bosque Bonita ehould have departed in so short a period of time, is sad indeed. In visiting the one, instead of seeing paraded in the shades of that grand forest in the yard such horses as Tom Bowling, with a groom at arm'e length on each side of him, Aristides, Tipperary and all the promising yonng onea hounding in their play over the blue grass soil, where many grand and great men have traveled thousands of milee to enjoy the hospitality of McGrathiana and witness the grand display of thoroughbred horsee; inatead of that we now have a man whose remorse of conscience must drive all thoughts of pleaeure and happiness with the horse away from hie trouhled soul. And here in his stall stande poor Onondaga, with hie head down, his heart hroken, and listening instinctively for whatever noiee he may hear. Having lost his sight hie hearing of necessity hecomes very acute, and when eveu the friendly monse rattlee the straw he strikes with hie feet with far more force than before his sight was deetroyed, ae then he could see it was hut a mouse; now his imagination tells him it is his enemy, man. At Bosque Bonita, where all ie still and quiet, no man inquires. No McWhirters or Ontarios are there to graze under the shade of that natural forest, through which tha squirrels were wont to romp and climh; they, too, are gone now. But turn yonr eyes to the lovely hill in front and you will see rolling down its gentle declivity a barrel of Bourhon whisky, with the bnng out, and in every revolntion, when the bung gets on top, there is a fearful report from the escape of gas and whieky. When the barrel reachee the valley, where Goodnight and McWhirter were oftentimes rubbed out after their gallop over that heautiful blue grass lawn, then it will stop and reet for all time to come, dead, dead, dead. "What, O what a fall was there, my countrymen!"

Dr. Cowper Reinforced.

Editor Breeder and Sportsman: In your iseue of April 21 I see under the heading of "Doctors Disagree" a etatement made by one who attachea V. S. to hia name to the effect that there is no auch diseaee as "impaction of the stomach" in the horse.

I am no professional man but I have read "The Principles and Practice of Veterinary Medicines" hy William Williams F. R. C. V. S., F. R. S. E., etc., and I wonld recommend Mr. Baldy to study the same work, paying particular attention to pagea 603 to 612, were "Impaction of the stomach" is fully and atly treated of.

I presume he will not question such an authority aa the ahove named Williame. A. I. H.

Cienega Ranch, April 23.

TURF AND TRACK.

Death of Monarchist.

Dan Swigert's stallion Monarchist died at Elmendorf farm, near Lexington, Ky., on the 15th inst., from blood poisoning. Some weeks previous he injured one of hie hind lege in running against a fence, and from the injury thue received the disease resulted.

Monarchist wae bred at Woodburn, Ky., in 1868, and wae sold a yearling, Colonel S. D. Bruce hnying him for M. H. Sanford for $1,900. He did not appear on the turf until he was three years old. His first race was for the Belmont at Jerome Park, in Jnne, 1871, when he failed to get a place. His second appearance was at Monmouth Park on the 4th of Jnly, when he ran second to Harry Baeeett for the Jersey Derby. At the same meeting he was aleo second to Nellie Ransom for the Monmouth Sequel Stakes. At the Auguet meeting over the same course he ecored his firat victory, a race at mile heats. On October 7, at Jerome Park, in the race for the Champion Stakes he was again second to Harry Bassett, hut on the third day of the same meeting he scored two brilliant victories, winning the Annual Sweepstakee, a dash of two miles for three-year-olde, and the Grand National Handicap, at two miles and a quarter, for which he wae handicapped at 88 pounds, at which weight Billy Donohue rode him with consummate judgment and ekill. The double event caused the greatest enthusiasm among the followera of the dark hlue stahle, several winning their expensee for the winter. Almost immediately after the Jerome meeting Mr. Sanford seut the whole of his stable to New Orleane, and at the December meeting Monarchist won the Post Stakee at two-mile heats over the old Metairie courae, while at the spring meeting in 1872 he won a purse at a mile and a half, beating a field of seven. On the third day he won the Metairie Cup at two miles and a quarter from Barney Williams, Nellie Ransom and Wanderer. Less than two weeks afterwards he won the inangural Stakes of the then new Louieiaua Jockey Club. It was a race of two mile heats, and was rnn in 3:39 and 3:44, which race he followed by winning tha Louisiana Stakes, also at two-mile heats, in 3:44½ and 3:40. Then the stahle went north, and at the Jnly meeting at Long Branch Monarchist won the Mansion House Stakes, a dash of two miles and a half, in 4:47½, heating Cottrell'e Frank Ross. He did not run againnntil the first day of the Octoher meeting at Jerome Park, when for the Manhattan Handicap he was heaten by Fanchou and Tuhman. It was on the second day, however, that Monarchist had his grand triumph when he heat Harry Bassett for the Maturity Stakes at three miles in 5:34½. Monarchist was ridden hy Billy Hayward and Harry Bassett by Jimmy Rowe (now trainer for the Dwyer Brothers). On the Saturday following Monarchist again beat Harry Bassett, the distance being four milee. He ran the distance in 7:33½; the time of the miles were 1:52½, 1:47½, 1:56¾ and 2:1:57, which was excellent time for a track like that at Jerome Park. Few who witnessed the two racee will ever forget the enthusiasm shown hy the followere of Mr. Sanford. The McDaniel confederacy wae in its zenith and had carried all hefore it for two years, for even at that very meeting it had led the list of winnere with a credit of $14,620, with Mr. Sanford second on the liet at $4,900. From Jerome Mouarchist was taken to Baltimore, where on the firet day he won a purse at three miles, which was his last race, having rnn in all seventeen races, of which he won twelve, was second in three and third in one, and having earned close upon $24,000. Efforts were made to train Monarchist in the spring of 1873, but his legs gave way and at the June meeting of the American Jockey Clnh of that year the announcement was made of Monarchist's retirement from the post to the paddock. Suhsequent efforts, however, were made to train him, hnt they failed, and in 1875 he made hie first season at the North Elkhorn farm, then the property of M. H. Sanford, but now the property of Mr. Dan Swigert and known as the Elmendorf farm. As a stallion, Monarchist has not been a great success. His progeny first appeared in the salee-ring in 1877. The following tahle, prepared hy Vigilant for the *Spirit of the Times*, will best show, however, what was thought of the yearlings hy Monarchist at the test hy auction:

Year.	Yearlings.	Colts.	Fillies.	Highest price.	Average.
1877	10	6	4	$370	$222.00
1878	7	4	3	575	230.00
1879	6	4	2	1,000	488.33
1880	9	5	3	475	293.88
1881	15	5	10	950	404.60
1882	7	4	3	2,550	802.85

As to what the get of Monarchist did on the turf each year, the following table, compiled from "Krik's Guide," showe:

Year.	Starters.	Racee.	1st.	2d.	3d.	Amount.
1878	6	11	1	3	—	$725.00
1879	8	31	5	11	7	5,209.84
1880	10	51	13	9	5	4,225.50
1881	11	87	24	5	12	6,586.75
1882	14	218	52	45	41	27,081.50

Of the separate winners the three-year-old Monsrch was the largest, he winning the Viley and Stallion Stakes at Lexington and the Dixie at Baltimore, while of tha othera Frankie B, Ida B, John Sullivan and Marchionees also ran with credit in this country, as did Aristocrat and one or two others in England. The yearlings now at Elmendorf to be sold on May 19 are seven in numher, of which three are colts and four are filliee. One of the latter ie a eister of Aristocrat, while among the colte there ie a brother of Monarch, a brother of Little Ruffin and a hrother of Storey.

Goldsmith Maid trotted 232 heats in 2:30 or better, won $364,200 during her trotting career and captured 121 racee. American Girl took forty-nine racee in gathering in the $118,100 she got for her owners. Rarus won sixty-three races to make his wiunings of $114,950, and Judge Fullerton was victor in thirty-two racea hefore hie winnings amounted to $102,035, Flora Temple, $90,000 in eighty-aix racee; Hopeful, $89,000 in forty-nine races, and Lady Thorne, $79,575 in forty-oue racee. The actual net gains, aside from expensea, that Goldsmith Maid haa brought to her owner, foot up $246,750.

Quite a crowd was in attendance at the racetrack Saturday to witness the match race hetween two horsee owned by Wm. Montgomery and Bud Gafford of Davisville. Neither of the gentlemen ever claimed that hie horse was fast, bnt $100 was wagered hy each one that his trotter was not quite as slow as the other. The race waa a single dash of a mile, and was won hy Montgomery'a nag in the almost nnprecedented time of 3:42. It ia douhtful if any other horse except Gafford'a ever mada any slower time than this.—*Woodland Democrat.*

Capt. Jinks known to fame in Oregon as a fast quarter horse, is on his way to California. He is owned by Dodd & Summers.

Trotting Sires.

The following list is intended to contain the names of all stallions that have sired as many as five trotters with public records of 2:30 or hetter. The first column gives the horse's rank, as determined, first, hy the numher of his get having the record of 2:30, and secondly, by the number of heats won hy his performers, the numher of the latter and their heats being shown in the columns at the right. The rank thus arrived at is not in all cases the true one. Nobody, for instance, would place Clark Chief's six performers above Alexander's Abdallah's five. One authority gives Golddust five in the 2:30 list, but ae one of the five ie by others alleged to he by a sou of that horse, I have omitted him from the list.

Rank.	Name.	2:30 Performers.	Heats.
1.	Hambletonian	34	397
2.	Blne Bull	27	273
3.	Volunteer	23	642
4.	Daniel Lambert	22	279
5.	George Wilkes	20	265
6.	Almont	19	192
7.	Happy Medium	15	156
8.	Green's Bashaw	11	154
9.	Gooding'e Champion	11	121
10.	Yonng Columbus	11	80
11.	Edward Everett	10	238
12.	General Knox	10	122
13.	Whipple's Hambletonien	10	67
14.	Mambrino Patchen	10	51
15.	Woodford Mambrino	9	57
16.	Wintbrop Morrill	8	72
17.	Pilot Jr.	8	70
18.	Aberdeen	8	62
19.	Sentinel	8	61
20.	Phil Sberidan	7	150
21.	Harold	7	101
22.	Stratbmore	7	72
23.	Wood's Hambletonian	7	70
24.	King'e Champion	7	59
25.	Godfrey's Patchen	6	186
26.	Mambrino Chief	6	142
27.	Belmont	6	141
28.	Jim Merce	6	100
29.	Ethan Allen	5	68
30.	California Patchen	6	60
31.	Clark Chief	6	36
32.	Dictator	6	33
33.	Alexander's Abdallab	5	351
34.	Mambrino Pilot	5	120
35.	Blackwood	5	79
36.	Messenger Duroc	5	57
37.	Tbomas Jefferson	5	48
38.	Hambletonian Prince	5	46
39.	Magna Charta	5	41
40.	S. A. Douglas	5	30
41.	Woodward's Ethan Allen	5	22
42.	Ericsson	5	12
Total		407	5,390

The 42 stallions in our list have begotten nearly a fourth of all the 2:30 horses yet produced in this country, while the oldest of them was foaled lese than 40 years ago. Were pacing records admitted as well as trotting, Scott's Hiatoga would rank as fifteenth in the list.—*Live Stock Journal.*

Trotting and Running at Los Angeles.

The following are the summaries of the late spring meeting at Los Angeles:

April 5, trotting; three-minnte class; puree $100.

C. A. Paige'e b e Max 2 1 1 1
D. Paine'e br m Kate Bender 1 2 2 2
Time—2:49½, 2:41½, 2:42½, 2:45.

April 5 and 6, running; balf-mile heats; purse $100.

Hill & Gries' bl f Dottie Dimple, by Ben Wade 2 1 1
A. F. Bland's b b Woodbury 1 2 2
E. J. Baldwin's br b Albert C 3 3 3
H. M. Johnston'e b b Den Rice 0 0 0
Time—0:49½, 0:50, 0:49½.

April 6, trotting; 2:45 class; purse $150.

C. J. Edgar's b g —— 1 1 1
Owner's Billy R 2 2 2
Time—2:55, 2:51½, 2:55½.

Same day, running; dash of one mile; purse $150.

E. J. Beldwin's b c Gano, by Grinstead—Santa Anita 1
H. L. Samnels' b m Jennie G 2
Hill & Gries' b b Wildidler 3
Time—1:44.

April 7, running; dash of belf a mile, for two-year-olds; purse $150.

A. F. Machado's Charley David 1
Hill & Gries' Bacbelor 2
E. J. Baldwin'e —— 3
L. B. Strond'e Baywood 0
No time. Baldwin'e filly finisbed first but was diequalified for a foul.

Same day, running; beats of a mile; purse $150.

H. L. Samuels' b m Jennie G, by Wheatley—Black Maria 2 1 1
E. J. Baldwin's br b Alberi C 1 2 2
C. A. Paige'e b b Dan Rice 3 3 3
Time—1:47, 1:45½, 1:46½.

April 9, trotting; 2:30 clase; purse $200.

C. A. Paige's b s Max 1 2 1 1
C. J. Edgar'e Democrat 2 1 2 2
Time—2:49, 2:39, 2:42½, 2:43½.

Same day, running; dasb of three-quarters of a mile; for three-year-olde; purse $100.

A. F. Bland'e b c Woodbury 1
Hill & Gries' b l f Dottie Dimple 2
H. M. Jobneton'e Ela 3
C. A. Paige'e b b Dan Rice 0
Time—1:19½.

April 10, Running; dasb of two miles; purse $200.

E. J. Baldwin'e b c Lucky B, by Rutherford—Maggie Emerson 1
Hill & Griee' b b Wildidler 2
H. M. Jobnston'e Ela 3
Time—3:41.

Same day, epecial running race; quarter-mile beats; purse $—.

Owner's b b Suspender 1 1
Owner's b b Dick 2 2
Time—0:23½, 0:22½.

First and second money in all races, two-thirds of purse to first, one-third to second horse.

In the race for tha Newmarket Handicap the winner, the Duke of Beaufort's Faugh-a-Ballagh, was handicapped at 115 pounds; the eecond, Lord March'e Alizon, at 84 pounds, and the third, General Williame' Cohort, at 92 pounds. Mr. Keene's Golden Gate was assigned 118 pounds, which was scarcely right, in view of the fact that Faugh-a-Ballagh ran Foxhall to a head for the Aecot Gold Cup. At least the weights ahould have been equal betweeu the pair.

Maud S is to be sent to Hartford, where, after being worked into first-clasa condition, Blair will give a public exhibition. If in ahape she will he shown at the June meeting of Chester Oak Park, otherwise, at the regular circuit meeting there.

At the race at Lemoore last Saturday a seven-year-old work horse belonging to Mike White trotted against time in 3:15. The horsa was never before in trotting harnesa nor on a track.

Gus Stordick, a well-known trainer and driver, was thr wn from a sulky at Lawrence, Kan., recently, and killed.

Darby, 2:16½, who was retired two years ago on a bad leg, is being jogged again, and if he stands th ul preparation will be driven hy Dan Mace.

BLOOD HORSE ASSOCIATION.

First and Second Days of the Spring Meeting at Oakland Trotting Park—A Brilliant Win by Joe Howell.

A finer afternoon for racing than that of last Saturday could scarcely be imagined. It was warm without being the least oppressive, and there was scarcely a zephyr to give motion to the leaves on the willows. Notwithstanding the heavy rain of Thursday the track was in good condition; not so fast as it will be with a few more days of sunshine, though "safe" as it is possible for a course to be. The attendance was fair for an opening day, and there was no jar or hitch to mar the harmony, except a slight ruffle over the start of the second race. As the horse that got the worst send-off, however, was the winner, it did not change the result. Speculation was quite lively on all the races excepting the Winters Stake, that being conceded a sure victory for Gano. There is always a slight grating of the machinery on the first day of a race meeting, though there was very little in this case, and all the races were through with, so as to give the visitors from San Francisco plenty of time to take the 5:30 train from Shell Mound.

The first race on the programme was the California Stake, and it brought out a field of the most promising two-year-olds that ever raced in California. The starters were the Grinstead-Josie C filly, Mariposa, Rutherford-Glenita filly, Fiammi, Hirondella, Callie Smart, Prince of Norfolk; and the Bazaar-Tibbie Dunbar filly. The placing for positions at the start was in the order their names are written, and in the opening of the pool sales Mr. Winters' nominations, Prince of Norfolk and Callie Smart, were largely the favorites, bringing $50. Mr. Haggin's entries, Mariposa and Hirondella, were the second choice at $38, and the others grouped as "the field" at $25. There was the usual trouble in getting the youngsters off, and some time was consumed, though when the flag fell the start was first-rate. Fiammi had a trifle the advantage, retaining the lead until half way round the turn, when there was a general closing up of the ranks. Prince of Norfolk, from his outside position, had to run around the others, but before reaching the three-quarter pole he was given his head, and the jockey, Patsey Duffy, flourishing his whip, he ran past his opponent when nearing the bridge across the creek, and from then the issue was never in doubt as to his being first at the wire. For second position there was a spirited contest between the stable companion of the Prince, Callie Smart and Fiammi, the filly securing it by a neck. The time of the half mile was 0:52½, which is very fast for the state of the track. The following is the

SUMMARY:

California Stakes, for two-year-olds, to be run on the first day of the spring meeting; $50 each, $25 forfeit, $250 added, second to save stake. Dash of half a mile. Closed with thirty-two nominations. One hundred and ten pounds on colts, 107 pounds on fillies.

Theo. Winters' ch c Prince of Norfolk, by Norfolk—Marion (Duffy) 1
Theo. Winters' ch f Callie Smart, by Norfolk—Mattie A....(Courtney) 2
C. Van Buren's ch f Fiammi, by Monday—Abbie W.....(Williams) 3
J. B. Haggin's b f Mariposa, by Monarchist—Heliotrope; J. B. Haggin's ch f Hirondella, by imported Glenelg—Susie Linwood; W. L. Pritchard's ch f by Bazaar—Tibbie Dunbar; E. J. Baldwin's ch f by Grinstead—Josie C; E. J. Baldwin's b f by Rutherford—Glenita, ran unplaced.

Time—0:50½.

The next race was the Hearst stake, and of the eight nominations four came to the post. Those were Premium, Atalanta, Joe Howell and Jim Douglas, that being the order of placing that the drawing gave them. Jim Douglas was the favorite, bringing $60; Howell $37, and Premium and Atalanta, coupled, $20. There were four old and capable jockeys up, and it was thought there would be little trouble in sending them on their journey. This proved an illusion, as there were several breakaways, and when the start was made the official hung to his flag. The timing flag was not dropped until some time after the starting line was passed, and the only knowledge the spectators obtained was the fall of the banner in the hands of the assistant starter. Premium had a good deal the best of it; Jim Douglas decidedly the worst. Premium made the most of the advantage, being several lengths in the lead when the first furlong was run, though at the half-mile pole Jim Douglas had shortened the gap, Joe Howell and Atalanta two lengths in the rear The fight down the homestretch was very exciting, Premium and Jim Douglas running together, and "Old Joe" perceptibly gaining on them. He passed Premium at the trotting distance pole, and was surely gaining on the leader. Gallant as was the effort, the best he could do was to place his head a little in advance of the shoulder of Jim Douglas as they went under the wire, Premium an open length behind and Atalanta some distance in the rear. Owing to the delay in dropping the timing flag no time was announced, though some "outsiders" made it 1:16½ and the run from the half-mile was 50¾ seconds.

SUMMARY.

Hearst Stake, for all ages; $25 each, $10 forfeit, $125 added, second to save stake; three-quarters of a mile.

Densdale & Howson's b h Jim Douglas, by Wildidle—by Norfolk, 5 years, 120 lbs..... (Howson) 1
Stemler & Ayers' b h Joe Howell, by Bonnie Scotland—Eva Shepard, aged, 117 lbs..... (Duffy) 2
John Mackey's e m Premium, by Castor—by St. Louis, aged, 115 lbs..... (Carillo) 3
Theo. Winters' s m Atalanta, by Norfolk—Lady Jane, 4 years, 113 lbs..... (Courtney 0

No time.

The Winters stake, through the fear of Gano, dwindled to two starters, the second money, $150, being the inducement for Laura to put in an appearance. She was permitted to lead until a mile had been run in 1:46½, when Gano slipped by her without an effort, galloping in at his ease.

SUMMARY.

Winters Stake, for three-year-olds; $100 each, $50 forfeit, $500 added, second to have $150, third to save stake; one mile and a half; 105 lbs. on colts, 102 lbs. on fillies.

E. J. Baldwin's b c Gano, by Grinstead—Santa Anita.....(Williams) 1
J. B. Chase's s f Laura, by Shannon—Folly..... (Kelly) 2

Time—2:45.

The hurdle race showed some very fair jumping and also good riding. The first hurdle was taken so close that it was difficult to see which aurmounted it the soonest. Both tapped it with their hind feet, and the next was also taken in close company, both jumping clear. From this Hattie B led, and making the three succeeding leaps very cleverly, with a lead of many lengths, came home an easy winner in the very fair time of 2:27. In the poola Hattie B was the favorite at $80 to $40.

SUMMARY.

Hurdle race; purse of $150, of which $35 to second horse, entrance $[illegible]; one and a quarter miles, over five hurdles.

Geo. Winters' s m Hattie B, by Norfolk—Maggie Dale...(M. Johnson) 1
Boots' b m Mollie H, by Wildidle—Mamie Hall..... (Kelly) 2

Time—2:27.

There was another fine afternoon at the Oakland Park Wednesday, and so far the Pacific Coast Blood Horse Association has been favored with capital weather for racing. Those who came from San Francisco on the 1 p. m. train were surprised to be welcomed by sunshine when there was a slight rain when they left the city. There was a light breeze when the first race was called, but this moderated, and when the horses were brought out for the main race there was only a slight ruffle in the atmosphere. The track was fast, probably in about as good condition to make fast time upon as it can be made, and so there were high expectations of seeing fast time made. As the account of the mile dash will prove, this was not a delusive hope, and the fastest time ever recorded in California was written on the blackboard.

The first race on the programme was a purse of $150, for two-year-old fillies, and of the twelve nominations seven donned colors. These were Fiamma, the Bazaar-Tibbie Dunbar filly, the Rutherford-Glenita filly, Faustina, the Wildidle-Robin Girl filly, Milita and Callie Smart. The positions awarded were as above. Callie Smart was largely the favorite in the pools, generally bringing more than all the others, Palo Alto being the second choice, with Fiamma and the Wildidle to battle for the blue jacket and orange sash, and the others were grouped in the field. A very good start was given after a few breakaways, and the hopes of the backers of the favorite rose high as she ran from the ontside place to the front before the turn was finished. All were in compact order, however, and it was evidently going to be a hot struggle when the trying ordeal came of the run home. The Bazaar was coming, and the Palo Alto representatives were in the van when nearing the seven-furlong mark, the favorite having dropped back. The jockeys were all hard at work, the Bazaar and Fiamma head and head at the trotting distance, while from there the former managed to secure the lead, coming under the wire a short neck in advance of Fiamma, the daughter of Robin Girl close up. The others were grouped so closely together that it was difficult to separate them, and the time was 1:04½.

SUMMARY.

Purse $150, of which $25 to second horse; entrance free; for two-year-old fillies; dash of five-eighths of a mile.

W. L. Pritchard's ch f by Bazaar—Tibbie Dunbar..... (Howson) 1
Palo Alto's ch f Fiamma.....(Williams) 2
Palo Alto's b f by Wildidle—Robin Girl..... (White) 3

The others unplaced. Time, 1:04½.

The second race was a purse of $200 for maiden three-year-olds, but there has been such a succession of casualties among the colts of that age that of the nine entered only two put in an appearance. These were Laura by Shannon, and W. L. Pritchard's Bazaar-Minerva colt. The filly was largely the favorite in the betting, and the estimate proved to be made on a good basis. The distance was one and one-eighth miles, and filly galloped at her ease, winning in two minutes.

SUMMARY.

Purse $200, $50 to second; for maiden three-year-olds; one and one-eighth miles.

J. B. Chase's ch f Laura, by Shannon—Folly.....(Duffy) 1
W. L. Pritchard's ch c by Bazaar—Minerva.....(Allen) 2

Time—2:00.

The third race was a dash of a mile, free for all, and from the time the entries were published it has been an absorbing topic among those who are at all conversant with racing and racehorses. Four horses were named which were conceded to be among the fastest of any country, and if these reached the day in good health and up to the mark in condition, the contest would be the most notable ever run in this country at the distance. The quartet contained Gano, Jim Douglas, Joe Howell and Duke of Monday, and though there were twelve nominations, the fame of the four highflyers frightened all the rest, and rather than suffer sure defeat they were better off in the stable—at least, so reasoned their owners. Gano's reputation was grounded on his exploits on both sides of the continent. Notwithstanding a palpable loss of condition in his journey to the East, he ran so well as to compel the Eastern critics to give him a place among the foremost of the two-year-olds, and, more convincing proof of high standing, there have been numerous offers to buy him at a large figure. Jim Douglas has shown to be one of the fastest, and his race on Saturday gave a forcible illustration that he still retains his wonderful speed. Joe Howell is a marvel. At an age when horses are considered to be past all racing form, he shows he has been gifted with nearly perennial vigor, and grows better as the years roll round. Foaled in 1872; raced, hammered over the rough and hard country tracks of the Western States; traveled over the territories long journeys on foot; hacked and harassed in nearly every way until purchased by his present owners—it seemed like the height of presumption to think of rating him in the same category as the crack three-year-old and the big fellow who had six years the better of him in age. Duke of Monday has also exhibited great speed, though he has been unfortunate in the possession of a temper that rendered his powers of no avail. It was thought that a surgical operation might be of assistance in reforming the stubborn disposition, and so that was tried and much good expected to follow.

In the pool sales Gano and Jim Douglas ran closely together, the latter finally obtaining the lead. Speculation was unusually brisk, with little variation from the following rates: Jim Douglas, $125; Gano, $120; field, $35. The drawing for places gave Joe Howell the first, Jim Douglas was second, Duke of Monday third, and Gano fourth. The start was rather scattering, Joe Howell having the advantage, Jim Douglas next to him, Duke of Monday lapped on Douglas, and Gano in the rear. They were so close to the starting point when the flag fell that they were not moving very fast at the time, but it did not take long for all of them to get into their stride, and before the first turn was half made the pace was very fast. Going down the backstretch Joe Howell had a lead of a clear length, Douglas second, and Duke of Monday third. When the half-mile post was passed, in fifty-one seconds, the nose of Douglas was on Howell's hip, and Gano ranged alongside of the Duke. At the middle of the curve of the further turn Howell drew away a little and came into the homestretch a trifle in the lead. Douglas was still second, and though Gano ran wide he was only a short distance behind. The race from thence was as fine as ever seen. Howell was answering every call of his jockey with unflinching gameness, Douglas was striving with equal determination, and the gallant three-year-old was closing on them at every stride. He had run on the outside on both turns and consequently lost ground, but for all that the pace was so fast he was still coming and coming again. The four were close together at the seven-furlong mark when the Duke retired, and about one hundred yards from home Douglas had to succumb. The head of the colt was on Howell's hip, at the trotting distance it was at his saddle's girth, sixty yards from home the clean-cut countenance was on the shoulders of the veteran, further it could not reach. There was not a sound from those who were so eagerly watching when this determined duel was waged; not an exclamation until the bright cherry jacket and gay sash swept under the wire these few inches in the lead, when there was an uproar that would have drowned the "banner cry of hell" that Sir Walter Scott in imagination heard in the highland glen. It broke from the stands in varied tones, the musical voices of the ladies adding harmony to the coarser notes of the men, the excited speculators near the poolstands catching up the refrain, winners and losers forgetting profits and losses in the wild excitement of the moment. With all this exhibition of enthusiasm on the outer side of the track fence, a scene was enacted on the course which far exceeded it. The course had been admirably kept. Not an individual save the energetic Marshal on the qurater stretch until the horses were by. In an instant there were masses tumbling over the obstructions, screeching, yelling, jumping, gesticulating in a fervor of feeling uncontrollable, for a moment beyond themselves in a furor of excitement. There was no waiting for the tale of watches, "time" for once was forgotten, and as "old Joe" and his jockey returned to weigh in, the cheers broke out again in such a volume of sound as to jar the judges' stand and caused the lever of the scales to vibrate as though an earthquake had shaken the structure. Once more when the figures were hung out came the shouts, for there was 1:42, the fastest ever made on the Pacific coast and a long way in front of anything as yet recorded in the annals of 1883. The old horse and the youngster had made the best effort of their lives, and though the dollars fell to the lot of the elder, honors are easy when the glory of the contest is to be weighed. The others did well, Joe Howell and Gano admirably.

SUMMARY.

Purse $200, $50 to second: dash of a mile.

Stemler & Ayres' b g Joe Howell, by Bonnie Scotland—Eva Shepherd..... (Duffy) 1
E. J Baldwin's b c Gano, by Grinstead—Santa Anita.....(Alvarado) 2
Densdale and Howson's b h Jim Douglas, by Wildidle—by Norfolk..... (Howson) 3
John Mackey's b c Duke of Monday, by Monday—by Demirep..... (Carillo) 0

Time—1:42.

The next race was a selling race, the starters being Maria F, which was put in at a valuation of $600, which entitled her to an allowance of eight pounds, Certiorari, $500, taking ten pounds off, and Belshaw at $400, which reduced his weight twelve pounds. Maria F was largely the favorite in the pools, and well she justified the reliance placed upon her. The distance was 1⅛ miles, and the first time they came up a capital start was obtained. Belshaw had the lead when he passed the stand and retained it to the half mile, the five furlongs run in 1:04. Rounding the turn he had to surrender it to Maria F, and soon after Certiorari gave him the go-by, though he could not reach the filly, who galloped in the very fair time of 1:58½. She was put up at auction, but failed to elicit an advance on the valnation. She is still a member of the Rancho del Paso string. Should she win the cup today (and many stranger things have happened on the turf) there will be numbers to regret the missed opportunity.

The machinery moved very smoothly, and there was plenty of time after the conclnsion of the races to saunter to the five o'clock train to the city. There was not a dissenting voice when the afternoon's sport was proclaimed of the best kind, and though there were many who counted their losses by hnndreds, even those assented to the proposition.

SUMMARY.

Selling race; purse $175, of which $25 to second horse; entrance free; dash of one and an eighth miles; horses entered to be sold for $1,000 to carry their entitled weight; two pounds allowed for each $100 under that valuation; horses entered for over $1,000 to carry three pounds over entitled weight for each $100 above that valuation.

The Pierce Sale.

An auction sale of horses and cattle from the stud and herds of Henry Pierce will be held by Killip & Co., at the Oakland Trotting Park, next Friday, May 4, the horses to be sold including trotting, road and draft animals. Among the high-bred trotters offered appears the grey stallion Alonzo Hayward, and the four-year-old Bertie Hayward, full brother to Newland's Poscora Hayward. The cattle are from Mr. Pierce's well-known Jersey herd and the sale will afford an opportunity seldom offered in the State to secure fine animals.

THE KENNEL.

The Bench Show.

The BREEDER AND SPORTSMAN goes to press too early for us to be able to give any account of the opening of the bench ehow, except the general facts, in this issue. Keeping open the entries until the day set for opening set back the work of preparing the catalogue considerably and as nearly as we could estimate there are in the neighborbood of 390 doge on exhibition. The kennel arrangements of the hall are good and tasteful, though at the last moment it was found that there were not enough benches and extra ones had to be built on ehort notice. The sporting dogs occnpy the place of honor on the center of the floor while the yard and watch dog are relegated to a back seat under the galleries. At the top of the hall, facing the entrance, the fowls are displayed. The lot on exhibition are fine in quality though not great in number. At the last meeting of the Kennel Cluh it was decided to hold a pnblic auction for the benefit of exhibitors on the night preceding the close of the show. Thie will he after the awards are made, and when every one has had a splendid chance to compare the dogs on exhibition. Among the probable sellers is Mr. Leavesley of Gilroy who has put hie kennel on exhibition and will offer several Gordon and field trial dogs of the best strains. Mr. Post of Sacramento put his dogs on exhibition and tbus disposed of all the nasty talk about judges entering dogs under assumed names. Mr. Hutchinson of Los Angeles, nephew of the celebrated Colonel Hutchinson, whose work on dog-breaking is standard the world over, sent up for competitiou one of the finest specimens of a rough deerhound that we have ever seen. A dog of immense size and power, able to cope single-handed with a hig stag, he is a rare dog in these parts and will no doubt attract a good deal of attention during the show. The canine curiosity from San Bruno road—half hear, half mastiff—occupies a place of honor on the stage and serves well to terrify small children. But we must not forestall what we have to say about the dogs before our next issue. It is to be hoped that the winners will uot be unduly elated and that the losere will take their disappointment in good part.

A Carping Critio.

The *American Field* has a good many readers on this Coast and some few friends among the members of the S. F. Kennel club, therefore it seems strange that the paper should offer no encouragement to the gentlemen who, at great coet of time and convenience, are striving to make a snccess of the bench show. There are lots of kind things that the *Field* could say ahout the disinterested workers of the Keunel club but instead of picking at random some point for commendation all jit has to say about the ehow is the following sneer:

"The Pacific Coast Kennel Clnb, at their bench show to commence in San Francisco, April 27, have instituted classes for Field Trial or Llewellin setters, and for Laverack setters. There are two Laverack setters on the Pacific Coast, Prince Laverack and Lulu Laverack, both owned by Mr. John Gale, of Oroville, Cal.; I believe he bas also some young pnppies of this strain. As these are all, the absurdity of estahlishing a class for Laverack setters is at once apparent."

Jnst where the absurdity of the thing comes in is hard to see. No one is wronged and no false impressions are created, and if the managers choose to go to the expense of $60 for medals for an extra class, it is surely no one's business. Auy one who owned a Laverack had the right to enter it as an English setter and it would have to be judged as such, pedigree or no pedigree. As to the special class for Llewellins, there will probahly be fifteen or sixteen of this strain on exhibition and were there only two the same argument would apply.

Cross Bred.

ED. BREEDER AND SPORTSMAN: Noting "A Stickler for Pedigree," in yonr issue of April 21, your note is the fact; hesides which a cross between a pure-bred pointer and a pure-bred setter is not a half breed or a mongrel. He would he rated (as we rate sheep, cattle and swiue) as a cross bred, i. e., thoroughbred on both sides and crossed in family to gain certain points. S.

FISH.

Inharmony and Inaction.

The Fish Commissioners have done nothing towards re-atocking streams, and it ie highly probahle that their former efforts in this direction will be entirely suspended. Various causes are assigued for this neglect, the principal one heing that the harmony so requisite to the proper discharge of their duties is wanting. The views of the members of the board are entirely antagonistic. The announcement that the commissioners would devote the entire State appropriation to the exclusive propagation of salmon, and that no attention would be paid to the culture of trout or of other choice fish, has provoked considerahle comment among anglers, who fail to see any good reaeon for anch a departure from past efforts of other commissionere. The principal objection which is made to this proposed action is that the interest of private parties will be served in preference to those of the general public. It is well known that of late the choicest fishing grounds have been allowed to hecome depleted, hoth from fiehing out of eeason and from the neglect to stock them with fieh as the neceesity for so doing arose. Paper Mill creek is barren, notwithstanding the statement in a contemporary that on Wednesday of last week an angler caught 115 fish in eomething less than two hours. A number of gentlemen who visited that stream on Sunday returned to town on the following morning after having fished all day Sunday and taking only eight emall tront. Carmello is quite as had and nothing better can be said of the streams in Monterey. Over 1,000 trout eggs are awaiting the pleasure of the Commission at Lake Tahoe but no effort ie made to secure them. The members of the board live at remote places, so the concentration of purpose or of work is wholly out of the question and anglers and sportsmen generally are the sufferers.

The Boss Club.

A number of gentlemen of this city some time ago organized a club under the name of the Boss Fishing Clnh and frequently took a spin around the bay in search of choice gronnds for eport. On Snnday last the party chartered the yacht Restless and the steam-tng Annie Hart and sailed to Lime Point, where they anchored and cast lines. Experiencing indifferent euccess Searlea beach on Angel Island wae next viaited, where the day'a eport following an election of officers was fast and furious. Clem Dixon was elected Preeident, John Muller Manager, and H. Pitcher Secretary. Messrs. Hager, Sullivan and Hopkins were appointed a committee on arrangements. The name of the clnh was changed to that of the Walton Fiehing Clnh. A liberal allowance of chowder was provided, and so excellent was the succulent clam that one of the memhere carefully collected the ecraps in a tin can that had grown rusty with exposure, preparatory to bringing some of the chowder to friends in this city. Some of the jocularly inclined members of the club took the precaution to empty a good portion of the chowder, refilling the can with salt water and adding a large stone to give hody and weight. The ruse enceeeded, for the provident angler carried his precione cargo with him on the return trip and then took it to his place of bnsiness on Commercial street in anticipation of a right royal feast. What effect the clams had on the rock is not told, but the angler was riled and vowed eternal vengeance upon practical jokers generally.

Some good catches of trout were made during the past week, especially in the vicinity of Pescadero, where salmon are reported to be running quite freely. Tuesday J. H. Allen of thie city and a party of friends caught some sixty odd in the space of four houre, some of the fish running as high as seven inches. As a general rule, however, the reports from other localities are disconraging and the outlook for a successful season was never worse.

A fisherman, John Thompson by name, pleaded guilty to the charge of stretching his net more than one-third of tbe way across the stream at the straits of Carquinez. For this offense he was fined $50 by Judge Cox. A few such examples as this will prove a check on tbis law breaking.

James Hamilton, fishing tbe other day in the Honsingers creek, a tributary of the Pescadaro creek, in an hour's time caught twenty-eight handsome tront; he reports fair fishing along the Pescadaro especially at or near the mouth.

Ben Burling, fishing along the Carson creek, one of the tributaries of the Lagunitas, brought home a large basketful of fair-sized trout as the result of his day's angling.

Last Sunday Chas. Precht on a stream at no great distance from town caught thirty trout that averaged eight inches in length.

Jersey Belle of Scituate, 7,828.

Her claims to celebrity, and her descendants to euperiority are based on three conclusions:

First, her own record.

Second, the records of her aucestors and relatives.

Third, the records of her descendants.

Under the first head, we give her record in a short history of the cow. Jersey Belle was dropped June 10, 1871. Her breeder, Mr. E. D. Sobier, a promiuent lawyer of Boston, had at his summer residence at Cohasset, Mass., an imported Jersey cow, Fanny, 7,823, which supplied his family with milk and butter. This cow was bred to Victor, a bull kept uear by, and gave Jenny, 7,827. When Jenny, the petted heifer calf from his imported cow, became of age she was also bred to Victor and dropped a heifer calf. He had no use for more than one cow, but he would keep two since he had been to the trouble of raising Fanny's calf. This new one was ordered killed. His man abont the stahle hated to do it and offered to give it to any one who wonld raise it. By chance Mr. C. O. Ellms came in his way and for some time it was a daily questiou: "Say, Ellms, are you going to take that calf?" Ellms did take it after a time and wintered it. Having more cows than he wanted, he was ahout to sell this one for a few dollars, when an old cow died and made way for this calf, which was none other than Jersey Belle of Scituate. For the first year of her life, she was not regarded as auything more than common. During her fifth year Mrs. Ellms, the aged mother of Chas. O. Ellms, remarked the intense yellow of the hutter, which led to separate milking and the fact that Jersey Belle was the rich one. That winter (February, 1867) she calved, and attention was paid to her yield. Ou the 5th of March she made 3 pounds 6 ounces of butter; that week, 21 pounds 5 ounces, and in eleven daye, 32 pounds. For five months she averaged 19 pounds per week. One morning's milking in July made 1 pound 10 ounces. Up to August 1, ehe made 400 pounds; to September, 472; to October, 532 aud to March 5, 1878, one year, a total of 705 pounds. With her next calf, (May 10, 1878) she made 22 pounds 13 ounces. This was tbe time the test of Eurotas was made, and during that year those interested in Jersey Belle watched carefully for the reporte of Eurotas, and when it became certain that she was to heat the record, Mr. Ellms wae urged to grain Jersey Belle and "go for Enrotae' record," which he refused to do for fear of epoiling his cow. Later on, he was prevailed upon to test for a week, which gave the record which has as yet never been heaten. It began June 15, 1880, and ended the 21st. Her flow of milk was 45 pounds a day at the outset and 44 at the end. Four days she gave 14 pounds 8 ounces of butter and the next three, 10 pounds 11 ounces, or a total of 25 pounds 3 ounces for seven days. This heing some pounds better than the beet week of Eurotas, (to be precise, 2 pounde 12 ouncee) it was evident that she was the best cow and would win if pnshed to the test. Of the truthfulness of thie record, there can be no doubt to the well-informed mind. Men were watching it whose money would buy if they were satisfied, and they scrutinized each step. The people of the town (Scituate) were proud of having euch a cow in their town, and resorted to her stahle at all timee. Lovers of Jerseys from afar came to see, and one lady (Mrs. E. M. Jones of Canada) came and stayed over night. She wrote of her vieit to the *Country Gentleman* as follows: "" " " Next morning, October 31, she was milked (Jersey Belle) and yielded fourteen pounde of milk which I expreeeed a desire to see churned separately. As my stay was to be ehort, Mrs. Ellms scalded the milk and eet it away in two pane. The next morning wo skimmed the cream, etirred it in a bowl (the Devonehire way) and in a few minutes the hntter had come. It was worked free of huttermilk and a little salt sprinkled in, when it was set away for eome hours. It was then reworked till dry and firm and made up into four pats, which I now eend you exactly as I got them, that you may judge for youreelf, both as to color and weight. You will find one pound and a quarter of butter which was made, etrictly and solely, from that one milkiug of fourteen pounde. " " " "

This is hut one of many iustances of people who, haviug read of the cow, came from great distances at various times to see her, whose testimony is available, if necessary, to eutain the reputation of this grand animal. Others, men of note and reputation in Jersey literature, championed her in the papers, notably Peter C. Kellogg and D. D. Biehop, men who only write of what they kuow and whoee words are believed. But besides all this, there remains but one bit of evidence, modeet but the moet conclueive. Mrs. Ellme was heloved hy all who knew her. Of old hlue blood, puritanical family, ehe welcomed you at the door; her face and carriage were honesty itself. With pride, ehe talked of her town and her neigbors, showed her heirlooms, the old mahogany furniture and the Waehington pictures; from the window ehe pointed to Marehfield and talked of Webster. She was an Otie (that'e where Chas. Ellms gets his O., Chas. Otis Ellms is hie name) and patriotism was part of her nature. Thie grand old lady kept honse for her hachelor son Charles, a man of middle age, who was to her then aud alwaye, "Charley." It was she who set Jersey Belle'e milk, skimmed the cream and churned the hutter, and it wae her word which told the yield. No greater indignity can he offered than that which would place the sworn statement of man against the simple word of this noble woman of the old school.

Under the eecond head, we find that large yields are not uucommon in her family and that she wae the unforeseen reeult of a certainty, for ae we breed to-day, with the preeent abundant kuowledge of Jersey cattle and their characteristics, the inbreeding of euch an array of animale of large yield would he expected to produce grandeur. Notice the list: Countess 114, 16 pounds in seven days; Flora 113, 511 pounds 2 ounces in 50 weeks. Czar as grandsire, Countess of Lakeeide 12,135 which made 19 pounds 7 ounces in seven days; Dick Swiveller Jr., as sire Jersey 3,260, 14 pounds 2 ounces and grandsire of Gilda 2,779, 14 pounde 6 ounces in seven days. Jersey Queen of Barnet A. H. B., 4,201, has a large percentage of blood in common with Jersey Belle; her record was 851 pounds 1 ounce in one year. Maud Lee 2,416, record 23 pounds per week, also hae ancestors in commou witb Jersey Belle. Effie, A. H. B. 885, made 23 pounds 2 ouncee in seven daye and 98 pounds in thirty days; also Gazelle of Lakeside 10,243, 13 pounde 6 ounces in seven daye, having the nse of only three-fourths of her udder.

Under the third and last head, we have the tests of her daughter, Belle of Scituate, 7977, which with her first calf made 10 pounds at four years old; with her third calf, 16 pounds, and the year after, 18 pounds per week. The following is the list of the progeny of this remarkable cow:

Belle of Scituate, dropped May 4, 1875.
King of Scituate, dropped February 25, 1876.
Duke of Scituate, dropped February 25, 1877.
Lase of Scituate, dropped May 10, 1878.
Lady of Scituate, dropped in 1879.
Maid of Scituate, dropped in 1880.
Scituate, dropped July 10, 1881.

Belle of Scituate was the first daughter in milk, consequently the first to be tested. The next, Lase, has no published record, but we nnderstand she has made a large yield. The other two daughters are not yet old enough to test. Of the hnlls, Orestes Pierce, East Baldwin, Me., owns King; A. B. Darling, New York, did own Duke, but he ie now dead.

The Sharpless estate owns Scituate. Mr. Pierce also owns Lass of Scituate, a daughter, and also the bulls out of Belle, the first daughter, by King, her brother. The ownership of these with their descendants makes him the owner of probably the largest percentage of Jersey Belle of Scituate blood. Jersey Belle of Scituate died in 1881 of milk fever; her udder, soon after calving, measured five feet eight inchee in circumference.

Henry Pierce has at his Yerha Buena ranch a grandson and daughter of this world-renowned butter cow, Jersey Belle of Scituate, the blood of which will he distributed on this coast.

The Newmarket Handicap.

Among the racing features at Newmarket on the 13th—the last day of the Craven meeting—was the Newmarket Handicap, over the last mile and a half of the Beacon Course. It had seven starters and was won by the Duke of Beaufort's Faugh-a-Ballagh, followed by Lord March's Alizon and General Owen Williams' Cohort. The race was run under the following couditions:

The thirty-ninth renewal of the Newmarket Handicap, for three-year-olds and upwards, at £15 each, £10 forfeit, and £5 only if declared out, with £200 added; winners after the publication of the weights, extra; closed with twenty-three subscribers; about a mile and a half.

Duke of Beaufort's ch c Faugh-a-Ballah, 4 years, by Lord Gough—Weatherglass..... 1
Lord March's b f Alizon, 3 years, by New Holland—Genevieve..... 2
General Owen Williams' br c Cohort, 3 years, by Vespasian—West Kent..... 3
Six others ran. The weights carried in the above handicap cannot be given as they were not announced in England until April 5.

Faugh-a-Ballagh was bred in Ireland and made hie debut as a two-year-old at the Curragh September meeting in 1881, and although he started favorite failed to get a place and was almost immediately sent to Newmarket. At the Houghton meeting and subsequently at Warwick he ran unplaced under the colore of the Duke of Beaufort. As a three-year-old he won the Riddlesdown Plate at the Epsom spring meeting, which was his only win out of six starts. He was beaten by a neck for the Ascot Gold Cup by Foxhall. It will be remembered that Faugh-a-Ballagh was started for the Ascot Cup to make the running for Petronel, with which the Duke of Beaufort expected to wiu. After they had run nearly two miles Archer, who was riding Petronel, fouud that he could not beat Foxhall aud signaled the fact to Martiu, who was ridiug Faugh-a-Ballagh. Martin obeyed the signal so well that it was as much as Tom Cannon could do to wiu with Foxhall. In fact, Mr. Keene's horse was so used up that he was beaten next day for the Alexandra Plate, and many English writers claim that he has never heeu the eame horse since. It is understood that Mr. Bathgate, who managed Mr. Keene'e etahle last year, says that Foxhall wae in no fit condition to run such a race as he did for the Ascot Cup, and that his success under the circumstancee ie proof of his real greatuess as a racehorse.—*World.*

Since January 1, 1883, A. P. Kuffell has shipped from the Santa Ana valley to San Francisco, 1,982 head of hogs, weighing 406,139 pounds. He has bought them at an average price of 6¼ cents per pouud, making a total of $26,409 03.

A match at 25 birde, 18 yards rise, for $25 a corner, will be shot at the Oakland Trotting Park on Sunday, May 6, between Messrs. Edwards, Fuller and Muller.

The trotting stallion Billy Hayward is offered for eale in our advertising columns this week. He needs no introduction to the horsemen of this State.

The Scotch, always a thrifty race, are investiug largely in American cattle ranches. During 1882 ten large ranches for herding cattle were bought by Scotchmen.

E. F. Walker of Jackson county, Oregon, has added several fine Shorthorns to his herd.

Charlee Harriman hae gone into the saloon [illegible] at Truckee.

ROWING.

McInerney and Peterson.

On Sunday, May 6, McInerney, the eastern sculler, and Peterson, the San Francisco champion, will meet on the Long Bridge three-mile course to decide their match; McInerney's boat has arrived and every day he takes a couple of pulls over the course. His boat was made by Blaikie and is much admired by the local connoisseurs. She is 31 feet long and 12 inches beam, very full, and carries her ponderous owner as if she were a regular ship. She was a revelation to some of the amateur boat-builders of our metropolis and has been the cause of temporarily depriving Long Bridge of the attraction of some of the ambitious naval architects. When Henry Hussey threw his scientific ogle along the beautiful lines of the eastern craft, he turned as pale as John O'Day after a hundred-yard dash, and started for home on the run. Nothing has since been seen of him by the Long Bridge scullers. It is said that at unseasonable hours of the night sounds of planing and hammering are heard in the amateur builder's workshop and the friends of the missing oarsmen are thereby afforded some grounds for hope that Mr. Hussey has not drowned himself in despair but is merely turning off a copy of Mr. Blaikie's boat that will astonish the rowing world. McInerney's boat although she has passed through the hard work of two seasons weighs but 31 pounds. She is of Mexican cedar and fitted with Davis rowlocks and a 26-inch slide, which is none too long for the gigantic oarsman who uses it. Her outriggers are of the three-legged pattern and are of prodigious thickness, the rods being half an inch in diameter. McInerney usually rows with his footboard very close to the slide. He has discovered, however, that the rig which is most serviceable in eastern waters is not the best for the San Francisco bay where there is always a ground swell and generally a stiff cross wind and a troublesome "chop." His outriggers were 56 inches in spread and he used a 9 foot 4 inch scull in the first week of his practice but he has discarded both and will row the race with 58-inch outriggers and 9 foot 8 inch sculls formerly used by Jack Largan. The latter sent them from Australia to M. Price, and the eastern man having a hankering for English sculls borrowed them. The sculls appear to be in several respects far superior to some of the best sculls by leading American makers. Although the wood is not of as good quality as that used by Donohua, the sculls are very light and remarkably stiff in the blade. McInerney's practice pulls have been watched closely by the Long Bridge men. Harrows from the Golden Gate club house and takes two spins a day over the course. At 7 a. m. he takes a pull past the rolling mills and after breakfast has another lively spin over the three miles, finishing at a lively pace. His style is easy. He slides up well and pulls the stroke through neatly but has a peculiarity of finishing which excites the adverse criticism of the Long Bridge experts. He is a very deceptive rower and goes along much faster than the observer is likely to imagine. There has been a noticeable improvement in his form during the week and he will probably show up well on the day of the row. Peterson has, however, had the advantage in the training. He has been hard at work for weeks in his boat, which is the best kind of work for a rowing contest. While McInerney has of necessity been reducing his weight by long tramps on land, the San Francisco Boy has been toughening his stout muscles by hard pulls through miles of rough water. He is consequently in splendid condition, hard as nails and full of vigor. A pull of eight miles scarcely effects him and he generally gets out of his boat ready to row over the course again on time. Con Lynch is training him carefully and has great confidence in the boy's ability to win. The Long Bridge men with a few exceptions have the same opinion and if the Eastern man carry off the honors it will be a blue day for the South End oarsmen. McInerney does not appear to be in the least discouraged by Peterson's backers. He goes on quietly and systematically about his business and has won friends by his modest and determined course. He makes no pledges of winning and only says that he will be sure to give his man a good race. Under his unassuming demeanor there is evidently confidence in his ability to win and no one will be more astonished than he if Peterson should beat him as easily as some of the boy's enthusiastic admirers expect.

The Boston *Herald* of the 8th inst. says: About ten days ago McKinney, a Washington amateur sculler, who was trained by John A. Kennedy, and of whose speed on the water Kennedy is well competent to judge, rowed alongside of the Toronto champion while he was taking a spin on the Potomac, as if to challenge him to a struggle. Hanlan apparently accepted the challenge, and soon the boats were flying over the river at racing speed. At last Hanlan stopped rowing, and McKinney was declared by the lookers-on to "have had the best of it." Indeed, Hanlan himself did not deny the statement that McKinney out-rowed him, and gave the amateur credit for being an excellent sculler. Hanlan had suspected, however, that McKinney was sent out to "feel of him," and was willing that the Washington man should have all the honor his friends claimed for him. A few days later McKinney again pulled up alongside Hanlan and once more opened out at a racing pace. Hanlan reflected a moment, smiled at McKinney's temerity and then "let go." When they had rowed half a mile McKinney looked over his shoulder, and, finding that he was far behind the champion, he ceased rowing, and slowly paddled back to the Potomac boat house, wiser and sadder than when he launched his shell for the practice pull. He now avoids the champion, and Hanlan sees very little of him.

The proportion of deaths among those who have rowed in the Oxford-Cambridge races since 1829 is shown by a carefully compiled "Record of the University Boat Races in 1829-1880," recently published in London, to be below the average death-rate. Out of 485 who had taken part in these races there were 370 survivors residing in Great Britain two years ago, besides others who could not be traced. Many of these had become clergymen, several reaching the position of bishops. The legal profession also absorbed many, Justices of the English Bench being among the number. Mr. Waddington, ex-premier of France, rowed in 1849, and Dr. Hornby, head master of Eton, in the same year. Mr. W. Spottiswood, president of the Royal Society, is also a 'Varsity Crew man. Altogether the list of intellectual oarsmen from Oxford and Cambridge is remarkable, and speaks well for the great institution of crew training and its effects. The ideal which reasonably co-ordinates mental, moral and physical training, permitting no dispargement of either, is nobly borne out by such showing as is presented by these statistics. The thin-veiled doctrine of monastic denial and scorn of physical life which Dr. Crosby is trying to revive in this country, stands ill in the face of such facts.

During the past two weeks there have been omnious signs of war on Long Bridge and the heavens have at times grown gloomy with the terrible denunciations of the man who takes out other people's boats. It is hardly necessary to say that this arch-confiscator of other people's property is a full bloom supervisor. The ruling passion of his class is so strong that he cannot keep his hands off anything that has not a lock or chain on it. The offender is a very young man with a growing family and a bright future, and in view of the attractions of life that are presented to him it is to be hoped he will not any longer tempt the coroner by persisting in his nefarious course. In this delicate hint, written at the suggestion of three distressed owners of racing shells, the identity of the villain is so carefully veiled that only his nearest friends will recognize him. It is to be hoped that he may profit by the warning and not darken the pages of aquatic history by unnecessary bloodshed.

None of the clubs are anxious to make up a crew and contest for the cup which the BREEDER AND SPORTSMAN offered last year. The cup is now in the custody of the BREEDER AND SPORTSMAN awaiting another contest, and the season having commenced, a second race should take place. It will not be to the credit of the rowing men of the crew which won the trophy with such ridiculous ease to be allowed to retain possession of it on the strength of one race. The Pioneers should shake off the lethargy which has oppressed them and organize a new crew. The North Beach clubs seem to have no ambition for championship honors, but it is not impossible that a good four could be obtained in that end of the shore. There is a crying need of something to be done.

President Growney of the Ariel club lately purchased a pair of blue spectacles and has thus assumed such an intellectual appearance that he no longer condescends to level his challenges at anything less dignified than a member of the Legislature. He offers to row Assemblyman Murphy in wherries two miles and gives the eminent law-maker the privilege of rigging his celebrated craft in any way that suits him. Mr. Growney does not bar jib-boons and will even permit the learned oarsmen from the Potrero to use one of his printed speeches as a mainsail if that will coax him into the match. Jim Brannan, who is ready to challenge the winner, is watching negotiations with deep interest.

The Washington correspondent of the Chicago *American Sports*, writing in reference to the training of Hanlan and Kennedy, says: "We have among us many experienced scullers, and I have one yet to find that has a word of fault to find with Kennedy as compared with the champion; indeed, the expression is that if he cannot give Hanlan a fast race, and a pushing one at that, the man does not exist that can. I saw both out on the river lately, and the rate of speed they obtained, while seemingly going with apparent ease, was marvelous, and Plaisted tried to hold them alternately, but they went past him like a flash."

Beef as a Bonanza.

It is estimated that the annual cattle sales in the United States amount to about $300,000,000. This wealth has been greatly increased by the large augmentation of thoroughbred cattle. The "American Herd Book" has been extended to 23 volumes. These volumes are occupied with the record and pedigree of 60,000 cows and 47,000 bulls, and all of one class, viz: Durhams and Shorthorns. The best beef which finds its way to market is that of graded Durham cattle. The *Agricultural Review* makes this comment: One not intimate with the subject might suppose that with such an array in numbers of our Shorthorns the prices of them would gradually diminish at both the public and private sales, now so frequent and in such large numbers in our State. Such, however, is not the fact. Average sales are now equal to prices at which they have ever been. During the last five years the public sales have annually averaged 3,000 animals—bulls, cows and heifers—at an average price of $162 per head, while probably an equal number have been sold at private sales and at somewhat higher prices. Many of them have sold for $1,000 and up to even $10,000 each, so esteemed for pedigree and quality are they by our enterprising breeders. Much higher prices, indeed, have been obtained in some past years, even as high as $25,000 and upward for single animals from eminent English breeders who have come here after them; but that was in a time of high excitement in Shorthorn rivalry, and need be noted only as one of the extraordinary fluctuations in their progress. The unfamiliar reader may ask where is the great demand for these cattle? Where is the market for the several thousand bulls annually produced? The question is readily answered. Until recently herds of cattle by hundreds of thousands roamed over the broad ranches of Texas, New Mexico, Colorado and California, of the descendants of the original Spanish importation into Mexico in the sixteenth century. Ranging over the vast plains and pampas of that mild climate, they increased multitudinously. Texas became full of them, New Mexico also; and since the incoporation of these countries with ours, uncouth and ragged as they were in their wild condition, those cattle have been brought to the subjection of civilized stockmen, arranged into herds, branded with the marks of the owners, and at marketable age driven through the Indian Territory into Kansas, and thence to Missouri and Chicago markets, either for immediate slaughter, as their conditions would afford, or sold to the grazers and feeders for a better market Eastward. These wild cattle are unfit for choice beef, but the cows, crossed on the ranches by Shorthorn bulls, produce tolerably good steers, partaking strongly of the blood and forms of their sires, and become marketable animals, with good pasturage and grain topping-off in the hands of the corn-growing grazers who purchased them. The grading up of cattle in the West and Southwest has been going on rapidly within the last ten years. It would be difficult to decide whether Illinois or Kentucky is the center of the short-horned breeding interest in this country. The center, whatever it may be, is a movable one. The long-horned, half-wild animal, is rapidly disappearing. Droves of these cattle are now rarely seen. They have been displaced by better ones.

The directors of the new agricultural district, No. 12, comprising the counties of Mendocino and Lake, met at Willits on the 11th inst. and organized by the election of E. C. Buel, President; D. Frank Vincent, Secretary, and Wm. M. Perry, Treasurer. In drawing lots for length of terms L. G. Simmons and B. B. Capell drew one year, E. C. Buel and J. H. Rufus two years, H. Willits and G. Scudamore three years and R. F. Miles and P. Muir four years. It was decided to hold the fair for 1883 at Willits and the president was authorized to secure the grounds of the Mendocino Agricultural Association for the purpose. The fair for 1884 will be held at Lakeport.

BASE BALL.

Fourth Champion Game of the California League.

The attendance at the fourth game of the champion series, which took place at the Recreation Grounds on Sunday, showed a material improvement in the number of spectators, and gave flattering promise of an usually interesting season. The playing of the various clubs composing the league has steadily improved with each game, until the teams may now be said to have reached that degree of proficiency which insures close and exciting contests. This was especially noticeable in the game between the Haverly and California clubs, in which the batting and fielding were at times brilliant. With few exceptions, the fielding was such as has not been seen for a considerable time in this city. The occasion was noticeable for the reappearance of the veteran and popular player John Cullen, formerly catcher of the old Athletics and Occidentals and prominently connected with the sport in later days. His playing was decidedly erratic, wholly on account of his lack of practice, and the same may be said of his batting. His rapid and accurate throwing to bases was generally commented on, and warrants the belief that in course of two weeks John will sufficiently recoup his forces to hold his own against other short stops. The Haverleys throughout the game played hard, batting with excellence, and fielding accurately. In fact it would hardly be too flattering to their prowess to say that if Sunday's game is an accurate indication of their general play, they are fully qualified to take chances with any picked nine in the State. That they will soon find foemen worthy of their steel in the club which they recently defeated is beyond doubt, as the errors counted against the Californias were committed by experienced ball tossers out of practice. The former club was in good form at the bat, and their in and out fields were exceptionally good, and their totels for eight innings, the last not having been played, give a record which the club may well plume itself on. The game commenced with the Californias at the bat, Piercy leading off with a slow hit to short and dying on the first bag. Cullen fanned out, J. Smith getting in a single bagger and continuing the run to second, where he was caught napping. The Haverlye were whitewashed on their first turn at the bat. McDonald opened the second inning for the Californias by retiring on a fly to Sohr, McKenna out on strikes, and French hitting hard to left, and reaching the plate for the first run on a wild throw from behind the hat to cut him off at third. Neither team scored on the third or fourth inning, the Haverlye closing over fifth with four runs by dint of heavy batting coupled with the fact that the Californias acted as if they were considerably roiled. From this stage of the proceedings until the conclusion of the game, the Haverlys maintained their lead, the Californias making a desperate effort in the eighth inning in which they scored two runs and batting unfortunately in the ninth, leaving the Haverlye seven runs ahead with one inning to play, which they waived. Following is the score:

HAVERLYS.	TB	R	BH	PO	A	E
Carrol, c	5	2	2	14	2	1
Sohr, 1 f	5	1	2	1	0	1
Levy, c f	5	1	1	1	0	0
Morris, 3d b	4	0	0	1	0	0
McCord, s s	4	1	2	1	3	0
Meegan, p	4	1	1	1	16	1
Gagus, 2d b	4	2	2	2	3	0
Sheridan, 1st b	4	0	1	7	0	0
Johnson, r f	4	2	2	0	0	0

California	0	1	0	0	0	0	0	2	0	—3

*Waived inning.

Two base-hits—F. Carroll, McCord. Earned runs—Haverly, 6. First on errors—Haverly, 4; California, 1. Base on balls—California, 1. Left on bases—California, 2; Haverly, 3. Passed balls—McDonald, 3. Time of game—two hours. Scorer—M. Fisher. Umpire—Eugene Van Court.

It would be well for the league umpires to read the rules carefully and to avoid making glaring mistakes. Double are decided in favor of the runner, all other things being equal. With the exception of first base, a runner must be touched with the ball unless forced out. A high ball is not such a one, that to reach it a step-ladder is requisite. The base or runner must be touched at first, and the mere straddling of the bag does not put a runner out. The latter rule is respectfully dedicated to Umpire Van Court and to Egan of the Niantics.

It is suggested to the managers of the grounds that foul flags be provided for future games.

It frequently happens that artificial feeding of lambs is necessary, and to do it successfully good judgment is required. The point is to promote a healthy and rapid growth, and not allow the lambs to scour. The milk of some cows, especially Jerseys, is too rich, and should be diluted with a little warm water. Farrow cows' milk, alone, is not a good feed, since it frequently causes constipation. It may be given by adding a little cane molasses. Milk, when fed, should be at about its natural temperature, and not scalded. Lambs, and especially "pet" lambs, are often "killed with kindness." Feed only about a gill to a half pint at first. After the lamb has become accustomed to the milk, it may be fed to the extent of its appetite. When old enough, feed a little flaxseed and oats, or oil-meal, if early fattening is desired. There are various methods of feeding young lambs artificially. A satisfactory way is to use a one-quart kerosene oil can with the spout fixed so as to attach a nipple; the milk flows more freely from this than from a bottle, on account of the vent. Let ewes and lambs have clean, well-ventilated apartments. When the weather is mild and warm turn them out into the yard. If it is not convenient to let the ewes out, arrange partitions and pens, so that the lambs may enjoy the outside air and sunlight.—*American Agriculturist.*

Mr. Frank H. Burke of this city has purchased from the Palo Alto farm the brown gelding Capt. Smith, and Mr. Burke is now driving him on the road. Price paid $1,000. Capt. Smith made a record of 2:29 as a four-year-old but has not figured much on the turf since. He was foaled in 1876, and sired by Locomotive his dam, Maid of Clay, by Henry Clay. Locomotive, by Robert E. Lee, son of Miller's St. Clair, dam Peggy, also by St. Clair.

Coughs. BROWN'S BRONCHIAL TROCHES are used with advantage to alleviate Coughs, Sore Throat, Hoarseness and Bronchial Affections. Price 25 cents a box.

ATHLETICS.

A Ten-Mile Run.

Henry Limperich and Albert Billick of Downieville ran a ten-mile race on the 15th for a stake of $250 a side. The men ran separately against time. The track was 354 feet and 7 inches aronnd, requiring 148 laps, 321 feet and 8 inches to make ten miles. Limperich came first. The first mile was made in less than seven minutes, and from that to the end he ran steadily and without apparent fatigue, to the end, the tenth mile being made in 6:30, the time for the full ten miles being 1 hour 11 minutes and 15 seconds. Billick followed and made his first mile in 6:30, but it soon became apparent that he was not in good form, having a bad cold, and showing that the work distressed him. On his second mile he struck his foot against a post and fell, jarring himself so much as to make him feel dizzy and sick. Notwithstanding his misbap he continued to make time until the sixth mile; up to this time bets were freely offered that he would still win, and as the bets were offered they were as freely taken by Limperich's backers; now he began to lose and it was evident that he was suffering severely; his backers now wanted him to stop, but he refused, and kept on until he made 125 laps, nearly eight and one-half miles, in 63:45, when he fell upon the ropes in a fainting condition.

A Tug of War.

Athletes have commenced training for the spring meeting of the Olympic Club, which takes place at the Oakland Grounds on Decoration Day. A large number of entries are promised, and some correspondence has been entered into with amateur clubs of the interior. It has been suggested by gentlemen prominently connected with sports in this city that the programme, as decided upon, should be so amended as to allow of a tug of war between teams of the several clubs represented. At a meeting held in the Mechanics' Pavilion for the purpose of offering a testimonial to Haley and Belcher prior to their departure East a similar event was given, in which some twelve from the Olympic Club contested against a team from the Golden Gates. The excitement which attended the match was such as to bring it into popular demand at the subsequent meetings, but the request has been invariably ignored. The programme for the next meeting is already of considerable length, but it might be advisable to omit some other event so as to give the rival teams an opportunity of entering for a tug of war.

Boxing is now all the rage among the athletically inclined. The most sensational set-to recently heard of was between an ex-school director and the oratorical J. J. Maloney. The encounter took place in a well-known resort of amateurs on Kearny street. In the first and second rounds the school director held his own manfully, but on the third round Mr. Maloney interspersed his blows with a couple of selections from his favorite street corner orations and knocked the educational sharp out of time before his backers could claim a foul.

A boxing tournament is spoken of, with a probability of its coming off during the latter part of next month. The last tournament given by the Olympic Club was well attended and resulted in a series of interesting matches. Arrangements have not yet been settled, and the question of making it open to amateurs, members of recognized athletic clubs is under consideration. Should the tournament be finally decided upon, medals will be given to the successful competitors.

A coursing match between S. E. Wilcoxon's dog Hector and George Sumney's Win was run near Yuba City last Friday. The match was for three courses and was judged to rule, Win being the victor. This was the first coursing ever seen in that section, and all interested liked it much. At the conclusion Win was matched against a Marysville dog for $40 a side, the race to take place May 4.

The Olympic Club will soon offer three medals for a boxing tournament for light, middle and heavy weights. It is promised that the medals will be valuable. They are to be emblematic of the championship and must be held for two years to become the property of any boxer. With such an attraction the club can obtain a fine exhibition at a comparatively trifling cost.

Cricket circles are unusually quiet and barring no small amount of talk in connection with the sport, nothing has been done this season. Even the approaching return of the English team, at present visiting Australia, seems to have had little effect in rousing local cricketers from their lethargy. The Oakland grounds, as well as those in this city, are in prime condition for the sport.

Lacrosse is exceedingly quiet though meetings were recently held at which it was decided to commence playing within the present month. The clubs are composed of well-known athletes who have creditable records both in the field and on the path.

The Golden Gate Athletic club has received many compliments for the creditable exhibition given last week. M. Price has presented the club with a set of the finest boxing gloves. The exhibition netted the club $150.

Dave Eisman is looking for a walking match with some of the Merion Cricket Club pedestrians.

The Golden Gate Athletic Club is considering the advisability of holding a spring meeting.

The Mission Athletic Club will give an exhibition about May 15.

Joe Masterson has been elected a member of the Olympic Club.

Peter McIntyre is training for long distance races.

From the number of stallions advertised in the Oregon papers we judge they are well off for stock horses up there. Considering the unpromising agricultural outlook, they will have, as Col. Gift used to say, "more stud horses than hay cocks" this year.

The bay horse Forest King, by Monday—Abbie W, one of the lot bought by Gov. Stanford with the Contte farm, has been shipped to Oregon, having been sold to Gilmore & Jones of Portland.

Hill & Grice' bay filly Nettie Hill, by Joe Daniels—Mary Wade by Woodburn, died at the ranch of her owners on the 31st ult., from injuries received by being pulled against a fence while at her training work.

The pinkeye is abating in Solano county.

THE GUN.

The Californias at the Traps.

At San Bruno last Sunday the California Wing Shooting Club held its third shoot this season. The custom heretofore at club shoots has been to try the ability of the marksmen at single birds and governed either by the rules of Hurlingham or the State Sportsmen's Association; but on this occasion, to change the monotony of affairs, the shooting was done at six pairs of pigeons thrown from plunge traps at eighteen yards. The day was very pleasant but the attendance was rather small, there being only twelve or fourteen members present and about an equal number of spectators. Twelve members faced the traps in competition for the three club medals and a sweepstakes purse. Mr. Roche was first to shoot and laid off by missing both birds. This elegant beginning he kept up until he reached his fourth pair, when he broke the duck-egg score and killed all six of the remaining pigeons. On his first round, Dr. Chismore bit both birds and it was owing to some good retrieving that he did not lose them. On Burbank's first pair, he hit the first but the second he lost as he had failed to cock the gun; he killed half his birds, bringing down the first and losing the second. Mr. Berwick, who is more than an average shot, surprised himself and friends with the score he made. Both Fay and Pearson having long reaching guns carelessly tried to make pretty shots at long range instead of getting all that flew as they ought to have done. The contside betting was not very lively. The pigeons were a mixed lot, fair, though not of the best. Several escaped being slaughtered by flying back into the crowd where the shooter did not dare to fire; these performances caused commotion among the lookers-on, nevertheless. Following are the scores:

Roche	00	00	11	11	11	11—5
Spencer	01	01	11	11	10	00—7
Kerrigan	01	10	11	11	11	11—10
Jellette	01	11	10	11	10	11—9
Pearson	11	11	10	11	01	10—9
Bogart	10	11	11	11	01	01—9
Walch	11	10	11	10	10	10—8
Chismore	11	00	11	11	00	11—8
Knowles	11	11	11	10	11	01—10
Burbank	10	10	10	10	10	10—6
Fay	11	11	10	00	00	11—7
Berwick	00	00	10	00	10	11—4

As seen, Kerrigan and Knowles tied on a score of ten birds, so they shot off the tie at three pairs of double birds with this result:

Kerrigan.....10 10 01—3 | Knowles.....01 11 10—4

This gave Knowles the first prize medal and Kerrigan the second. The tie on nine birds among Jellette, Pearson and Bogart was decided by a double-bird freeze-out whereby Pearson won the third prize. The judges were W. Golcher Jr. and John Stack.

After this was finished the much-talked-of match between T. A. Pearson and Mr. Swan, the painter, for $250 a side at 25 pigeons, 30 yards rise and both barrels used, was shot. By this time the wind began to blow and the birds taking the advantage left the ground trap as right quartering tailers and consequently the scores were very low. Mr. Swan led off so well that his friends grew too confident and staked their money rather carelessly on the result being in his, Swan's, favor, but eight consecutive misses turned the tables to Pearson's favor. The score stands:

Swan—11111 10100 00000 0*1000 0*000*1—9.

Pearson—010*01 000*11 01010 10101 11101—13.

Rather a poor score. Those marked with a star(*) died out of bounds.

The next in order was a sweepstakes match. Seventeen $2 50 entries were made. The shooting was done in squads of four men each, at six birds, 21 yards rise with one barrel, plunge traps. Several withdrew to save pigeons, as the following shows:

Slade	0	1	1	w	—2
Burbank	0	1	0	0	w—1
Jellette	1	1	1	1	0—5
Chismore	1	0	1	0	w—2
Fay	1	1	1	1	0—5
Roche	0	1	1	1	0 0—3
Liddle	1	1	1	1	0—5
Bogart	1	1	0	1	1 1—5
Berwick	1	1	1	0	0 w—3
Pierson	1	1	1	0	1 0—4
Spencer	1	1	1	0	1 1—5
Golcher	1	1	0	0	w —2
Lachman	1	1	1	1	1 1—5
Walsh	0	1	1	1	1 1—5
Kerrigan	1	0	1	1	1 1—5
Brown	1	0	0	1	1 0—3
Smith	1	1	1	1	1 1—5

Mr. Lachman and Mr. Smith tying on clean scores, divided first and second money, 50 and 35 per cent of the purse, while the remaining 15 per cent was shot for by Jellette, Fay, Liddle, Bogart, Spencer, Walsh and Kerrigan, who tied on four birds. The two last named again tied, killing their three pairs of birds, the others having dropped behind, so they again shot off, this time Walsh killing five to Kerrigan's four pigeons. Though Mr. Walsh got his fifteen per cent it did not anywhere near pay for the pigeons killed. Two other unimportant sweepstakes were shot. Edward Fay did some very pretty practice shooting, killing eleven consecutive pairs of birds. Such a run of shots as this is deserving of notice. All of the sportsmen returned to the city on the 4:15 train having well enjoyed themselves during the day.

Watsonville Gun Club.

At a shoot held by the club last Sunday the following scores were made at ten clay pigeons:

Frizzell	0	1	0	1	0	1	1	1	0	—6
Colehower	1	0	1	0	0	1	0	1	0	—4
Fischer	0	1	0	0	1	1	0	1	1	—6
Arano	1	1	1	1	0	1	0	1	0	—7
Hudleson	0	0	1	1	0	1	1	0	1	—6
Wilcox	1	1	1	1	0	1	0	1	0	1—7
Milliken	1	1	1	1	0	1	1	1	0	—8
Johnson	0	0	0	0	0	1	0	0	0	—1

The following figures were scored at twenty glass balls.

Frizzell	18	Fischer	13
Milliken	14	Ralph	8

The District Attorney of Mendocino county gives notice through the local papers that he will promptly prosecute all violators of the game and fish laws that are brought to his notice and invites all persons cognizant of such violations to post him at once. The efforts of the local clubs and the press are having a good effect in some places.

To-morrow the Pacific Gun Club will hold their first shoot of the season at Birds Point, at five pigeons. This club is going in for a good time as they, in connection with the shoot, will have a fine clam-bake. The club have made arrangements to hold all their matches on Bird's Grounds.

THE RIFLE.

Shooting at Shell Mound.

On Saturday last a match was shot at the Shell Mound range, distance 200 yards, each 100 shots, between Col. Beaver and Howard Carr on one side and Sergt. Nick Williams and S. I. Kellogg on the other. As the annexed score will show, the shooting was highly creditable and the match evenly contested throughout. At the commencement of the shoot an accident occurred to Carr in the bursting of a primer, which affected his eye and caused him considerable annoyance. Col. Beaver and Sergt. Kellogg tied on 449 points, Beaver, however, making the better score according to Creedmoor rules. The match resulted in favor of Kellogg and Williams by two points, as the annexed score will show:

S. I. Kellogg	4 4 5 4 5 4 5 5 4 4—44 4 4 5 4 5 5 5 5 4 4—45 5 4 4 4 5 5 4 5 5 5—46 4 5 5 5 4 5 5 5 5 4—47 5 5 5 5 5 5 4 5 5 4—47 5 5 5 4 4 4 4 4 4 4—44 5 4 4 4 4 4 4 5 5 4—43 4 5 5 5 4 4 4 4 5 5—45 4 4 5 5 5 4 4 5 5 4—45 5 5 4 4 4 4 4 4 5 4—43	449
Nick Williams	4 4 5 5 4 5 5 4 5 5—46 4 4 5 4 4 3 4 4 4 4—40 5 5 4 5 4 5 4 4 4 5—45 4 4 4 5 5 5 5 5 5 4—45 5 5 5 5 4 4 4 4 5 5—46 5 4 5 5 4 5 3 4 4 5—43 4 4 4 4 4 4 4 4 4 4—40 5 4 5 4 4 5 5 4 5 4—45 4 4 4 4 4 5 5 5 4 3—43 4 4 3 4 4 4 5 4 4 4—40	434

Aggregate score of Kellogg and Williams	883
Aggregate score of Beaver and Carr	881
Majority	2

C.'s Rifle Team.

The rifle team of Company C., First Infantry Regiment, held their last practice shoot, preparatory to entering at the spring meeting of the California Rifle Association, last Sunday. This team shoot on the 200 and 500-yard ranges, and during their practice they have made very good scores. Sergeant Ed Snook has been elected as captain of the team, but it is doubtful whether he shoots at the competition, as he has had some trouble with his eyes which may forbid; this is to be regretted as he is one of the best shots and his loss will be felt. The following are those who will shoot and the percentages they have made at their practice: Lieut. J. E. Klein, 88 per cent; private T. F. Kelly, 87⅔; private F. Cummings, 86⅔; Lieut. H. T. Sime, 85⅔; private L. Perkins 84⅔, and Capt. H. S. Templeton, 84. This team now hold the Andrews Silver Challenge Trophy, which they won the first time at the tournament held June 4, 1882, and again October 29 of the same year. If they win it again at this meeting the trophy becomes theirs permanently.

The Citizen's Pistol Team.

Last Sunday J. E. Klein selected the men who are to shoot in the pistol matches at the tournament to-morrow. Though the team is made up of the best pistol shots in the city they are laboring under several difficulties. The Citizens are all sadly in need of practice. The Smith & Wesson 45 caliber pistol, which is the weapon that must be used, is very hard to procure, as there are none of that description for sale in this market. All the practice of sixteen men has been done with three or four pistols. The Police Pistol Teams which they will have to compete with are well supplied with the pistols of the required pattern, so the odds are against the Citizens. Those selected to shoot are Col. S. E. Beaver, Col. S. I. Kellogg, Lieut. J. E. Klein, J. M. Pike, Dr. Tracy, Mr. Gilham, T. E. Carson, Chas. Carr, T. F. Kelly, E. O. Thompson and Hon. M. Doane and Lieut. H. F. Sime, who will be ready to serve as alternates.

On account of the races at the trotting park this week, the Alameda County Sportsman's Club will hold their first clay-pigeon shoot of the season for the club medal at Adam's point to-day (Saturday) afternoon, commencing at 2 o'clock.

The *Western Sportsman* describes three fast young trotters as follows: "It is said that Enoch Warman, Indianapolis, owns a three-year-old colt by Hambletonian Tranby, out of an Iron Duke mare, that can trot faster than a Western cyclone was ever known to travel. We have not yet had the pleasure of seeing this young flyer, but a gentleman whom we know has never been an admirer of Hambletonian Tranby's get saw him go, and enthusiastically describes him to me as the most wonderful trotting colt he ever saw, and he has had many years of experience with trotting horses. We, too, have been seeing some young trotting wonders, over in the Kentucky blue-grass region, and, if the reader enjoys baby trotting exhibitions as we do, he will not accuse us of exaggeration in relating what we saw. We had attended Colonel Stoner's public sale of trotters, where the Strathmore two-year-olds astonished all present with their extraordinary speed. But on returning to Paris, we went out with Mr. James Miller to his Sunnyside stock farm, and there saw a colt two years old this spring trot faster than any two-year-old we ever have seen or ever expect to see again. He was taken out to an open lot, a rope about seventy-five feet long attached to his halter, and set a-going. We may possibly be mistaken by a few seconds, but if this chap did not show a '30 gait,' and never break the trot, we are not capable of distinguishing three minutes from a 2:20 clip. His sire is Bourbon Wilkes, dam Carrie Sharp by Alexander's Abdallah. On General Withers' place, near Lexington, there is a blue-roan yearling filly by Almont that is a curiosity. She is as long as a fence-rail; rather a big head set on a long, slim neck, light, long tail; a drooping rump, and altogether as sin; but Je-ru-sa-lem, how she can trot!"

SPRING MEETING PACIFIC COAST BLOOD HORSE ASSOCIATION.

Two days of the race meeting have come to a close, and from the accounts published elsewhere it will be readily conceded that a full measure of success has followed the efforts of this popular association. Thongh the racing is fully depicted, there are points that call for more extended notice and which require more thorongh consideration. The weather is always held to be a topic that demands attention and race meetings are fully as much affected by atmospheric conditions as other branches of business or pleasure. The rains of Thnrsday, the 19th inst., came unfortunately in one respect, opportunely in others. Many were deterred from attending on the opening day thinking that the course could not possibly be in any order for satisfactory racing, and also afraid of damp ground and chilling breezes. This was an unwarranted conclusion although it reduced the attendance. The good result of the rain was a thorough soaking of the track that not only saved the labor and expense of artifical sprinkling, as it also accomplished the job in a far more workmanlike manner, and the consequence is that on the first day the track was good, if not technically fast, and on the second it was nearly at its best. There was grand racing on both days. The California Stake brought out a fine field of two-year-olds, and the Hearst Stake was an exciting contest. The winner of the California is without question a colt of very great capacity, and we doubt if there has been a better two-year-old on the courses of this coast. A colt of high form, of perfect action and all the other requisites for a successful career, it can only be the worst kind of luck that can prevent him taking a very high rank among the celebrities. A brother to the Duke and Duchess of Norfolk, it may appear rash to predict that he is likely to prove the flower of the family, and yet we feel like "going on the record" as the prophet who is so sanguine. His stable companion, Callie Smart, gained the distinction of beating all the others, but as she was doomed to struggle without obtaining a place on Wednesday, it will appear still more presumptuous to give her a place which the evidence now in does not warrant. Two-year-olds are proverbially uncertain, and in the springtime fillies of that age are prone to run in and out in the most provoking manner. Addison and Steele in the "Spectator and "Tattler" sought to explain why this vernal period of the year should be provocative of erratic actions, and gave safe counsel how to avoid the trouble. Trainers have cudgeled their brains as persistently as these distinguished literati and without success. Their two-year-olds still upset their most carefully-figured-out calculations, disappointing them grievously, in the first place by falling far short of the form they expected, and then maybe in the very next race running better than they had ever done before. The epizooty, distemper, pinkeye, or whatever else the invidious disease has been termed, played havoc with the youngsters, and many of the nominations in the two and three-year-old stakes have been "knocked out" by this foul fiend. Even when apparently entirely recovered from the ill effects, looking well and as lively as need be, there would be an incapacity to perform. The champions that Palo Alto depended upon were domiciled in the hospital so long that spring racing was out of the question, thongh those which took part did so well that the regrets were more poignant at the absence of the better. Rancho del Paso had something of the same bad luck, though the wearers of the green and orange are "rounding to," and give reason to think that in the coming races there will be a different showing. In this retrospect, which must necessarily be brief, the most salient point in the racing that has passed is the dash of a mile which was run on Wednesday.

In characterizing it as the most remarkable race ever run at the distance here, there is no danger of exceeding the truth. It can truly be claimed that it was one of the best ever run in any country. In the first place the time is the fastest that was ever made with the same amount of weight, and though Joe Howell has to his credit the fastest race of heats at three-quarters of a mile, a second and third heat at that, he has now the fastest record for a mile when the weights are taken into consideration. A mile in 1:42, with 119 pounds, takes the preference, the nearest approach to it being that of Checkmate, who ran in the same time with one pound less. The other fast performances were as follows, discarding that of Ten Broeck which should not be classed in the same category, as that was made in an exhibition run, and with advantages that are never conceded in an actual race: The first on the list is Boardman, 4 years, 91 pounds, 1:40½; Marchioness, 5 years, 64 pounds, 1:41; Searcher, 3 years, 90 pounds, 1:41¾; Victim, 5 years, 117 pounds, 1:41¾; Parole, aged, 102 pounds, 1:42; Hindo, 3 years, 108 pounds, 1:42; Knight of Templar, 4 years, 106 pounds, 1:42. With the above comparison there will be few to deny that this "last effort" (we sincerely hope he may live to make many more of still greater brilliancy) is the best of his long career.

There is surely little necessity for amplyfying on the remarkable performance and while the "old horse" receives full credit for the meritorious work his young competitor must not be overlooked. Gano, though beaten, added to his already high record the best performance he ever made. Divested of the depressing influences of defeat the candid mind must acknowledge that it was a great victory over every obstacle excepting his fortunate competitor. Dame Fortune was against him in the lottery of position, and to draw the last place, to have to start on the extreme outside, and that so close to the commencement of the turn, was a turn of bad luck to commence with. The rear position when the flag fell was an untoward circumstance, another was the mistaken idea that Jim Donglas was the only horse to fear. The instructions to a comparatively unpracticed rider were based on this false estimate, and the rider of Douglas also thinking that he had every one safe with the exception of Gano made another adverse circumstance. This led to Donglas being nursed to meet the rush of the colt when it was made and this being the upper turn the youngster had to make the longer course and lose feet that even his immense speed could not overcome. Valiantly he fought against the combination of circumstances, and highly as we rated him before the race on Wednesday last, there is a more prominent niche in the Temple of Fame awarded him now.

Jim Donglas carried too much flesh to "pack" his 122 pounds for a mile at the pace they were going, and after a few more races there is scarcely a doubt of his ability to come inside of the fast time made. Duke of Monday was right amongst them until it was evident to his jockey that there was no use in striving further. Every horse did well if even the first and second in the race made the other two labor in the shadow of rear positions.

But the races to come are now the magnets, and there will be two more days before the next issue of the paper. The advertisement gives full particulars of what they are, the conditions, nominations and entries, so full, in fact, that there is no necessity for further explanation. But in the Cup race to-day so many have stayed in that in all probability there will be a contest which will be as exciting as the mile race on Wednesday. The acceptors are Fred Collier, 118 pounds; Precious, 110 pounds; Fostress, 108 pounds; May D, 106 pounds, Inauguration, 100 pounds, and Maria F, 103 pounds.

We never sought for the distinction of being thought a shrewd guesser of the chances of racehorses, but if it had been the habit to follow the practice of English turf journals, and some of the American papers which aspire to the same fame, this is a race that one would not venture to hazard an opinion upon. The distance is 2¼ miles. Fred Collier and Precious have shown that they could compass it. Fostress is well enough bred to go any distance, not only coming up to the Sunday-school pupil's idea of the meaning of "well bred," viz., two crosses of Lexington, as she has three of Boston, and materially of the same stock as Parole. Her grandam was a sister to the dam of the great victor in both hemispheres, and the Planet in her dam should not set her back any when ground to the cup distance has to be traversed. May D is a veritable Clinker, having run 1½ miles at San Jose in 2:36, the fastest record for California, and only two seconds behind that of Luke Blackburn, which is the "top notch." Maria F ran twelve races last year and won six of them, and in the selling race last Wednesday she showed that she could gallop. Inauguration looks fine and gallops like he conld hold his lick up constant, very constant, and there are many who have yet a vivid recollection of Nathan Coombs, his half brother, when he set the pot boiling with so mnch turbulence at Sacramento a couple of years ago.

There is not a man, woman or child with the least admiration for the grand sport who can afford to miss seeing the Cup race to-day, and when there are the further attractions of the hurdle race and two others, the afternoon is snre to be one of the liveliest. Wednesday next there is a good bill, and then the pleasure of the trips must not be overlooked. Thirty-five minutes from the foot of Market street, the only change from the boat to the cars, and the Oakland people have the choice between steam, horse-cars and carriages. Although not "hankering" for the reputation of a Yates in foretelling what the horses will do, we do not hesitate to promise that the weather is sure to be favorable, and furthermore, that there will be a "crowd" well worthy of the racing.

GROWLERS.

One of the most pestilential drawbacks to racing is the grumbling, growling, the persistent endeavor to make matters as unpleasant as possible by some of the men connected with the horses. In rare cases a few owners are in the habit of finding fanlt, thongh the main trouble comes from trainers, and, we must say, from those who have an inferior rank in the profession. The really skillful trainer has intelligence enough to realize the injury that follows this practice, and has sufficient understanding to see that malicious diatribes have a depressing effect on the sport. If the weights in a handicap do not suit him, he quietly advises the owner to "declare out." Shonld he have occasion to find fault with a starter, he makes his complaint in a business-like manner, and he finds this course far more effective than an indulgence in violent language. Knowing that a man of this stamp has something to base his accusations upon, he is listened to with deference, and measures are taken to correct the evils of which he complains. He is a complete antitheton to the growler. The latter rails early and late. He accuses honorable men of being concerned in fraud, and does not hesitate to make charges that he knows to be false. The adjnstment of weights in a handicap he ascribes to the efforts of a ring which was gotten up to favor some particular person, or to make a certainty of some horse winning on which wagers could be laid by those who apportioned the weights. He rattles away whenever he can secure listeners, and a great majority of his audience, being comparatively ignorant about racing affairs, give credit to the erroneons statements, and go away with false impressions. There may be other motives than "pure cussedness" in railing at the weights. In one case the desire may be to cause bettors to think that the horses in their charge have no show to win, and thus lessen the rates in the pools. It may be that they are anxious to impress an owner with reasons for being beaten, and prepare him to anticipate defeat, brought about by a conspiracy against him. And, by the way, growlers do more mischief in this way than any other. The trainer tells him wonderful stories of injustice. Reiterates that he has to fight against favoritism for others to his prejudice; that the judges, starter, etc., are all banded against him; that the rules are enforced in his case, while the favored ones can violate them with impunity; and the false testimony is so artfully managed that it has the desired effect, though it goes still further than was intended and the hoodwinked owner withdraws from any participation in turf sports. Then when members of an association are doing all in their power to advance turf interests, working assiduously without thinking of reward, spending time and money to aid in placing turf sports on an enduring basis, and receive abuse for their work and trouble, it is not surprising that they become disgusted and decline to further help the ingrates who owe them so much. Were it not for the better class, were the whole body of trainers tainted with the vices of the few, there would be no hope. As it is we are inclined to think that much of the faultfinding comes from thoughtlessness, and that by placing the matter before them in a shape they can realize the injury they are doing the evils will be remedied.

Some have acquired the pernicious habit from early associations, and from receiving instructions from a tutor who was imbued with the spirit of carping that has been acquired as well as the knowledge of the proper

method of "getting horses in order." There is an overweening conceit in some that they are pillars of strength and that associations will put up with impertinences in the fear that resentment will be followed by a refusal to make entries in the future.

There are cases which have come to our knowledge, where a growler had influence enough with his employer to bring about such a result, but another followed, that being his own discharge.

Owners should look into the business more closely than some of them do, and before giving heed to the piques and misrepresentations of those who are so prone to make malicious charges, examine personally, and it is long odds that in a majority of cases they will discover they are without a shadow of foundation. We write this for the benefit of those who are at fault, trusting that the short lecture may be productive of good. They have a greater personal interest at stake than any others connected with racing affairs, and every effort should be directed to popularizing the sport. This cannot be done by railing at men who are doing all in their power to further the welfare of those who return abuse and slander. A contrary course will soon show the wisdom of this advice.

SPEED PROGRAMME CALIFORNIA STATE FAIR.

Owing to the hurry attending the effort to get the speed programme of the California State Agricultural Society into the first form some errors were made. These have been fully corrected and now in proper shape we call attention to the arrangement and classification of the premiums.

Altogether the programme must meet the approbation of the owners of horses, being liberal in the amount of money added, and the classification such as to serve the interests of the horses of this Coast.

As usual the opening day is chiefly running, there being four on the hill to one trotting, 2:25 class. It is needless to repeat in this place the information that can be obtained from the advertisement, further than is necessary for comments. The introduction of a stake for all ages, three-quarters of a mile, is sure to bring out all the flyers, and writing on the eve of the meeting of the Pacific Coast Blood Horse Association, it is not safe to enter into a discussion of the respective merits of this class. That it will be a spirited brush there can be no doubt, and will insure a long list of entries. The California Derby and California Annual Stake, Nos. 2 and 3, are the "fixed events" for that day, being two and three-year-old races, the first with eleven and the other twenty-two nominations. No. 4 is a hurdle race, and the requirement of three starters cannot be unfavorably criticised, as something must be done to stimulate the owners to train for this popular kind of sport.

There are plenty of horses in California which would make capital jumpers, and this branch of home enterprise has been strangely overlooked on this Coast. There is a ready and increasing demand for hurdlers and steeplechase horses in the East, and to furnish them will certainly be remunerative to those who engage in supplying the demand. Raven showed to be one of the best in his Eastern campaign and had he fallen into the right hands when sold by the party who took him from here would have gained a high reputation. Apart from the chance to sell for a round price if owners will endeavor to fill the place there will not be a fair or meeting in California that does not offer premiums for hurdle racing, and with good fields of starters the public will sustain the action by attending in increased numbers.

The fifth race on the first day calls for a class of trotters that rank in the medium list. There are quite a number eligible that will have a good showing, and the figures of 2:25 cannot fail to be satisfactory.

The second day will be very interesting as it brings out two classes of colts, two and four-year-olds. That for two-year-olds closed on the 7th instant with fourteen nominations, and, as was stated last week, those of the greatest promise. At the present time we do not know of a class which will attract more attention than that which brings out the colts and fillies foaled in 1879, and in offering the very liberal purse of $1,000 the association has taken the right ground to insure a full representation.

The 2:40 for the same amount of money is judicious, and there is little risk in predicting that the entries will be sufficient to return a few hundreds above the amount given.

Four running races on the third day and the 2:22 will make a lively afternoon, and as enticing as well can be. The running is varied, there being a dash of three miles, a dash of one mile, a selling race of heats of a mile, and a hurdle race, one and a half miles with six hurdles to overcome. The fourth day with the 2:30, the trotting three-year-old and the 2:25 pacing can be marked with the biggest white rock that can be found, and the fifth with four flat races and a hurdle race at heats of a mile will come in the same category. The closing day is all trotting and a busy one it will be to get through with all there is on the hill. Free-for-all, Occident Stake, yearling and three-minute class, is a programme for one afternoon that the most fastidious cannot find fault with. We desire to call especial attention to the three-minute, as it closes on the 15th of May and those who have horses that are eligible can scarcely afford to leave them out. The plan is that first adopted at Chicago, of only requiring 2½ per cent down, the same amount at a future time, in this case July 1, and the remaining five per cent the 1st of August. It would have been better to adhere to the Chicago idea in full, and not embody the clause of ten to make the first payment, and also better to have carried the day of payment of the other money to the first of the fair. But as it was considered experimental compliance at the beginning and a liberal response will insure a change, and ultimately concessions will be made. As is well known the speed department of the State Agricultural Society meets with violent opposition and if the directors could not show beyond all question that it was remunerative outside of the increased attraction to spectators, the battle would be still harder. The ranks of the bigots are growing weaker every year, and with the spread of intelligence they will become so reduced as not to be worthy of the name of a skeleton regiment even. Until this time comes it behooves all those interested to sustain the management though there may be points that do not meet with full approbation, and a helping hand now will surely bring a welcome return in the future. The directory is placed in an entirely different position from the racing and trotting associations of the East. There the only ones to account to are the members of the clubs, and as liberality is sure to bring a pecuniary return, that course meets the approval of all who are interested. Here the growlers have a chance to vent their ill nature from the fairs receiving state aid, and the narrow-minded representative who from some inscrutable cause has been honored with a seat in a body which alone gives him any weight thinks to heighten his consequence by the assumption of virtues that he has not a shadow of claim to possess. He makes a parade of economy, delights to be called the "watchdog of the treasury," and yet any scheme which favors his individual aggrandizement receives his hearty support. There are well-meaning, honest men who have not as yet thrown off the shackles that were forged in the days of the blue laws, who believe that all kinds of enjoyment are sinful. These are not the men who make trouble, as their tenets have a slight hold on the majority. The specious reasoning of the watchdog has some influence and the desire to "reduce taxation" misleads others who are sincere in the desire to give a good account of their stewardship. While the hills were before the Legislature, we advanced arguments to prove that every dollar granted by the State brought a return of the amount with a high rate of interest, and as the position was so strong as to be supported by almost the certainty of mathematical demonstrations, there is no necessity for repetition. Every debate in the Legislature added to the strength, but it also disclosed a malignity of purpose on the part of some, imbecility in others, and the attacks of a snarling tribe which it would be euphony to name by the general appellation which rightly belongs to a nobler race. Until the motley army is completely routed, the directors of the California State Agricultural Society have an arduous task, and the obstacles in their way are not fully realized by quite a number of those who are engaged in breeding the higher grades of horses. Now that intelligent agriculturists are becoming better acquainted with the system that is giving the fairs of California prominence in all parts of the country, a system that is accomplishing more towards increasing the prosperity of the State than sanguine supporters are aware, it is only necessary that the efforts of the managers be seconded by those who can so materially assist in increasing the attractions of the "speed department," and place it in a position where there will be little to condemn.

FRENCH POOLS.

We are pleased to learn that this genteel way of putting a few dollars on the races is meeting with the success it merits.

On the "big race," last Wednesday the Mutuels paid twenty-five per cent more than the auction pools. Every $5 on Joe Howell returned $56 and a fraction, and with the same amount invested as it required to buy an auction pool, $40, $448 came back. Another good feature is that the amount desired to be risked is within control, and be it as little as $2 50, this can be done without delay and without coming prominently in view.

Whatever may have been done in the East, from personal knowledge we can vouch for the business being conducted here honorably, and that every buyer will get his own to a cent.

EDITORIAL NOTES.

The Capital Turf Club of Sacramento have, by a happy thought, decided to give a purse of $400 for a two mile heat trot for the 2:30 class. The race will be trotted on the last day of their spring meeting, May 19. It should bring out a large field. The two mile heats will even up the chances so much that there are probably from forty to fifty horses in the State that could start in this race on equal terms. The club deserves the support of all horsemen for their efforts to arrange races and classes to suit both horses and owners, and we hope to see liberal encouragement extended. Entries to this race will close May 7, with the Secretary, W. P. Emery, Box 378, Sacramento.

We have received a supply of catalogues of the sale of Runnymede yearlings, by George W. Bowen & Co., at Lexington, Kentucky, May 18, and they may be had by application to this office.

State Sportsman's Association.

The annual meeting of this association will be held at Gilroy next Thursday, Friday and Saturday, May 3, 4 and 5. The association feels greatly encouraged by the signs of the times and indulges the hope that officers of the law and the public generally will soon arrive at a realizing sense of their mutual duties in the matters of preserving and protecting fish and game. The convention of 1883 will be an unusually interesting one. The committees on fish and game protection will be able to report decided progress. Carefully prepared papers on the various topics that interest sportsmen will be read and the interchange of thought and items of experience will result in many valuable points to devotees of the rod and gun. The Gilroy Rod and Gun Club will give a tournament at the traps during the season, and live pigeons, blackbirds and clay pigeons will be provided in abundance. This tourney will be open to all members of the clubs composing the State Association and the prizes will be in cash. Altogether the annual meeting should be the occasion of a grand gathering of sportsmen. It will be one of edification and profit from the nature of its deliberations. Gentlemen who attend will also find sport with their guns in the competitions at the traps and pleasure in the social diversions of an enterprising and genial people.

Foals.

At Theo Winters' farm, Sacramento valley:

Marion, by Malcomb—Maggie Mitchell by imported Yorkshire, a chestnut colt by Norfolk. Bred back to Norfolk.

Ballinette, by Monday or Young Eclipse—Ballerina by imported Balrownie, a bay filly by Norfolk. Bred back to Norfolk.

Neapolitan, by War Dance—Eliza Davis by imported Knight of St. George, a chestnut filly by Norfolk. Bred back to Norfolk.

Illusion, by Alarm—Mary Hadley by O'Meara, a chestnut colt by Norfolk. Bred back to Norfolk.

Kitten, by imported Eclipse—imported Pussy by Diopbantus, a bay filly by Norfolk. Bred to Joe Hooker.

Ada C, by Revenue—Sally Morgan by imported Emancipation, a bay filly by Norfolk. Bred back to Norfolk.

Countess Zicka, by Norfolk—Ballerina by imported Balrownie, a chestnut colt by Joe Hooker. Bred back to Hooker.

Mattie Glenn, by imported Glen Athol—Mattie Gross by Lexington, a chestnut colt by Norfolk. Bred back to Norfolk.

Abbey, by Norfolk—Ada C by Revenue, a chestnut colt by Joe Hooker. Bred back to Hooker.

Laura Winston, by Norfolk—Golden Gate by imported Leamington, a chestnut filly by Joe Hooker. Bred back to Hooker.

At E. J. Baldwin's Santa Anita ranch, Los Angelescounty:

April 1, Santa Anita, by Virgil—Mary Martin by Lexington, a bay filly, star in forehead and left hind foot white to ankle, by Grinstead.

April 12, Jose C, by imported Leamington—by Lexington, a chestnut colt, blaze face, both hind legs white half way to hocks, by Rutherford.

April 18, Glenita, by imported Glenelg—Lark by Lexington, a bay colt, no marks, by Grinstead.

Yearlings.

The following foals of 1882, the property of Theo. Winters, have not been previously reported:

Chestnut colt by Norfolk—Lady Jane.

Bay colt by Norfolk—Ballinette.

Cbeatnut filly by Joe Hooker—Puss by Norfolk.

Chestnut filly by Joe Hooker—Mattie Glenn.

Gray colt by Joe Hooker—Queen.

Bay filly by Joe Hooker—Illusion by Alarm.

Bay filly by Joe Hooker—Countess Zicka by Norfolk.

Brown filly by Joe Hooker—Kitten by imported Eclipse.

Chestnut colt by Joe Hooker—Bay Kate.

Bay filly by Joe Hooker—Abbey.

Trotting Foals.

Kitty Wink dropped a bay colt by Sultan, April 18, at the Santa Anita ranch.

Dolly Varden, by Montezuma, the property of Dr. N. S. Hamlin, Yuba City, dropped a chestnut filly, hind legs and off foreleg white half way to hocks; white strip in face, wide between eyes, narrow at nose, extending to muzzle; by Brigadier; April 13. The name of Thetis is claimed for this filly.

At Hill & Gries' farm, Springville, Ventura county, April 6, Mary Wade by Woodburn, a bay filly, white spot in forehead, by Wildidler.

The fourth volume of "The American Stud Book" is now receiving the finishing touches, and will be published as soon as the foals of 1883 are all reported, which will not be later than June 15. Many breeders have not yet reported their stock, and all such will, of necessity, be left entirely out of the work. The public will be loath to accept stock as thoroughbred not found in the "Stud Book." It is utterly impossible for the author to know the mares and foals unless reported by the breeder, and without the fullest co-operation on their part errors and omissions must occur. We therefore insist that all who wish their stock entered must report it without delay. In giving the stock parties must be particular in stating color, sex, name and pedigree to some well-known animal in either volume of the "Stud Book." Report foals of 1883 as soon as dropped, and state to what stallion the mare is or will be bred to anticipate the foal of 1[illegible]

Turf, Field and Farm.

Hereditary Power.

Form, size, spirit and instinct are hereditary, and descend from one generation to another. The young are counterparts of their parents. They put on the characteristics of their sires and grandsires, dams and grandams, from the soles of their feet, through the body and gearing, to the color that shades them. Types and models of the hreed are the effects of hereditary acqnisition. Temper, courage and action are reproduced in nearly the same force and effect of renowned ancestors. In line hreeding, the colts will follow after sire or dam, or their most powerfnl progenitors. In crossing out, the first generation carry in their veins one-half of the hlood of their sire. In the second remove, they retain one-fourth of the blood of the male progenitor, aud in the third remove, one-eighth of the same kindred hlood remains to temper the amhition, and keep np the distinction of the produce. The colts are a second edition of their progenitors, revised and corrected hy the breeder. If they are stereotyped with noble ancestors, the edition is never run out. If the offspring should fail to inherit all the good qualities of renowned ancestors, the heritage is not lost; it only lies dormant. It failed to generate from temporary causes. It has been preserved for fnture production, and will reappear again in all its original force and vigor.

For instance, Dictator did not inherit from his renowned family the same speed and courage as his famous hrother Dexter. The inheritance lay over inactive; it was purified for future nse. It reappeared in his fast four-year-old son, Jay Eye See, record 2:19; in his fast three-year-old son, Code, 2:31; in his five-year-old scion, Director, 2:24, and in his five-year-old son, Phallas, 2:22½. The inheritance was preserved, and appeared to gather new force and vigor from repose. Trotting is, in part, hereditary, and in part acquired. When the foundation is laid through a rich inheritance, it is hrought out into practical application hy education.

The condition indispensable to a good trotter is, perfect eqnilihrium of the hody—equilihrium which keeps np a regular movement of the diagonal fore and hind feet, gives them an eqnal elevation and extension with such lightness that the animal can easily execute all changes of direction, moderate his speed, halt or increase his speed without effort.

The difficulty experienced in training trotters to perform the open stride in the hind reach, and sqnare trot with extended step and rapid gather in the movement, results from imperfectly developed or weak hind quarters. There is often a discrepancy in the relative weights of the hind and fore quarters. One has an excess of power, and the other a deficiency of force, which destroys the equilihrium between the parts, and diminishes the force of action. The high withers and low croup tend to lighten the propelling power. They have to be dragged along hy the stronger fore qnarters, which make such a dividend of power that the overtaxed organs can not long stand the exertion. The croup and withers should he of even height, and the quarters would he more likely to be of even weight.

Speed is the effect of perfect mechanical movement, through the co-operation of evenly-developed physical forces. Form has much to do with speed. Imperfect forms disorganize the nervous and physical powers, and interfere with rapid movement. There ie a hereditary force of character in some breeds that stamps an indelihle impress npon the offspring. They mould their produce into a strong family resemhlance, that shows to ocular demonstration their hreeding. The experienced breeder has no difficulty in locating the family to which they helong. It gives him an advantage in selecting parents. They breed after themaelves, which is no ordinary merit in reproductian. It shows that they have atrong generating powers, that establish fixed characteristics in the hreed that will descend through the line of inheritance to their auccessore in hlood.

There is an advantage in hreeding from a prepotent family that have celehrated ancestors in their pedigree. Yon will know the future complexion of yonr stock from the distingniehed progenitors in the pedigree of the parents. They will inherit the virtues of their relatives. There ia no better way to preserve the merits of great horses than to breed after their kind. The sciona will follow in the footstepe of their illustrious predecessors. Leaving representatives worthy to fill their places ia the most durable monument to commemorate their viruea and their worth. Their merits are engraved upon the hearts of their admirers, and will live in their veneration long after other memorials have crumbled into duat. Breed from the beet, aud you will increase their numhere.—*Live Stock Journal.*

Poultry Raising.—A prominent and successful rancher haa furnished us with the result of his efforts in keeping thoroughbred poultry. From thirty-five hens of the brown and white Leghorn variety he obtained, from November 22d to December 6th, 433 eggs, and the hens are still laying as vigorously as ever. His system of feeding is as follows: Bran stirred up with hot skim milk every morning, wheat in the afternoon, plenty of burnt bones and clean water. He says: "I have tried the scrub, or dung-hill variety, until thoroughly satisfied that they are not worth having around the place. It pays to keep the very best poultry and live stock as well as the best of wheat, and many of our best farmers would be surprised to see what a good table can he set by the profits of keeping blooded poultry.—*Gridley Herald.*

Pig Generalizations.

In order to succeed well in rearing pigs special care, in many respects, is needed. One who has no disposition to look after minor details in the management of the sow and her litter had better keep in the background and allow some trusty person to take his place, or else uot attempt pig rearing at all. From the time the pigs are farrowed nntil they are weaned they mnst have the hest care that can be given them. This, hy no means, consists in having an attendant with them all the time, nor in petting and handling them, nor in constantly feeding and fussing with them. Many a fine litter has been reduced or lost altogether hy the well-intended hnt misplaced kindness of the keeper. They do, however, require to have a good, clean pen, where they can sleep in comfort without exposure to the excesses of cold or heat; dry, moderately warm and ventilated in winter, cool and airy in summer. In such quarters the sow should have heen kept for several weeks before farrowing. Here the pigs will afterwards learn to resort, and here they should be fed as soon as they have learued to eat, at regular hours dnriug the day, so long as they are with the sow. At weaning time the sow may he taken away and the pigs will miss her less than if they themselves are placed in new qnarters and compelled to rely entirely on the feed provided for them.

When a sow has more pigs than she has teats, the most unpromising should he sacrificed for the good of the others, for each yonngster will claim a particnlar teat as his own, and will fight valiantly for its possession. Whatever nnmher of teats a sow may have, she will soon cease to give milk from all except those in use. If, on the other hand, the pigs are in excess, the weaker ones will suffer and eveutually drop off altogether, unless fed in some other way. In case a numher of sows have littered about the same time, some having more than they can suckle and others less than they might rear, the pigs may he so divided among them as to allow each a fair chance of fulfilling a nseful destiny. And herein will he needed the patience of the manager. Instead of only two parties to the hargain, we have three to he consnlted in such a case. The sow will not usnally admit, without protest, a new comer to her little family; the new pig would naturally prefer to remain with his own fellows; worse than all, the pigs to whom the little stranger is introduced are very sure to give him anything hut a kindly welcome. These changes should therefore he made at once, and at night, while the pigs are quite young. The sows, with their respective litters, should he placed ont of hearing of each other, and the little pigs so confined for a day or two that they may not stray away. Care should he taken also to so mark them that their parentage may not be forgotteu.

Twelve pigs are as many as any sow onght to he reqnired to raise at one time. A young sow with her first litter may be considered as doing well to hring up six or eight; older sows will rear eight or ten profitahly. Moderate-sized litters usually prove the most satisfactory. The pigs make a better growth and the sow is less worried and exhausted. When, however, the pigs are early taught to eat, and it is practicahle to give them plentiful supplies of milk and other good food, so that they may depend less on the sow for their support, larger litters are desirable. If extra food is thus given to help them along, the same kind of food should he given the sow; for if she have one diet and the pigs another, the latter will almost surely he taken with the scours and so thrown into had condition, from which they may be a long time in recovering. Breeders often hoast of the wonderful prolificacy of their brood-sows, hnt they seldom afterwards report resnlts in avoirdupois from these large litters. Some, however, are glad to have from twelve to fifteen or more come in a litter in order that they may cull out the weak ones and thereby have the halance grow up strong and more even in aize. But we would rather have a lesa nnmher, and those of uniform size to start with, and we believe that this uniformity is more certain to occur in the moderate-sized litters than in those where the pigs are remarkahly numerons.—*Breeder's Gazette.*

Hill's Ferry seems to be the sporting center of Stanislaus county. The season has already opened. Friday and Saturday, May 4 and 5, there will he several races at Dutch Cornera. On the firet day there will he a trotting race for foals of 1880, purse $400. There will he mile heats, best three in five; the first horse to receive $280, second horse $80 and third $40. On May 5 there will be a trotting race, free for all. There will also be some running races, etc. The track is said to be in good condition and the races are to be run according to rule.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five except the two-year-old trot, unless otherwise specified; five to enter and three to start; entrance fee, 10 per cent on purse, to accompany nomination; purses divided at the rate of 50 per cent to first horse, 25 per cent to second, 15 per cent to third and 10 per cent to fourth.

National Association rules to govern trotting; but the hoard reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry 110 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 118 pounds, with the usual allowance as above.

Starters in all races must be named to the secretary or clerk of course at 6 p. m. the day preceding race, any other rule to the contrary notwithstanding.

No added money paid for a walk-over.

Horses entered in purses can only he drawn hy consent of judges.

Rules of the Pacific Coast Blood Horse Association to govern running races, except when conditions named are otherwise. Non-starters in running purses will be held for entrance under rule 3.

All entries to be made in writing, giving name, sex, color and marks of horses; also name and residence of owner. In running races full colors to be worn by rider, and drivers of trotting races are respectfully requested to wear caps of distinct colors, to he named in their entries, as their horses will he designated on programmes by colors worn hy drivers. This is necessary to enable spectators to distinguish the horses in the race.

Entries to all the above races except No 25 to close with the secretary on Wednesday, August 1, 1883.

Write "Entries to Races" on outside of envelope.

P. A. FINIGAN, President.
EDWIN F. SMITH Secretary.

No. 17. Purse $3,000, open to all horses which have not trotted better than 2:14 previous to January 1, 1883; subscribers to enter their name and post office address; the horse to be named at 8 o'clock p. m. of Saturday, July 14, the first day of the meeting, when the last 5 per cent will be due and payable; with $1,000 to the winner of the fastest heat, if better than 2:10¼; five subscribers to fill.

Special—Five thousand dollars is set aside for a special purse on this day. Terms and conditions to be announced hereafter.

CONDITIONS.

All the above purses (except Nos. 5, 8 and 13 pacing) are for trotting, and are divided, 50 per cent to the first horse, 25 per cent to the second horse, 15 per cent to the third horse and 10 per cent to the fourth horse.

Mile heats, best three in five, in harness, and to the rules of the National Trotting Association, except as hereafter specified.

Entries in all purses close on Tuesday, May 1, 1883.

Entrance fee 10 per cent of purse, as follows : Two and one-half per cent cash, which must positively accompany the entry ; 2½ per cent on Friday, June 1, and the remaining 5 per cent, from those who start, at 8 o'clock p. m. of the evening previous to the race, at the secretary's office, 116 Monroe street, Chicago. No entry will be accepted or considered unless the 2½ per cent cash accompanies the same, nor will any entry be allowed to compete unless the second payment of 2½ per cent is made or mailed on or before 11 o'clock p. m. of Friday, June 1, 1883, and any entry on which the final payment of 5 per cent is not paid at 8 o'clock p. m. of the evening previous to the day set for the race shall be considered drawn, and will not be permitted to start, but no entry shall be held or liable for any amount beyond the first payment of 2½ per cent, but failure to pay either of the payments when due shall be considered as a withdrawal, and shall disqualify the entry for competing in the race. It is the intention to place the whole matter of entrance on an absolutely cash basis, and no deviation from these rules will be allowed in any case or in any particular. No entrance is charged on the extra money offered for fastime in the several races.

N. B.—The special purses will be announced from time to time, as they are decided on. In arranging them consideration will be given to Maud S and Sir Julen, who are barred by their records from entering in the class races; to a stallion race, should one be deemed advisable; to double teams, and to trotting with running mate.

For further particulars and blanks, and in making entries, address **D. L. HALL,** Secretary, 116 Monroe St., Chicago.

NATIONAL ASSOCIATION

OF

Trotting-horse Breeders

Programme of Trotting Stakes for 1883.

CIRCULARS CONTAINING A DETAILED LIST of stakes, for three, four and five years, for 2:25, 2:30 and 2:40 stallions, and for 2:30 and 2:40 mares,

To close Friday, May 1, 1883.

and to be trotted for at the coming annual fall meeting, can now be had upon application to the undersigned at his office, room 81, 111 Broadway, New York city, or at the office of the BREEDER AND SPORTSMAN.

Also stakes for foals of 1881 and for foals of 1882 (now two-year-olds and yearlings), to trot when three-year-olds, and Subscription Stakes for stallions (at $50 and $200 each), only the get of stallions subscribed for eligible, foals of 1882 and foals of 1883, to trot when three and four years old.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23¾; another with a record of 2:26, made in 1882; another with a record of 2:28¾, and a grandson with a three-year-old record of 2:23¾, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20¼ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15¾ to 2:27¾. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23¾ to 2:28¾, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¾, by Happy Medium Jr.; and Carrie B, 2:28¾, by Elial G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address

WILLIAM T. WITHERS,
2-13y1 Lock box 392, Lexington, Ky.

ASHLAND PARK TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred.

For catalogues or further particulars address

2-17y1 B. J. TREACY, Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TO

Sportsmen & Pleasure-Seekers.

THE

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY THEIR LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING ESTABLISHMENT

OF THE

"HOTEL DEL MONTE,"

IS UNSURPASSED.

A SPACIOUS SWIMMING TANK

(150 x 50 feet)

FOR WARM SALT WATER, PLUNGE AND SWIMMING BATHS.

ELEGANT ROOMS

For Individual Baths with DOUCHE and SHOWER facilities.

MAGNIFICENT BEACH

Of pure white sand for SURF BATHING, Etc., Etc.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA THE

Southern Pacific Railroad,

(Broad Gauge), and the

SANTA CRUZ RAILROAD.

☞At PAJARO, the SANTA CRUZ R. R. connects daily with Trains of the S. P. R. R.

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets o any description issued by this Company will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggagemen. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle checked and carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt Agt,

☞S. P. Atlantic Express Train via Los Angeles Yuma, etc., leaves San Francisco daily via Oakland Ferry, foot of Market Street at 9:30 A. M.

Having been appointed SOLE AGENT for the

Whitman Saddle Company

For the Pacific Coast, I have in stock full lines of their celebrated goods.

SADDLES FOR ROAD, RANCH OR PARK USE, With or without the California horn.

TRAINING SADDLES.

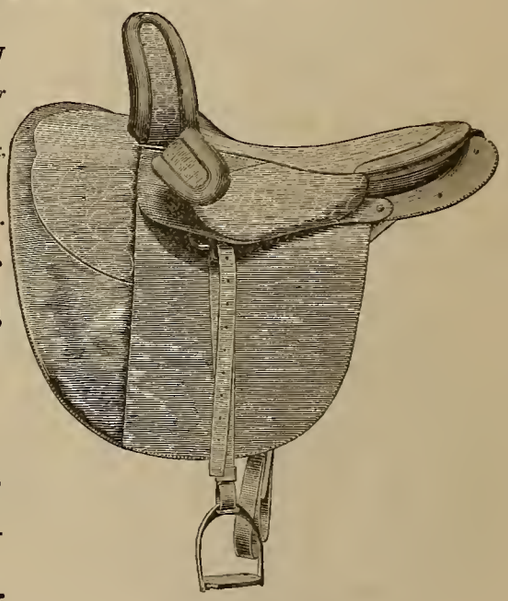
Ladies' saddles on hand or made to order in special styles

THE TRADE SUPPLIED

AT MANUFACTURERS' RATES.

An Inspection of these Goods is Invited.

Illustrated Catalogues sent free on application.



JOHN A. McKERRON, 230 and 232 Ellis Street, San Francisco.

WHITMAN TREES.

HAVING ON HAND A LARGE SELECTION OF

WHITMAN TREES,

I AM PREPARED TO MAKE UP SADDLES IN ANY STYLE DESIRED BY CUSTOMERS, WITH OR WITHOUT THE CALIFORNIA HORN.

Trees for Sale to the Trade

IN QUANTITIES TO SUIT,

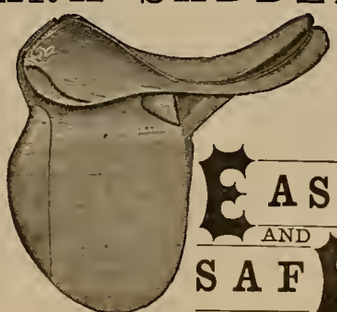
AT MANUFACTURERS' PRICES.

JOHN A. McKERRON,

230 and 232 Ellis street,

SOLE AGENT FOR THE PACIFIC COAST.

WHITMAN PARK SADDLE.



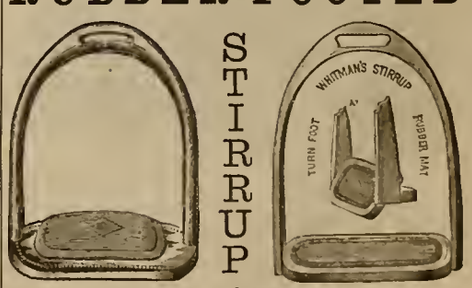
EASY AND SAFE

Riders or those who intend to become good riders should try these saddles. In conjunction with the WHITMAN COMBINATION HALTER-BRIDLE and the WHITMAN RUBBER-FOOTED STIRRUP these are the most stylish and comfortable outfits in use. They can be finished to suit any taste at from $15 upwards.

JOHN A. McKERRON,

230 and 232 Ellis St., Sole Agent for Pacific Coast.

WHITMAN'S RUBBER-FOOTED STIRRUP



THESE STIRRUPS ARE VERY HANDSOME AND THE RUBBER MAT A GREAT CONVENIENCE AND COMFORT TO THE RIDER, AS THE SLIGHT AMOUNT OF ELASTICITY PREVENTS SHOCK, WHILE THE ADHESIVE PROPERTY OF THE RUBBER HOLDS THE FOOT IN PLACE WITHOUT EFFORT.

No person ofter once using them will use any other.

JOHN A. McKERRON,

230 and 232 Ellis Street, Sole Agent for the Pacific

See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the ensuing season, 1883, from February 15th to June 15th, at the Oakland Trotting Park. Terms $50 the season.

JOSEPH CAIRN SIMPSON,
Oakland or 508 Montgomery street, San Francisco.

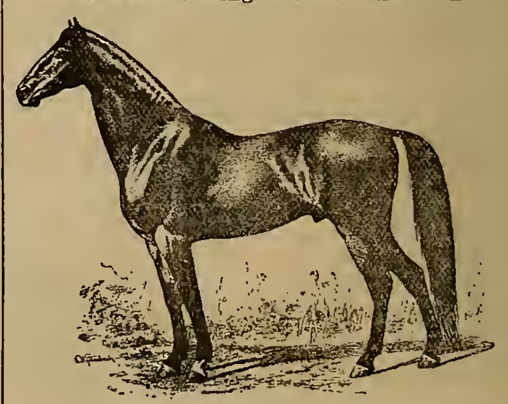
STALLIONS.

THAD STEVENS.

THIS THOROUGHBRED HORSE WILL BE AT AGRICULTURAL Park, Sacramento, for the season commencing Feb. 1 and ending the 1st of July next. Good pasturage for mares will be provided at $3 per month. For terms and particulars apply to or address

W. M. MURRY, Agent,
Sacramento Racetrack.

The Fast Trotting Premium Stallion



ALEXANDER

WILL STAND THE PRESENT SEASON AS FOLLOWS: MONdays, Tuesdays and Wednesdays at Clark's stables, Santa Rosa. Balance of time at Fashion stables, Petaluma.

Alexander is by Geo. M. Patchen Jr., the sire of Sam Purdy (2:20½) Starr King (2:22) and Vanderlynn (2:22). Dam Lady Creim, by a son of Brown's Bellfounder, by imported Bellfounder. For full description, see BREEDER AND SPORTSMAN of Sept. 9, 1882.

Of Alexander's get Tommy Dodd has a record of 2:24, Reliance 2:22¼, Nellie Patchen 2:27¼, Eudora 2:34½, Inauguration three miles in 7:29—last mile in 2:26, Sonoma Boy 2:37. Alex. Button proved by his performance in 1880 to be one of the best three-year-olds which have ever appeared in any country. He won the stake for three-year-olds at the State fair, beating Belle Echo, Annie Laurie, Len Rose and others, winning the first, third and fifth heats and making a dead heat with Annie Laurie in the fourth; time, 2:34½, 2:30, 2:29, 2:30¾, 2:35. At the fair of the Santa Clara Valley Association at San Jose he won, beating Belle Echo and Len Rose; time, 2:28¾, 2:30½, 2:33¾, 2:31¾. Belle Echo won the first heat. He won at Stockton, beating Honesty, Len Rose and Upright in straight heats; time, 2:32, 2:33½, 2:32½. In 1881, as a four-year-old, Button made a record of 2:26¾ over the Santa Rosa track. Dot Craig, by Alexander, has a private record of 2:29.

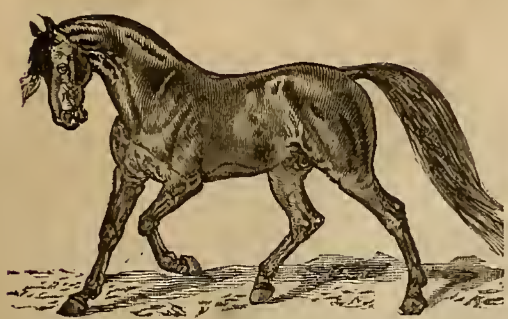
The Frasier team took first premium at the Sonoma and Marin District fair; also at Oakland for best carriage team.

Mares left at the City Front stables, San Francisco, will be forwarded. For further information apply to

T. T. UNKLESS, Petaluma.

STALLIONS.

UNDERMAN.



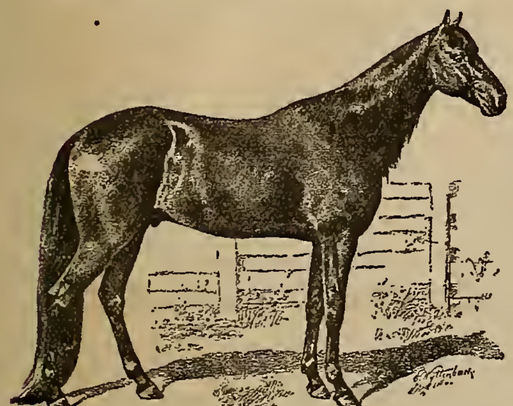
SIRED BY ELMO, DAM BY TOM HYAR, SON OF OLD Belmont, will make the season of 1883 from March 1st to July 1st at the Bay District Track, San Francisco.

Underman is a dark chestnut, with blaze face and left hind foot white. Coming six years old, 15½ hands high and weighs about 1,100 pounds.

Terms, $20 for the season. Mares not proving with foal can be returned next year free of charge. No responsibilities assumed for accidents. Apply to

FRED BENNETT,
Bay District Track, San Francisco.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2:21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Columbus. Woodford Mambrino by Mambrino Chief, his dam Woodbine by Woodford, a thoroughbred son of Kosciusko.

Woodford Mambrino is recognized to be the best son of Mambrino Chief. His own record is 2:21½, and there are a large number of his get in the 2:30 list. Among them: Abbottsford, 2:21½; Convoy, 2:22½; Magenta, 2:24½; Lady McFatridge, 2:29; Dacia, 2:29½; George A. Ayer, 2:30.

Besides those having public records, he is the sire of the two celebrated mares owned by Robert Bonner—Manetta and Malice. Manetta, with a running mate, and harnessed to a road wagon, trotted two miles in 4:27½, and Malice trotted a trial, on the same track, a mile in 2:19½. Woodford Mambrino is also the sire of Princeps, the sire of Trinket; record, 2:14. Woodbine is also the dam of Wedgewood, record, 2:19. Young Columbus, the sire of the dam of Abbottsford, has nine of his get in the 2:30 list, so that on both sides of the house there are notable performers. Abbotsford is a rich rosewood brown, 15¾ hands, and of very high form. His get are very promising, his daughter Jasmine having won the Embryo Stake for yearlings in 1881, and every one which has been put in training has shown good speed.

TERMS.

Seventy-five dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

LOCATION.

Abbotsford will make the ensuing season, 1883, on the ranch of S. B. Whipple, Esq., San Mateo, season commencing February 15th and ending June 1st, 1883. For full history see the issue of BREEDER AND SPORTSMAN of August 5th, 1882.

GEORGE BAYLIS, Agent, San Mateo, Cal.

MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,200 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

☞ George Wilkes has twenty representatives in the 2:30 list, of which 10 have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.

Will make the ensuing season, beginning February 1st, 1883, at STOCKTON.

In putting the price by the season at the low figure of $10 the owner does not acknowledge, thereby, any inferiority on the part of this horse to any other sire of Trotters.

IRVIN AYRES.

STALLIONS.

S T E I N W A Y.

TWO-YEAR-OLD RECORD 2:31¼; 3-YEAR-OLD RECORD 2:25¾.

TERMS

WILL SERVE MARES THE PRESENT SEASON AND ENDING July 1, 1883, at the stock farm of the late Daniel Cook, Danville, Contra Costa county, Cal., at $100 for the season, payable before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage at $6 per month, and extra pains taken with mares in attendance, but no liability for accidents or escapes. Mares sent in care of of McCleverly & Noblett, Fashion stable, Oakland, S. J. Bennett, Martinez, or D. S. Smalley, Haywards, will be forwarded immediately to the farm.

DESCRIPTION.

He is a rich bay; 15¾ hands high; long, flowing mane and tail; two white hind ankles; remarkable style and lofty carriage; has a good, resolute head, set on a stout neck; his shoulders are of the Hambletonian form—do not mount very high at the withers; has great length and capacious middle piece; plenty of bone and substance, and his gait is big and square.

PEDIGREE.

Steinway was sired by Strathmore.

First dam Abbess by Albion, the sire of Vanity Fair, with record of 2:24.

Second dam by Marshal Ney, by imported Emancipation.

Third dam by Bertrand, by Sir Archy.

Steinway's dam is the dam of Solo with five-year-old record 2:28¾, and also the dam of W. S. Buckner's colt Currency that trotted as a yearling last fall in 2:46. See N. Y. "Spirit of the Times of November 18, 1882. Strathmore is the sire of Santa Claus 2:17½; Chestnut Hill, 2:22½; Steinway, 2:25¾; Alice Stoner, four years old, 2:24; Nannie Talbot, four years old, 2:29; Solo, five years old, 2:28¾; Monitor, five-year-old record 2:29; by Rysdyk's Hambletonian, the sire of 35 in the 2:30 list. Address

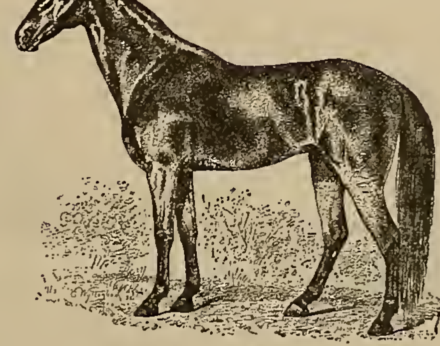
Danville, Contra Costa Co., Cal.

HAMBLETONIAN TROTTING STALLION



BOB MASON

By Echo. His dam Belle Mason by Belmont, Thoroughbred.

Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's); First dam Lucy Johnson by the Pony (son of Imported Leviathan); second dam Catalpa, by Frank; third dam by John Richards.

WILL MAKE THE ENSUING SEASON, LIMITED TO TWENTY mares, commencing February 15, 1883, and ending June 15, 1883, at the stables of his owner, Figueroa street, Los Angeles.

DESCRIPTION.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100 pounds. Foaled May 10, 1879. He is of fine, kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For full history of his sire, Echo, see BREEDER AND SPORTSMAN July 29, 1882. See also, for his full brother, Exile, BREEDER AND SPORTSMAN, issue of September 16, 1882.

TERMS.

One hundred dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Address

CHARLES J. ELLIS,
Post office box 55, Los Angeles, Cal.

THE TROTTING STALLIONS

SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMING SEASON, FROM Mach 1st to July 15th, 1883, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

PEDIGREE.

Singleton is by Willie Schepper, a son of Rysdyk's Hambletonian, his dam Lightfoot (the dam of Pride) by Flaxtail, a son of Pruden's Blue Bull.

DESCRIPTION.

Singleton is a dark brown horse, tan flanks and muzzle, a little touch of white on hind feet and one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was bred by Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

Fifty dollars the season. Mares not proving in foal will be bred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner their owners desire, at reasonable rates. There is every convenience on the place, boxes, paddocks and plenty of shade and water.

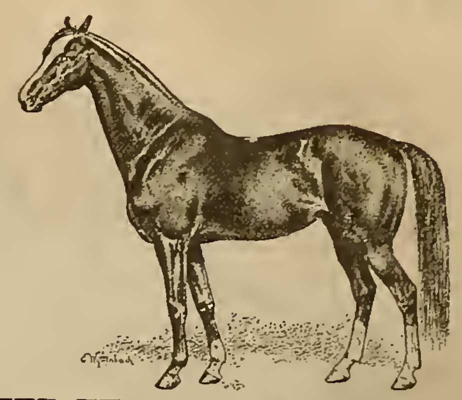
L A H A R P E

Will also make a short season at the above place on private terms. La Harpe is by Fame, a son of Alexander's Belmont, his dam Prairie Bird by Flaxtail, the dam of Flight and Prompter. Address

J. T. McINTOSH, Chico, Cal.

STALLIONS.

THE THOROUGHBRED STALLION



W H E A T L E Y

WILL STAND THE ENSUING SEASON, ENDING JULY 1ST, 1883, at the Oakland racetrack.

TERMS—$50, payable at the end of the season. Satisfactory arrangements can be made for pasturage near the track for mares from a distance.

PEDIGREE AND DESCRIPTION.

Wheatley is a golden chestnut, 15 hands 3 inches high, and of fine style and appearance, and is by War Dance.

First dam sister to Pryor, by imported Glencoe.
Second dam Gipsy, full sister to Medoc, by American Eclipse.
Third dam Young Maid of the Oaks, by imported Expedition.
Fourth dam Maid of the Oaks, by imported Spread Eagle.
Fifth dam Annette, by imported Shark.
Sixth dam by Rockingham.
Seventh dam by Baylor's Gallant.
Eighth dam by True Whig.
Ninth dam by imported Regulus.
Tenth dam imported Duchess.
Eleventh dam Griscwood's Lady Thigh by Croft's Partner.
Twelfth dam by Greyhound.
Thirteenth dam Sophonisba's dam by Curwen Bay Barb.
Fourteenth dam D'Arcy's Chestnut Arabian.
Fifteenth dam by Whiteshirt.
Sixteenth dam Montague mare.

War Dance by Lexington.
First dam Reel, by imported Glencoe.
Second dam imported Gallopade, by Catton, the sire of Trustee.
Third dam Camillina, by Camillus.
Fourth dam by Smolensko.
Fifth dam Miss Cannon, by Oroville.
Sixth dam by Weathercock.
Seventh dam Cora, by Matchem.
Eighth dam by Turk.
Ninth dam by Cub.
Tenth dam by Allworthy.
Eleventh dam by Starling.
Twelfth dam by Bloody Buttocks.
Thirteenth dam by Greyhound.
Fourteenth dam Brockelsby Betty, by Curwen's Bay Barb.
Fifteenth dam Mr. Leedes' Hobby Mare, by the Lister Turk.

For further particulars apply to

MATT STORNS, at the Oakland Racetrack,

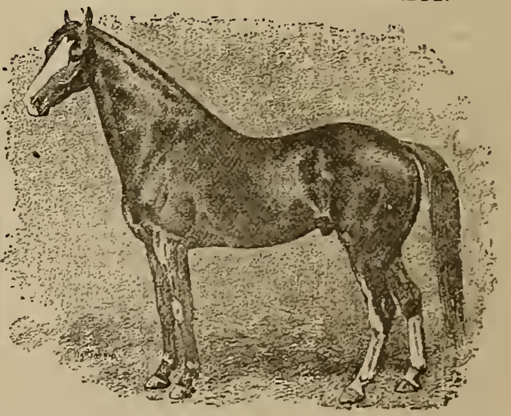
THE THOROUGHBRED STALLION



J O E H O O K E R,

BY MONDAY.

First Dam Mayflower, by imported Eclipse.
Second dam Hennie Farrow, by imported Shamrock.
Third dam Ida, by imported Belshazzar.
Fourth dam Gaiuma's dam, by Sir Richard.
Fifth dam by imported Eagle.
Sixth dam Bet Bosley, by Wilkes' Wonder.
Seventh dam by Chanticleer.
Eighth dam by imported Stirling.
Ninth dam by Clodius.
Tenth dam by imported Silver Eye.
Eleventh dam by imported Jolly Roger.
Twelfth dam by Partner.
Thirteenth dam by imported Monkey.
Fourteenth dam imported mare from the stud of Harrison of Brandon.

TERMS—$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at $4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento on the Freeport road.

This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN Jan 20, 1883.

THE STABLE.

Trotting Action.

Fast trotting action may be defined as the power to move the limbs so as to be capable of showing a great flight of speed. There may be faultless action without endurance, as the capacity to keep up more than ordinary speed for even a comparatively short distance depends upon lungs, heart and brain, as well as muscular force, and properly arranged machinery in the shape of correctly placed bones. It is evident that if the bones are in a position to be moved with the least possible exertion there will be a corresponding husbanding of power, just as a well-constructed steam engine will do the same work with less fuel than one that is of inferior shape. The engine is represented by the skeleton, steam is the exemplar of the muscles, the engineer is the brain to regulate, guide and make effective the combination. But the brain of the trotting horse has a double duty to perform. From this comes the adaptability to acquire the fast trotting step, and it is the reservoir of that intangible something which has been such a puzzle that as yet it is without a name.

Horsemen call it "game," the will to struggle, the determination not to succumb to tiring muscles and engorged lungs. It is different from "pluck." The bulldog is the type of the latter, as he endures punishment without flinching. He is of such a coarse organization that he is insensible of pain when under the excitement of battle, and suffers hideous lacerations without a whimper.

Without this excitement he does not display the quality which is termed game. He must be aroused by acute physical suffering or the expectation of it from an antagonist. He will not run until he falls from exhaustion, as I have seen the greyhound, and if engaged in chasing an enemy will never exert himself to extreme fatigue.

It does not require sight of the hare for the greyhound to run until exhausted, as he will do it in play, and in the instance referred to emulation could be the only motive. I owned a large greyhound when living near Chicago, and a jockey who lived with me was exercising a horse for a neighbor. He brought him to our stable at a certain hour, and this dog accompanied him in his exercise. He had some means of timing when the horse would come, and made a practice of meeting him before he got to the track. On one occasion the track was muddy and the work was more than ordinarily severe. The dog ran until completely done up and dropped on the muddy track nearly lifeless. He tried his best to outrun the horse, and did not give up the contest until there was complete prostration.

In contradistinction to this I owned a bull terrier that was a stallmate of old Blackbird. A pluckier dog was never whelped nor one which exhibited a greater attachment for a companion. He would scarcely leave the horse long enough to go from the stable to the kitchen door for his food, always carrying it to the stall to eat it. When the horse was harnessed he took his place behind the sulky or wagon, and as long as the pace was not too fast he would make the circuit of the track. It was a private track without being fenced, and when the gait was too rapid to suit him, he would cut across and meet him. When this entailed greater exertion than suited his notions he would sit on his haunches until the work was finished, contented with the horse being in sight.

With this divergence to illustrate the difference between pluck and game I will return to the consideration of action, the desired point to establish being that form is secondary, and that there is a more potent influence than configuration. It must be borne in mind that very fast trotting action is the topic, the artificial characteristics making it very different from what may be termed the natural paces. While no one, who is conversant with the subject, will deny that there are great advantages in good shape, it is manifest that other qualities are necessary to insure the acquisition of trotting speed. I always considered that Dexter was as highly formed as any of the very fast trotters I ever saw, and yet have seen quite a number, equally as well shaped, that did not have the faculty to acquire the step. "Trotting instinct," that catchpenny phrase without meaning, does not express the agency that makes form effective, and in some cases overcomes faulty conformation.

It cannot be called superior intelligence, as some of the most intelligent horses are stupid pupils, so far as a trotting education is concerned.

The faculty, whatever it is, is not purely hereditary, and yet like nearly every other quality judicious selection of parents is followed by offspring that come near to the desired standard. It is much easier to reproduce proper form than the traits which are necessary to make that form of service on the track. For all that, it is essential that there should be the right foundation to build upon, and that blood, form and action be joined. In the last article a brief account was given of the movements that constitute fast-trotting action. When it is thoroughly understood what these movements are it may be easier to devise a better system of education to perfect the pupil, and by giving the animal lessons that are more suitable to perfect the knowledge, it will be discovered that a great part of the lack of success is due to the teacher, and that the adaption is more frequently met than is now supposed. At the first glance it appears as simple as teaching a child the alphabet, and that if a colt progressed by moving the fore and hind legs on opposite sides of the body synchronously it would readily acquire the faculty of accelerating the movements so as to reach an approach to the fastest rate if even incapable of keeping it up for a distance. Before the cameras showed the exact handling of the limbs it was palpable that there were serious obstacles to overcome. In the jog-trot horses "interfered" and "forged," and when going faster "knocked" their knees, "cuffed" their shins, "cut their quarters," and the skill of the old-time trainer was powerless to apply any effective remedy. From pieces of blankets, scraps of sheepskin with the wool on, canvas, etc., the transition to boots was to be expected, though it was many years before these useful appendages were any improvement on the ancient appliances. As is usually the case, one extreme followed another until some of the trotters are laden with boots from foot to brisket in the anterior of the body, from foot to above the hocks on the hind legs.

There came with the rage for boots a neglect of other methods to guard against injury. With all the protection which could be obtained from leather and kersey there were drawbacks arising from faulty shoeing and bad "handling." Ponderous appendages in the shape of "a good, strong shoe," weighing from one to two pounds, feet tilted to a side to prevent cutting, the hoof mutilated to meet the fancy of the smith or, perhaps, the still cruder imaginings of the trainer, and then the head elevated until the face was in a horizontal line, it was not surprising that wounds should follow. The tortured animal was further punished for not possessing the right kind of action at the commencement of the education; "pulled" at when trotting, unmercifully snatched about when he broke, run at his top rate, the whip being plied at every stride, and this was called the proper system to make a fast trotter. There have been many and decided improvements since the days I write about, and yet there is plenty of opportunity for further advance. The dilatoriness of trainers in availing themselves of the lessons that Palo Alto has been at such an expense to formulate, is incomprehensible. In any other profession (and the training of trotters understandingly is well worthy of being called a profession) corresponding revelations would be hailed with delight; every student eager to learn; every master ready to teach. In this case the intelligence was received with sneers, and in lieu of an effort to understand there was skepticism, and that unbelief grounded on profound ignorance. When photographic cards, giving a complete illustration of the stride of the racehorse and trotter, were offered for sale at $1 50 each, not a trainer to my knowledge invested, and when a free exhibition was given by Muybridge in San Francisco, and in Sacramento during the week of the State Fair, when scores of equine tutors were present, not a solitary individual could be induced to attend. These photographic illustrations are so intimately connected with the subject under consideration that this allusion is applicable, though now it may be as well to recover from the break and proceed with the investigation.

The main difference between slow and fast trotting action is in the distance covered in the stride when the body is in the air. The length of the stride is doubled which, of course, compels greater energy of motion. In the slow trot the hind foot strikes the ground very nearly where the fore foot rested; in the fast gait it is extended several feet beyond. As has been stated in previous articles there are really two strides in what is termed one. This comes from the fore and hind foot touching the ground at nearly the same instant, and also being nearly together in giving the final impulse for the air-flight. While the body is carried along at say a 2:20 gait, the legs have to be moved with far greater velocity. Both hind and fore feet have to traverse the space which is bounded by the extreme rear and front extension while the body is moving. A horse with a stride of eighteen feet makes 294 of them in a mile. That is what we call a stride though in reality there are double that number, and in less than half of a second the feet have to push the body along, give it impetus enough to overcome gravitation until it is supported, and get into position again to renew the work. As long as the feet are on the ground it is evident that weight in the shoe does not detract from the force, though it is just as palpable that when they are raised every additional ounce makes the labor of bringing them forward far more severe. If then there is neither aid nor hindrance when the feet are on the ground, it is safe to assert that weight in the shoes make no difference at this stage of the action. But if weight is an obstacle while the feet are in the air, taken together there is a serious drawback in the encumbrance. Then comes the fact that horses with weight on their feet can trot faster than when relieved of what theory says is detrimental, and we are at a loss to account for the discrepancy. According to mechanical principles, and those which have been demonstrated to be correct, the inertia of weight can only be overcome with force. Thus a steam engine is rated according to the number of pounds it will raise to a certain height in a specified time. When weight has to be moved with increased velocity, then the force required is augmented in proportion to the speed. Writing without books of reference, I cannot state even an approximation to the immense difference there is between moving a body slow and fast, and though the medium through which it has to be moved offers as little resistance as the atmosphere there is a striking inequality in the motive force required. Immense muscular power is needed to propel a heavy weight, as that of a horse, at the rate of thirty-eight feet in a second and keep it up until a mile has been compassed. A few ounces on the extremity of the levers when these have to travel with at least double the rapidity entails a great loss of power. This is shown by the difference between shoes and plates in the racehorse which gave rise to the saying that "an ounce on the heel" was more potent in retarding speed than "a pound on the back." The puzzling question then comes how can you account for the fact that it does not retard the fast trotter? I have endeavored to answer this, and at various times have come to the conclusion that I was on the right track. Subsequent investigation, however, demolished the structure and, driven from the position thought to be impregnable, I had to choose other ground. At present I am forced to the conclusion that weight on the feet *does* retard the fast trotter, and when we discover methods of controlling the action without resorting to heavy shoes or weights applied to the feet, that the riddle will be solved, and that the same advantages will follow as in the case of the racehorse when the shoes were pulled off and plates put on. That a heavy shoe is an injury in lieu of protection to the foot I am thoroughly convinced and have convinced others by the results of practice who were not to be moved by theoretical reasoning. Should I succeed in presenting arguments that will bear analysis, the first step will be taken. Should these be sustained by the results of actual trials, then theory can be dignified with a title.

OUR NEW YORK LETTER.

Racing in Tennessee—Great Entry for Monmouth's Stallion Stake—Etc.

Since my last letter the second spring race meeting in the Sonthwest has become a matter of turf history, and Memphis' racing week was, in some things, more eventful than the Crescent City's race carnival, much more so than was anticipated, an account of several of the large stables going from New Orleans direct to other points and the small entries to tha stakes. Bnt the purses were productive of some exciting contests, and the twenty-six runs during the six days gave the followers of the equine gladiators some good lines to future events. Morris and Patton continued their success with their fine Darby colt, Drake Carter, who won at a mile and a half in 2:43¾—a good race, as the track was rather heavy. Strange to say, however, Green Morris dodged the Illinois colt Aztec on the first day in the Chickasaw Guards Stake, with $750, for which Drake Carter was also entered. Carter beat Aztec two lengtbs in the Pickwick at New Orleans, but Powers' colt got pocketed and had to pull back and go round his field, or ha would have given the Derby crack a much harder win, if not have beaten him. Remembering this, perhaps, and with a view to save his colt all he can for his arduous campaign ahead, Green Morris paid forfeit for Carter. This may be sound judgment, bnt on the ground of "a bird in the hand, etc.," it looked rather ominous to the colt's Derby backers, as showing that his owner did not place in him the overweening confidenca that has been represented. It was a pity, too, jor Aztec is the only good colt Drake Carter hes yet beaten, and that he is a real "nailer" this son of Aramis and Nelly Gray showed hy following up his Chickasaw victory of Monday and defeeting four days afterwards Duke of Montalban, Apollo, Lnte Fogle, and others a mile and a half in 2:39½, the festest ever run on that track. Should Carter and Aztec meet at a mile and a half, which, unfortunately, they are not likely to do soon, the Illinois colt not being in the Derby, the namesake of the ancient Mexicans would find many hackers. Botb these fine colts are brothers in blood, grandsons of imported Phaeton, by King Tom. Fellowplay, Morris' fast miler, also showed fine form at Memphis, and his mile conquest with 118 pounds up over Wedding Day showed that up to nine furlongs he is as fast as ever. His 1:43½ at Memphis last week is equal to 1:42 at Louisville, and if he can keep up this clip in the Merchant's Stake there, he will trouble Thora, Checkmate, Freeland, Farragut, or any of the cracks to defeat him. His defeat on the first day hy Pearl Jennings counts for nanght, as he was virtually left at the post. Of the two-year-olds Unknown, hy your old friend Foster of $30,000 pursa fame, fairly made all the honors, getting three races right off the reel. As she beat Lloyd Daly, who showed well at New Orleans, this gray filly, by Capt. Moore's stallion, must be a rasper.

Lute Fogle, hy Enquirer, won two races, and served to further enhance, if possible, his sire's trausceudent merits. Duke of Montalban beat Ballast, Pope Leo, Wallensee and Katie Creel a good race, and Ballast and Apollo each scored a win from fair fields.

Memphia is one of the few large cities in this country where the people have right across the river, almost at their very doors, as it were, an impenetrable, trackless wildernesa of canebrake, where bears, panthers and other large game can be "stirred np" at short notice.

Nashville, the Rock City, opens its gates to the racers next Monday and the events of the week will be the expected meeting of Thora and Checkmate and Gen. Harding's yearling sale at Belle Meade. Col. S. D. Bruce, as your readers are aware, attends this and the Bowen, Swigert and other Kentucky sales in May. He will be glad to execute any commissions, and can he written or wired until May 3 at Maxwell House, Nashville, and from that date until the 21st of May at Phœnix Hotel, Lexington, Ky.

Tbe death of Mr. Dan Swigert's fine stallion Monarchist has left a void not easily filled. He was just heginning to make his prepotency felt as a sire of winners, and even for the limited time he did stud duty his get for five years past show $44,000 winnings. This ought to make his yearlings in the Elmendorf salesring the subjects of eager competition next week, and thereby compensate in aome degree their popular owner, for the great loss he hes sustained is a national one. Owing to Monarchist's untimely decease Mr. Swigert announces that hie other stallione, Glenelg and Virgil, will tbis season serve none but hie own mares. The Messrs. Bowen's Runnymede yearlings by imported Billet will also he much sought after at their eale within a day of those from Elmendorf. This fine stallion has shown himself to be a sire of both fast and stout horses, and his breeding is unsurpessed.

The liberal entries of Messrs. Baldwin, Winters, Stanford and other Californians to the Eastern racing stakes, and those of Hickok and Goldsmith to the trotting fixtures, have shown our turfmen thie side of the mountains that the Pacific Coast ia not going to be the hindmost in the struggle for turf honors this year. Tba fine entry from your saction in the Chicago etallion fixtures, the arrival of St. Julien, Romero, Overman, Director, Eva, etc., at Chicago on Mouday of thie week, and particularly the subscriptions ($500 each) of E. J. Baldwin and T. Wintere to the Monmouth Stallion Stakes of 1884, which closed on the 16tb, will tend towards a mutual reciprocation by Eastern breeders, associatious, racing men, etc., of the interest eo cleerly ahown on your Coast, in many ways, and cause many an eye to be directad toward the eetting sun, with a view to hnying, selling, wintering and raising fine stock where the advantages for doing so are eo meny and peculiar, as compared with some parts of the East. This enterprise of your State has been perhaps slow to meet with the proper recoguition East, but that it will do so now is assured, from tbe expressions of commendation heard on every side.

A notable instance of Kentucky liberality in connection with thie same great Stallion Stake of '84, is that of Maj. Thomas of Dixiana farm, the home of King Ban, Lelapa, Fellowcraft, Himyar, etc., who sent to the Monmouth Park Association his entry for tha first three of theae stallions. When it is known that Major Thomas only owns one yearling by King Ban, three by Lelaps, and three by Fellowcraft, his energy in this matter can be appreciated better—$1,500 subscribed to pay entrance fees for, most likely, the benefit of othar persone. Truly the age we live in is, in turf mattere, constantly gravitating towarde larger and more liberal ideas. Twenty-five stallions are entered in this colossal stake, and tbeir entrance fees ($12,500) are a "nest egg" that givee promise of a small fortune to the owner of the winner.

The $10,000, puree for 2:19 trottere to be contested for in August, at Hartford, Conn., also has a large entry, which was made pnblic yesterday. Thirteen owners sent in their names the list including Com. Kittson of St. Paul, Budd Doble of Chicago, J. W. Page of Wyoming, J. E. Turner of Philadelphia, Wm. Armstrong of Michigan, W. R. Loomis of Chicago, J. A. Goldsmith of California, and Messrs. Gordon of Cleveland, Hedges of New York, Morse of Providence, Golden of Boston, Browne of Rochester and Connor of Middleton. Horses do not have to be named until just prior to the race. Romero, Fanny Witherspoon and Yellow Dock are three likely to he in the field. The defeat of Sachem, Passaic, etc., last week at Epsom, England, has shown New Yorkers at least that the path of our animals abroad is not likely this spring to he strewn with the roses so fondly anticipated a month ago. Foxhall gone wrong again, Iroquois not yet seen in the field, and the rest of the Lorillard and Keene contiugents, seemingly not worth a ——, is the way the situation stands at preseut, and no "silver lining" visible in tha "clond" either.

To-day the 2,000 guineas at Newmarket was run, and as up to the time of closing this letter the winner had not been called, it is safe to say no Yankee horse has won it, for when an American horse wins in England, so promptly is the triumph wired across the "big pond," that in one notable case, that of Iroquois in '81, the news was in this city at 9:30 in the morning, *before the bookmakers here stopped business in the race*, as many of them found out to their subsequent bewailing of such sharp work.

Late English betting advices point to a probable victory in the 2,000 of Lord Falmouth's Galliard, or Mr. Blanton's Prince.

The late Mr. Crawfurd's horses were sold at anction in Euglaud, on the 17th, and the lot (thirty-one head) brought nearly $80,000, Martini, by Hermit, a full brother to Shotover, last year's Derby winner, realizing the highest price, $20,5000. He goes to Germany.

Mr. Walton (the plunger) was to have shipped his beautiful mare, Girofle, to England to-day, but at the last moment it wae decided to wait for the Egypt, of the National Line, which sails May 5. The steamers of this company, are universal favorites among sbippers of live stock, both for their accommodations and the care shown hy the officers and crew.

Mace and Slade, after a benefit at the rink on Monday of this week, sailed in the Arizona yesterday for "Hold Hingland." Ten weeks will see them back again, and then the Maori will go into training to meet the new importation, Chas. Mitchell. Sullivan, the Bostou pet, has beeu getting away with some of that $12,000 realized from the lete testimonial given him hy tbe esthetic residents of the "Hub," and wild dissipation has borne its natural fruit in the severe hemorrhage which seized him yesterday in Boston, and his coudition is said to be rather critical, though his friends scout the idea and say ha will be all right in a few days.

Hanlan and Ross have at last come to terms, and after the champion tackles the Washington sculler the New Brunswicker will try his haud, with the usual result, probably—Hanlan an easy victor. Now that Courtney shows such a white feather, is there no one in America that can cope with the Canadian wonder? Let California try her skill with the sculls, and see what her oarsmen can accomplish.

A good story comes from Columbus, Ohio, tbe abode of J. N. Ackermen, the well-known "beach comber" of Brighton, and a well-known horseman at other points. It seems that Mr. A. is the owner, beside his racing stable, of two large drug-stores in Columbus, and each racing season, or rather for six months in the year, he leaves his drug business to run itself, and follows his horses around the country. This last winter something has gone wrong, which the wonder is did not happen before, and now Mr. A., realizing the fact that two drug stores in Columbus are more valuable to him than even a racing stable at Brighton Beach, has come to the conclusion to dispose of his horses, which iuclude those familiar old campaigners Geo. McCullough, Edwin A., Ohio Boy, Nimblefoot, Morgan Spy, Clara A., etc., all winners of fair races in 1882.

The bench show at Madison Sqnare Garden, next week, is exciting great interest here, and some valuable canines will be shown.

The free-for-all race at the Gentlemen's Driving Park, for which St. Julien, Fanny Witherspoon and Hopeful are entered, is likely to prove a "fizzle" unless the contemplated race between Clingstone and St. Julien is arranged instead. If this is accomplished a great struggle for fast time will result, which Hopeful in his present "bunged-up" condition, nor Com. Kittson's mare, could not force St. Julien to show.

Tha theaters are doing very well here, as usual. Haverly's Fourteenth-street housa has been running "Around the World in Eighty Days" to large business. The cast included a pack of simon-pure Indians, and the well-worn piece was splendidly put ou the stage. Wallack's will soon shelve the great success, "The Silver Key," for "The Cape Mail," "La Belle Russa" and other plays. The Comique's local satire, "The Muddy Day," still draws fairly and "The Russian Honeymoon" at the Madison Square is good for as long a run as manager Dan Frohman will allow it. Salvini and Clara Morris are filling Booth's Theater nightly with "The Outlaw," "Othello," etc., and Burgess' "Vim," Edouin's "Bunch of Keys," Salshury's Troubadours and the McCaull Opera Company at the beautiful Casino are all playing to remunerative business. PACIFIC.

New York, April 25, 1883.

P. S.—Since this was written Galliard has won the Two Thousand, Prince third. Prince Batthyany dropped dead at Newmarket to-day. P.

The Charter Oak Park Association has received nineteen subscriptions for the $10,000 purse it has offered, to be trotted for during the August meeting, viz.: N. W. Kittson, St. Paul, Minn.; W. L. Gordon, Cleveland, O.; W. H. Hedges, Newburg, N. Y.; John E. Turner, Philadelphia, Pa.; E. W. Conver, Middletown, N. J.; J.W. Page, Cheyenne, Wyo.; Jas. Golden, Boston, Mase.; H. W. Brown, Rochaster, N. Y.; Budd Doble, Chicago, Ill.; W. Armstrong, Almont, Mich.; W. R. Loomis, Chicago; J. A. Goldsmith, Oakland, Cal., and the Yellow Dock Company of Providence, R. I. Subscribers need not name until August, but among those likely to be named are Fanny Witherspoon, Romero and Yellow Dock.

After Drake Carter's victory in the Cottrill Stakes at New Orleans, the handsome silver cup was filled with water and Col. Simmons held it while the noble animal was led up and dipped his nose into tha silver vessel. As the cup was about to be taken away Drake Carter reached for it again and took another sip. Hia proud stable boy drank out of tha same cup and Johnny Sax, the little jockey, pnt his head into the vessel for luck. The scene was a pretty one and Green Morris wae eepecially delighted as his stable has succeeded in carrying off the trophy for three successive years with Fellowplay, Apollo and finally with Draka Carter.

Two colts were exhibited at Fresno last week that took the eye of people interested in the draft horse. These youngsters at eight months weighed reapectivaly 825 and 805 pounds. They were eired by T. C. White's Clydesdale stallion Lord Douglas.

TURF AND TRACK.

An Eastern Racecourse.

The following, which is copied from the New York *Herald* of April 22, will give our readers an idea of the magnitude of turf interests in the vicinity of New York. The improvements mentioned will place Monmouth Park on the plane of the grand course at Sheepshead Bay, and give it, so far as embelishments go, the advautage of Jeroma Park. In one respect New Jersey has the advantage of the Empire State, that being untrammeled with legislative restrictions in regard to poolselling and bookmaking. At these large meetings there is an immanse revenue from the percentages, a large proportion of which reverts to the horses. The stringent law now in force cama from the pools which were sold on the presidential election in 1876, and the "cheap" pool rooms which were condnctad hy irresponsible men. Had turfmen taken a stand in opposition to the illegitimate offshoots, there wonld have been no trouble and with anything like united effort the law might be amended so as not to interfere with the racing. New Jersey reaps the benefit, however, and New York must suffer from the delinquencies of a few and the bigotries of many. As has oftentimee baen stated in thie paper, California is interested in the Eastern clubs, and eventnally must share in the prosperity. It may require a few years to hring this coast into the same prominence on the turf as it uow holds in trotting. The time is enre to come when the superiority will be jnst as well established and the ealee of blood stock hring purchasers from the East. California-bred colts will occupy many of the boxee at Monmouth Park, and we have the utmost faith that they will play well their parts.

There is a featnre which we desire to call especial attention to, viz.: the provision for the "stables" to do their own cooking. This ie of the greatest importance to owners and trainers, not merely from the reduction of expenses, as it enables those in charge to have better control of the boys employed:

Since the racing track at Monmouth Park, N. J., was first established thirteen years ago it has been constantly growing in popular favor, and the improvements made from year to year added greatly to the natural attractiveness. Not content with this the association is expending $50,000 this season in improving the gronnds, already shaded with thrifty maples, and adding to the accommodations and comforts of the sporting fraternity and the many thousands who visit there. It is the object of the associaiion, while it is conceded that it hae the most desirable and favorable track for racing, to make the surroundings and accommodations exceed all other racecourses in this country.

The improvements being made this season, and already nearing completion, are extensive and nead only to be seen to be thoroughly realized. The large and imposing club house, which stood npon the knoll opposite the turn in tha track known as the "clnb house turn," has been removed north toward the grand stand 285 feet, and is connected with it by a curved balcony 215 feet long. This is to be set apart for the use of the members of the association and their invited guests, for whom they will he required to purchase tickets of admittance to it. In front of the balcony are steps or seats sixty feet long, for accommodation of trainere and jockeys exclusively. Under the balcony ie the weighing room and jockeys' dressing room, the latter being fitted np with lockers, to be used for saddles and clothes, while in the rear is the saddling paddock. The main grand stand has been extensively changed and enlarged, effording seating capacity for thousands more than formerly. In the south end a ladies' room has been added, with a stairway leading from the stand, which is to be fitted np with all the necessary requirements to make it a comfortable retiring place. Adjoining this is the superintendent's office, when next comes tha dining room, which has been enlarged to double its former size, giving ample room for a large number to dine. Provieions are being made to furnish meals equal to the hotels by the building of a kitchen, 25x45 feet, in tha rear, which contains a range, a large icehox and other necessary equipments for cooking purposes. To the north of the kitchen is located the tank house, the tenk having been raisad several feet, in order to give more force to the water used in supplying the wants of the several apartments. The extension or steps in front of the grend stend have been rehuilt and enlarged and are now 226 feet long, built upon a brick foundation and in a unique style. The section nearest the south end is open underneath, affording sheltar from rain, and under the center one is a counter 117 feet long, while the one at the extreme north end ie eimilar to that at the south end, giving extra access to the pool rooms. The reporters' etand extends out from the center of the grand stend directly in front of the judges' etand, and is conveniently arrauged, and from ite location the occupants can have an unobstructed view of an entire race. It is 42 feet long and 9 feet wide, and inclosed in such a manner as to prevent intruders from entering.

The French pool stand is located at the north end of the grand staud, and is 70 feet long and sbeltered from sun or rain. Access is had from the front through arched doorwaye and at the north end, where is located the bookmakers' room, to which an addition of 40x160 feet has been added and fenced over. At the east cornar of this building is another addition, 50 feet square, to be nsed in selling auction pools.

The old French pool staud has been cut away, and a lunch counter formed around a portion of it, while the other hae been converted into a telegraph office, with all the conveniences possible.

The extensive improvements have greatly encroached upon the heautiful grase plot known as the quarter stretch, but they have added greatly to the appearance of the place, and more comfort will he experianced therefrom. In addition to tha improvements stated four large stables containing ninety-six stalls and a kitchen to each, have been erected, thus obviating the trouble experienced last season in finding accommodations for the horses that arrived thara to take part in the racing.

There are now one hundred horses on the grounds in training. They comprisa the stables of Tom Little, George Evans, William Storey, James Kelly, C. Littlefield, James Flannigan, Commodore Kittson and W. R. Babcock.

The racing will commence ou the 4th of July and continne till the 25th of August, inclusive, three days in each week. The arrangements for reaching the track from this city will be more complete than ever and greater accommodations offered.

BLOOD HORSE ASSOCIATION.

The Racing on the Third and Fourth Days of the Spring Meeting.

The third day of the races of the Pacific Coast Blood Horse Association was, if anything, more favorable so far as regarded the weather and track than either of the preceding. The attendance was large and the sport very good. Although the race for two-year-old colts brought forth only two starters, and these too far apart in speed to make much of a contest, the second race was a fast one, and the Pacific Cup very exciting from the start and until the last furlong it was doubtful how it would end. It is rare at this season of the year to have the rain come so opportunely as it did before the opening of the meeting, and of the ten days since the showers the three which were altogether the finest were those on which the races were run. The thorough softening of the track made it an easy matter to keep it in order, and a few light sprinklings all that was necessary to make it both fast and safe. The first race on the programme was for two-year-old colts, five-eighths of a mile, and of the six nominations only two appeared. The prevailing distemper has sadly interfered with the youngsters, and since the entries closed so many of them have been rendered unfit that this usually attractive part of the racing has been meager. The two which came to the post were the Palo Alto colt by Wildidle, from Blarney, and E. J. Baldwin's colt by Rutherford, from Maggie Emerson. This makes him brother to Albert C and Lucky B, but for some unscrutable reason he has not inherited even a slight portion of the speed of his bigbrothers, and all the description of the race that is necessary is to state that the Wildidle galloped away from him from the start and won by a long distance in 1:05.

SUMMARY.

April 28—Purse $150, of which $25 to second horse; entrance free; for two-year-old colts; dash of five-eighths of a mile. Closed with six nominations.
Palo Alto Stock Farm's b c, by Wildidle—Blarney....................1
E. J. Baldwin's b c, by Rutherford—Maggie Emerson....................2
Time—1:05.

The second race was for three-year-olds, a handicap, the distance 1⅜ miles. In this there were only two starters, Lucky B with 118 pounds and Augusta E with 105 pounds.

This gave the filly an allowance of eight pounds while the colt carried the rule weights. At the opening of the pool sales the odds were $35 on Lucky B to $20 on the other, and as the sales progressed the filly retrograded until it was more than 2 to 1 that she would be beaten. There was a very even start and the filly led to the stand the first time and at the quarter pole she was still in front, though the run down the backstretch showed that Lucky was only hiding his time, as he passed her with apparent ease and won in the very good time of 2:24.

SUMMARY.

Same day—Handicap Stake; for three-year-olds; $25 entrance, $10 declaration, $200 added, $50 to second horse, third to save stake; dash of one and three-eighths miles; weights to be announced Thursday, April 26, at 8 p. m.; declaration to be made Friday, April 27, at 12 m.
E. J. Baldwin's b c Lucky B, by Rutherford—Maggie Emerson, 118 lbs.................... (Duffy) 1
Howson & Co's b f Augusta E, by Monday—by Norfolk, 105 lbs....................(Howson) 2
Time—2:24.

The Cup was the great attraction. So much greater the interest that the other races were merely considered as a prelude to the entertainment. Ever since the weights were announced there have been heated controversies and quite a large amount of money at stake before the opening of the pool sales. Being a handicap there was the usual amount of grumbling at the allotment, and it was authoritatively stated that the race was a gift to the favored one. The starters were Fred Collier, 118 pounds; Precious, 113 pounds; Fostress, 108 pounds; Maria F, 108 pounds; May D, 106, and Inauguration, 100 pounds. The speculation was lively. Precious and Fostress being in the same stable were sold together, and at the opening of the auction Palo Alto would bring more than all the others. The favoritism rather increased, and $200 on Palo Alto, $120 on Fred Collier and $60 on all the others were the ruling quotations. The pools ranged from $200 to $300, and in the interval between the finish of the second race and the start for the cup the auctioneer was working at his highest rate of speed, and so fast and furious was the bidding that the clerks were troubled to enter the bids and make out the tickets. The placing and jockeys were as follows: Fostress drew the first position, Thomas Goff being the jockey; Fred Collier second, with Patsy Duffy up; Precious third, George Howson having the mount; Inauguration fourth, John Williams in the saddle; Maria F fifth, Fred Carrillo holding then reins, and May D, sixth, her trainer, Billy Appleby, to guide her. The start was not long delayed after the jockeys were mounted, and a very good "send off" it was when the flag fell. From her inside position Fostress had a good chance to fulfill her task which was evidently to "set the pace," though at the outset it was by no means fast.

The first quarter was 0:27, Fostress leading by three lengths as they passed the stand, May D second, the others grouped in the rear. The half mile showed Fostress still further in the lead without any acceleration of speed, 0:56 being the time. At the three-quarters in 1:23 the gap was still wider, May D and Inauguration second and third. It was a very pretty sight as the further semi-circle was compassed, the six being strung out in Indian file, the gay colors of the riders showing still brighter with the neutral-tinted high fence for a background. When they came opposite the stand the second time, Fostress was in the lead and still running easily, Inauguration second, Precious third, May D fourth, Fred Collier fifth and Maria F pegging away in the rear. The time for the 1¼ miles 2:16; from stand to stand 1:49. There was a moving closer of those in the rear in going round the turn, and when the straight work on the east side was reached, Collier was given his head. From the fifth place he bettered his position to second in passing the water tank, and there were hearty cheers as he passed Inauguration, who had to take third place. The jockey on Precious was also at work and so was Appleby and when about half way around the northern turn there was a mingling of colors for a short time, and then the white face of Collier showed in front. The cheers were redoubled, and as they entered the homestretch for the final run it was evident that Collier had it safe unless he "gave it up" on the trying ordeal. They were running faster than at any other time, Fostress still gallantly struggling to regain the threatened supremacy, Precious striving to come to the front and Inauguration still holding his grip with grim determination. But the white-legged, white-faced son of Joe Hooker was running easily while all the others were on a drive, and he gaily cantered under the wire three lengths in advance of Fostress, Precious and Inauguration having a close contest for third place. The filly got the better of him by a neck, and then came May D, Maria F last. The time for the 2¼ miles was 4:03¼, the last two miles having been run in 3:36½, and the last quarter 0:25¼. This was very good time considering the slowness of the first mile, and is as fast as even the Westchester Cup at Jerome Park has ever been run.

SUMMARY.

Same Day, Pacific Cup; Handicap of $50 each, $20 declaration, $500 added, second to receive $150, third to save stake; dash of two miles and a quarter; closed with thirteen nominations.
Stemler & Ayers' ch g Fred Collier, by Joe Hooker—Puss, 5 yrs., 118 lbs.................... (Duffy) 1
Palo Alto Stock Farm's ch f Fostress, by Foster—Planetia, 4 yrs., 108 lbs.................... (Goff) 2
Palo Alto Stock Farm's b m Precious, by Lever—Frolic, 4 yrs., 110 lbs.................... (Howson) 3
Wm. Boots' ch c Inauguration, by Wildidle—Miami, 4 yrs., 100 lbs....................(Williams) 0
J. & H. C. Judson's ch m May D, by Wildidle—Nettie Brown, 5 yrs., 106 lbs.................... (Appleby) 0
John Mackey's ch m Maria F, by Leinster—Flush, 4 yrs., 108 lbs.................... (Carillo) 0
Time—4:03¼.

Without there being the excitement which attended the close finish between Gano and Joe Howell on Wednesday, there was no lack of rousing cheers, and when a very handsome wreath was placed around the neck of the winner by the president of the association and remounted by his jockey, there was a repetition still heartier than greeted him at first. The big bettors, however, were disconsolate. This was the second downfall of the meeting and it would be rare good luck if they could regain the lost dollars in the two days yet to come. To offset the lugubrious visages of the heavy operators at the auction pools there were smiling faces in the line that was formed to get their tickets cashed at the mutual stand. Every $2 50 investment brought a return of $8 55, and this system is growing in popularity as people become better acquainted with it. The race that Joe Howell won the tickets brought $28 20 for every $2 50 risked.

The closing race was over hurdles, the distance being one and a half miles with six hurdles to jump. The winner of the previous race again was victorious though the competitor made a better showing than before. Both made clean leaps ran fast, though owing to the official timers having left their stand the rate was lacking. Hattie B was the favorite in the pools at the first and increased as the selling progressed. Both were well ridden, and with more practice are sure to be capital performers.

Same Day—Hurdle Race; purse $150, of which $25 to second; dash of a mile and a half over six hurdles.
Theo. Winters' ch m Hattie B, by Norfolk—Maggie Dale, 4 yrs., 141 lbs.................... (Johnson) 1
Wm. Boots' b m Mollie H, by Wildidle—Mamie Hall, aged, 147 lbs.................... (Stinson) 2
No time.

Second Extra Day.

Though the morning was as fine as the most exacting could desire, by the time the races were called there was a chilling wind from the northwest, and the afternoon, while bright and sunshiny, was not favorable for fast time. There was a fair attendance for a Wednesday, and those present were gratified by witnessing some of the best races of the meeting. The first on the bill was a race for two-year-olds, five-eighths of a mile, winners excluded, and five youngsters composed the field of starters. There were two unnamed fillies, by Grinstead, belonging to E. J. Baldwin; two of the Rancho del Paso nominations, Faustina and Milita, and a colt belonging to the Messrs. Judson, by Monday, called John A. The favoritism fluctuated, and though Rancho del Paso had the call at the start, Santa Anita came to the front, and taken together there was not much difference. Each of these "stables" would bring about $40, while John A had only slight support, so that his price was about one-tenth of the others. As the sequel will show, again the short end was the fortunate purchase. There was some trouble in getting the five off, though when the flag fell the start was very fair. Faustina had a trifle the best of it, all running fast, however, and rounding the turn they were closely bunched. The pace was fast, too fast to last, as the first furlong was run in twelve seconds, and the speed was not materially slackened until half way down the stretch. The outsider, John A, was among the leading division, and an opening being left for him next the rails he shot in, and the run home between him and the Grinstead filly from the sister to Clara D was very exciting, the colt reaching the score first by the length of his neck; Faustina third, the time 1:04.

SUMMARY.

OAKLAND May 2.—Purse $150, of which $25 to second horse; entrance free; for two-year-olds; winners at this meeting excluded; horses running second, 5 pounds extra; dash of five-eighths of a mile.
J. and H. C. Judson's John A, by Monday—Lady Clare..... (Appleby) 1

John Mackey's b f Faustina, by imported Glenelg—Marmot (Carillo) 3
E. J. Baldwin's ch f by Grinstead—Josie C................ (Garcia) 0
John Mackey's b f Milita, by Lever—Malta.................. (Kelly) 0
Time—1:04.

The second race was a handicap stake, a dash of a mile and a quarter, there being twelve nominations, three of which put in an appearance. These were Fred Collier, 119 pounds; Duke of Monday, 100 pounds, and May D, 100 pounds. Collier was the favorite, the rate being $100 to $65 on the Duke and $25 on May D. There was a lively effort by those who had lost on the first race to get even on this, and they entirely overlooking the extra weight on the favorite, rushed in their money with a will. Patsy Duffy had the mount on the favorite, and this added to the feeling of confidence, and there was no faltering until the horses were started; pool-seller and assistants were kept as busy as they could work. A good start it was, and there was no lagging. May D was in the lead when the stand was passed, Duke of Monday on her hip and the favorite going along easily in the third place. There was no variation at the quarter pole, the half in 52 seconds, though there was a general closing in going down the backstretch, and about midway the trio were on a line. Soon after, Collier dropped back a trifle, and his backers thought that Patsy had made the move to feel of his antagonists, and had taken "a pull" to prepare for the run home. For all that it was rather ominous to see the gap widening around the upper turns, though few lost heart, until at the three-quarter pole it was seen that the whip was at work on Collier. He passed May D, but never could reach the Duke who won, with something to spare, in the fast time of 2:09.

SUMMARY.

Same Day—Handicap Stake; free for all; $25 entrance, $10 declaration, $200 added, $50 to second, third to save stake; dash of one and a quarter miles; weights to be announced Monday, April 30, at 8 p. m.; declaration Tuesday, May 1, at 12 m.

J. & H. C. Judson's ch m May D, by Wildidle—Nettie Brown, 5 yrs., 100 lbs....................(Kenuedy) 3
Time—2:09.

This was the second downfall of the afternoon, and when the next race was summoned there was an army of "plungers" making frantic efforts to recover a few of the lost dollars. It was a selling race in which Maria F and Belshaw were the starters. The latter had twelve pounds off, Maria F an allowance of eight pounds. In the pools Maria F rated at $100, the other from $17 to $21. The buyers of the favorite appeared to think that it was like picking up money, and though it proved that they were in a measure right at several stages of the race, they were quaking at the danger of making another losing. The start was even, Maria F having the inside. They passed the stand with Belshaw slightly in the lead, and the first semicircle was done without any variation. It was neck and neck down the back stretch and nose and nose on the next half circle. In the straight run home both jockeys were driving. At the seven-furlong pole Maria F had a length the advantage, when again Belshaw came, and answering gamely had his head on her shoulder as they passed under the wire in 2:11½.

SUMMARY.

Same Day—Selling race; purse $175, of which $25 to second horse; entrance free; dash of one and a quarter miles; horses entered to be sold for $1,000 to carry their entitled weight; two pounds allowed for each $100 under that valuation, horses entered for over $1,000 to carry three pounds over entitled weight for each $100 above that valuation.
John Mackey's ch f Maria F, by Leinster—Flush, 4 years, $600, 105 lbs.................... (Kelly) 1
J. & H. Judson's b g Belshaw, by Wildidle—by Hercules, 5 years, $400, 110 lbs....................(Kennedy) 2
Time—2:11½.

The closing race was the one which was anticipated with the most interest. In it Joe Howell met Jim Douglas, and there was an impression that it would be stubbornly fought. The distance was heats of three-quarters of a mile, Douglas carrying 120 pounds, Howell 117 pounds. Duffy was on Howell, Howson guided Douglas. The pools started at $60 on Howell to $50 on Douglas, and with trifling variations up to the start for the first heat. The start was as good as could be, Douglas having the inside, though old Joe soon deprived him of this advantage and had a lead of a clear length at the half-mile pole, that quarter being run in 24¾ seconds. From there the heat was more in doubt, and though Douglas made several attempts to close, he was unequal to the task, Howell winning by three lengths in the very fast time of 1:14½. Taking the weight carried and the strong breeze into consideration, this is as great a performance as has ever been made, and so thought the bettors, and, furthermore, reasoning that Joe could not be beaten, threw their money into the box at the odds of $100 on their favorite to $17 on Douglas. There were few to squander the lesser amount, most of those who invested doing so from a desire to "hedge" their former bets. The second heat was a surprise, the most stunning of any of the meeting so full of surprises. The only description necessary is to say that Douglas outran Howell from the start, never surrendered the lead of two lengths which he got in the first furlong, winning in 1:15. After this exhibition there was no lack of supporters on the side of the son of Wildidle, and the auctioneer and clerks had no spare moments from their business. The rates ran $200 on Douglas to $100 on the other, and a great deal of money was staked. There was another incentive to win. Miss Alma Stuart Stanley authorized the announcement that she would present a suit of clothes to the victor, jacket of gold color, cap of rose, and that they would be ready for the successful knight of the spur and snaffle to don the next racing day, Saturday. Douglas was very fretful at the post, and there was a long delay before a start could be effected. It might be that the announcement made him nervous, though when the flag fell there was the nerve to carry him along at a tremendous rate. The quarter was run in 24 seconds, and though Howell was also running fast, his younger competitor was too much for him. Hopes were raised as he closed a trifle of the gap, only to be dashed into thin air when the finish came, as the chances of Douglas were never in jeopardy, and he scored the final heat of this exciting race in 1:15¼. As this gives Howson the gold and rose in place of the orange, which has faded into a dull yellow, he was warmly congratulated on his double and glorious victory.

SUMMARY.

Same day—Purse of $200, of which $50 goes to second horse; three-quarters of a mile and repeat; free for all.
Densdale & Howson's b h Jim Douglas, by Wildidle—by Norfolk, 5 years, 120 lbs.................... (Howson) 2 1 1
Stemler & Ayres' b g Joe Howell, by Bonnie Scotland—Eva Shepherd, aged, 117 lbs.................... (Duffy) 1 2 2
Time, 1:14½, 1:15, 1:15¼.

The Kentucky Derby.

The *Courier-Journal* in a recent interview with several Louisville racing experts decided that Leonatus could not win the Kentucky Derby. It was said that he had been asked to go a mile and a quarter, and that although he ran the mile in 1:49, he was 2:19 doing the mile and a quarter. On the strength of this Major Thomas' Queen Ban has been selected to carry off the honors, although the Derby never has as yet been won by a filly. But, as one of the gentlemen observed: "There was no reason why it shouldn't be." Later Ben Bruce was seen on the subject, and although he liked the Queen's chances, it was evident that he fears Drake Carter. He says:

"I believe Green Morris expects great things from his colt, and I'll tell you why. You know he bought both Fellowplay and Drake Carter from F. B. Harper. Both horses are out of Platina, but Fellowplay is by Longfellow and the other by Ten Broeck. Last summer he told Harper he wanted the refusal of the next colt out of Platina and permission to select the sire. Harper promised this. In February Harper wrote Morris about the matter, but received no answer. Since then, however, the Ten Broeck colt has been running at New Orleans and Memphis and displayed wonderful powers, and a second letter from Harper was answered a few days ago by the request that the mare he bred to Ten Broeck by all means. So you see that in spite of the success Morris has had with Fellowplay he evidently prefers Drake Carter and thinks him a better horse."

"He won the Cotton Handicap very easily to-day?" said the reporter.

"Yes, and it was a wonderful performance; 2:43¾ over a heavy track is evidence of pretty fine work, I tell you. Drake Carter has another advantage over his rivals in the Derby. He will go into the race a seasoned horse. He has run in very good company, showed excellent staying powers, has the prestige of several victories, and will prove a hard one to beat."

"How are the horses up in the Bluegrrss?" asked the reporter.

"All in good form, as far as I know, except Cardinal McCloskey. He is about played out, and I don't think will do much of anything this season. Why, Imogene, I understand, ran away from him the other day with the greatest ease—and you know she's no good on earth.

Among the winners at Newmarket on the first day of the Craven meeting was the Duke of Hamilton's three-year-old filly Natica, by Preakness. She won the Bushes Han[illegible] 82 pounds, from four others with the odds at 7 to 2 [illegible] her.

Oregon Turf Gossip.

What will he done in Oregon is a question that has been asked of ue every day for the last week. Here we have as good a track as can he found in the State, excepting the Baker City spring-board, over which horses can always make faster time than they can anywhere else, and which is something like the California tracks on which horses stop the watch at figures that cause men to helieve them world-beaters, until they take them East and then find out that they can only heat second-raters under the most liberal allowances hy the handicapper. The horse that can run in 1:45½ at City View can do his mile in 1:43 at Baker City or Oakland, to say nothing of the Bay District track at San Francisco, where they meke it so hard that hut few horses run a second race over it. To its hard, unyielding soil must be attributed the breaking down of Wildidle, Grinstead, Waterford, Thad Stevens, and last, but hy far the handsomest of all, the Ohio horse, Hock Hocking. No Oregon performance has yet been deemed sufficiently marvelous to warrant a horse being teken East on the strength of it. When Trade Dollar ran her two miles in 3:35¾ at Baker City, finishing so easily that every person who saw the race was satisfied she could have done it in 3:32, we urged Joe Crahb to take her East and run her in the winter races at New Orleans, Mobile or Savannah, and hreed her to Longfellow in the spring. Old Joe laughed and asked us if we thought she could win anywhere else in the world. He was at first inclined to douht the track heing a full mile, hut suhsequently saw it measured and found to he 1,761 yards and 2 feet in length. The next year Trade Dollar won five or six races at East Portland and Salem, hut never got below 3:40 iu any of her two-mile runs. Horses that have run in 1:44½ at Sacramento come up here and get heaten in 1:48½, notably Twenty-One and Frank Hastings. The homehred stables are not yet large enough and there has been no influx of stock from other States to fill the list as in 1878, when L. G. Duhois and Nathan Coombs, hetween them, sold some sixteen or twenty head of thoroughbreds to various purchasers. It was out of this diffusion of fine blood throughout the State that Walla Walla was enahled to give the best three-year-old race that has heen run north of the Siskiyous up to the preeent writing. Now we have no new importatione, and the young things have not yet hegun to come along. Thos. H. Tongue has a two-year-old by Glen Dudley out of Lucy Ashton by Waverly, her dam heing Annie Laurie, hy Vincent Nolte. The latter mare was the dam of the noted two-mile horse Locust Post hy Melbourue. U. Jarred of Umatilla county has also a two-year-old hy Dr. Lindsay out of Jewel hy Lodi. Jewel was own sister to Ruth Ryan, the dam of Billy Coombs, who won the Oregon cup at the last State fair. The Baskett estate still retains possession of old Des Chutes, now six years old, and one of the speediest horses ever foaled iu this State. If he has not lost his wonderful gait hy his trip to Montana he will still he a dangerous customer from half a mile up to three miles. The same parties have a colt hy Humboldt, out of Novice hy Norfolk, which is pronounced to he as game as old Butralph and a good deal faster. John Young, better known as "The Pony," has a two-year-old by Dr. Lindsay, out of Rosa Mansfield hy Rivoli, which is considered the finest colt ahout Walla Walla. He also has from the same mare a yearling hy Lodi, and the old mare is now in foal to Patsy Duffy. Georgia A is the property of Joe Lamar, hut he has never bred her to any horse that was her equal in heanty or purity of lineage. The City View Park ie being put in splendid order for the spring training by the lessees, Messrs. Buchtel aud Lindsey. No other track in America has more heautiful surroundings, and hy July there will be a line of street cars to carry passengers right to the gates of the track, besides which there will be the old trip by steamhoat from the front of Morrison street. Now there is plenty of money in that track for the proprietors if they conduct matters properly, and not a quarter of a dollar if they don't. If they permit drivers and riders who have heen ruled off elsewhere to come upon tbat track and drive or ride horees in races under their management, they cannot expect decent people to come on their track a seoond time. Bnt if they exclude the jobhers and their followers, then they may look for a prosperous season. They do not propoee to give any meeting of five or eix days' duration, hut to give races on Wednesday and Saturday of each week during the entire month of July. This we regard ae a much hetter plan.—*Oregonian.*

English and American Weights.

The racing puhlic and indeed most American turfmen labor under an error ae to the weights carried by most English horees in the racee they win. With the exception of stakes and races exclusively for two and three-year-olde, the English horeee who win carry a lees amount of weight than American horeee, notwithetanding we hear eo much abont the heavy English scale of weights, and the necessity of raising our own. Many Americane are caught hy the glamour of something English and foreign and never stop to investigate the matter.

Most of the important English and Continental racee, outeide of two and three-year-old etakes, are handicaps or racee with penaltiee and allowances, and ae a rule—with few exceptions—are won by the light or medium-weighted horsee.

We firmly helieve that 110 pounde on two and three-yearolde in thie country, over dirt tracke, run around sharp turne, ie fully equal to the English scale of 122 pounde on their comparativo by etraight coursee on the soft turf.

To illuetrate the matter eo that the mereet tyro can understand it, we will take four races run at Jerome Park and four run in England—the Fordham Handicap, one and a quarter milee, and the Jockey Club Handicap, two milee, correeponding with the City and Suburban Handicap, about one and a quarter milee, and the Great Metropolitan Stakee Handicap, about two and a quartor milee, all run in tbe spring of the year. The Fordham Handicap hae been run fifteen timee and the average weight carried by the winner is 106 2-15 pounds. The Jockey Cluh Handicap has heen run sixteen times, aud the average weight carried by the wiuner ie 110 3-16 pounde. Thc City and Suburhan Handicap has beeu run thirty-three times; the avorage weight carried by the winner is 95 2-33 pounds. The Great Metropolitan Stakes has beeu run thirty-eight timee; the average weight carried by tbe wiuner is 92 24-38 pounde.

Now take the Manhattan Handicap, a mile and a quarter, and the Grand National Handicap, two milee and a quarter, run in the fall, and corresponding with the Comhridgeehire Handicap, 1 milo and 240 yarde, and the Cesarewitch Stakee Handicap, 2 milee, 2 furlonge and 28 yarde, aleo run in the fall. The Manhattan Handicap hae heen rnn eixteen timee; the average weight of the winners ie 106 1-16 pounde. The Grand National Handicap hae been run eeventeen times; the average weight carried by the winnere ie 108 12-17 pounde. The Cambridgeshire Handicap has heen run forty-four timee; the average weight of the winnor ie 99 17-44 pounde. The Cesarewitch has been run forty-four timee; the average weight of the winners is 96 31-44 pounds.

It will be seen hy the ahove that the Fordham Handicap winners carried seven pounds more than the corresponding English races for the City and Suhurban; the Jockey Club Handicap winners some eighteen pounde more than the corresponding winners of the Great Metropolitan Stakes; Manhattan Handicap winners seven pounde more than winners of the Cambridgeshire Handicap, and winners of the Grand National Handicap twelve pounds more than winnere of the Cesarewitch Stakes Handicap. Now this is a great difference, more especially when you come to consider the difference in the courses, the English comparatively straight and on the turf, while those at Jerome are on deep ground and one of the most devious, crooked and trying courses in America.—*Live Stock Record.*

The Turf at Chico.

EDITOR BREEDER AND SPORTSMAN: Since my last tbere has heen hut one ripple of excitement among the horse fanciers of this city, and that was a match hetween Roanoke and Fred Ackerman. The following ie the

SUMMARY.

Chico, April 28, 1883; match race for $40 a side; mile heats, best 2 in 3

J. T. McIntosh's b g Fred Ackerman, (pacer)	1	1
Chas. Sherman's b g Roanoke, (trotter)	2	2

[Our correspondent failed to report the time.—ED.]

OCCASIONAL.

Trotting at Vallejo.

Saturday, April 28, 1883; match trot, $50 a eide; one mile.

Frank Denio'e Blacksmith Boy	1
C. Conger's Sorrel Dick	2

Time, 3:46½.

Same Day—Premium a eet of harness valued at $50; mile heats, three in five.

Owner'e Blacksmith Boy	3	2	1	3	1 1
Owner's Minnie Warren	2	1	2	1	2 2
Owner'e Red Robin	4	3	3	2	3 ro
Owner'e Frank	1	4	dr		

Time, 3:03, 2:57, 2:56, 3:05, 2:55, 2:57.

Among the features of the July meeting at City View Park, Portland, will he a douhle team trotting etake with four or five probable starters.

E. J. Turner of Hollister has two Norman-Percheron mares which he claims are the only pure hred mares of the kind in the State. As far as our knowledge goes the claim is true.

FISH.

Last Sunday the fishing along the Saucelito shore was fine In the vicinity of Lime Point a large number of rock-cod were taken. At Point Diablo the fieners from the city were rewarded for their pains by getting a good supply of sea trout and cabersones. Many of hoth these fish weighed three pounds. In the vicinity of this point J. E. Shane and Mr. Ward caught over thirty-five pounde of these fish together with rock-cod. Fishermen look for a run of hlue perch ahout the second week of May. The fishing during the coming week ought to he fair, though not quite so good as at more favorahle conditions of the tide.

Last Sunday a party of four gentlemen from this city, Messrs. Gus Lion, Bothe, Jobson and Sellers, took a trip to the foot of Mount Hamilton for the purpose of making a good catch of trout. In this they were succeseful, and to use the language of Mr. Sellers, "We caught a very large number of d—— emall fish," which shows in a nntshell the result of their trip.

Some fishermen ont at Point Diahlo caught in their nets a very large eel that weighed over five pounds. This eel, though not very long, was very large and chuffy and had a head like an English hulldog with an undershot lower jaw. Both jaws were armed with formidable rows of sharp teeth.

It has heen generally nnderstood that the Lagunitas creek ie entirely fished out, hut a few days ago Messre. C. D. and Ed Ladd spent two days up there fishing, and were rewarded hy catching 200 fair-sized trout.

A few days ago Dr. Bogert, while fishing on the Saucelito shore, caught a regular sea terrapin on the beach.

YACHTING.

The Pacific Yacht club will observe opening day to-morrow. The following orders for the cruise have heen issued hy Commodore Philip Caduc: Yachte will assemble on Front street at 12 m. At 12:15 p. m. a gun will he fired hy the Commodore, at which eignal the yachts will prepare to get nnder way. At 12:30 p. m. a second gun will be fired by the commodore, at which signal the yachts will get nnder way. The course will be around Mission Rock, passing same on eaet side, returniug on the west; thence along the city front to the anchorage off the clubhouse, old Saucelito, where they will occupy positione most convenient to each. Yachte will immediately dress ship upon coming to anchor. Yachts will observe gun-fire from flag-ship, for hauliug down and hoisting colore, at sundown and at 8 a. m. Yachts of the club will carry the club flag. Other veesels occupyiug the fleet are respectfully requeeted to comply with tbese orders. On Saturday membere and gueste will take the 1:30 p. m. Saucelito ferry and return at 7:30 p. m. On Sunday the yachts will leave Saucelito at 11 a. m. and eail in squadron along the city front to Hunter's Point, returning along the city front to Fort Point, thence to anchorage at the club house at Saucelito.

Names Claimed.

REGULATOR, for my hay colt foaled April 25, with left hiud foot white; hy Mr. Learned's Reliance, son of Alexander, by Geo. M. Patchen Jr., dam Frankie Eaton hy Wbipple's Hambletonian; eecond dam Mary Fish hy General Taylor; third dam hy Belmont; fourth dam by Easton's David Hill.—BEN E. HARRIS.

H. R. COVEY, for my light bay colt, right hind foot white, foaled April 10, 1883; hy Steinway; first dam Katie G. hy electioneer; second dam hy Niagara (sire of Chas Crocker mare, Stark's Lady Hoag and Cobh, record 2:31); third dam Fanny Wickbam by imported Herald; fourth dam by imported Truetee; fifth dam hy imported Barefoot; sixth dam by Sir Archy; eeventh dam by Florizel; eighth dam hy imported Aldermay.—SAMUEL GAMBLE, Sup't Horse Department, Cook Farm, Danville.

Frank Herdic as a Jehu.

Mr. F. L. Herdio made a flying visit to Gotham lately, and on telling him what a deuce of a furore his story of "A Trip to Texas" had created among the grand army of pool buyers, I added: "Now that you have euch high form as a man of letters, I feel sure eome of your exploits on the turf must be well worth relating."

"All this is very gratifying," replied the Great American Pool-eeller; "hut where does my three per cent come in? However, I will trust you," said he, with a serious face, hut merry twinkle in his eye, "and give my eerly experience in trotting horses, without having it copyrighted. So trot out your stenographic machine, to follow me fast, for your time is ehort. I cannot nor will not go on with the story after I get the word 'to bed.'"

"Young Andrew Jackeon was the first horse I owned who could fill the Cockney's description of a fast trotter—'A mile in three minutes, fifteen miles an hour, and surroundin' ohjects rendered inwisible hy hextreme velocity.' He was hy Vernol's Black Hawk out of a Seely's American Star mare. When I traded for him he was five years old, and had passed through secondary horse distemper, and compleints enough to kill a mule, but he survived, and showed a Star gait; so, of course, must make a trotter. Well, I, like all other young horse owners, got the racing fever had, and gave him his first leseons myself hy speeding him with any and everyhody who would start up on the road. As that kind of education didn't improve his speed, I put him in the stud, and afterwards took an older head into my confidence—Mr. Jamee Clark of Williamsport, Pa.—who handled him, and we made our debut in a 3:00 race, at a little town called Lewishurg. Blind Tom was the favorite over the whole field—$5 to $3 was ahout the clip. I hought ahout two fields; wanted to be game, of course; and, as luck would have it, my horse won right off the reel, in 2:44, 2:43 and 2:41½. A thousand cheers rang in my ears, a huudred hurly farmers slapped me on the hack, and as many more shook both my hands. Such hearty congratulations were too muoh for me. I was hursting with importance. I wore a tall hat, and it rose still higher, resting on ahout two haire, and I was prohahly the best-feeling man in Pennsylvania. I would not sell Andrew Jackson for $4,000. Oh, no! I had eo many offere that I lettered hie blanket, 'Not for sale.' On the strength of his victory, he served lots of mares at $50, and, after the spring season, there was a stallion race at Corning, N. Y., and as it didn't suit me to let him stand idle, I put him in it, and now felt equal to the task of steering him myself. I won it, hands down. The next year I trotted him three races at Clearfield, and won two of them. Afterwards trotted him a number of races against old Sorrel Dan, and then stood him until he died, full of years and honors.

"My next adventnre was Little Rachel, a large, watch-eyed, homely mare, a head like a fiddle, hut plenty of strength to carry it, and could draw two men in a wagon in 2:40. When I bought her in Philadelphia she could just beat 3:00, so they said, hut ahont 2:35 was her measure and no slacking up or coming hack. The fun hegan when I put her in a home race at Williamsport. There were four of us in it, and, as the pool-seller was on hand, we had some caucusing around to play winner. I, of course, being a square man, told them I didn't know whether my old mare could stand it to go three heats or not. They, therefore, left me ont and, ae nsual, played 'a ringer' from Lockhaven. I kept my own counsel, merely instructing a confidential friend to quietly huy Rachel cheap. I just dropped inside the flag the first heat, and Mr. Lockhaven won it so easy he was then heavily hacked against the field. So I kept my man huying that end. Next heat I rested the same way, Jack Phillips style, and the pride of Lockhaven kind of quit, forcing one of the combination to win it. Then, as Charley Perkins would say, 'I think there is going to he a shift,' and sure enough, there wae, for they pooled on the winner of the last heat to save their money, and went in deeper on him, giving long odds, for hand't they a sure thing? But I gave my agent more money, and told him to keep huying the field. When I found the money was all in, I set sail for the third heat and just won it hy half a length under the whip. "She's done," wisely said the knowing party, and nearly every one in the orowd who saw the finish believed she was sure to shut up hefore the end of the next heat. Rachel and I laughed in our eleeves for we knew hetter, and I kept my man at the elaughter-house, now huying her for choice at $10 against $25 for the field, and few poole escaped him.

"I nailed the fourth heat the same way as the other, hy a short length. Then the crowd hegan to hover around Little Rachel, and the leaders of the pool gang who had laid against her took me to the far corner of a distant hox-stall, and with an anxione countenance, the spokesman said:

"'Why, Frank, you don't want to win this race, do you? We are all wrong. From what you said we thought your mare was of no account, so now what will you do to keep ue from going overboard?'"

"'Win if you can; my wife and friends are all here anxious to see Rachel go to the front.'"

"'Well,' he saye, in a puffing way, "we can beat you, hut would rather have it dead sure, and will divide poole and purse with you."

"'You left me out at the start; I can't agree to lose it now. You have no one to hlame hut yourselves.

"'They went off disconsolate and made my old family mare the favorite, $25 to $10, I stopped huying then, and made up my mind to down them all, so I let her go an easy heat, and ehe, to all intents and purposes, deliberately quit, barely saving her distance. They raised a great hurrah, and poked fun at me, saying:

"'You ought to have taken our offer, and made sure money; you can't heat anybody with euch a dub.'"

"'You'll soon have the hoot on the other leg, my gentlemen, thinks I, as they rushed madly to the butcher shop, hlowing in all their remaining caeh against Rachel, and my man was right there, like Johnny at the rat-hole, huying her for $5 and $6 against $25 for the other two, only three heing allowed to etart for the sixth heat. They were very tired, bnt my mare was as fresh as a daisy, and won the race in hollow style.

"There were sounds of revelry that night at the Herdic mansion, but, strange to say, the sports felt very sad.

"My next experience was with Mr. Charles Dohle, who had a dun horse from Philadelphia, hy Frank Pierce, that could trot in about 2:38. Charley was very fresh, and made a match for $50 a eide, giving me my choice of horses the next day, so I put up, of course, and I told him I would decide at the post which I would drive. I did not give him a chance to water hie horse in case I made up my mind to drive him. So the next day came, and I looked his horse all over, and then I flipped up a copper, and it came down for me to drive my old mere, and away we went, and I won four heats to get three—he kicked ahout my yelling at Rachel, and they took a heat away from me."—*Wilkes' Spirit.*

THE KENNEL.

The Bench Show.

The dog show is a thing of the past; Union ball no longer resounds with the yelps and howls of huudreds of dogs, all offering a noisy protest against the change of quarters from their master's kennels to a hench in a dog show. The judges have done all their work, given their decisions and retired to private life and the peaceful avocations of their usual husiness, where the howls of the disappointed exhibitors and the loud mouthed assertions of the "kickere" cannot reach them. On the whole tbe sbow was moderately successful, and has at least served some good ends. It has certainly awakened public attention to the breeding of fine dogs and many gentlemen whose exhibits were heaten aoknowledged defeat in a manly way, hut promised to eend abroad for hetter stock to ensure success in the futnre. The masses of the people who generally speak of dogs simply as dogs and know no difference hetween a mongrel and a hlne blood bave had their eyes opened to a sense of the fact that there are dogs and dogs, aud have been giveu a good opportunity to learn what were the hest types of every hreed. The judges met the fate of all bench show judges. Each and every one of them has incurred the ire of some indignant loser who could see none hut points of merit in his own dog, nor any but had points in those of his opponents. Likely enough the judges made some blunders, it would indeed he strange if they were perfect, hut it is none the less a fact that the complaints always came from those who had no ground for complaint, while those ahout whose dogs a doubt might exist took the awards as gentlemen should and made no complaints. The withdrawal of W. Aiken from judging the terriers at the last moment was most unfortunate. The work had to be done and was finally forced on one who already had his hands full. A brief hour was all the time he could spare to pass on the merits of some forty odd dogs and this gave the losers apparent cause for dissatisfaction. Another trouble was the many errors in the catalogue and the more grievous errors of exhihitors who entered tbeir dogs in the wrong classes. Thus, Newfoundland and St. Bernard dogs were mixed in almost inextricable confusiou, one big dog of the Great Dane breed with a touch of mastiff ahout his head was classed as a hloodhonnd. Dogs were shown that were not on the catalogne and dogs on the catalogue were not in the show, their places heing filled hy other animals which, in eome cases, were mistaken for the origiual animals.

The list of awards in the various classes is as follows:

Foxhonnd Dog—First prize—406—Prof. E. P. Heald's Racky (imported); H. C.—462—J. M. Bassford's Nip, hlack, white and tan, sire T. Tunstead'a Dash, dam Fannie. There were seven entries in this class, which wae none of the hest, and with the exception of the winner showed too much of the heavy sleuth hound or staghound stock, good for hunting deer hut not up to the standard demanded for animals used to go thirteen miles an hour across country and carry a cold scent.

Foxhound Bitch—Second, J. M. Bassford's Judy; V. H. C., Fritch & Martin's Juliet; H. C., J. M. Bassford's Tuc. Of the six entries in this class all were too heavy, and none were thought worthy of first by the judges.

Foxhound Puppy—No prizes.

Greyhound Dog—First, J. J. Murphy's Stonewall Jackson; eecond, T. J. Cronin's Chicopee; V. H. C., W. Lane's Rnler.

Greyhound Bitch—First, Robert Leach's Young Minnetta; second, John Dugan's Lady Newark; V. H. C., Thomas Waite's Fly; V. H. C., James Henderson's Gypey.

Greyhouud Puppies—First, J. F. Carroll's Master Tarpey. Tbe greyhonnds were a fair lot, but not as good a representation of the keunels of this coast as was expected in the show. Stonewall Sackson is by Monarch from Joe Franklin's old blue dog Specnlation, dam Plaice's Branch. He has not been very successful on the coursing field, but has made as good single races as any dog in the State. Young Minetta is by White Cloud and an unnamed dam. Master Tarpey is by Monarch—Judge Peunie'e Jemima, and is really a splendid specimen of a greyhound pup.

Scotcb Deerhound Dog—Capt. A. J. Hutchinson's Sheik, cream, sire Shah, dam Haidee (imported), four years. Sheik is as grand a specimen of a dog as ever graced a show bench. He is very big; his only fault is a trifle of heaviness in excess of the graceful lines popularly accorded to the deerhound, but he is a dog that, single-handed, could master deer, wolf or kangaroo, and in speed could compete with the finest greyhound ever bred. Sheik is good enough to take first prize in any company.

English Setter Dog—V. H. C., D. E. Goodman's Bob; H. C., John de Vaull'e Bill. These are fine specimens of tbe English setter, and it was rather a snrprise that no awards of prizes were made.

English Setter Bitch—V. H. C., M. D. Goodman's Daisy G; H. C., John de Vaull's Beauty. The same surprise was ehown about these awards as about the doge, only more so.

Llewellin or Field-Trial Dog—Second, O. K. Hopkins' Coin II. Coin II is a heavy, homely looking dog, with little grace, bnt doubtless posseesing fine field qnalities. The competition wae narrowed down to two, all the dogs not direct descendants from Duke—Rhoebe being excluded from the class by the judges.

Llewellin Setter or Field-Trial Bitch—First, E. H. Farmer's Queen; first, H. D. Bartlett's Roh Roy; eecond, T. R. Jacob'e Fannie; V. H. C., H. D. Bartlett's California Roee. This class was so good and competition so close tbat two first prizes were given—a novel plan of getting out of a difficulty. Queen is by Belton—Belle. Rob Roy is by Miller'e Joe—Queen.

Llewellin or Field-Trial Puppies—First, E. H. Farnier's Marks; first, D. M. Pyle's Daisett; second, H. A. Mayhew's Mars; H. C., R. W. Martin's Bess, S. F. Martin's Jim Budd, J. B. Martin's Chispa. Marke is by Drake—Queen, Daisett hy Regent—Daisy.

Englisb Setter Puppiee—No prize. H. C., W. Martin's Bess.

Irish Setter Dog—First, H. M. Briggs' Race Jr.; second, R. W. Hill's Nemo; V. H. C., Samuel Austin's Irish setter dog; H. C., George Kammerer's Flash.

Irish Setter Bitch—First prize—360—H. C. Chipman's Beatrice; second prize—385—H. M. Briggs' Fern; V. H. C.—451—Frank G. Ahell's Red Bess; 483—P. J. Smith's Queen; H. C., W. Hearst's Kate II. Tbe Irish setters were tbe best class of sporting dogs in the show, especially the bitchee, than which a finer lot cannot be found in America. Kate II is a tbree-time prize winner in England; recently imported. Geo. Kammerer's Flash, a fine, thongh small dog, got no mention.

Gordon Setter Dog—First prize—355—Dr. H. C. Davis' Duke; H. C.—491—J. S. Van Doren's Patsy; eecond prize, F. A. Taft's Dorr.

Gordon Setter Bitch—First prize—425—C. Krumback's Nellie; eecond prize—511—T. J. O'Keefe's and S. L. Abbott'e Peggy.

Gordon Setter Puppies—First prize—376—E. N. Underwood's Fanny; second prize—496—W. W. Morrison's Professor. The Gordons were an average lot, most of them being rather undersized and more remarkable for field qualities than for show points. The color of Duke was rather dull.

Laverack Setter Dog—First, E. L. Mayberry's Dan; second, J. C. Nealon's Dick.

Laverack Setter Bitch—First, Henry Payot's Cleopatra.

Laverack Setter Puppies—Second, John De Vaull's Royal Duke; V. H. C., E. L. Mayberry's Topsy.

Nealon's Dick is from a Belton-Belle hitch and only about one-half Laverack.

Royal Duke is not pure and it is doubtful if any of the other so-called Laveracks are straight. Yale's dog did not appear for exhihition.

Pointer Dog—First prize—524—G. W. Bassford's Ranger Boy; V. H. C.—354—R. E. Bell'e Jack.

Pointer Bitch—First prize—526—G. W. Bassford's Gracie Bow. Second prize—524—G. W. Bassford's Josie Bow.

Pointer Puppies—First prize—359—George H. Peahody's Victor Bow; second prize—350—H. A. Bassford's Butte Bow; V. H. C.—441—J. M. Bassford's Keno Bow; V. H. C.; General G. B. Coshy'e Bow Jr.

The pointers were poor except Bassford's lot. Why Bow Jr. got a V. H. C. is an enigma, for he is a very poor specimen.

King Charles Spaniel Dog—No award.

Irish Water-Spaniel Dog—First prize—407—Albert Miller's Dash; second prize—391—A. W. Havens' Roger; H. C.—477—C. A. Story's Ben.

Englisb Water-Spaniel Bitch—First prize—320—John Struever's Nellie.

Cocker Spaniele—First prize—440—Mise V. Rutter's Kidleawink.

English Retrievers—First prize—358—C. A. Thilo'e Curley; second prize—387—E. H. Fritch's Boh.

English Retriever Bitches—First prize—374—John N. Koerner's Nigger: second prize—450—Nell; V. H. C.—442—James Lawler's Juno.

All the spaniel classes were small and not particularly fine in quality. The first-prize retriever dog is a fine specimen, perfect in points and only a trifle deficient in size.

The non-sporting classes were marked hy great unevenness, some few very fine specimens, and more animals of dubioue origin.

Newfoundlands—First prize—513—Dover; second prize, V. H. C., S. Stuhr's Dick. There was not much to choose between first and second, Dover gaining in symmetry what he lacked in size.

Bitches—First prize—316—Flora. Flora took first prize in 1881, and is such a fine animal that the competition was only nominal.

St. Bernards—First prize—353—M. L. Stangroom's Lion; second prize—394—Hy M. Norton's Jack; V. H. C.—319—William H. J. Mathew's Ponto. Lion is a fine specimen of the Alpine spaniel. A red, tawny clear through, in ehape the pattern of old Barry and only unlike that dog in that he lacks the distinguishing white mark on the face. His hind quarters were a trifle weak, but he was away ahead of all competitors.

Great Danes—First prize, A. B. Spreckels' Diana; second, O. Tolle'e Baton. Diana is a pure specimen of the breed and one of the finest seen in California.

Great Daue Puppies—First prize, O. Tolle's Major.

Mastiff Dogs or Bitches—First, James Henderson's Juno; second, W. T. Pettegrew's Sport. It was no easy task to decide hetween these dogs. Sport has the hest coat and head but lost tbe first place on account of his clumsy chest and short legs. The hitcb is a fine upstanding animal almost perfect in form and symmetry, but rather off as regards color and markings.

Mastiff Pups—First, T. F. McNamara'e Queen (imported).

Russian Terrier Dog or Bitch—First prize, W. Boger's Sabbak (imported); second, S. Ambler and J. H. D'Arcy's Nell; V. H. C., F. Boegler's Lion. All these dogs are fine specimens of a rare breed. Huge, grand fellows with enormous heads and immense legs, they looked the finest class in the show; but the winner, both in coat, color and size was, far the best of them all.

Scotch Colley—First prize—Jas. McNab's Max.

Bitch—W. J. Callingham's Gypsy.

Dalmatian dog—First, Dr. E. H. Woolsey's Spot; V. H. C., same owners Speck.

Dalmatian bitch—First, J. A. Kelly's Nellie Dodge; second, H. B. Slocum's Ruby. This was a fine class, all the dogs shown being above the average. Ruhy lost on account of her spots heing less clear than those of Nellie. In other points tbe pair were eqnal.

Bull Terrier Dog—First, L. T. Ewen's Pete; second, D. Shannon's Paddy. Wallace not entered for competition. This award was very unsatisfactory to many good judges. Pete's coat ie rough and harsh and he looks as if he had some cross of a split haired fox terrier, but he is a well shaped dog, with clean limbs, fine mouth and head and eymmetrical hody. Paddy labored under the double disadvantage of being undersized, weighing only ten pounds, and having a poor color. He is not a fine specimen of a dog and no matter how the award might have heen made it would have been open to criticism. Wallace was tbe only pure bull terrier shown and he was not in for competition.

Bull Terrier Bitchee—First, J. W. Orndoff's Gypsy (imported); Second, J. F. Carroll's Fly; V. H. C., J. B. Lewis' Jennie; V. H. C., Jas. Crowley's Fannie. Many good judges claimed tbat second should have been given to S. McCormick's Fly, a white and brindle, weighing thirty-eight pounds.

Bull Terrier Dog Pup—First, W. Z. Tiffany's Spriug (imported); Second, D. F. Crowley's Tonie.

Bnll Terrier Bitch Pup—First, C. H. Jouett's Bess (imported). Again the award caused complaint. The friende of Tonie claimed that he should have taken first. As Tonie is hy a hitch more than two-thirds hull, it is not clear why he should have preference over a fine terrier with an estabhished ancestry of fine hull terriers.

Bull Bitch—First, A. B. Truman's Sallie McClellan.

Skye Terrier Dog—Firet, Robert Bruce's Fido.

Skye Terrier Bitch—First, W. Hearst's Blue Bonnet (imported).

Fox Terrier Dog—First, James Boyd's Dandy.

Yorkshire Terrier Dog—First, B. Kenny's Prince; second, George Stovens' Prince.

Yorkshire Terrier Bitch—First, Tbomas Connor's Flip; eecoud, Thomas A. Hall's Minnie.

Dandy Dinmont—Thomae Conuor's, No. 409.

Toy Terrier—First, John Walden's Tootscy.

Black-and-tan Terrier Bitch—Firet, C. H. Annis' Lilly.

Pug Dog—First, M. H. McAllister's Toby.

Japanese Pug Dog—First, John Mengel's Poodle.

Japanese Pug Bitch—First, John Mengol's Mary; second, R. C. Johneon's Chow Chow.

Italian Greyhound Dog—Jules Dubsnuith's Don.

Englieh Poodle—First, Josh Davis' Tommy.

Miscellaneous—First, Mrs. John Zammitt's Manilla poodle Carrie; second, J. B. Lewie' Laplander Dog Sancho.

Trick Dogs—First, F. A. Taft's Gordon setter Dorr.

Levi's Laplander is a perfect specimen, just as much entitled to first as the Manilla poodle, hut a decision had to he made hetween the pair, and the fair sex got the usual advantage. Mr. Taft's trick Gordon setter Dorr gave such a clever performance on tho stage that all his competitors were frightened off.

Last Wednesday night when the show closed, Mr. Clem Dixon, President of the Kennel Club, was presented with a handsome gold-headed cane.

A Brutal Act.

J. F. Carroll is one of the most enthusiastic hreeders of dogs in the State, and his greyhouuds and terriers bave won many victories in the field and on the bench. The fact that he bred the best bull terrier dog in the State inspired some evil-minded man or woman to poison it as it lay on the bench iu the dog show, and also to poison a hitch of his get who had heen awarded a second prize. The dog was named Wallace, imported in 1877 hy Norton Fisber. Wben tbe fact that the dogs were poisoned hecame known a scene of the most intense excitement ensued. Carroll and Fred Rose, who owned an interest in Wallace, cried like children, and many meu and women present also shed tears. Carroll offered $300 reward for the name of the poisoner, J. W. Schaeffer added $100, McNeill added another $100, and soon a reward of nearly $1,000 was promised. Up to the time the BREEDER went to press no clue had heen found to the poisoner, but he or she may rest assured that if money and detective skill can bring out the secret, the courts will deal with the offender. Had the poisoner been caught in the act it would have gone hard with tbe wretch. Wallace was wortb $350 aud Fly a less sum.

A Big Dog.

The Riverview Mastiff Kennel, of Clinton, Mass., bas just imported the fine large mastiff, Sir Anthony, E. K. C. S. B. 10,559. Sir Anthony is a lineal descendant of Lukey's celebrated Governor, illustrated in Stonehenge's "Dogs of the British Islands." He stands fnll thirty-two inches at tbe shoulder, and weighs, when in good hench condition, two hnndred pounds. Visitors at the bench show of the Westminster Kennel Club will have an opportunity of seeing this magnificent animal.—*Forest and Stream.*

We think our contemporary has made a mistake. 200 pounds for a mastiff is a little steep; though, of conrse, it is not impossihle. Nichols, of Brook Green, London, who hred Turk, owned a reddieh mastiff, by King—Venus, who stood thirty-two inches at shoulder and weighed, in fair condition, 176 pounds. He wae called Big Ben and (we now speak from memory only) took first in puppy class, Crystal Palace, 1872. Wallace, a dog of the Lymehall hreed (Kingdon's stock), weighed 175 ponnds, standing 31½ inches. Colonel Stuart Taylor's hig Great Dane, 32¼ inches, weigbed 172 pounde in fair order.

Trotting Foals at Palo Alto.

The trotting foals at Palo Alto for 1883 are as follows, our report coming down to April 30:

1883.	No.	Color and Sex.	Sire.	Dam.
Jan. 13	1	Bay colt	Electioneer.	Lady Ellen
" 23	2	—— Colt	Shannon.	Nellie Walker.
" 25	3	Bay filly.	Electioneer.	Mamie C.

30	48	Brown colt.	Electioneer.	Happy Dream.

A bottle of carbolic acid should be kept in every farm house, not merely as a disinfectant, hut as a wash for wounds and sores. For any purpose it should he diluted with water. Its power to destroy fungus growths makes carbolic acid invaluable in pruning orchards of pear, plum or peach where blight or other disease is suspected. The pruning shears should be frequently dipped in carbolic acid water.

The struggling young industry of oleomargarine manufacture is in trouble. The churning of lard with milk makes a vile compound, even worse than that made from beef suet. The art of coloring to give a June butter tint has also heen learned by the makers of the hog product. In the mean time real dairymen are beginning to hope that the frauds are at last over-reaching themselves.

The value of wood ashes as a fertilizer is but little appreciated. They contain in varying proportions the valuable mineral properties needed by plants. They are especially valuable for orchards in bearing, having an as yet unexplained effect in perfecting the fruit. It is better to give a light dreseing of any potash manure every year than to give large doses at any one time.

To-morrow at the Oakland Trotting Park shooting grounde a $75 match will be shot. The contestants for the purse are Messrs. James, Muller and Edwards. The shooting will be at twenty-five birds each, 21 yards rise. After the match there will probably be pool shooting.

Jacks and Mules.

In 1877, Mr. C. F. Spencer of Kentucky, whose experience extended over a period of thirty years, wrote a series of letters on the subject of "Jacks and Mule Breeding," from which we take the following extracts:

The raising of mules is not profitable in Kentucky or the West, unless of good size—say from 14½ to 15½ hands high (a hand is four inches)—for the reason that, all things else being equal, size is the measure of strength. I mean by saying all things else being equal, that a mule 15½ hands high, with the activity of a mule only 13 hands high, is a better mule for all purposes. I will not discuss the size of the mule raised in Texas or Mexico as to profit, for they are raised in either country at so little cost that if they sell for anything the producer is paid. In order to raise the kind of mules which I have assumed to be profitable, and which will always command a good price, the size of both sire and dam become important factors, and must be taken into consideration. The very best jacks for this class of mules should be not less than 15 hands, and their size should come from a succession of crosses giving them size by right of inheritance—for no stream can rise unless the fountain is high; and no animal will produce a superior class unless well bred. This proposition is now so well established among well-posted breeders that to state it is proof is enough. The dam is of equal importance. The very best mules I have ever seen in Kentucky were bred from the kind of jack mentioned above, and out of improved blooded mares—in fact, the finer the mare, the better has been the mule, unless too small.

If I intended going into the raising of mules, here or elsewhere, with a view to profit, after the type of jack I have described, I would secure, as nearly as I could, the well-bred or improved blooded mare.

The most important improvement in jacks in this State was through the introduction of the well-known Spanish jacks Mammoth and Warrior. These were imported from Spain between the years 1835 and 1840—I am not precise as to dates. These jacks, at date of arrival, were valued at, and I think cost, $5,000 each, and were full sixteen hands high. As breeders, they were remarkably fine, and greatly improved the size of the jack stock by crossing on the common jennet of Kentucky. Later importations from the same source made additional improvements, but none so decided as the two above named. Then to Spain and the island of Malta are we indebted for the improved jacks of America.

If kept for mares only, the owner must use a stud for a teaser, for but few jacks are fit for that branch of the operation. A jack intended for mares only should be raised with a filly; and by letting them run together for two years, the jack will become fond of the horse species, and take easily to mares when breeding.

During the breeding season, beginning here in March, the jack should have a lot sufficiently large to supply him with grass at night; but in the day he should be kept in a tight stable. The lot should be located, if possible, where no horse stock can come to the fence; for if they do, a vigorous jack will fret through the night and may become vicious, and sometimes will bite horses through the fence.

They frequently fret from this cause till they get poor in flesh and unserviceable. If permitted to run in the lot during the day, you may feed him, three times a day, four to six ears of good, sound corn and two bundles of sheaf oats, cut up to the band. I have found by experience this to be the better plan. If the breeder has no grass lot, he should feed corn and oats, the latter cut fine enough to make chop feed. This is a feed composed of oats cut up and corn meal ground fine—fine enough for family purposes. Mix with a stick, and not with your hands, and put a little salt, if not every time it is fed, at least frequently; and do not feed too much at first, to avoid founder—or the new meal may cause colic.

A jack should be permitted to serve one or two mares at two years of age; but be careful not to breed the jack intended for mares to jennets before you have bred him to at least half a dozen mares; and, in breeding, do not let him serve more than two mares a day—one in the morning and the other in the evening—and not over forty mares the first year. If more are bred, permanent injury to the jack is likely to result. In litigated cases which have come under my notice, the testimony has generally shown that more jacks have been injured by breeding to too many mares at three years old than at any other age.

If you have jennets, you may have to use a mare to induce the jack to serve them; or if your jack has been raised with jack stock, and never run with a filly, as described, a jennet may have to be used at first, to induce the jack to serve mares. I have occasionally found, in my experience, a mare very obnoxious to a jack. I have known the jack, instead of serving the mare, seize her with his mouth as if attempting to kill her; and I had on one occasion, at some risk to myself, to seize the jack by the ear before he would relax his hold.

Caution should be used during the season to have the jack securely haltered in the day, for some few will watch for an opportunity, when the groom is off his guard, and bite seriously. I once had a jack, seemingly docile, seize his groom by the back and bite him severely. Jacks generally are docile; but until you find out the disposition of your jack, you had better, during the breeding season, give him no chance to do mischief. The application of a good hickory will soon cure his viciousness.

A jennet will carry her foal twelve months and a jack foal often thirteen months; and the owner should be present if possible when she foals, for the young of this kind of stock are more liable to be smothered than mule or horse colts.

It should be borne in mind that a young, healthy jack will get his best colts the first season; and if you are using your jack yourself, never permit him to be over-bred. I bred nine jennets in the spring of 1844 to a three-year-old that had been sired by the famous jack Mammoth, referred to in my former communication, in your April number, 15 hands high; and although the dam was not very large, the foal grew to be 16 hands. This was his first get; and here is an instance showing the stream will rise high where the fountain is high, for the sire of this jack was 16 hands. The young jack was used by the purchaser, mostly to jennets, and proved a famous breeder. If your jack is 15 to 15½ hands, and has that height by inheritance, through his ancestry, you can, by breeding him to mares of good size, confidently rely upon having good-sized mules.

If your mule, when foaled, is out of a good mare, or rather, an improved blooded mare, and measures, after getting properly upon its feet, 3 ft. 5 in., and you give it good care, it will, when matured, make you a fine mule. If its dam is a good suckler, and is not worked much during the season, her mule will grow two inches each month until weaned. When mules are foaled [in April or May, they should be weaned by the 25th of September following. If there are two or more, the better plan is to fence a lot with rails, or any other kind of strong fencing, large enough to keep them without crowding, and with the fence high enough to prevent their leaping over, strong enough to restrain them from pushing it down, and close enough to prevent the colts getting their heads through, for if they get their heads through, they are liable to hang themselves. I lost one in that way. They should remain in this close lot for a month, and be broken thoroughly of jumping; otherwise they may acquire this habit, and thus become annoying and troublesome to you.

They should, while being weaned, be fed bountifully. To do this, place a suitable trough, fully two feet wide and about twenty inches high, and of sufficient length to hold feed enough and to spare; and then keep constantly in this trough common sheaf oats, cut very fine, and old corn in the ear. The mules, for a day or two, will run around frantically, but will soon begin to eat; and as at that age they eat but little at a time, food should always be in the trough. A good-sized water trough should also be placed in the lot, along the fence, and it should be kept full of water. After the month has expired, you may turn your mules on a blue-grass pasture, which has been reserved for that purpose, off from any pass-way through it, and inclosed by a good fence; for, although you may have kept them inside your first inclosure, yet, if the fence here be faulty, they will jump, and once having thoroughly learned to jump, there is no way of breaking them of this ruinous practice that I know of. If, when you have placed your mules on grass, the grass is abundant, you may for a time dispense with the oat feed, and feed corn in the ear only. Feed just as much at a time as they will eat up clean. If any is left in the trough after feeding diminish the next ration by so much, or increase it if it seems necessary. Some give as much at one feed as will last them for a week; but that is not advisable, for the mules will muss over it until they refuse to eat it unless very hungry. Besides, this treatment will bring on a constipated habit of the bowels, which is more easily acquired by mules than horses. If snow covers the grass, the cut oats may be given, and occasionally a little wheat bran, not mixed with, but only sprinkled over the oats. The bran acts as a laxative; it also neutralizes the heat engendered by the corn.

In this climate my preference is to winter mules in an open shed or hard by a thick wood, but in no instance in a close shed. The feed trough should be protected against rain and snow. In winter, in addition to the food above mentioned, stock fodder may be given advantageously if you have it—as much as they will eat. Rude racks may be made by crossing common worm-fence rails on a log placed on forks eighteen inches high, letting every other rail lie to the right or left, by which space enough will be left through which the mules can pull off the fodder from the stalk. Mules are very fond of this arrangement; and then the stalks which, after a short time, are thrown on the ground, furnish a fine, dry bed on which the mules can repose.

The well-bred mule, if properly treated after being weaned, will grow the first year six, and the second year three inches, and if well kept in this way for two years will have attained its height. Of course, if poorly fed and cared for during the first and second years, they will not mature until three years old; but the stunting business costs the owner one year's additional interest, feed, attention and care, which never pays. —*Live Stock Journal.*

Messenger and Diomed.

Mr. C. W. Van Ranst wrote to the October, 1831, number of the *American Turf Register*, and gave some account of the blood horses owned by him. He placed Messenger at the head of the list, and described him as "a full-blooded racer," 15 hands 3 inches high, and well-proportioned." The turf performances of this stalion are thus summarized:

In September, 1783, he beat at Newmarket, Mr. Porter's Colchester, by Shark, for 100 guineas, and Mr. Stanley's horse (a brother to Straightlegs) for 30 guineas. October 30, he beat Mr. Napier's horse Specter, across the flat for 300 guineas; and Mr. Fox's Pyrrhus, across the New Flat for 150 guineas. In May, 1784, he beat Lord Boringdon's Trigger for 25 guineas. In July, Mr. Windham's horse Apothecary for 200 guineas; Lord Foley's Rodney, Mr. Westall's Snowdrop, and Mr. Clark's Flamer for 60 guiness; and Lord Foley's Ulysses for 100 guineas; and Mr. Windham's horse Fortitude for 300 guineas. In April, 1785, he beat Lord Sherburne's horse Taylor for 50 guineas; and, to crown his career of success, he finally won the King's plate.

Four years after Messenger lauded in this country Mr. Van Ranst purchased an interest in him, which he held till he died, January 28, 1808. He owned several of the gray stallion's progeny, which, to use his own words, "acquired a high reputation in the racing annals of this country." One of these was Powtomack, a bright bay, "out of a mare by Bashaw, who was sired by Wildair, whose pedigree is well known." Mr. Van Ranst matched the horse several times, and he ran him four-mile heats. His description of one of these matches is as follows:

Mr. Thomas A. Cooper (the celebrated tragedian) told me that he had a carriage horse he would run against him for $1,000, in a race of 600 yards, each horse carrying 140 pounds. I without hesitation accepted the challenge, and won the race, which was in Harrison lane, after a hard struggle, and only by a head. It afterward appeared that this animal, although brought on as one of a span of cropt coach-horses, was in fact expressly imported from Virginia for the purpose of racing. He was called Banquo, and for a short distance was said to be one of the fleetest nags in that section of the country.

This was clearly a case of the hiter being bit, but it gives rise to two thoughts. First, Messenger bequeathed to his progeny the speed of the quarter horse as well as the capacity to run four-mile heats, and in doing this he demonstrated his right to take rank with the best thoroughbreds of his day. Second, the fact that such a horse as Banquo was used in front of a carriage should make us attach more weight than is usually attached by the unthinking to harness animals whose blood is classed as "unknown." It does not follow that the unknown quality is of plebeian origin. In many sections of the country it is composed of elements distinguished on the running turf.

Mr. Van Ranst numbered among his equine treasures the chestnut horse American Eclipse. He stood 15:3, and possessed "a large share of bone and muscle," and excelled "all the racers of his day in the three essentials of speed, stoutness or lastingness, and ability to carry weight." He was a great performer at four miles, and his most celebrated race was on the Union Course, Long Island, May 27, 1823, against Henry, for $20,000 a side, which he won. The sire of American Eclipse was Duroc, and his dam was Miller's Damsel, a daughter of Messenger. Duroc was by Diomed, a horse that ran successfully in England, and then was imported in 1798 into Virginia, where he sired among others Florizel and Sir Archy. Diomed is almost as prominent in trotting horse pedigrees as Messenger. The lines of distinguished performers take root in him. He did as much for his opportunities toward founding a family of trotters as Messenger. Seely's American Star was one of his descendants, and the Star blood, through Dexter, first gave world-wide reputation to Rysdyk's Hambletonian, a direct descendant in the male line of Messenger. American Eclipse, in whom was united the blood of Diomed and Messenger, also is individually prominent in the ancestral structure of the light harness horse. Gano, the sire of the dam of Lady Thorne and Mambrino Patchen, was an inbred son of American Eclipse. The mare ranked on the turf among the greatest of her day—the day of Dexter; and the track achievements of Katie Middleton, Mambrino Kate, London, Alcantara, Rosa Wilkes and Cleora have year by year added to the stud laurels of Mambrino Patchen. Mambrino Chief, the sire of Lady Thorne, was the great-grandson of Messenger, and her ladyship's success on the turf, like that of her brother in the stud, illustrates the value of the old theory concerning bringing together kindred strains after the lapse of generations. When Mr. Van Ranst penned his memoranda in 1831 the blood of Messenger was in demand for harness purposes, but he did not dream that a school of philosophers would rise up to exalt the gray stallion above all others that ever lived—to make him the fountain, the starting point of trotting inheritance; nor did he foresee the part which American Eclipse, combination of Messenger and Diomed, was destined to play in giving strength and action to the trotting structure.—*Turf, Field and Farm.*

A Breeders's Challenge.

EDITOR BREEDER AND SPORTSMAN: I write for information in relation to size, weight, measurement and development of yearliug colts. I have one that took first premium at the State fair last fall, foaled April 26, 1882, just one year old this day, sired by L. J. Rose's horse Del Sur, he by The Moor, dam by Black Ralph out of a trotting mare brought by Dan Blodget from Beloit, Wiscousiu. I claim the name of Sur Del for this colt. I think I can beat any colt in the State as finely bred as this one in size and development but they must not be any older than mine. His height, weight and measurement are as follows:

Weight, 785 pounds.
Height, 14 hands and one-half inch, withers.
Height on hips, 14 hands 1¾ inches.
Girth, 5 feet 5 inches.
Point shoulder to withers, 26 inches.
Withers to point hip, 26 inches.
Point shoulder to hip, 3 feet 9 inches.
Point hip to whirlbone, 22 inches.
Point hip to hock, 3 feet 1 inch.
Length of neck, 2 feet 11 inches.
Round the arm, 19¾ inches.
Under knee, 7½ inches.
Round knee, 12 inches.
Middle of quarter, 16½ inches.

With as fine a head and eye as one of ten sees on a colt. A bottle of champagne to any man that beats it in the State on a colt as well bred as this. R. H. NEWTON.

Woodland, April 26.

Dr. Baldy Agitated.

EDITOR BREEDER AND SPORTSMAN: I see in your valuable paper "Dr. Cowper Reinforced." In reply I have studied the principles and practice of medicine, surgery and anatomy and all of the best authority on the horse that can be had and I have had twelve years' practice and have been very successful, and I have attended full courses of lectures at a regular chartered medical college and I have my certificates of attendance, and I think I know what impaction means without referring to William Williams, F. R. C. V. S., F. R. S. E., etc., if he had all the alphabet attached to his name in the bargain; and I refer him or the man that signs his initials A. I. H. to Dr. Going, V. S., his veterinary dictionary, who is a professor of the New York college of veterinary surgeons and who writes for *Wilkes' Spirit of the Times* the answers to correspondents in regard to the diseases and treatment of the horse, and also to "Dunglison's Medical Dictionary," which is the standard dictionary of the United States and used in all the medical colleges in the United States of America, and Cowper or A. I. H. can't find the words impaction of the stomach, and that man Williams that has all the alphabet on the tail of his name has made a grand mistake. Now, Mr. Editor, my advice to Dr. Cowper and A. I. H. is that they had better study and post themselves. Plain O. C. BALDY, V. S.

Oakland, April 30.

How Now, Hidalgo?

A correspondent of the Portland *Rural Spirit* is wroth at the way the correspondent of the New York *Spirit* affects to contemn the quality of the horse Patsy Duffy. Hear him:

It has been decided to put Patsy Duffy on the turf this season, and we congratulate the owners—Messrs. Jeutry & Carnahan—on their wise decision, for it seems from the tone of some superannuated old croaker that the great son of Leinster has not established himself a racehorse in his estimation. Now we think that Patsy Duffy is much better established as a racehorse than the correspondent of the *Spirit of the Times* is as a writer of the truth. It is not our intention to commence an argument on Patsy Duffy's merits—we only wish to say a few words to show our estimation of any writer of turf matters who would undertake to defame and misrepresent as great a horse as the descendant of the Australian family. In conclusion we would simply say it would be very gratifying to the friends of Patsy Duffy to see the correspondent with his ponderous corporation in front of the pool stand this summer and fall blowing his money in on his favorite and against Patsy Duffy with Johnny Starr in the pigskin and under the management of the gentlemanly and accomplished trainer, Mr. Wm. Claypool, who left Baker yesterday to take charge of the great horse Duffy. This will be in print in plenty of time for some of the wonderful horses that have been pulled so often to Duffy to meet him somewhere from Boise City to Portland and Salem, where he is intended to run during the present summer and fall.

There is a material change in the value of horses since they were sold at sheriff's sale for a postage stamp each, as it is said was once done in the Santa Maria valley. It is said that one of the Dons of that valley once gave 500 head of horses for a fine saddle. Another one gave 100 head and $1,000 for a fine American horse. Since that time strong efforts have been made to improve the stock. The present drift is towards heavy draft horses. This will not last long, as horses for all work are quite necessary. San Luis Obispo, though not famous for racing stock, has some that for all work are not excelled in the State.—*Tribune.*

Smuggler has failed to achieve fame as a sire in the East, and the sporting papers say he will be brought to this coast. They have heard in Boston that the horse is to come to Palo Alto.

HERD AND SWINE.

Popularizing Fine Stock.

The rapid increase of interest in improved stock—well-bred stock—among American farmers is every way gratifying. In no country in the world is such interest so directly manifested. It is not "Yankee boasting" to say that in no country is there an equally widespread interest, or equally energetic action, as a whole well considered, in the matter of improving the stock of the country. Surely American farmers manifest no narrow-mindedness in this matter; and they do not show excessive prejudice in favor of stock reared in their own country. We are importing largely, and of many breeders from different countries. In no other country is there more prompt and intelligent discussion of questions of breeding and management. The pages, reading and advertising, of our own paper are sufficient answer if any dispute these propositions.

Granting all this, and thankful for it, with high hopes for the future from what has been done in the past, and is now being done, it is still true that a very large percentage of American farmers have no direct interest in improved stock; do not believe in it; look upon pedigrees, herd books, questions of purity of breeding, etc., as "humbugs," and count herds or flocks of finely bred animals as designed only for speculation on the part of wealthy or fancy farmers. Many take no pains to inform themselves of what is being done. The writer to-day talked with an Illinois farmer of more than ordinary intelligence on many matters, something of a cattle raiser, too, who had never heard of the black polled Scotch breeds of cattle. Ask a dozen general farmers in almost any neighborhood—if they do not read a live stock paper—concerning the characteristics of breeds of animals other than those found in their vicinity, and note the answers. Listen to the comments of farmers at any prominent exhibition of live stock.

Much yet remains to be done in the way of popularizing the improved breeds of live stock. There are many ways in which good work may be done; we are doing what we can; other papers, agricultural societies, and live stock associations are doing effective work. Just now let us especially call attention to some things which breeders of such stock can and ought to do.

1. Each breeder should try to prove, practically, that the breed he has chosen deserves the name improved; that it is better fitted for some useful purpose than is the common stock about him. If his animals are kept only for show, if they are managed in so expensive a fashion that the practical farmer is repelled rather than attracted by knowing of them, the owner is not popularizing improved stock. Practice is more effective than precept; seeing makes believing probable. It is one of the crowning merits of the fat-stock shows at Chicago that they have clearly proven that well-bred cattle are superior to common, unimproved cattle for beef production, and this under methods open to any farmer. The dairy breeds of cattle must rest their claims to continued favor not on beauty, not on any fancy, but on their superior adaptation for the production of milk, butter or cheese. It is a strong argument against a breed, or else against the management of those who own animals belonging to it, if it has been represented in any community for a series of years, and yet has not met with favor.

2. Breeders of improved stock should pay more attention to individual, practical merit, than to any fancy point, whether this be fashion in pedigree or fashion in color or other equally unimportant points. Where characteristics, unimportant in themselves, have come to possess great value as evidence of purity of blood they cannot be lightly regarded, but it is always a mistake to needlessly multiply such points. It would be a misfortune should leading Hereford breeders, for instance, attempt to create a prejudice against all animals which did not have a white spot on the back. Harm has been done in many cases by excessive praise of some one family in a breed, or helping to create an unfounded prejudice against some other family. The Short-born breeder who sneers at the descendants of "Red Rose by Ernesty" isn't helping to popularize his own or any other good breed of cattle by such action.

3. Great harm has been done by overstating the importance of "purity" of blood, meaning by such purity necessary descent from some one flock or herd, or from some one animal through certain lines. It does not make any breed more popular to insist that no possible system of "grading up" can ever reach practical purity. Over statements of any kind about the merits of any breed finally do harm. There are modern instances of breeds gaining widespread popularity in spite of foolish and absurd claims made in their behalf, but it is not wise to try the experiment. A broad-minded, generous course on the part of breeders, as individuals and when associated together, hearty recognition of the merits of all good stock of whatever name, and the constant recognition of the fact that our domestic animals are kept for very practical and utilitarian purposes by the mass of farmers, will tend to make popular every good breed.—*Breeder's Gazette.*

D. O. Shattuck of Bachelor valley, Lake county, brought 340 pounds of butter to Ukiah last Friday, and the quantity will be increased hereafter. Mr. Shattuck is the most extensive dairyman in Lake, and his butter is the best brought to this market, and that it finds a ready sale is evidenced by the fact that although he comes over every fortnight he cannot supply the demand. Besides furnishing this market with from 250 to 350 pounds every week he supplies Lakeport with 100 to 200 pounds monthly, and always keeps enough on hand to supply the home demand. He is an enterprising, hard-working gentleman, and deserves the success he is now meeting with. A few more farmers of his kind would prove a material benefit to both Lake and Mendocino counties.—*Ukiah Dispatch.*

D. L. Shirk, a big cattle man at Stein Mountain, writes that the winter in that section has been unusually mild, and that everything indicates an early spring. He also says that he has found it quite profitable to wean calves in the fall. The hay they eat during the winter does not amount to much compared to the loss sustained by not weaning.—*Reno Gazette.*

Mr. J. W. Knox, the whilom owner of Nutwood, has abandoned the turf and is now engaged in the cattle business in New Mexico. Mr. Knox is now on a visit to this State but will leave for home in a few days, taking a number of graded Shorthorns to breed up the beef cattle on his ranch.

The foot and mouth disease is no respecter of persons. Sixty out of eighty cattle in a herd belonging to Queen Victoria have been smitten with the scourge.

Nearly three-quarters of the American cheese exported is shipped to Liverpool.

Prepotency in Jerseys.

Great expectations pervade the Jersey world. There are honors, trophies, prizes, fortunes to be won in the development of phenomenal butter cows. Many a breeder secretly cherishes the hope that ere another decade he shall, by his own skill or good fortune, produce the nine-hundred-pound cow predicted by Mark Comstock.

Out of what material is the coming cow to be made? What combinations, crosses and blendings must be had—what in-breeding and inter-breeding must be done to bring the lucky hit?

The field of expectancy seems to lie within the lines of the four grand families that have exhibited great prepotency by their long lists of high butter records. This prepotent quality, though probably the result of successive in-breedings, is so modified by avatism and reversion that it can in no way be mathematically estimated, for it crops out frequently in animals having but a small percentage of the noted ancestral blood, and that, too, in spite of haphazard breeding.

Among the famous prepotent Jerseys were Countess 114, Alphea 171, Pansy 8, and Old Noble; also Albert 44, Rioter 2d 469, Violet of Darlington 5573, Flora 113, Czar 273 and Duchess 548. If we could trace back the pedigree of each of these we should probably find that many of them unite in a common in-bred ancestry. I believe that Countess, Flora, Duchess and Czar were near of kin; that Pansy and Albert were from an in-bred Island strain, and that the reunion of diverging strains of an ancient close-bred family has produced the marvel, Bomba.

The tide of productiveness having risen highest among the descendants of Countess 114, her family deserves to be placed at the head of the column. The blood has been neglected by breeders.

For so full a list of Countess cows I am largely indebted to Mr. J. H. Walker, who has been at great pains to gather them, several being in his own herd:

COUNTESS ROLL OF HONOR.

	In 7 days.
Countess 114, at 14 years, on grass	16 lbs. 0 oz.
Jersey Belle of Scituate 7828	26 3
95 lbs in 1 month: 705 lbs. in 1 year.	
Effie 885, A. H. B.	23 2
98 lbs. in 30 days.	
Duchess of Bloomfield 3653	20 0½
Jersey Queen of Barnet 4201, A. H. B.	19 12
851 lbs. 1 oz. in 1 year.	
Countess of Lakeside 12135, at 15 years	19 7
Roland's Bonnie 2d 18054	19 2
Moss Rose of Willow Farm 6194	18 8½
Belle of Scituate 7979	18 0
Miss Blanche 2575	17 11½
Fawnette of Woodstock 3710 (rated)	17 8
Su Lu 4706	16 11
Pattie M 3d 4754	16 8
Tilda 3720	16 0
Lucy Gray 2746	15 13
My Queen 12614	15 13
Jersey 3260, at 18½ years old	15 6
Topsy of Roxbury 7796	15 0
Lily Scituate, at two years old, rate of	11 6
Pavon 12485, at two years old, rate of	14 8
Eva 883, A. H. B., rate	14 8
281 lbs. in 138 days.	
Gilda 2779, at three years, on grass	14 6
Angela 1682	14 2
Woodland Lass 4443	14 2
Dolly of Lakeside 10824	14 8
Nibbie 6796	14 0
Gazelle of Lakeside 10243, lost one-quarter of udder	13 6

The Countess family shows the largest record for one week, viz. 25 lbs. 3 oz.; for one month, 98 lbs., and for one year, 851 lbs. 1 oz., or within 48 lbs. 15 oz. of the predicted limit. It is also celebrated for having produced the richest and best model of a dairy cow ever known—the nonpareil of nonpareils—Jersey Belle of Scituate. Among the famous bulls of this family were Dick Swiveler Jr., 276, Duke F 6134, and Victor 3,550.

Yerba Buena Ranch has two grandsons of Jersey Belle, of Scituate, and H. Pierce, the owner, has more of the descendants of this world-renowned cow at the East than anyone, which he intends to bring to California from time to time, as they may be wanted.

Butter Records.

We are glad to be able to state that Major Campbell Brown has agreed that, in case the Jersey Cattle Club at its next meeting fails to make some provisions for official butter tests, he will undertake to bring down his tables commenced one year ago to date. He has given his assent to this solely on condition that he is to have the assistance and advice of several other gentlemen, members of the club, whose names are to be given to the public, and who are to share with him all the responsibility of passing upon the evidence that may be presented.

We regard this matter of butter tests or records as of the most vital importance to the Jersey interest. The Jersey cow is nothing if not a butter producer; and a carefully-kept record, under such conditions as will inspire public confidence in their accuracy, is destined to have the same effect upon the breeding of Jersey cattle that the records of the trotting course have had upon the breeding of trotting horses. It will show to the public whether or not Jerseys, as a breed, are superior to all others in butter-producing capacity; and it will also show clearly and unmistakably what families, if any, possess a degree of merit beyond the average of the breed. It will result in demolishing mere fancy points and prevent high prices based upon a mere caprice of fashion and will erect in its stead an aristocracy of blood, so to speak, based upon demonstrated superiority of merit. The Jersey Cattle Club can make no disposition of its surplus fund that will so directly promote the best interests of Jersey breeders and further the improvement of the breed as by applying it wisely to this end.

We suggest that it would be well to appoint a committee of its members, who shall have charge of the records, and who shall carefully investigate all alleged tests above a certain limit, and when satisfied of their genuineness and authenticity, shall give them official certification. Mr. Brown has inaugurated this good work, and we trust the club will, at its meeting next week, make such an order as will ensure a continuation of his efforts in the same direction, under such circumstances as will stamp his conclusions as the official act of the club. It is idle to say Jersey breeders are all honest, and that every private test reported should be regarded as reliable and authentic. Whether this be true or untrue, the public will not accept mere individual statements of remarkable yields as trustworthy unless they come attested in some such manner as to command belief. Breeders of trotting horses are perhaps, as a class, quite as honorable as the breeders of Jersey cattle, and yet any proposition to admit as records any mere private trials of speed will not for a moment be tolerated by them. The butter record must have some such foundation based upon some sort of official recognition, and the sooner it is inaugurated the better will it protect honorable breeders from imposition.—*Breeder's Gazette.*

BICYCLING.

Opening Meet of the Season.

Wheelmen have been in expectancy for some time past at the prospect of a good time in connection with the formal opening of the season by the Oakland Bicycle Club. The greatest good feeling has always existed between that organization and local riders, and the occasion has been made a sort of reunion of attached wheelmen, and in certain cases outside riders have been invited to attend. The first run of the season occurred on Sunday, and was attended by a large number of sportsmen from this city. The San Francisco wheelmen were met by their guests at the Oakland wharf at 10 o'clock Sunday morning, and after an interchange of courtesies mount was ordered and line formed, and the cavalcade proceeded towards Berkeley. The drill, as it passed Peralta street and through to Thirty-fourth street, was admirably executed. Along the whole line of the course the wheelmen were the observed of observers. A number of minor mishaps occurred, but beyond a severe bumping and scraped knees the riders experienced a pleasant trip. At Adams Point a liberal collation awaited the procession, and arrived there the signal to dismount was given, and a photograph of the party was taken. The interesting feature of the run here transpired, and it would have puzzled a conjuror to divine how that lunch disappeared. It might be remarked parenthetically that the possession of good constitutions is indispensable to active pursuit of the sport, but the manner in which the viands disappeared left grave doubts upon the minds of some favored observers whether a genuine famine might not be feared in the event of a bicycling craze seizing the public. It has always been a favorite argument with patrons of the sport to refer to the long fast of their steeds, and to the little nourishment they require. It might be contended, on the other hand, that it would be better to feed the steed than the rider. This view is borne out by the fact that the riders rolled their steeds back in the direction of Oakland instead of mounting for the return.

The run was a thoroughly enjoyable affair, and it is to be regretted that similar events are not of more frequent occurrence. It was conducted by Captain George Strong, assisted by W. H. Lowden, Lieutenant. The following members of the Oakland Club participated: Chas. G. Yale, C. Burkhalter, D. Booth, J. N. O. Rabe, E. A. Rix, W. H. Bunker, W. O. Gibbs, W. F. Booth, J. Barker, W. L. Pattim, M. H. Duroc, W. J. Bowman. The San Francisco Bicycle Club was represented by Charles Leonard, M. London, J. Sandersou, H. A. Green, A. M. Warschaner, M. Verrinder, M. J. Day, H. L. Chambers and Messrs. Winter, Rideout and Gibson. The unattached guests were A. Jellison and George A. Story.

The annual League meet and parade will be held the latter part of this month in New York city. A large body of wheelmen are expected to be present, and it is to be hoped that their numbers and appearance will duly impress the Park Commissioners, so that they will grant the riders some privileges in Central Park.

Two members of the Oakland club left on the 30th for a three or four days' tour through San Jose, Gilroy and the country to the south of these points.

It is the intention of the Oakland club to have a run to Haywards next week, and on the week following the annual two days' excursion to San Jose.

ATHLETICS.

Decoration Day.

The near approach to the time announced for the spring meeting of the Olympic Athletic Club at the Oakland track which takes place on Decoration Day does not appear to have hastened the number of entries. The events were announced in ample time to give everybody an opportunity of practicing and the complaint formerly made that outside athletes were prevented from entering for open events for reason of the short space of time intervening does not hold good at present. The events are of sufficient importance to stimulate amateurs both in the running and bicycle races, and yet the entries all told to date number only two. It in no way compromises the ultimate success of the meeting, as it is customary to delay entering until the time for so doing shall have expired. But the evil of this course is rather in the fact that the example of the members of the club is emulated by unattached athletes who also practice their prerogative of entering on the last day, and in this manner practicing is indulged in at odd times without any promise of resulting in interesting contests. The entries are numerous and should from their character, as well as from the liberal prizes, for amateurs gold and silver medals, and for the professionals money and prizes, call out a full field of aspiring athletes. Considerable misapprehension in connection with the exact programme adopted exists and to set the matter at rest the correct list of events is annexed:

One-hundred-yard race, open.
One-hundred-yard handicap.
Two-hundred-and-twenty-yard scratch race, open.
Four-hundred-and-forty-yard handicap, open.
Half-mile handicap, open.
Base running for members of the Olympic Club, foot racers barred.
Running high jump, open.
Half-mile handicap.
Bicycle race, open.
One-mile handicap bicycle race, open.
Five-mile bicycle race, open.
Finally a professional handicap race.

Entries close on the 19th inst. and the handicaps will be announced on the 23d.

In a colony of bees there are pollen and honey gatherers, which are generally old bees. Another class, called wax producers, cluster in the hive and are fed in abundance with honey, which causes a secretion of oily, waxy substance on the inside of the abdomen, perfectly white and shaped something like a fish-scale. This is worked over by the bees, and formed into wax for comb-building. Another class are delegated as nurse and housekeepers. This generally devolves upon the younger portion. A colony of bees is a perfectly organized corps of workers. No idlers are allowed as members.

The project of a racecourse at Quincy, Plumas county, has been put in definite shape by a public meeting. The committee who have the business in hand feel assured that [illegible] be a success.

THE
Breeder and Sportsman.
PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 29 Warren street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Rnss Honse, 1,009 J street.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion

San Francisco, Saturday, May 5, 1883.

SACRAMENTO AND SALT LAKE.

When the meeting, now in progress, ends, there will be a rush for Sacramento, and then Salt Lake will be the objective point. We are pleased to hear that the enterprise of the people of Sacramento is likely to be appreciated and that there will be a fair representation of horses as a token that owners and trainers are inclined to second the efforts of the club. There is not a city or town in California that equals the capital in liberality, and though the inhabitants of Stockton are spirited and full of vim, the Petalnma folks active, intelligent, determined to take a front place in the race for breeding all kinds of fine stock, more money can be raised in Sacramento to further turf sports than any town of its size in the whole country. Where all do so well it appears invidions to make comparisons. There is not a State in the Union that can compare with California in fair grounds, especially in first-class racecourses. From Chico to Los Angeles there are tracks in every prominent town that cannot be excelled in the cities of the East, and though some of them may have finer buildings, the snperiority of the California tracks is so decided as to call forth the praises of all those who are conversant with the conrses of the country. Ere long we will give a description of the "mile tracks" of this State, and the sketch will convince our Eastern readers that the claim of decided superiority is snpported by facts that will completely establish the point.

It is unnecessary to eulogize the Sacramento course as it is conceded to be one of the best, and now the only objection is to be removed by increasing the radius of the "first turn," those who "growl" at it would surely find fault with a duplicate of the Garden of Eden if that was their dwelling place. The Capital Turf Club is doing its part to keep up an interest in the spring meetings. The autumn has heretofore absorbed the attention of owners and trainers, and they have been dilatory in seconding the efforts of the association. The weekly trots, which a few years ago were such a prominent feature of San Francisco and Oakland sport, have been discontinued, and thongh we believe the abolishment was an advantage it leaves a long interval between the close of the fairs and the opening of the following season. By aiding the regular meetings that are given in the spring it will not be long until there will be a complete circuit which will give the opportunity for racing and trotting until the fairs commence. From San Francisco to Salt Lake there are places enough to keep the ball rolling, and whenever it is evident that a sufficient number of horses can be got to participate there will be no lack of encouragement.

The entries to the purses which did not fill at Sacramento close on Monday next, and at Salt Lake to-day. Under the present rules trotting entries can be made at the date of closing from the place where the letter containing them is mailed. The postmark must be legible, and the safest plan is to register the letter. The practice in the San Francisco postoffice is to postmark on the day the mail leaves, so that a letter deposited after the closing of the mails to-day will bear the stamp of the 6th. Registering obviates this, and when there is any doubt that precaution should be observed. We are pleased to learn that quite a number of California horses will participate in the meeting at Salt Lake, and should there be no mishaps at Sacramento there will be a worthy delegation.

GOLD AND ROSE.

A communication was received from Alma Stuart Stanley by the president of the Blood Horse Association, offering to present a suit of colors to the jockey that won the race in which Joe Howell and Jim Douglas were engaged, the presentation to be made to-day.

It is a graceful tribnte from the beantiful Qneen of the Stage, and even in this practical era we feel assured that there is enough of the spirit of the chivalric days to give proper appreciation. Though the lists are deserted where gallant knights fought a death struggle for ladies' favors, and the right to wear the colors nerved the contestants to deeds of "great emprise," there is a spice of poetry left in the dull routine of every-day life. Racing is one of the bright spots that has survived. There is a tinge of the old-time romance, a portion of the radiance that shone in the old-time gatherings, and though the lance hangs in the hall, the rapier rests in its sheath, the descendants of the animals that carried the victorions warriors have lost none of the qualities that have made them celebrated since the days of the crusades. There has been a blending of the lines. The fiery charger of Saladin and the stronger blood which carried the ponderous weight of the armor-clad Lion Heart has resulted in combining the fleetness, grace and beanty of the "child of the desert" with the strength and endurance of the flower of the isles. Who has so good a right to wear the colors which beauty has selected, as the highly bred racer?

There is harmony and unison; there is fitness in the association, a poetical commingling which the most stupid cannot fail to appreciate.

We must acknowledge a feeling of satisfaction at not having a horse in the race. There would be an intense desire to win, and then to be recreant and surrender the "tartan and black" for the "gold and rose." Why not? The bright colors conld be woven into the desired pattern, and very handsome it wonld be. Then we have a clear title to the "royal Stuart," as our grandmother was a Stuart, and the "red, red rose" was one of the emblems of the clan. We haye felt like giving up the racehorse as too much of a luxury for present circumstances to snpport, and look to the more practical trotter to gratify desires that can never be obliterated. Bnt shonld there be a continuation of such prizes how can the resolve be maintained?

Wheels, harness, boots, toe-weights, tangling breaks, discord, confusion. The gold and rose surmounting the legs spread apart to reach the foothold on the shafts, a sorry looking knight to display the favor when he is making frantic endeavors to "catch" his horse, an incongruity not to be thonght of.

Sir Thad would surely grow sulky, if forced into a sulky when such trophies are to be won, and Lady Viva perverse and peevish over the degradation. Then again it may be, if the "rig" is not quite so poetical, and there is a lack of grace in the movements, the trotters may earn enough to bny the viands and the embellishments for the more favored. In that case we will be sure to enter the list and take part in the tonrney.

The presentation to the victorious jockey will be made to-day, the donor gracing the occasion with her presence. The colors will be worthily worn as withont donbt Douglas is one of the very fastest horses on the turf and is as strong and graceful in proportion as his namesake in the days of the Knight of Snowden. There are uames of oldtime celebrity connected with the presentation and of historical prominence. The Stuarts and Stanleys met in opposition on the fiercely-fought field of Flodden, and the gallant Stuart who fell had the Douglas "tender and true" as his chief support. Though the "flowers of the forest" were lamented in the most touching strains of the poetess, there is a fragrance which time can never wither and a glamourie that will always dazzle.

We are much pleased to chronicle that which is a reminder of the days when to wear the colors was the guerdon of the bold and true, for which the highest born strove, and as in the battle referred to called forth the encomium that "knight fought like noble, squire like knight as fearlessly and well."

Transferred from the battle field to the racecourse, may there be the same desire to keep the shield unsullied that bears the favor.

CHEAP TRANSPORTATION.

We learn that arrangements have been made to secure cheap transportation for the horses that go to Salt Lake. A baggage car will be attached to the Eastern Express if that is required at a cost of $300. As twelve horses can be carried in it this will be only $25 apiece, which is surely very reasonable. By freight train the cost for the car will be reduced to less than $200.

There should certainly be twelve California horses entered, and without doubt that many will go.

THE RACES.

Two more days of the spring meeting of the Pacific Coast Blood Horse Association are now part of the records of the past. Two very successful days from all points of view, more than successful in the quality of the racing. There is little necessity for particular mention of the races as the reports given are full and complete in the minntiæ of the contents, and a general review is all that is required to complete the picture. Probably the most notable feature of this meeting has been the downfall of the favorites. The "big bettors" went strangely astray in their choice, and in races that it did not require a great deal of knowledge to foretell the probability of very close work the plungers were betting as though there was only one horse in the race. The uncertainty of racing is the charming feature of the sport, so much so that a long time ago the part that chance played was called "glorious," and every trne devotee of the turf was allured by the difficulty in making forecasts. In California there is a disposition to follow a lead, and like sheep going through a gap in the fence, follow the leader of the movement in a grotesque fashion. Thus there may be a foot to surmount the "bell-wether" jumps a foot above it, and in place of the others measuring the height for themselves, away they go bounding higher and higher in the game of surmounting obstacles. Soon after the pool sales commence there is an anxiety to see how the main speculators are investing their money. There may have been a mental choice of the champion, and a strong resolve to wager so much on the one selected. It is discovered that his choice is selling for a low figure, perhaps gronped in the field with others which are known to have little chance. The natural supposition wonld be that this state of affairs would be exactly to his wishes giving him the opportunity to place his money at long odds. In place of that he discovers ground for apprehension, distrusts his judgment, and follows the rage of snpporting those on which the most money is laid.

The "glorious" is an important element at all times, doubly so in the springtime. Trial runs are very deceptive and the only true gange is what is shown in actual races. That is deceptive enough, as is well known, as condition is a fickle thing to retain, and the "high order" of last week may be followed with comparative prostration in the next. Still it is also "glorious" to win a great many dollars with a few, and one of the good effects is to multiply the "suckers" and give horses a position in the betting which otherwise would have no support. Another good thing is the weakening of the hold of the point-givers. This class rarely picks an outsider and the advice from them is usually to back the favorite or those that are selling well up. The most fearful tumble of all was on the heat race of last Wednesday. It would have been far worse if after the first heat there had been a few who were willing to back Douglas at the long odds that ruled. One hundred dollars to $17 only elicited a feeble response and after one or two were sold the odds increased to $80 to $6 and slow work at that. And by the way, some were foolish enough to state that this was not a true race, and at least one infatuated individual claimed he had "the tip" to support Douglas after Howell had won the heat. The charge was still more absurd when he said it was given him by those who had a right to know, for if this had been the case there would have been a different showing. Men who engineer snch jobs take good care that there is a return, and laying aside all other proofs, the fact that the only bnyers of Douglas were those who deemed it good policy to "hedge" their bets, and that even these were meager buyers, puts the question at rest. But we will have to beg pardon of our readers for noticing such a ridiculous charge, at least to those who were present, though as some who did not have the knowledge might be misled by the boldness with which the false statements are made, it may be well to kill the slander at the outset.

In the Cup race Fred Collier showed that he was "at himself," and gave proof that it would have taken a good horse, more than an extra good one, to have beaten him. The time was not a true criterion though that was very good as the pace was slow for the first quarter, and though the two last miles were run in 3:36, the last quarter was made in 25¼ seconds. His defeat by the Duke of Monday a mile and a quarter on Wednesday did not detract from his reputation, as 2:09 is very fast for a horse to go with 119 pounds on his back. Wednesday was a good day for the Mondays. As John A ran a capital race, and as these were the only two which started, better could not be. The race heats of three-quarters of a mile was a stunner. The track was not as fast as on the preceding Saturday and tbe day could not be called good by any one who is competent to judge. There was a strong breeze, and as chilly as strong. For Joe Howell to carry 117 pounds and run in 1:14½ was marvelous and it will stand as high in the calendar as any race for the distance that has ever been run. Douglas to mark 1:15 and 1:15¼

for the second and third heats; with a steadier of 120 pounds gives him a place which none can outrank.

There are fine races on the cards for to-day, and a reference te the advertisement will show that it is a rare hill and grand sport is surc to follow. So far there has not been an accident of any description and the managers can be congratulated on the success that has followed their exertions.

The ahove was written Thursday evening. Friday morning, as early as two o'clock, the rain came pouring down, and at nine o'clock it was still sprinkling. Should it clear up by the middle of the afternoon, the track will be in fair condition and from present appearances the sun will be shining in time.

ALMO AND ALMO MAID.

H. Scott's mare Pacific Maid, by Elmo, her dam hy Eugene Casserly, grandam by McCracken's Black Hawk, foaled on the 19th of April twins hy Albert W. It is so rare that twins live that this is the first instance that has come under our ohservation when both survived. Now two weeks old, they are as sprightly as can he, and there can be no more danger to apprehend in the future than in single foals. Contrary to the usual course these foals are widely different in appearance, of different sex, and in color one is a bay, the other chestnut. The male foal is chestnut, the female hay, the chestnut resemhling the Elmo hranch, the hay the Electioneers. There is a variety of hlood in these youngsters. Hamhletonian, through the sire, Long Island Black Hawk, The Morse Horse, Vermont Black Hawk, and then Trustee through the sire of the dam of Albert W, John Nelson. This is certainly a rich inheritance, their sire with the fastest record for a four-year-old stallion, 2:22, and a second heat of two miles in 4:51, which is a still more surprising performance. These foals attract a great deal of attention, and we shall watch their future career with much interest. Since writing the ahove we learn from Mr. Scott that he has christened the colt Almo and the filly Almo Maid.

POSTPONENENT OF AUCTION SALE.

The auction sale of horses and Jersey cattle belonging to Henry Pierce has heen postponed on account of the rain until to-day at 10 a. m., which will give time enough to finish it hefore the races.

Alonzo and Bertie Hayward, the latter a hrother to Poscora Hayward, are to be sold, and should attract purchasers. The stock is now at the Oakland Trotting Park, and the sale will certainly take place unless the storm continues.

The hoat which leaves the foot of Market street at 9 a. m. connects with the train that arrives at Shell Mound at 9:35.

CALIFORNIA HORSES IN THE EAST.

So far the Eastern trip of "our horses" has been accomplished without any mishap. Plenty of time was taken to make the journey as little trying as possihle, and two weeks were occupied in the trip to Chicago, where they arrived on the 23d ult. There was only a short delay, and they are now domiciled at Chester Park, Cincinnati, where they will remain until there is necessity for faster work than their tutors like to give on a half-mile track. This much of the campaign safely got through with is a good heginning, and notwithstanding the old proverh we will look for equally as satisfactory an ending.

GOLDEN GATE FAIR.

The vacancies in the Board of Directors of the Golden Gate Agricultural Association have been filled hy the appointment of James Adams and Mr. Ewing. From personal knowledge we congratulate the society on Mr. Adams hecoming one of the management, and though not so fortunate as to know Mr. Ewing, we learn that he is equally well qualified for the place. Mr. Adams has had a great deal of experience in kindred work, is well and favorahly known over the whole Coast, and better than all a man of liberality and enterprise, and will cheerfully devote whatever time is necessary to the husiness of the Association.

A GOOD PROSPECT.

The purse which is offered hy the Capital Turf Cluh, heats of two miles for trotting, 2:30 class, should he one of the best races of the meeting. If owners will aid the associations in giving support to races that vary from the stereotyped "three in five," more interest will be taken hy the public, and the public gratified there is a better show for owners. Were racing hampered with the aame monotonous features it would lose prestige. Vary the trotting programmes and good will follow, and hy all means make entries in the two-milc-heat purse.

MISCONSTRUCTION.

A suhscriber writes from Stockton inclosing a slip from the *Herald* of May 1 in which a wrong construction is put upon an article which appeared in this paper of last Saturday. In place of heing intended for Mr. Shippee, the allusion was to memhers of the legislature who opposed the passage of the hills making appropriations for the fairs and granting aid to huild a pavilion in Sacramento. We have always found Mr. Shippee active in his support of the fairs, clear sighted, so as to realize the importance of liberality in their management, and one of the very best officers of the associations with which he is connected.

CLOSING OF ENTRIES.

For the Salt Lake meeting the entries close to-day, Saturday, May 5. The substituted purses at Sacramento close on Monday. Have letters containing entries plainly postmarked the day of closing, or, better still, have the letters registered. See advertisements for particulars.

E. J. T., Hollister:

There is no hook of the kind yon want that we ever heard of. The snhject has been treated in all the live stock jour. nals, the BREEDER AND SPORTSMAN inclnded, at varions times. How a young stallion shonld he managed depends mnch on his condition, disposition and development. It is difficult to advise in particnlar cases without specific knowledge of the pecnliarities if there he any. As a general rnle stallions in service should he kept in an active condition, not too high in flesh hut in working order, and should have moderate exercise throngh the season to keep them vigorons and in full appetite. We would restrict a three-year-old to one service a day, allowing perhaps, occasionally two, if necessary to meet his engagements, hut confining him to one if possible. With dne care a stallion thus managed may make a season of fifty or sixty mares without injnry or uncertainty as to results.

Ned O'Neil, Yreka:

Little is known of the pedigree of the horse you speak of. He is described in the Stnd Book as follows: Garibaldi, bay horse, foaled 1857; hred hy J. H. Groff, Utica, Mich.; got by Duroc Messenger (a horse of unknown hlood hrought from Canada); dam's pedigree unknown. Taken to Marysville, Cal., in 1862, hy F. M. Stevens, where he was kept for two years, and bronght back to Swansea, Mass. He was kept in that State nntil ahout 1875, and was then taken to Potsdam, N. Y., where he died in 1878. He was the sire of Belle Oakley, record 2:25; dam nnknown.

1. Did a horse by the name of Grey Planet ever run a mile nnder 1:40 either in a race or against time? 2. What is his hest record? OFFICER.

Answer—1. No.

2. One miunte forty-two and a half seconds run against time at Saratoga, August 13, 1874.

Governor Bowie stood champagne last week, and is the best-pleased turfman, outside of Green Morris, to be found in the Union. The event was the hirth of a full brother to the famous Crickmore, which his hroodmare Belle Meade foaled to Cateshy on the 15th. The coming of the little stranger cansed quite a sensation in the worthy Governor's family, and Bill Bird never qnite left the mare, so great was his snxiety. The colt is a hay, marked with a small star and hind pasterns white, which, being the identical color and markings of "the hest colt I ever sed," caused the old Znln chief to declare there was "another good time coming," and hetake himself hack to his team, vowing to lead another Dixie winner hack to scale before he died. From all we hear, no event since the Dixie of '81, has caused so mnch rejoicing in the land of the Calverts, and we could hope to live that day over again. With the fusilade of cheers that greeted the "home-bred" when he drew away, the decoration hy "Brother Krik," after the race, and wild revelry of the Baltimoreans thst night at Barnum's, it was an occasion we shall not soon forget. Champagne flowed like water, and the Yorktown Centennial was forgotten in the enthusiasm for the first Dixie won hy a Maryland-bred colt, the son of a Maryland-hred sire. Talk of State pride in South Carolina, why, it's nothing compared to that of these Marylanders.—*New York Spirit.*

Hickok and Goldsmith have arrived safely at Chester Park, near Cincinnati, where Maud S and Little Brown Jug are also atahled. Thus the fastest mare, the fastest gelding and the fastest pacer are brought together at the same track. In a talk with a Cincinnati *Enquirer* reporter as to the chances of a meeting between Maud S and St. Julien Hickok aaid: "Not in the least. Mr. Vanderhilt told me last year that he would not race his horses against any others and that he wished me to put an end to all propositions that might he made to me to put my horse against Maud S."

Cooked, dried and pulverized flesh, hone and blood is offered for sale at some Western packing houaes. It may he shipped loug distancea if kept dry, and is just what is needed for poultry food. If a little is mixed with the usual wet meal ration it will aoon color hens' combs a hright red and cause the fowls to "shell out" most ahundantly.

The Department of Agricultnre estimates that the stock of corn on hand March 1 was about 580,000,000 buahels, or twenty-aix per cent of last year'a crop. The proportion of wheat on hand ia twenty-eight per cent of the crop, or abont 140,000 000 bushels.

Blue Bull Redivivus—Occasional Files a Brief.

EDITOR BREEDER AND SPORTSMAN: I notice an article in your issue of April 21 copied from the New York *Sportsman* headed "Blue Bull as a Sire" in which the writer thinks the correspondent who wrote the former article in yonr paper "has not heen a very assiduous reader of the Eastern sporting journals," and starts in to praise the Blue Bulls just as all the Eastern sporting journals do with very few exceptions, to wit: A little honey, some wormwood and plenty of vinegar. The *Sportsman* says Blue Bull "has 26 in the great 2:30 list." If he will look over that list he will find 28 in it credited to Blue Bull. But the *Sportsman* has the faculty of hlowing hot and cold at the same hreath. After giving the old horse the praise honestly due him of gettiug more trotters from mares that were not trotting hred than any other horse, and second on the list to the horse that was bred to more trotting hred mares than any other horse, he says, "in hreeding he was a plehian; the prohahilities are that his powers died with him." It is the same hue and cry that is raised on every successful pacer in the stud. Old paciug Pilot came in for his share of this unwarranted ahuse, and the *Sportsman* will find that nearly eight-tenths of the successful trotters of this day have one or more crosses of pacing blood conrsing through their veins. Is he right when he says "he is the great exception to the rule." If a horse has the prepotency to transmit his speed to his offspring at a different gait, on what theory does the *Sportsman* huild its opinion "that his powers died with him?" We, on this coast, have no knowledge as to how many of his sons and danghters are doing duty in the stud at the East. There has heen hut one of his sons on this coast, that is an entire one, and for the chance he has had he has shown very well. I spreak of Prompter, an inhred Blue Bull. Prompter, hy Wilson's Blue Bull—Pra ie Bird hy Flaxtail, hy Pruden's Blue Bull. I saw a filly sired by Prompter when eighteen months old trot a half mile in 1:23, and a qnarter in 0:39. Mr. McIntosh was offered $1,000 for her which he refused, and had she lived, I am confident she wonld hy this time have honored her aire hy heing in the 2:30 list. Dr. M. W. Hicks has one by Prompter—Tinsley Maid hy Flaxtail, that he has entered in stakes to he trotted at Chicago in 1884. Mr. McIntosh has a two-year-old, Sally McKim, entered in the Stockton stakes to come off in September, 1883, and, harring accidents, she will he a daugerous competitor for any man's colt. I have never seen one of Prompter's get that was a pacer, the gait the *Sportsman* has snch a horror of. Mr. McIntosh has several of his colts and thinks very highly of them. So much for what I know of Blue Bull's son. I do not think the *Sportsman* is right when he classes him with accidental sires. The horses named by him are in no way in my opinion the eqnal of Blue Bull. They served hetter trotting bred mares and only one got an exceptionally fast trotter. Blue Bull produced quantity with more than an average amount of speed to each. How is it that the *Sportsman* lays so mnch stress on Blue Bull being a plebian? Is there any better hred mare on his sire's side than his dam hy Blacknose, son of Medoc, ont of Lucy, hy Orphan, second dam Lady Grey, third dam Maria hy Melzar; Medoc hy American Eclipse? There is no necessity of running the pedigree any farther. Every horseman knows there are no finer or better staying strains than these.

Is there any one who knows the origin of Merring's Blue Bull? The fact of his heing a large horse and working on a farm is not proof positive that he was a cold-blooded horse. And so far as advertising it is a well known fact "hy every assiduous reader of the Eastern sporting journals," for the last sixteen years there has not heen a son or daughter of the "old hero of Chester," that has won a hard contested race that the Eastern journals have not sounded their praise in loud and continued applause. How different with the Blue Bulls. Just a simple summary. Everyone should he trested alike, and every good performer either on the turf or in the stnd should he honored accordiug to the performance. I hold that a horse that can trot fast and stay without a pedigree is worth a thousand that cannot trot although they may have pedigrees as long as the moral law. Riding hehind pedigrees without speed is like sitting hy a stove without a fire on a cold day, cold comfort. OCCASIONAL.

Chico, May 1.

Prince Batthyany Dead.

A cahle dispatch to the New York *Herald*, under date of April 25, announces that Prince Batthyany, the well-known patron of the turf and owner of a numher of racehorses, died suddenly at half past two o'clock that day in the inclosure for memhers at the Newmarket track. His death occurred just after the numhers of the starters and jockeys in the race for the Two Thonsand Guineas Stakes had heen hoisted.

The neatly dressed, trim little figure of Prince Batthyany was one of the hest known at Newmarket, where for many long years he had been a regular frequenter. He was at one time one of the hest cross-country gentleman jockeys in England, aud took great interest in all turf sports, heing a member of the Jockey Cluh. With increasing years he gradually restricted his attendance at race meetings, hnt was usually to be found at the Jockey Club and other important reunions. His career as an owner was not a very hrilliant one, for although he always had some horses in training he owned hut few really first-class animals. The hest was Galopiu, winner of the Derhy in 1875. Galopin was an undouhtedly good horse and won all the five races he started in when three years old. One of the five was the sensational £1,000 match with Lowlander, then considered the best miler in England. The match was decided over the Rowley mile conrse, and Galopin won hy a length. The only eugagements of auy consequeuce rendered void hy the dcath of Prince Batthyany are those of his colt Fulmeu, who was considered to have a very good chance of winning this year's Derhy, for which he had been heavily supported. Galliard, the winner of the Two Thousand Guineas race at Newmarket yesterday, was a son of Galopin. Prince Batthyany was the defeudant in a suit hrought last year by Lord Marcus Beresford to compel the transfer of some property at Newmarket which it was intended ahonld he turned into a clnh. The Prince held that no contract had been made such aa was claimed, and the court so decided.

The Prince, Gnstave de Batthyany-Strattmau, was born on December 8, 1803. He was hereditary Lord of Gnssig and Chief of Eisenhurg. He succeeded his cousin, Prince Philip, July 22, 1870. He was married in 1820 to Wilhelmina, Baroness of Ahrenfeld, who waa the widow of the Comte de Bubna. He was left a widower twelve years later. He had two sons, the eldest of whom, Count Edmond Batthyany, is attached to the Austrian Embassy at London.

The great obstacle to wheat growing in Brazil is that owing to the rank vegatahle growth of that climate, and extr[illegible] fertile soil, the wheat has to he weeded carefully two o[illegible] timea. Thia entails so much labor as to make its c[illegible] unprofitable.

THE RIFLE.

The Spring Tournament.

Last Sunday, April 29, the California Rifle Association held the spring tournament at Shell Mound Park. Heretofore, it has required two days to finish the competition for the different medals and trophies, bnt on this occasion the programme was cnt down so that the shooting was finished in one day. The cash prizes offered, heside medals in the several matches, wera larger than ever offered before. Pools were open all day for shooters on the 200 and 500-yard targets for the rifle and 30-yard target for the pistol. The tickets were sold for the small price of ten cents a shot. Tha pools were divided among thosa who made the largest number of bullseyes. The day was pleasant, thongh not snch a day as rifiemen like when they desira to make exceptionally good scores. The sky was overcast by drifting clouds, which made the light varying aud uncertain. The breezes of tha morning turned to a respectable little blow in the afternoon, and thongh it did blow strong the rifiemen were fortunate in having it blow steady. The first match shot was for the Governor Perkins Trophy. Ten cash prizes wera also offered in this match. These purses run from $1 to $15. Tha conditions of the match wera ten shots at 200 yards, the trophy to become tha property of the rifleman winning it three times. It has been won as follows: Nov. 14, 1880, J. Robinson, 47 points; May 29, 1881, F. E. Knhnle, 48 points; October 17, 1881, N. Williams, 48 points; October 29, 1882, F. E. Kuhnle, 48 points. The score stands:

Prvt. S. I. Kellogg Jr. O. L. C.	5	5	5	4	5	4	5	5	5—48
Prvt. F. Cummings, Company C, First Infantry	5	5	5	4	5	4	5	5	5—48
C. A. Carr, Esq.	4	5	4	5	5	4	5	5	5—47
Lient. Kuhnle, I. R. P., Fifth Bat. Infantry	5	4	4	5	5	5	4	5	5—47
Officer P. D. Linville, S. F. Police	4	5	5	5	4	5	5	5	4—47
Col. S. E. Beaver	4	4	4	5	4	5	5	5	5—46
Howard Carr, Esq.	4	5	4	4	5	5	4	5	5—46
Sergt. F. Kuhls, Company C, Second Artillery	4	4	4	4	5	5	4	5	5—45
Col. Robt. McKillican, I. R. P., Division Staff	4	5	4	5	4	4	5	5	5—45
Lient. Klein, Company C, First Infantry	5	5	4	4	4	4	5	5	5—45
Corp. L. Barrere, Company E, First Infantry	4	5	4	5	5	4	5	4	5—45

Tha next match was for the Barnes Trophy, the same number of additional cash prizes and the same terms and conditions as in the first match. This trophy has been won as follows: May 29, 1881, F. E. Kuhnle, 47 points: October 17, 1881, N. Williams, 47 points: Jnne 4, 1882, N. Williams, 47 points; October 29, 1882, S. I. Kellogg Jr., 49 points. As Sergt. Nick Williams won it the third time, it now becomes his personal property. The scores made were:

Sergt. N. Williams, O. L. C.	5	5	5	5	5	5	4	5	5—48
C. A. Carr, Esq.	5	4	5	5	4	5	5	4	5—47
Corp. L. Barrere, Company E, First Infantry	5	5	5	4	5	5	4	5	4—46
Howard Carr, Esq.	5	4	4	5	5	4	5	5	5—46
Prvt. F. F. Kelly, Company C, First Infantry	4	5	5	4	5	5	4	5	5—46
Lient. F. Kuhnle, I. R. P., Fifth Infantry	4	5	5	5	4	5	4	5	5—46
Lient. J. E. Klein, Company C, First Infantry	5	5	4	5	5	4	4	5	5—46
Prvt. S. I. Kellogg Jr., O. L. C.	5	5	4	5	5	5	4	4	4—46
P. D. Linville, S. F. Police	4	5	5	5	5	4	5	4	4—45
Prvt. F. Cummings, Company C, First Infantry	4	5	4	4	5	4	4	5	5—44
Lient. H. F. Sime, Company C, First. Infantry	4	5	4	4	5	4	4	4	5—44

The mid-range match came next. This was open to all comers with any military rifle, distance 500 yards, seven shots. There were five cash prizes, $10, $8, $6, $4, $2. Following are the scores made:

Corp. Barrere, Company E, First Infantry	5	4	5	4	5	5	5—33
Prvt. F. Cummings, Company C, First Regiment	5	5	5	4	4	5	5—33
Lient. J. E. Klein, Company C, First Regiment Inf.	5	5	5	5	4	4	5—33
Lient. H. T. Sime, Company C, First Regiment Inf.	5	5	5	5	3	5	5—33
Sergt. Wilson, Company M, First Cavalry, U. S. A.	4	4	4	5	5	5	5—32
Prvt. Matson, Battery C, First Artillery, U. S. A.	4	5	4	5	4	5	5—32
Sergt. F. Kuhls, Battery C, Second Artillery, N. G. C.	4	5	5	4	5	4	5—43
Prvt. T. F. Kelly, Company C, First Infantry	5	5	4	5	4	5	4—32
F. Kuhnle							31
— Dongherty							30
T. E. Carson							29
H. C. Mangels							28
Prvt. Dupont							28
L. G. Perkins							27

The fonrth match was for the Andrews Silver Challenge Trophy. This match was open to any military rifle team composed of six men. The conditions were tan shots to each man at 200 and 500 yards with U. S. Springfield rifles. Four cash prizes to the four highest members of competing teams were offered. The trophy has been won as follows: Company E, First Infantry Regiment, N. G. C., won it May 29, 1881, by a score of 487; Company E, First Infantry Regiment, N. G. C., October 17, 1881, with 515; Company C, First Infantry Regiment, N. G. C., June 4, 1882, with 503; Company C, First Infantry Regiment, N. G. C., October 29, 1882, with 519. Company C having won it three times, the trophy now becomes the property of that company. Below are the teams and scores:

Company E, First Infantry:

Corporal Barrerer	200 yards	4 5 4 5 4 4 4 5 4 4—43	—83
	500 yards	5 3 5 4 4 3 4 4 3 5—40	
Private Murphy..	200 yards	4 4 5 3 4 4 3 4 4 5—40	—83
	500 yards	4 5 4 5 5 4 3 4 4 5—43

Next cama the Douglas pistol match, so named as complimentary to Capt. Douglas of the San Francisco police. The shooting was done on the ring target. Ten cash prizes were given, running from $1 to $15, distance 30 yards. The lucky men and rings mada are:

Officer Berges, S. F. Police	11	12	11	12	11—57
Private F. Thompson, Bat. B, 2d Artillery	11	12	11	11	11—56
F. E. Gilham	11	12	11	10	12—56
Officer Peckinpah, S. F. Police	10	11	10	12	12—55
Officer P. D. Linville, S. F. Police	12	10	11	12	11—55
Lieut. J. E. Klein, 1st Infantry	11	11	10	11	10—53
Officer N. T. Field, S. F. Police	11	10	9	12	11—53
Officer Whitworth, S. F. Police	12	11	10	9	11—53
Philo Jacoby	10	10	11	9	11—51
Officer J. Clark	11	10	11	8	11—51

The sixth and last match was for the Association's Pistol Trophy, a beantifnl cup valued at $100. This trophy was held last by the second team of Capt. Douglas' division of San Francisco police. The shooting was done with Smith & Wesson's 45 caliber revolvers, 15 shots at 30 yards. The team winning it three times holds it permanently. Tha teams and scores are as follows:

Capt. Douglas division, San Francisco Police, Company A, team No. 1:

Linville	5	4	5	5	5	5	5	4	5—73

Total									—681

In addition there were four cash prizes, $10, $6, $3, $1, given the individual members of the teams who mada tha highest scores.

This evening the prizes will he awarded to the fortunate rifiemen at the N. G. C. headqnarters on New Montgomery street. After the prizes have been distribnted the shooters will be invited to the armory of Companies C. and G., First Regiment, on Post street, where refreshments will be spread for the guests.

"Konkering K's."

For some time past a match has been talked of among rifiemen. Col. H. D. Ranlett said that he conld select a team of five men whose names began with the letter K who conld make better scores on the 200 and 500 yard targets than any team of the same number of men picked from tha National Guard. Last Sunday as the rifiemen were assembled at Shell Monnd at the California Rifle Tournament, a team was picked to dispute the claim of the superiority of the K's. By permission of Col. Dickinson, this match, which was strictly a private affair, was allowed to come off. The terms of the shooting were: The K's to shoot against any five men of the N. G. C., each man to shoot ten shots on the 200 and ten on the 500 yard target, the losing team to pay for the snpers for both teams. Col. Ranlett was captain of the K's and Ed. Snook, of Company C, 1st Regiment, was captain of the picked five. As the K team were the winners by 18 points they will dine to-morrow evening at the expense of the opposition team. Following are the names and scores of both teams:

COL. RANLETT'S K'S—200 YARDS.

Kellogg, O. G. C.	4	4	4	5	5	5	4	5	4—45
Klein, Co. C, 1st	5	5	4	4	5	5	4	4	5—45

The Fusileers.

On tha 22d of April tha San Francisco Fusileers, Co. C, Second Artillery Regiment, N. G. C., held their second quarterly priza and medal ahooting at Shell Mound Park. In tha first class Fred Kuhls won tha first prize, a handsoma gold medal. Lieut. Adolph Hnber won the first prize medal of the second clasa, and in tbe third class tha medal was won by private J. Schmitz. Following ara tbe scores made hy the members of the three classes:

FIRST CLASS.		SECOND CLASS.	
Private Fred Kuhls	46	Lieutenant Adolph Hnber	42
Sergeant Otto Lemke	44	Corporal Charles F. Repenn	41
Lieutenant H. J. Mangels	43	Private Hy. W. Frank	37
Captain John Bruer	39	Corporal Charles Gloss	35
Private L. Haake	37	Corporal Henry Schmeear	34

THIRD CLASS.

Private Joe Schmitz	37	Private Frank Koch	33
Private Thiesen	35	Corporal George Marcus	32
Private John Patrick	33		

The company also gave liberal prizes for pool-shooting on a pnblic target. Thia target was at 200 yards and tha points scored hy rings. Following are the fortunate rifiemen, tha rings made and the amount of cash prizes won:

Name.	Rings.	Total.	Prize.	Name.	Rings.	Total.	Prize.
Cummings	12— 9	21	$21 00	Lemke	10— 9	19	3 00
Thierbach	3—12	20	12 50	Will	11— 8	19	*
Bearrer	11— 9	20	10 00	Sime	5—12	18	1 50
Klein	7—12	19	7 00	Haake	8—10	18	1 00
Mangels	10— 9	19	5 00				

*Special prize.

Socially and financially this company's quarterly picnic and shoot was a success.

To-morrow the California Schnetzen Clnb will hold their regular monthly medal shooting, at Schuetzen Park, Alameda.

The San Francisco Schuetzen Verein will hold their regular shoot for club medals on Sunday, May 13.

ROWING.

McInerney and Peterson.

To-morrow morning McInerney and Peterson will row for $500 a side over the Long Bridge three-mile course. Tha race is expected to he the best ever witnessed on California waters as both men ara in good condition and excellent scullers. The majority of important matches heretofore rowed have been woefnlly one-sided and it is therefore to be hoped that the expectations of a close contest to-morrow may be realized. The final deposit of the stakes was mada last week and Captain P. Brannan of the California clnb chosen as referee. The race is to ba started at 10 a. m., and it is promised that for once the programme will be carried out as arranged. Usnally 10 o'clock in racing means noon or later and the result is consequently nnsatisfactory, as after 11 a. m. the bay is generally in the summer months swept by winds that make good scnlling an impossibility. The persona who have in charge the present match are, however, energetic and enthusiastic, and it is probable that tha race will ba rowed on time. McInerney has coma up somawhat in the betting during the present week. He has shown a marked improvement in his rowing, and had he another week's training might ba expected to do better things than he will be capable of tomorrow. He has a good deal of confidence in his ability, however, with the insufficient practice ha has had, to row the California champion to the finish.

Peterson has had the benefit of long and careful training and satisfies his backers by his looks and his form. To onr mind he is jnst a trifle too heavy, bnt his youthful appearance may deceive tha eye. His opponent is drawn down very fina bnt is still gigantic in figure and apparently full of vigor. The admirers of the rival oarsmen hava becoma very prononnced in their opinions during tha week and aome nnnecessarily loud talk has been indulged in by a few men whose tongues are much longer than their purses. One of these visited McInerney's headquarters the other night and shook the building with his proclamations of confidence in Peterson. He wonnd up his declamations with tha promise that the San Francisco boy wonld make it hot for any man in the world, whereat the Eastern oarsman, who had been listening long and impatiently, lost his temper. "Why, what are you talking about," said the herculean oarsman. "There are men in the East that wonld give him a minnte and beat him." To the credit of both oarsmen they hava indulged in no invidious comparisons of each other. McInerney thinks that he has selected a worthy antagonist and Peterson does not underrate his opponent.

The Toronto *Globe* comes to tha rescue of John A. Kennedy, of whom the English *Referee* critic speaks very slightingly: Pendragon is rather too severe upon Kennedy. If Hanlan is "right" on the day of the race Kennedy cannot beat him, bnt it mnst be remembered that for all this tha champion cannot afford to give away much in the way of condition if ha wants to win this race. Anyone who carefully watched tha last race in which Hanlan rowed at Barrie mnst hava been convinced that had ha desired to do so Kennady conld have beaten them both handily. In that race the little Naw Englander never rowed more than 33 to the minnte, and still ha finished a close third without once extending himself. Whatever may have been his reasons for showing so indiffarently in public, it is very certain that Kennedy is no baby. If any American sculler can beat him it is his friend Davis, bnt it is very certain that tha little watchmaker could "make a show" of either Conrtney or Riley in a five-mile race. If Kennedy is right on the day of the race, Hanlan will have no occasion to play with him, though, as already stated, he is very likely to defeat him.

The entries for the Pnllman, Ill., professional regatta are Edward Hanlan, Wallace Ross, George Hosmer, Georga W. Lee, Charles E. Conrtney, James Dempsey, Frank Hill, R. J. Nagle, M. Kilo, F. A. Plaisted and Harry Parker of New York. All of those who have entered are in active training for tha regatta, which promises to be the most interesting ever held in the United States. The course to be rowed over, Mr. St. John says, has been accnrately measnred on the ice, and embraced ona and a half miles straightway or three miles with a turn. At every 200 yards the coursa is to ba flagged off.

Hanlan and Lee occasionally practica donble scnlling. On the 20th ult. the champion aud Lea rowed double on tha Harlem river, and went well together, though it was the first time they had sat together.

The Boston *Globe* hints that Hosmer would row Lea for $1,000 a side. The *Turf, Field and Farm* says that if Hosmar wants such a raca ha had better challenge and get it.

Eggs stored with the large end downward will keep mucb longer than if in any other position. Tba philosophy of tha thing is this: When the egg is on the big end the air chamber is nnder tha antire weight of the egg and cannot expand freely. If flat, or on tha small and, the air cannot ba so well confined and exudation sets in much more rapidly. If yon cannot sat yonr eggs as soon as you would wish, sea to it that they are placed large end downwards.

Wood ashes are an excellent fertilizer for both potatoea and onions. For the latter crop, in lieu of wood ashes, straw may he spread over the land whera it is proposed to plant tha crop, and, after hurning, the seed may ba drilled in on tha ashes. This warms the surface, destroys some weed seeds and diminishes the labor of caring for tha crop.

Honay-dew is considered by bea experts and entomologists to be the secretion exuded by a species of lousa that infesta vagetation.

THE GUN.

The Pacific Club's Shoot.

This shooting club held its first live pigeon match last Sunday at Birds Point, Alameda. The match was shot nnder Hnrlingham rules at twelve birds, for medals and sweepstaks purses. Precaution was taksn to have pleuty of pigeons, so that the membsrs conld have all ths sport they desired, and as soms went over on the early traiu a $2 50 entrancs sweepstakes was shot off before the regular match. Ssvsn entries wsre made, and three made clean scorss ou ths four pigsons, as this resnlt shows:

Lambert	1	1	1	1—4	Funcke	1	0	1	1—3
Schwerin	1	1	0	1—3	Pearson	1	1	1	1—4
Broden	1	1	1	0—3	Welsh	1	1	1	0—3
Precht	1	1	1	1—4					

Lambert, Precht and Pearson, tying, shot off ths tis on ths "miss and out" principls. Precht and Psarson killed thsirs straight, and divided first and second money.

After this was finished, fourteen members sntered in competition for the club medal. Though thers were some who shot remarkably well, there were some, too, who did not do as good shooting as ueual. This may bs excused on ths plea that it was the first time that soms of the members facsd the trap under the rules of Hurlingham. These are the scorss made:

Valleau	0	1	0	1	0	0	0	1	1	0	1	1—	6
A. Schwerin	1	0	1	1	1	1	0	1	1	1	1	1—	10
T. Schwerin	1	1	0	1	1	1	1	1	1	1	1	1—	11
Smith	1	0	0	0	0	0	0	1	1	0	0	1—	4
Meyers	0	1	0	0	1	0	1	1	1	1	1	0—	7
Stewart	0	0	1	0	0	0	1	1	1	1	0	0—	5
Galindo	0	0	0	w								—	0
Precht	1	0	1	1	1	1	0	1	0	0	1	1—	9
Fowler	1	0	1	1	0	1	1	0	w			—	5
Gonyeau	0	0	0	0	0	1	0	0	1	1	0	1—	4
Lambert	1	1	1	1	1	1	1	1	1	1	1	1—	12
Broden	1	1	1	1	1	1	1	1	1	1	1	1—	12
Adams	1	1	1	1	1	1	1	1	1	1	1	1—	12
Haines	0	1	1	1	0	1	1	1	1	1	0	1—	9

Lambert, Broden and Adams made straight kills of twslve pigeons, so they shot off the tie at four single birds with this result:

Lambert	0	0	1	1—2	Adams	1	0	1	1—3
Broden	0	0	1	1—2					

Adams' score of thres gave him the msdal and first money. Again the first two men shot under the sams conditions, and again they tied on three killed. On the third contest Brodsn dropped his four straight and took the second money, and Lambert's thres won third money. After the match the members and spectators turued their attention to a fins lunch that was prepared for them. In this everyone made a straight score and no misses. We are glad to ses that Mr. Bird has been improving the grounds for the accommodation of visitors. Ths dip in the ground that cansed so mnch annoyancs to sportsmen has been filled np to the level, and the grounds ars now among the best in this vicinity. A pleasant time was had by all who attended the Pacific Club's shoot.

The Trap at Chico.

EDITOR BREEDER AND SPORTSMAN: On the 20th nlt. a match was shot at the racetrack, between J. T. McIntosh of Chico and Horace Silsby of Seneca Falls, New York. The conditions were twenty-five pigeons, thirty yards rise, use of both barrels, Hurliugham rules, eighty yards bouudary. They made the followiug score:

McIntosb.	1†	0†	1	1	0†	1	0†	1	1†	0†	0†	0*	0*	1	0*	1	0†	1	0*	1	1	0†	—	11
Silsby	0†	1	1†	1	0†	1	0†	1†	0†	0*	1	0†	1†	1†	0*	0†	1†	1†	0†	0†	1†	1†	—	12

* Died out of bounds. † Both barrels used.

The birds gave out on twenty-eecond bird, and the match was postponed nntil the 23d, when the shoot for the medal of the Butte County Sportsman's Club came off. Busiuess prevented Mr. Silsby from attending, and the match was declared off. Below you will find the clnb score at twelve birds, twenty-one yards rise, plunge traps, eighty yards boundary:

McIntosh	0	1	0*	0*	1	0*	1	1	0	1	1	0*—	5
Wm. Waddams	0	1	1	1	0	0	1	0*	0	1	1	0*—	5
Spurgeon	1	0*	0	1	1	1	1	1	1	1	1	1	—10
Thomas	1	1	0	1	0*	1	1	1	1	1	1	1	—10
Brown	1	1	1	0	0*	1	1	1	1	0	0*	0	— 7
Rose	1	1	0	1	1	1	0	w					— 5
Barnard	0	1	0	1	0	0	0	0*	0	1	1	1	0	— 5
Swearengin	0	1	1	1	0	0	1	1	1	1	0*	1	— 8
Swain	0	1	0*	0	1	1	1	0*	1	1	1	0	— 7
Scott	1	0	1	1	1	1	1	1	1	1	1	1	—11
Hendricks	1	0	1	1	0	1	0	1	1	0	1	1	— 8

* Died out of bounds.

Same day—match at clay pigeons:

Rose	1	1	1	0	1	0	0	1	1	0	0	1—	7
McIntosh	1	1	1	1	1	1	1	1	1	0	0	1—	10
Swearengin	1	0	0	1	0	1	0	1	0	1	0	1—	5
Swain	0	1	1	0	1	0	1	0	1	1	1	1—	8
Brown	0	0	0	0	0	0	0	0	0	0	0	1—	1
Barnard	1	0	1	1	1	1	1	1	0	0	1	0—	8
Henseley	0	1	0	0	1	0	0	1	0	0	1	0—	4
Waddams	1	0	0	0	1	0	1	1	0	0	1	1—	6
Henry	1	0	0	0	0	0	1	1	1	0	1	0—	5
Denman	1	0	0	0	0	0	0	1	1	0	0	0—	3

Same day—pool; $100 corner; eight pigeons:

A. A. Scott	0	0	1	1	1	0	1	1—5	Swearengin	1	1	0	0	1	1	0	1—6
Thomas	0	1	0	1	1	1	1	1—6	Spurgeon	0	1	1	1	0	1	1	1—6
N. B. Scott	0	1	0	1	1	1	1	1—6	Henry	1	0	1	1	1	0	1	0—5
McIntosh	1	0	0	1	1	1	1	1—6	Swain	1	1	1	1	1	0	1	0—6

It was a fearfully bad day for ehooting; the wind blew a perfect gale from the north just before the ehooting commenced; it blew down about fifty yarde of back fence. McIntosh and Scott tied on the shoot-off and divided the pool.

D.

The annual tournament of the Butte Conuty Sportsmen's Clnb was held at the Chico racetrack on the 23d ult. The attendance was large and the interest displayed great. N. B. Scott of Nelson captured the club gold medal by killing eleven birds out of twelve. He has held the medal the paet year. A high wind interfered somewhat with the eport and made the scoree eo low that they will not be published. Scott killed 11 out of 12 birds.

At the clay pigeon ehoot at Watsonville last Sunday H. S. Fletcher carried off the medal for the first time. The following scores were made at twenty pigeons each: Fletcher 17, Arano 16, Colehower 15, Huddlesou 13, Milliken 11, Frizzel 11, Johnson 6.

Charcoal has coneiderable manurial valne, especially if applied on rich ground, the ammonia of which it absorbs and gives out as the plant roots reqnire. It aleo improves the mechanical textnre of the soil whether light or heavy, and its dark color holds the heat from the enn, making the land warm and early. The remains of old charcoal pita alwaye make the best land in the field for many years thereafter.

BASE BALL.

Progress of the Championship Struggle.

Ths fifth game of ths championship season at the Recreation Grounde on Snuday last bstwes n the Niantic and Haverly clubs, failed to attract ae largs an audisnce as the prsceeding games. Ths explanation of this fact is to be sought for principally from the furthsr fact that ths gamee are hardly up to ths standard of professional bass ball conteste. A large number of the players have as yst not warmed np to what may reasonably bs expected from them and in cousequence for some time to coms the matches will be wanting in that careful playing which is sure to etimulate patrons of the sport, and induce them to turn out in forcs. Ths various clubs havs already shown signs of improvement so that, making due allowance for ths first games, the season promises to bs sventfnl and interesting. Ths teams are at preseut decidsdly weak at ths bat and the number of those striking out is quits formidable. This was espscially the case with the Californiae in their last gams, the total outs on strikes being sixtssn as against three for their opponents. The Niantics on the contrary are powerful hitters and invariably hit low. On the othsr hand, much of ths bad play credited to the Californias is attribntable to ths frssh recruits which ths team has lately recsivsd from the playere who formerly bore good reputations, based on avsrages for two and svsn thres successive seasons, and who since that time have done no playing whatsver. Frsnch was always considered a good fieldsr and a hard hitter, though his running on basss was invariably below criticism. Stewart both as outfisldsr and as first bassman was considered as an excellent ball-tossar, and the same may be said of Cullsn, Angus and Harlow Boyle. With the practice that the next four or five games will enable them to have the contests will assnme a closer aspect and the audiences may be connted npon to increase materially from their prssent numbers. The game on Sunday was noticeable for the excsllent batting, fisldiug and bass running of the Niantics, who seemed psrfectly at ease at the bat and in ths field. Finn was especially fortunate in making three bass hits and scoring two runs, one of them bsing earned. He had little elss to do, and beyond a play which hs missed on third, and a neat put out, his score was a sample of the others. Owing to the poor form which ths Californias displayed at the bat, there was no opportunity for good fielding on ths part of the Niantics. Ths game was principally contested betwesn pitchsr and catchsr. Lawton, who guardsd their fortunes in the latter capacity, did some really good work. His throwing to bases was gsnerally commented upon and was one of the featurss of ths gams. He was sevsrely injured in ths ssventh inning by a hot foul while stauding close to ths bat and for a time it seemsd as if ths services of Finn wonld be required in that position. He manifested his usual pluck and contiuued to catch until the close of the game. Ths Niantics are exceedingly fortunats in possessing relief pitchers and catchers who are competent to assnme the duties of either position whenever occasion may arise. The Californias are eqnally well off. Following is the score:

NIANTICS.	TB	R	BH	PO	A	E

The next game will be between the Redington and Haverly clubs.

By the Coptic from Japan Robert G. Horn of this city received a commnication from William Ryan, captain of the base ball nine of the United States flagship Richmond of the Asiatic fleet, requesting a snpply of professional "dead balls" and bate. The writer complains of being compelled to use "cricket" balls, which, he writes, are very unsatisfactory. He aleo mentions that the Richmond nine is the champion base ball clnb of the Yankee fleet on the Asiatic station.

A match game of base ball was played at Napa last Sunday between the Twilight Club of that city and the Haverleys of San Francisco. The latter won, the score standing 15 to 6.

Delos R. Ashley, one of the league nmpires, has not yet officiated. He ie eminently the man for the place aud should be indnced to put in an appearance at an early date.

The Oakland league has been abandoned. A movement is on foot to bring about a series of games between the Olympic club teams and those of the California league.

It is not improbable that on the conclusion of the Eastern seaeon, one, and perhaps two clubs will visit thie coast.

Jack Rice is considering the advisability of making hie reappearance after two years' absence from the diamond.

The Ornithological clubs will arrange another match in a few days.

The Sacramento club propoeee to challenge our local ball tossers.

It looke as if the old Califoruia club wae abont to be revived.

Newspaper men are thinking about getting up two teams.

Interior clube are being organized with alarming rapidity.

A team compoeed of police officere ie being organized.

Flatbush Maid, foaled 1852 and famous as the mate of Lady Palmer in the donble harness performance, in which Mr. Robert Bonner was the driver, is etill alive, but ehe is thin and weak. She was a pereistent cribber until her teeth became eo worn that ehe could not grind her food. She was fed the past winter on crushed oate and bran, and thus kept alive. Now that the grass is coming forward, it is hoped that ehe will take on strength and gain fleeh. She is but a wreck, bnt Mr. Bonner has preserved her for the good that she has done. She has never bred eince her retirement from the road, although ehe has frequently gone to a stallion. She ie thirty-oue yeare old.

Eugland now imports far more breeding horses for geueral purposes than ehe exports.

A Hint to Mr. Villard.

The *Oregonian* fires this delicate intimation at tbe North Pacific magnats:

The California tracks ars idle during July, as there ars no races in ths State during ths heated term, where here the weather is not sultry till August. If purses to the amount of $3,000 for running and $3,000 more for trotting wers offered during the mouth, we could rely upou a large influx of horsee and their following from California. The railroad companiee have mads a great dsal of money carryiug visitors to races in times past, and should be willing to aid this project liberally, as sportsmen have to pay their fare when they travel. If Mr. Villard, now that he is here, would eudow a staks with $1,000 we conld havs as fine an annual race hsre as they have at Jerome Park for ths stakes endowed by August Bslmont or D. D. Withers, both of whom are financiers and capitalists like Mr. Villard. It might bs well to agitate this thing at oncs. Our city is ths only placc in Oregon to run a big race, because it is the only place which affords good accommodatione to peopls coming from a distauce.

The horses of the German army are now fed with biscnits. Thsy consist of thirty parts of oat flour, thirty parts of dextrinated psa flour, thirty parts of rys flour, and ten parts of linseed flour; somstimss of twenty parts of pea flour, twenty parts of wheat flour, twenty parts of coru meal, twenty parts of rye flonr, twenty parts of grated bread, and ten parts of linseed flour. Ths iugredisnts are made into biscuits. The first-named mixture is ths best. Thess biscuits ars made with a hole in the middls of each, so they can be strung and hung to tbe saddle-bow, or be carried by ths trooper aronud the waist. Each biscuit weighs, baked dry and hard, about two ouncee. Seven biscuits are broken np aud given to the horss in the morning, moistsned with water, if convenient, othsrwise, dry—twelve at noon and sevsn at night. After careful experiments in camp, on the march and campaigning, they are rsported by all the cavalry and artillery officers betsr than oats. A trooper can sasily carry thirty pounds of these biscuits, which will furnish his horse with full rations for sight days, or will eerve, with forage, for twenty days' hard marching.

Sale of English Thoroughbreds.

On the second day of the Newmarket Craven Meeting (April 11) thirty-one horses, ths property of the late Mr. W. S. Crawfurd, were sold at auction for a total of 15,487 guineas, in ths presence of the Princs of Wales and a largs and fashionabls company. The highest-priced lot was the five-year-old Martini, who brought 4,100 guineas. The *Post* says: "Iu accordanes with general sxpectation Martini—for whom there were a conpls of 'two thousand' commissions in the markst—realized the highest price, which far exceeded 'fancy's limit,' howsver; and whsn Mat Dawson contested his possession np to 4,000 guineas it was hoped that this grand-looking brotbsr of Shotovsr would not leave ths country. His Hermit blood, however, was too highly appreciated by that fine judge, Gensral von Luderitz, the director of the Government studs of Gsrmany, for whom he was bought at an advance of 100 guineas on Mat Dawson's last offer by James Wangh, whose eldestson—who formerly lived at Heath House nntil he was appointed private trainer to the Emperor of Germany, nnder Count Lehndorff, at Graditz—accompanied the General to Newmarket as intsrpreter. Martini's destination is the Imperial Stud of Graditz, near Torgau; whilst Kingdom—who was purchased for £3,000 yesterday evening for the German Government—goes to Trakheuen, in East Prussia, as a sire for half-bred stock." The ueext highest price was paid for the two-year-old Miss Waller, by See Saw, dam Mrs. Waller, whom Sir Johu Astley bought for 1,225 guineas. Among the other features of the sale was the price paid for the three-year-old Violetta, who was sold for 500 guineas, as against 1,000 which Mr. Crawfurd paid for her at the late Lord Wilton's sale just a year ago, while Hamptou Court, for whom 1,850 guineas was paid last September, was sold to Captain Machel for 200 guineas, it being rumored that the youngster had been hurt in the back.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23½; another with a record of 2:25, made in 1882; another with a record of 2:28½, and a grandson with a three-year-old record of 2:23½, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20¼ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15½ to 2:27½. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23¼ to 2:28½, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¼, by Happy Medium Jr.; and Carrie B, 2:28½, by Elial G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address

ASHLAND PARK

TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

2-17y1 **B. J. TREACY,** Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

Standard Fowls.

Breeding fine poultry has become as much of a science as breeding any other kinds of live stock, even though it does not require a tithe of the outlay or expense, and those of limited income can indulge their tastes in that direction, being reasonably sure of making the fowls pay their way, and in some cases realizing quite snug little profits. A mistake too often made by novices is to buy a pair or trio of first premium birds, at some large poultry show, and then expect to raise from them the following season nothing but chicks which will be as meritorious every way as their parents. Very often it is desirable to get these prize-taking birds for breeding purposes, if the fitting of them for exhibition has not impaired their health or strength in any way, for from such birds many fine chicks can be reasonably expected, but if from ten to fifteen per cent of the offspring can be rated as extra standard birds, the breeder has every reason to feel well satisfied. In procuring choice breeding stock, however, we would not make it a point to buy the exhibition birds at the shows, but rather visit the yards of some prominent breeder, who breeds the variety or varieties you wish, and there select what you need. By this means you secure the choice birds, just as they are at home, without having been pampered or fixed up for exhibition. As to varieties, that is a matter which must be decided by each individual, but it is very bad policy to try more than one breed at a time, for if the breeder attends to the birds properly, he will find all his time and skill required to perfect one breed. It is far better to sell extra specimens of one kind to purchasers, at a round price, than to supply customers with many kinds at a low price, and a corresponding low grade.

In attempting to rear standard fowls, it is absolutely essential to hatch out the chicks as early each season as it can possibly be done, to enable them to have the entire season to perfect themselves. Of course, chicks hatched out in March require more care and attention, while in the downy state, before they become fully feathered, than do those brought out in May. With many breeds, the experienced breeder can, while the birds are very young, pick out those chicks which will, or should meet the requirements of the "standard," and to these he can give extra care and attention, to induce a rapid and healthy development, the others being given ordinarily good care, and consigned to the kitchen, as they are needed, and become fit. It may seem rather hard to cull close, frequently selecting but ten or fifteen birds, at first, from a flock of forty or fifty, and consigning the others to separate quarters, as a mere food supply for the house, yet in no other way can improvement be assured. And those who wish to raise standard birds, but do not yet understand the desirable qualities of the breed they wish to rear, should post themselves thoroughly in the matter; first, by reading up on the subject, in the different periodicals devoted to poultry; then by studying the standard of excellence for poultry, which gives the "ins," as well as the "outs," of each recognized breed of domestic poultry; then by visiting the prominent poultry shows, and carefully noting the size, shape, weight and markings of those which carry off the honors, and lastly by purchasing a pair of standard birds, as a model to breed to, rather than as stock from which to produce all standard chicks. Those who have been successful in a pecuniary point of view, in rearing poultry for mere food purposes, cannot always make a success of it in attempting to breed thoroughbred fowls to a high degree of excellence, for the simple fact that not only must the best of care and management be bestowed, and the food and feeding be all that is desired, but there are certain requirements in the way of plumage, markings, shape, style and weight, which count very heavily in the show-pen. While the show-room will go far towards teaching many valuable items of knowledge to the novice, making repeated visits to some well-known and successful breeders of thoroughbred fowls will do far more, as many of the practices there in vogue can be seen and learned, the breeder rarely refusing to show the visitor his birds, and how he conducts his operations.—*American Agriculturist.*

Market Report.

FLOUR—We quote: Best City Extra, $5 65@$6 05; medium grades, $4 50@$5 25; Shipping Superfine $4@$4 25.

WHEAT—Market stronger but prices not materially changed. No. 1 White, $1 80@$1 82½. Milling lots $1 85@$1 87½.

BARLEY—Trade dull. Spot feed, $1 27½; Brewing, $1 30@$1 35 ℔ ctl.

OATS—Fair Feed, $1 85@$1 95; Good, $2@$2 15; Choice, $2 20@$2 22½ ℔ ctl.

RYE—Quotable at $1 65@$1 85 for fair to good.

FEED—Ground Barley, $28 ℔ ton; Cracked Corn, $35 ℔ ton; Shorts, $15 50@$17 ℔ ton; Oilcake meal, the oilworks sell to the trade at $35 ℔ ton, less the usual discount; Middlings, $22@$24 ℔ ton for lots at the mill.

HAY—Alfalfa, $10@$14; Wheat, $14 50@$17; Wild Oat, $14 50@$17; Mixed, $12@$14 ℔ ton.

STRAW—75c@90c per bale

PROVISIONS—Eastern Hams, 16½@16¾c; California, Hams, 15@15½c for plain, 15¾@16½c for sugar-cured canvased; Eastern Breakfast Bacon, 16@16½c; California Smoked Bacon 15@15½c for heavy and medium, and 16@16½c for light and extra light; Clear Sides, 15¼@15½c; Pork, $18@$18 50 for Extra Prime, $20@$20 50 for Prime Mess, $23@24 for Mess, $25@$25 50 for clear and $26@26 50 for extra Clear; Pigs' Feet, $16@$18 ℔ bbl; Mess beef, $15 50 for bbls and $8 75 for hf bbls; Extra Mess Beef, $16 50 for bbls and $8 75 for hf bls; Family Beef, $18@18 50 ℔ bbl; California Smoked Beef, 13@13½c ℔ lb.

FRUIT—We quote: Apples, 40c@50c for common and $1@$1 50 ℔ box for good to choice; Lemons, $5@$7 per box for Sicily; California Lemons, 75c@$1 50 per box; Limes, $8@$10 per box for Mexican; Bananas, 1 50@$3 ℔ bunch; California Oranges, $1 25@$1 50 for common and $2@3 25 for good to choice ℔ box; Pineapples, $6@$8 ℔ doz. Western Cranberries are offering at $15@$17 ℔ bbl; Strawberries, $5@$9 ℔ chest according to variety.

VEGETABLES—We quote: Marrowfat Squash, $25 @$30 ℔ ton; Carrots, 37½c@50c; Turnips, 75c; Cauliflower, 75c@$1 25 ℔ dozen; Cabbage, 75c ℔ ctl; Garlic, 3½c ℔ lb; Celery, 50c ℔ doz; Dried; Okra, 20c@25c; Dry Peppers, 10c@12½c ℔ lb; Green Peas, 3@3½c for common, and 4@6 for sweet; Rhubarb, 6@8c per lb; Mushrooms, 75c@$1 ℔ box; Green Peppers, 8c@10c per lb; Tomatoes, $2@$2 25 ℔ box, Cucumbers, 50c@$1 75 per doz.; Asparagus, $1 12½@$1 50 ℔ box; Sprouts, 3c ℔ lb.; Artichokes, 10c@15c ℔ doz.; String Beans, 12½@15c ℔ lb.

POTATOES—River Red, 60@70c; Early Rose, 50@70c; Tomales and Petaluma, $1 05@1 12½ ℔ ctl; New, 1½c@2c per lb.

ONIONS—$6@$7 for good to choice.

BEANS—Bayos, $4 75@$5; Butter, $3 25@$3 50 for small and $3 50 @$4 for large; Lima, $3 55@$3 80; Pea, $3 50@3 75; Pink, $4 50@$4 75; Red, $4 50@$4 75; small White, $3 50@3 75; large White, $3@$3 25 ℔ ctl.

BUTTER—We quote jobbing lots: Fancy, 25c@25½c; choice, 23@24c; fair to good, 17@22c; inferior lots from country stores, 15@17c; firkin, old, 19@22c for choice; new, 22@25c; pickled roll, 20@22½; Eastern 17@20c.

CHEESE—Firm. California, 14c for choice; 11@13c for fair to good; do, factory, in boxes, 14@16c; Eastern, 16@17c.

EGGS—California, 24@26c ℔ doz.

POULTRY—Live Turkeys, gobblers, 23@25c; do, Hens, 24@26c; Roosters, $7@$8 for old and $10@$12 for young; Hens $9@$10; Broilers, $4@$8, according to size; Ducks, $9@$10 ℔ dozen; Geese, $2 25@$2 50 ℔ pair; Goslings, $3@$3 50 per pair.

GAME—Snipe, $2 25@$2 50 for English and 75c@$1 for common; Hare, $1 50@$2; Rabbits, $1 25@$1 75.

WOOL—Quotations nominal. 16c@20c for Spring.

HIDES AND SKINS—Dry hides, usual selection, 16½@17c ℔ lb; culls one-third less, and Mexican Hides 2c ℔ lb less; Dry Kip, 17c; Dry Calf, 20c@22½; Salted Steer, over 55 lbs, 11c ℔ lb; Steer over 55 lbs, 11c; Steer and Cow, medium, 9½c@10c; light do, 8½c; Salted Kip, 15 to 30 lbs. 10c; Salted Calf, 14@15c ℔ lb; Salted Veal, 12½@15c; Sheep Skins, 25@30c for Shearlings, 30@60c for short, 60c@$1 for medium, and $1@$1 40 apeice for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—Quotable at 8@8½c ℔ lb for rendered and 11@12c for refined, both in shipping order.

MEATS—Following are rates for whole carcasses from slaughterers to dealers:

BEEF—Prime, 8½@9c; medium grade, 7½@8c; inferior, 6½@7c ℔ lb.

VEAL—Large Calves, 7@8c; small ones, 9@10c ℔ lb.

MUTTON—Wethers are quotable at 5c and Ewes at 4@4½c ℔ lb, according to quality.

LAMB—Spring is quotable at 8c ℔ lb.

PORK—Live Hogs, 8@8½c for hard and 7@7½c for soft; dressed do 10½@10¾c ℔ lb for hard grain hogs.

An Extended Popularity. Brown's Bronchial Troches have been before the public many years. They are pronounced superior to all other articles used for similar purposes. For relieving Coughs, Colds and Throat Diseases they have been proved reliable.

FOURTH DAY.

Race No. 13. The Hotel Stake, for all ages; $50 entrance, $25 forfeit, $500 added, $100 to second, $50 to third; 2¼ miles.

Race No. 14. The Flash Stake, for two-year-olds; $50 entrance, $25 forfeit, $250 added, $100 to second; three-fourths of a mile.

Race No. 15. Club Purse; $200; all ages; first $125, second $50, third $25; half-mile heats.

Race No. 16. Trotting; 2:40 class; purse $400, first $250, second $100, third $50.

FIFTH DAY.

Race No. 17. Selling race; purse $250, $75 to second; horses entered to be sold for $1,500 to carry entitled weights; two pounds off for each $100 under fixed valuation; winner to be sold at auction immediately after the race, and any excess over entered price to be divided between the club and second horse; 1⅛ miles.

Race No. 18. Trotting; free for all; purse $1,000, first $600, second $300, third $100.

Race No. 19. Consolation race; purse $250, for horses that have not won a race during the meeting; beaten allowances; 1⅛ miles.

CONDITIONS.

Running races will be governed by the rules of the Chicago Driving Park.

Trotting and pacing races by the rules of the National Trotting Association.

All entries will close May 5, 1883.

Entrance fee of 10 per cent in all club purses. Running with three or more to enter; two or more to start. Trotting and pacing races, five or more to enter and three or more to start. In all cases the entries must be inclosed in sealed envelope and addressed to the secretary, and plainly state name, age, color and sex of horse, name of sire and dam (when known) and name of owner. For all races colors of rider must be given with the entry. No entries accepted unless accompanied by the money, and under no circumstances will any conditional entries be received. Walk-over by any one horse entitles him to half of the stake money and all of the forfeited money and all plate or cup added.

Any horse distancing the field, or any part thereof, will be entitled to first money only.

The association claims the right to interlace heats of different races whenever it may deem it expedient. It also claims the right to postpone on account of bad weather.

J. T. GILMER, President.
E. J. TRAVIS, Treasurer.
T. F. MULLOY, Secretary and Manager,

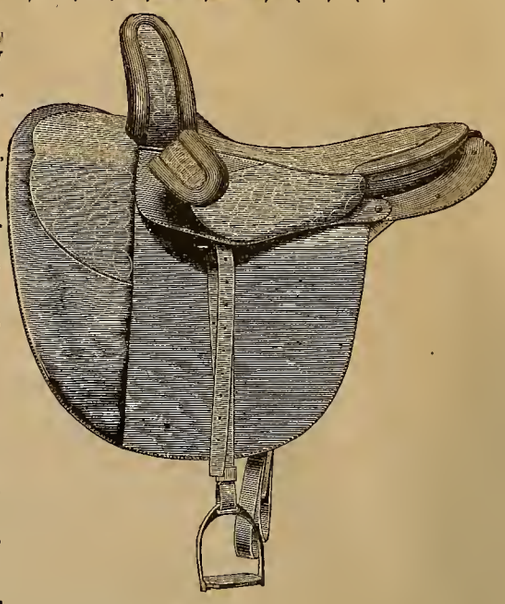
TRAINING SADDLES.

Ladies' saddles on hand or made to order in special styles



THE TRADE SUPPLIED

AT MANUFACTURERS' RATES.

An Inspection of these Goods is Invited.

Illustrated Catalogues sent free on application.

JOHN McKERRON, 230 and 232 Ellis Street, San Francisco.

WHITMAN TREES.

HAVING ON HAND A LARGE SELECTION OF

WHITMAN TREES,

I AM PREPARED TO MAKE UP SADDLES IN ANY STYLE DESIRED BY CUSTOMERS, WITH OR WITHOUT THE CALIFORNIA HORN.

Trees for Sale to the Trade

IN QUANTITIES TO SUIT,

AT MANUFACTURERS' PRICES.

JOHN A. McKERRON,
230 and 232 Ellis street,

SOLE AGENT FOR THE PACIFIC COAST.

WHITMAN PARK SADDLE.

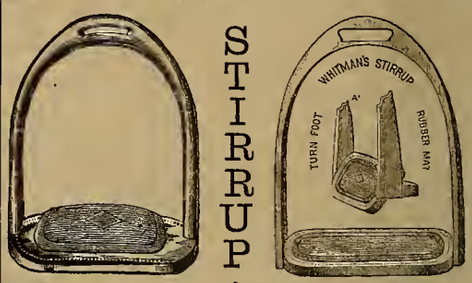
EASY AND SAFE

Riders or those who intend to become good riders should try these saddles. In conjunction with the WHITMAN COMBINATION HALTER-BRIDLE and the WHITMAN RUBBER-FOOTED STIRRUP these are the most stylish and comfortable outfits in use. They can be finished to suit any taste at from $15 upwards.

JOHN A. McKERRON,

230 and 232 Ellis St., Sole Agent for Pacific Coast.

WHITMAN'S RUBBER-FOOTED STIRRUP



THESE STIRRUPS ARE VERY HANDSOME AND THE RUBBER MAT A GREAT CONVENIENCE AND COMFORT TO THE RIDER, AS THE SLIGHT AMOUNT OF ELASTICITY PREVENTS SHOCK, WHILE THE ADHESIVE PROPERTY OF THE RUBBER HOLDS THE FOOT IN PLACE WITHOUT EFFORT.

No person ofter once using them will use any other.

JOHN A. McKERRON,

230 and 232 Ellis Street, Sole Agent for the Pacific Coast

CAPITAL TURF CLUB,

SACRAMENTO, CAL.

W. M. MURRY, Agent,
Sacramento Racetrack.

THE CELEBRATED TROTTING STALLION

ERWIN DAVIS

WILL MAKE THE SEASON OF 1883 AT OAKLAND TROTTING park.

DESCRIPTION.

Erwin Davis is a beautiful mahogany bay with very black points and one hind foot white; 15 hands high; of superior good disposition and fine trotting action.

PEDIGREE.

Erwin Davis was sired by Kentucky Hunter (Skenandoah) by broken-legged Kentucky Hunter (the sire of Flora Temple) by Ferguson's Kentucky Hunter, by old Kentucky Hunter, by Highlander. Erwin's dam was Lost Diamond, by Vermont Hambletonian.

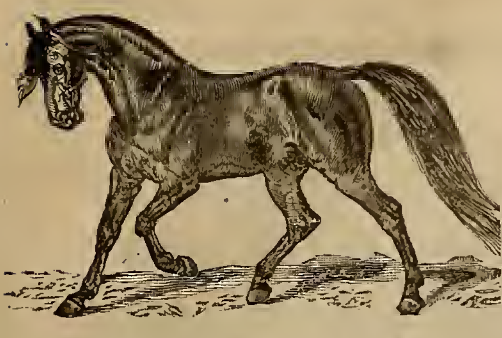
TERMS.

Twenty-five dollars for the season, payable at the time of service. Good pasturage at $5 per month. No responsibility for accidents or escapes. For particulars apply to

JOHN ROGERS,
Oakland Trotting Park.

STALLIONS.

UNDERMAN.



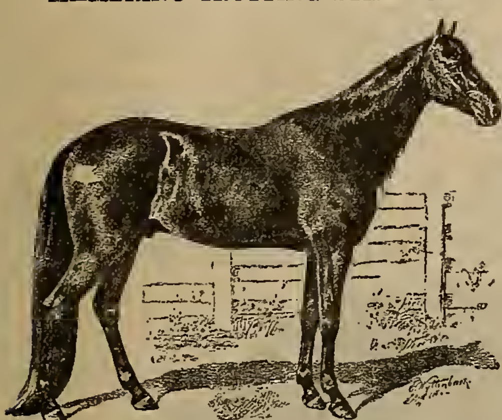
SIRED BY ELMO, DAM BY TOM HYAR SON OF OLD Belmont, will make the season of 1883 from March 1st to July 1st at the Bay District Track, San Francisco.

Underman is a dark chestnut, with blaze face and left hind foot white. Coming six years old, 15¼ hands high and weighs about 1,100 pounds.

Terms, $20 for the season. Mares not proving with foal can be returned next year free of charge. No responsibilities assumed for accidents. Apply to

FRED BENNETT,
Bay District Track, San Francisco.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2:21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Columbus. Woodford Mambrino by Mambrino Chief, his dam Woodbine by Woodford, a thoroughbred son of Kosciusko.

Woodford Mambrino is recognized to be the best son of Mambrino Chief. His own record is 2:21½, and there are a large number of his get in the 2:30 list. Among them: Abbottsford, 2:21½; Convoy, 2:22½; Magenta, 2:24½; Lady McFatridge, 2:29; Dacia, 2:29½; George A. Ayer, 2:30.

Besides those having public records, he is the sire of the two celebrated mares owned by Robert Bonner—Manetta and Malice. Manetta, with a running mate, and harnessed to a road wagon, trotted two miles in 4:27½, and Malice trotted a trial, on the same track, a mile in 2:19¾. Woodford Mambrino is also the sire of Princeps, the sire of Trinket; record, 2:14. Woodbine is also the dam of Wedgewood, record, 2:19. Young Columbus, the sire of the dam of Abbottsford, has nine of his get in the 2:30 list, so that on both sides of the house there are notable performers. Abbotsford is a rich rosewood brown, 15¾ hands, and of very high form. His get are very promising, his daughter Jasmine having won the Embryo Stake for yearlings in 1881, and every one which has been put in training has shown good speed.

TERMS.

Seventy-five dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

LOCATION.

Abbotsford will make the ensuing season, 1883, on the ranch of S. B. Whipple, Esq., San Mateo, season commencing February 15th and ending June 1st, 1883. For full history see the issue of BREEDER AND SPORTSMAN of August 5th, 1882.

GEORGE BAYLIS, Agent, San Mateo, Cal.

MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,200 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

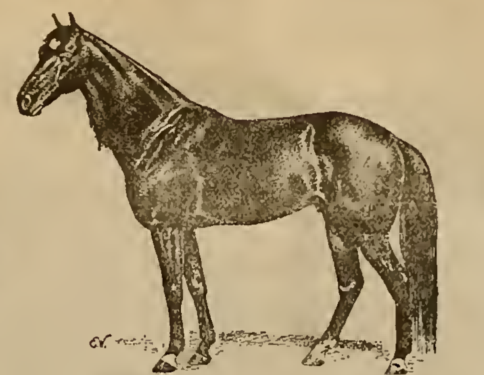
☞ George Wilkes has twenty representatives in the 2:30 list, of which 10 have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.

Will make the ensuing season, beginning February 1st, 1883, at STOCKTON.

In putting the price by the season at the low figure of $40 the owner does not acknowledge, thereby, any inferiority on the part of this horse to any other sire of Trotters. **IRVIN AYRES.**

STALLIONS.

THE TROTTING STALLIONS



SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMINO SEASON, FROM Mach 1st to July 15th, 1883, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

PEDIGREE.

Singleton is by Willie Schepper, a son of Rysdyk's Hambletonian, his dam Lightfoot (the dam of Pride) by Flaxtail, a son of Pruden's Blue Bull.

DESCRIPTION.

Singleton is a dark brown horse, tan flanks and muzzle, a little touch of white on hind feet and one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was bred by Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

Fifty dollars the season. Mares not proving in foal will be bred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner their owners desire, at reasonable rates. There is every convenience on the place, boxes, paddocks and plenty of shade and water.

LA HARPE

Will also make a short season at the above place on private terms. La Harpe is by Fame, a son of Alexander's Belmont, his dam Prairie Bird by Flaxtail, the dam of Flight and Prompter. Address

J. T. McINTOSH, Chico, Cal.

The Fast Trotting Premium Stallion

ALEXANDER

WILL STAND THE PRESENT SEASON AS FOLLOWS: MONdays, Tuesdays and Wednesdays at Clark's stables, Santa Rosa. Balance of time at Fashion stables, Petaluma.

Alexander is by Geo. M. Patchen Jr., the sire of Sam Purdy (2:20½) Starr King (2:22) and Vanderlynn (2:22). Dam Lady Crehn, by a son of Brown's Bellfounder, by imported Bellfounder. For full description see BREEDER AND SPORTSMAN of Sept. 9, 1882.

Of Alexander's get Tommy Dodd has a record of 2:24, Reliance 2:22½, Nellie Patchen 2:27½, Eudora 2:34½, Inauguration three miles in 7:29—last mile in 2:26, Sonoma Boy 2:37. Alex. Button proved by his performance in 1880 to be one of the best three-year-olds which have ever appeared in any country. He won the stake for three-year-olds at the State fair, beating Belle Echo, Annie Laurie, Len Rose and others, winning the first, third and fifth heats and making a dead beat with Annie Laurie in the fourth; time, 2:31½, 2:30, 2:29, 2:30¾, 2:35. At the fair of the Santa Clara Valley Association at San Jose he won, beating Belle Echo and Len Rose; time, 2:28¾, 2:30½, 2:33¾, 2:31¾. Belle Echo won the first heat. He won at Stockton, beating Honesty, Len Rose and Upright in straight heats; time, 2:32, 2:33½, 2:32½. In 1881, as a four-year-old, Button made a record of 2:26¾ over the Santa Rosa track. Dot Craig, by Alexander, has a private record of 2:29.

The Frasier team took first premium at the Sonoma and Marin District fair; also at Oakland for best carriage team.

Mares left at the City Front stables, San Francisco, will be forwarded. For further information apply to

T. T. UNKLESS, Petaluma.

STEINWAY.

TWO-YEAR-OLD RECORD 2:31¾; 3-YEAR-OLD RECORD 2:25¾.

TERMS

WILL SERVE MARES THE PRESENT SEASON AND ENDING July 1, 1883, at the stock farm of the late Daniel Cook, Danville, Contra Costa county, Cal., at $100 for the season, payable before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage at $6 per month, and extra pains taken with mares in attendance, but no liability for accidents or escapes. Mares sent in care of of McCleverty & Nohleit, Fashion stable, Oakland, S. J. Bennett, Martinez, or D. S. Smalley, Haywards, will be forwarded immediately to the farm.

DESCRIPTION.

He is a rich bay; 15¾ hands high; long, flowing mane and tail; two white hind ankles; remarkable style and lofty carriage; has a good, resolute head, set on a stout neck; his shoulders are of the Hambletonian form—do not mount very high at the withers; has great length and capacious middle piece; plenty of bone and substance, and his gait is big and square.

PEDIGREE.

Steinway was sired by Strathmore.

First dam Abbess by Albion, the sire of Vanity Fair, with record of 2:24.

Second dam by Marshal Ney, by imported Emancipation.

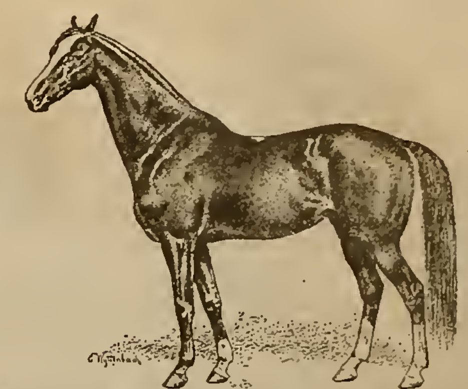
Third dam by Bertrand, by Sir Archy.

Steinway's dam is the dam of Solo with five-year-old record 2:28½, and also the dam of W. S. Buckner's colt Currency that trotted as a yearling last fall in 2:46. See N. Y. "Spirit of the Times of November 18, 1882. Strathmore is the sire of Santa Claus 2:17½: Chestnut Hill, 2:22½; Steinway, 2:25¾; Alice Stoner, four years old, 2:24; Nannie Talbot, four years old, 2:29; Solo, five years old, 2:28½; Monitor, five-year-old record 2:29; by Rysdyk's Hambletonian, the sire of 35 in the 2:30 list. Address

SAMUEL GAMBLE.
Danville, Contra Costa Co., Cal.

STALLIONS.

THE THOROUGHBRED STALLION



WHEATLEY

WILL STAND THE ENSUING SEASON, ENDING JULY 1ST, 1883, at the Oakland racetrack.

TERMS—$50, payable at the end of the season. Satisfactory arrangements can be made for pasturage near the track for mares from a distance.

PEDIGREE AND DESCRIPTION.

Wheatley is a golden chestnut, 15 hands 3 inches high, and of fine style and appearance, and is by War Dance.
First dam sister to Pryor, by imported Glencoe.
Second dam Gipsy, full sister to Medoc, by American Eclipse.
Third dam Young Maid of the Oaks, by imported Expedition.

Trotting Action.

In taking the position that trotters will ultimately go faster with light weight on their feet I am fully aware that there will be no end to the ridicule of those who think they "know it all."

There has been such a unanimity of opinion, such a general concurrence in the idea that weight was more or less a necessity thet to go counter to it is a hazardous undertaking. But there has been a modification of previons opinions among some of the trainers of trotters, and in the last ten years a change, fully as startling as the one I now propose. The use of toe-weights has been the means of attracting attention to this portion of the education of trotters, and should the ecience progress until these appendages are thrown aside, the advance in a great measnre can be ascribed to the lessons that were presented by the application of weight to the outside of the foot above the shoe. Not long ago in a conversation with O. A. Hicock he informed me that he was driving the young colts barefooted, and that so long as they were doing so well as they were at that time he would continue the practice. One of the reasons he gave was that by accustoming them to trot without weight on their feet they could trot in races with lighter ehoes, and that in his opinion thie wae an advantage. Should it be fully established that there is no necessity for the "protection" of a heavy ehoe, that furthermore the least metal that can be got along with is the best thing to keep the feet and lege in order, then the only argument that can be offered in favor of a greater mass ie that it ie neceeeary to give the proper action. In these articles I will proceed on the assumption that this has been demonstrated, inaemuch as my experience for a sufficient length of time, viz.: eight years' trial, snstains the ground taken. I do not suppose that this will be accepted by people who have no personal, practical knowledge of the effect of discarding full shoes, as the "old rnts" are worn to a depth that it is troublesome to extricate the wheels from the channels that centuries have grooved.

In the etudy of trotting action no one can arrive at more than a partial nnderstanding who does not avail himself of the teachinge of the camera. It givee the same advantagee as demonstration in geometry. Were a teacher restricted to worde it would be difficult for him to make hie pupils undereteand the simplest problem, the intricate could never be elucidated. The photographs ehow the action tranefixed. They place it before the student in the cleareet light by giving the opportunity for critical examination, and the leieure to scan every phase. If the living animal could be brought to an instantaneous rest, with feet and limbs in the exact position occupied in every portion of the etride, that would be inferior. We have the further advantage of extending the time for observation without dependance on memory, and illuetrations as true as the reflectione from a mirror. Among the representations taken at Palo Alto are eeveral of Edginton. In a former article the difference between harnese and eaddle action was commented upon, and the eubject for thie will be a card on which he is depicted trotting at the rate of a mile in eight minutes. This in the perlance of the tracks would be termed a "slow jog," which a very large proportion of colts could easily equal. To ehow the etride of eleven feet and one inch eight pictures taken at dietancea of twenty-one inches apart were necessary. Number one ehowa the left fore foot and the right hind foot on the ground, the otber feet elevated, and in number two the same feet are on the gronud, the body carried forward twenty-one inchee. In number three all the feet are off the ground the left hind foot nearly touching and under the fore foot on the aame side. These feet are contiguoua, the toe of the fore foot ao close to the coronet of the hind that in the photograph it eeema to atrike it. Aa Edginton wore scalping boota when the picture was taken this was probably the case, and in this position may be found the etarting point to lead to a better underetanding of the proper method of overcoming the most serious trouble there is in the education of trotting colts. I think there are few trainers of trotters who will not agree with me that the greatest trouble with young trotters is to keep them "square." As long as they go level and true there ie generally progress. When they resort to "hitching" the improvement ends. Occasionally there may be casee where there is an increase of speed with the "running behind," but this is so exceptional that it is safe to assert that the reverse will follow the faulty movement. With some the tendency can be overcome by faster motion, and once in a while it is possible to "drive the colt out" of the hobbling into a purer gait.

In nearly every one of my colts which have fallen into the habit, there has been an inclination to pull at the bit when hitching, and from going with only a slight tension on the reins considerable force had to be applied. Now in a very large proportion of casee the change from square to faulty action when going at a moderately slow pace arises from the collision between the fore foot and the hind at the extremely sensitive portion which ie usually termed "between the hair and the hoof. A very light blow on the finger nail will prove how painful muet be the contact of the iron, and that when it occurs the animal will resort to eomething to avoid it. In training horses for the saddle much stress was laid by the old-time teachers in placing the pupils "properly on their haunchee." Thie consisted in quickening the movements by a touch of the spur, and at the eame time "keeping them well in hand."

So when the Duke of Newcastle wrote, over two hundred years ago, he laid great etress on thie point, and among other methods he gives the following directions to effect the purpose: "The hand ehould never be above two or three fingers above the pommel, a little forwarder, and easy, but firm; for there is nothing makee a horse go more of the hauuches, than a light hand, and firm; for when he hath nothing to rest on before, he will reet behind; for he will rest on eomething; and when he rests behind, that's upon the haunches: A light hand is the greatest eecret we have; but there is no horse can be firm of the hand, except he suffers the cnrb, and obey it." From the above it will be eeen that the noble author wae as particular abont his punctuation ae his inetructions, and with the exception of spelling, italice and capitale it is an exact transcript.

Something of the same ueage may remedy the tendency to "ecalp," and the use of a curb, operated from a height which will bring the preseure in the proper place. Before taking, for the preeent, leave of Newcastle it will be apropoe to quote from another page hie reasone for eo warmly advocating the putting the horse on his haunchee, and it will also show that he was familiar with "balancing" though he usee a synonym. "There are many reasone why we work a horse eo much to put him upon the hannchee, which I have ehowed you before; but there ie oue reaeon more, and that is thie: A horse'e croup or haunchee bears nothing but hie tail, which ie very light; but hie ehoulders hath his neck and head to bear, which is more; and therefore we put him upon the haunches, to poise him, and to releive his ehoulders, and to make him light on the hand." Thie chapter is terminated with a paragraph nearly all in italics to give proper emphasis and enforce the importance of the leesons. It reade: "Thue much for dressiug all manner of horsea upon the ground, to make them obey perfectly both hand and heel, and to put them upon the haunchcs, which is the masterpiece of our art."

Now the "poyse," as the Duke apells the word, may be effectual in so sharpening the action as to cure the habit of striking the hind and fore feet together, or the wounding the coronet or pastern with the toe of the fore foot. It ia apparent, however, that trotting colts, especially when handled so young, as is the practice now, cannot be subjected to the treatment which the masters of equitation recommend and some other plan must be devised to effect the purpose. It is also evident that if this can be accomplished without weights or heavy shoes there will be less liability to injure the feet and legs.

I am thoroughly convinced that we delay too long before applying a guard while the lessons are taught, waitiug for a succession of blows ere the application is thought necessary. The pupil may ehow no indication of the injury in hie gait for some time, though the marks on the horse will give evidence, and when it tries to avoid the injury by hobbling behind, the chances are that it will be a long time before confidence is regained. The old adage that "an ounce of prevention is better than a pound of cure" is peculiarly applicable, and if within the range of discovery will be of great value to breeders and trainers.

Toe-weights have been of great service in correcting the faulty action, and in Kentucky especially, they are in general nee on colts. Since the invention of those that can be fastened on a bare foot I learn that among the breeders of the blue grass country it is the practice to put them on from the start, and that a fine degree of success has followed. Fully acknowledging the efficacy of toe-weights, and that the introduction of them marks an era in the education of trotters, still I would much rather get along without them if other methods subserve the same ends. Not the least of tho benefits that have resnlted is the awaking of teachers to the necessity of a closer study of the action, and it has also stimulated inventors to originate desigus free from the serious objections that marred the first crnde contrivances that were nsed. Clumsy and faulty though they were it was demonstrated that tnere was a potent influence in the application, that even the inveterate sticklers for the old practices wero forced to admit. I believe that if there is as general an awaking to the importance of further study, a wider spread desire to discover new methods of overcoming the drawbacks of faulty action, partially removed by the use of weights, that it will not be long before an applicable remedy will bo ound. There may be cases which can only be cured by carrying weights, though extremely rare, and still more rare to find a pupil that will require the weights after graduating. In succeeding papers I will offer suggestions that may prove worthy of trial, and while presenting them will continue experiments founded on the theorics advanced. Somo of the poeitione I have already proved hy actual trial and others are based on what has been shown by "work" given without a specific object.

N. Curry & Bros., No. 113 Sansome Street.—This old established firm will supply sportsmen with every kind of cartridges. Paper and brass shelle, etc. Guns and revolvers iu any quantity. Winchester repeatiug rifles. They are agents for the glass balls mauufactured by the California Glase Works.

Will & Finck—No. 769 Market etreet, have on hand tho finest assortment of dog collars and chains; also eportiug goods of every kind.

Mr. R. G. Head of Napa offers to the lovers of thoroughbred poultry 2,000 fowls of the leading varieties to eelect from. Read hie advertisement.

Mr. C. H. Huffman, who left hero a little more than two weeks ago for the Western States, to purchase mulce, returned last Thursday moruiug. Supervisor Hartley accompanied him, and is on his way back in chargo of the mules purchased. They bought 120 head—80 for the Caual Company and 20 each for uee on their ranches. Mr. Huffman saya mules and horsea are higher in St. Louie than here. They bought in St. Louis, as mulea were not to be found outside that market in lots as large as they desired to purchase. *Merced Express.*

The Alameda County Sportsman'a club will hold its second monthly shoot of the season at live pigeone for the club's gold medal at tha Oakland Trotting park thia (Saturday) afternoon.

ANCIENT AND MODERN ARMS.

The Increasing Spiral Compared with the Even or Continuous Twist of the Rifle.

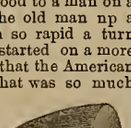
BY DR. E. H. FARDEE—NO. 14.

I have now come to a very important question, and one that the very best of our experts differ on. I find in my gunnery that people are very slow in giving up ideas that have grown up with them; how great a struggle it has been for some of our old fossils to give up the love and apparent attachment for the muzzle-loading rifle for that of the more advanced weapon, the breech-loader. How many times I have heard good, sensible men, lovers of the rifle, expert hunters, say thet they wanted one good shot, a shot that they could depend upon—that they had no confidence in a rifle where it was fed with ammunition at the stern; that the old muzzle-loader was Old Reliable, its reliability had gained their confidence and their affection, and no argument would have any weight with these old guardsmen of the double trigger and muzzle-loader. "No, sir," they would say, "you can't divorce me and my old true friend for none of your dirty, magazine, breech-loading playthings."

And, so it has been with myself. As I look back over the past thirty years and see how I indulged in my hobbies, it becomes both painful and amusing. How I first advocated the plain or continuous spiral and defied the advocates of the increased twist to controvert my arguments. I can now look back and see where many a position I then took in favor of the continuous twist are lame and faulty, and can say with a consciousness of being in the right, that the more a man studies and learns intricate problems of gunnery, the less confidence he has in a gun.

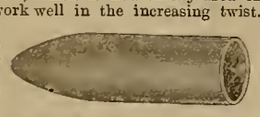
The increase twist was introduced in the United States by Mr. Edmond Wesson, a celebrated rifle-maker of Roxbury, Mass., in about the year 1842, not as an invention of his own, as is generally supposed, as rifles may now be seen in the French Museum in Paris, made more than a century ago, with the increased spiral. And from the accuracy of Mr. Wesson's guns, he became at once the leading maker, and his guns were sought by all experts with the rifle in all parts of the United States. The proof was positive that the increased twist gave a new impetus to target shooting in every State of the Union. I claim the honor of being the possessor of one of Mr. Wesson's "Tally-ho telescopic American target rifles." An order was given by a gentleman in San Francisco in 1855, through *Wilkes' Spirit of the Times*, New York, for one of the best target guns, regardless of cost, that could be procured in the United States. It is the first rifle that I commenced target practice with in California, and although I have other guns that will beat it now still I cling to it with the same tenacity that a country chap holds to the girl of his first love. True, 'tis more than a quarter of a century old, but age has not corroded her, and to-day her inside shines like the sparkling diamond and the display of workmanship I have never seen excelled on any gun. It has the increased twist and with the working of that gun I became convinced that the performance was more even and steady than that of the even twist. In fact all over one hundred yards, it was four to one on the "Wesson Tally-ho." At that time the continuous twist was very slow, making one turn in about ten feet, while the increase would start on the above turn, increasing in spirosity from the breech to the muzzle and coming out on about a thirty-six inch turn, i. e., if the same turn should continue that is found at the muzzle, a complete turn would take place in a gun barrel thirty-six inches in length.

The advocates of the increasing twist believe that a steadier motion is imparted to the projectile by having the slow start on a slow twist, and have it continually augmented until it leaves the muzzle of the gun and takes its departure in the open and unconfined air; and that the bullet has imparted to it the same amount of rotary velocity when coming out on a 36-inch gain as it would from a continuous twist when it made one complete revolution in thirty-six inches. And I must confess that this reason would look good to a man on a seat in the first row in the orchestra or to the old man up a tree. That the bullet that would start on so rapid a turn would be more likely to upset than one started on a more slow rotation no one will doubt, providing that the American fleet or round-end picket bullet was used, that was so much in demand twenty-five years ago in this country, a diagram of which I will insert as the best for the increasing twist, which was always used with a linen patch cut by a die of suitable size. It will be seen from the above diagram that the bearing on the bullet extends but a little way from the butt toward the point, just enough to steady it, as it will readily be seen the less bearing on either an increased spiral, or plain, the less must be the friction on the bullet when passing along the plane of the grooves.



Now, it will be seen the increased twist is not used in Europe for the very good reason that they use the long projectile, and always the plain or uniform twist. A wood-cut of the English bullet will readily convince the expert of the rifle that the cylindro-conoid, which is now chiefly used in this country, would not work well in the increasing twist.

This diagram is supposed to be an inch and a quarter long and 44 caliber, and such a shot in my opinion will not only increase the friction, but, as the bearing is the entire length of the cylindro part of the bullet, and as the form of the grooves actually changes, inch by inch, from the breech to the muzzle, a constant and increasing friction must be admissible, and more liable to shift its position, to strip and to break. Therefore, I consider that a continuous twist is preferable for a bullet which the above diagram represents.



It appears strange that no one (to my knowledge) has observed the impossibility of a perfect coincidence existing between the sides of a groove cut on the principle of the increasing spiral or gaining twist. If the sides be made equidistant, the form of the groove will change, and this change will be still greater if the sides be not equidistant, as they cannot then be parallel to each other. It will be no difficult thing for anyone to comprehend the fact that grooves cut with a regular spiral may be described as straight lines applied to a cylinder, while those which form an increasing twist are represented arcs of circles or other curves. For instance, if two concentric arcs of a circle be described on the interior surface of a cylinder, the distances between points taken at right angles to the axis of the cylinder will vary. Again, let us take the groovee of the increasing spiral, the sides of which are formed by arcs parallel one to the other, so that the radius of one will be less than that of the other. Hence, it will be observed that the groovee on the principle of the increasing spiral cannot be true, for it is not only by making the sides of the groovee parallel to each other in the direction of their common center that the grooves can maintain the same width throughout, in which case they are not equidistant in a direction at right angles with the bore, and if the sides are equidistant in a direction at right angles with the bore, they cannot be parallel, but continually approach each other.

And, in the former, the grooves widen, and in the latter they contract toward the muzzle of the gun. Therefore, by a parity of reasoning the intended longitudinal increase of the turn of the grooves is not the only alteration that takes place. I have no doubt but that the increase spiral works best with the bullet that has a short bearing, and when the bore is freed, or, in the vernacular of shotgun-men, choke-bored; and that the cylindro-conoid works best in the cylinder-bore and of uniform twist.

I cannot close this article without a short notice of my friend who resides in Red Bluff, and who is the champion advocate of the small bore rifle, with large charges of powder. It will be remembered that I referred to the dispargement of 90 grains of powder in a hunting gun of 40 caliber, in my two last communications. And I am glad to say to the readers of the BREEDER AND SPORTSMAN that my remarks on the subject have brought forth a reply from the champion of 40-90 and I only wish it had been sent to the BREEDER AND SPORTSMAN so the friends of this "mighty nimrod" could see how ably and philosophically he has defend his pet position.

Believing that I would not betray any confidence, should I quote from his very able letter, written at Red Bluff, April 8, I will take the liberty to quote, ad literatim, the powerful argument put forth to pull down and destroy the theory and deductions as advocated by myself, under the head of "On the Manner in Which a Difference in the Caliber Influences the Turn of the Rifle." He writes: "I read the paper you sent me, and read your article; you had better come up here and try your way on a grizzly bear with your light charge of powder, and large bullet then you will get cut up unless you are so cowardly as to run away without shooting." Now, Mr. Editor, if this is not Pickwickian style I am lost; it is enough to make the dead bones of Dickens turn over in his metallic coffin, and try to say that the whole cast, as made in his Pickwick papers, is false. Mr. Red Bluff, you are wrong; I never advocated small charges of powder and large bullets; I argued that there must be a theory in ratio for quantity of powder for quantity of lead and that a system of carefully recorded experiments and deductions in testing the actual penetration of leaden bullets, is the only way to solve this almost metaphysical problem, the amount of means necessary to impart to the projectile its greatest initial and terminal velocities. You misunderstood the meaning of my article, and if you will take the trouble to run your eagle eye over the two last communications, you must impress the frozen fact upon your fertile brain that the short of those articles are simply this and nothing more.

Take a rifle of 40-caliber weight of bullet (cylndor-conoid), 330 grains, with one-fifth of that amount of Hazard's Sea shooting powder, making 66 grains to the charge. To test the initial velocity of this bullet, hang up by a pendulum a bullseye cut from sheet iron, one-third of an inch thick, and eight inches in diameter, and fire for its center twenty feet, and your result will be merely an indentation, but no perforation of the suspended iron plate.

Now let us take a rifle of 45 caliber with the same turn of grooves and same shaped projectile, weighing 530 grains, one-fifth of that amount for a charge of Hazard's Sea shooting powder, 105 grains, and fire it under the same circumstances that the 40 caliber was fired and the result will be a clean punched hole in the iron plate, with the indentation upon another plate of the same size and thickness hanging one foot from the first plate. But my old friend K, from the grizzly bear region of Red Bluff will say, the test isn't fair. He will come thundering back on me in the difference of the two charges of powder, that the large bullet has 40 grains of powder more than the small caliber has, and as a matter of course you will have greater penetration. Yes, I will say, my dear fellow, you are right so far, but a little further you are wrong again.

In accordance with the laws of dynamics, it requires well regulated forces to set in motion substances of the same density, but of different sizes, and to be friendly and liberal with this notorious bear slayer, I will acknowledge, for the benefit of his position, that he may take the full 106 grains of powder, the same as was used in the 45 caliber, and still his little 40 caliber bullet would not make daylight shine through the iron plate, as he would naturally suppose it would. And to elucidate this problem a little further, and to sweep away any remaining cobwebs suspended from the arch of this man's brow, so that no hair may be left dangling to obscure his vision while investigating the laws of gunnery, I will say that we will take the 66 grains the same as was used in the 40 caliber and charge the 45 caliber and fire at the suspended iron plate and we will punch a clean hole through it. I think I hear my friend say this is too much at one dose, but nevertheless it is true, which both theory and practice will substantiate. Why, Mr. Editor, this mighty Nimrod of the far North has talked this small bore and large charges of powder, until he actually believes it himself, and a thousand of his disciples have become his ardent followers. And strange to say, that the king of the forest of the Golden State, the nomadic grizzly, has become imbued with the same feeling, and dislikes to meet one of these 40-90 fellows. This I feel quite sure is so, as I once heard this leader of the 40-90 theory relate one of his hair-breadth escapes, when in the pursuit of an uncommonly large old grizzly. I will relate it verbatim as he told it to me, as I took it down in short hand unbeknown to him at the time it was related.

It was in the month of September, 1867. He took his double-barrel muzzle-loading 40-90, and started with his mule and his old dog Rover for the Yola-Bola mountains, about sixty miles west from Red Bluff. The second day out he struck an immense bear track; just the print of the heel of the animal made an impression on the sand as large as a common beer barrel; he told old Rove to take the track and go slow, and he would follow. The dog looked at the master and the master at the dog, the one to see that the other was in earnest. The hair on the dog's back bristled up like a field of bean-poles, and with a fierce growl like that of the Bengal tiger the dog put his nose on the track, the master with his 40-90 on his arm, with both barrels cocked, and, after persistant traveling for thirteen days and sixteen nights, on the morning of the thirteenth day, they came in sight of the huge old moneter; and a big fellow he was, too, you bet.

"Well," says I, holding my breath in deep anxiety, "what, pray what did yon do ?"

"What did I do ? I just says: 'Rover, he's our meat,' and Rover licked his chops, and well he might, for neither of us had eaten anything for the thirteen days and sixteen nights."

"Poor fellow," *sotto voce* says I, "and pray what did you do then ?"

"What did I do. I took a ball of assafetida out of my pocket, and my hunting sling, and like David in the great naval battle of Goliath, I loaded my sling with this gummy ball, and with all the vigor and force of my manhood I gave the gummy ball a sling of high elevation, intending to drop it directly at Mr. Grizzly's nose, but the wind forced the ball a little to the right and dropped it just at the fellow's stern."

"For what," I asked, "did you throw?"

"I know," says my friend, "I see you don't understand the habits of the grizzly."

"True, sir; I am profoundly ignorant in this line," says I.

"I'll tell yon. The big grizzlies are very fond of this gummy, stinking assafeteda, and if you can get a ball near their cussed noses before they know it, they smell it, and it sorter magnetizes these mountain monsters, and then a hold, fearless hunter can walk right up to them and take them in camp, you know. But you see I made the mistake, and dropped (and by the way it was the first mistake of the kind I ever made) this gummy ball at the wrong end of this old chap, and he turned round, quicker than you could say dog with your mouth open, to see what made the noise so close to him, and while turning his nose was up in the air taking scent, for these old pets of mine go a great deal on their noses, you know, and by Crimus, he got my scent, and he everlastingly came for old Rove and me, you bet."

"Well, well," says I.

"Just keep cool," says he, "and I'll give it all to you; I wasn't a bit scared, I stood just as still as a Bohemian soldier on a rainy night on guard."

"Is it possible," says I, "and——"

"You bet," says he, "I wasn't as scared as you are now hearing me relate the occurrance."

"Did the bear go for you?"

"Just as straight as I could sling a stone, and with his dam mouth wide open; why, sir, his mouth looked for all the world like an old sachel wide open, filled full of old red rags, and his teeth looked like spikes as long as your arm and his mouth opening and shutting as often as every tick of the watch."

"And you stood still?" says I.

"Just as still as death, and old Rover a little behind me, and that position Rover and I occupied until he got within twenty feet of us."

"Great heavens!" says I.

"That's nothing," says he; "I knew what I was about, you bet."

"Tell me, tell me," says I.

"Keep cool, Doctor; I'll give it all to you," says he. "When he got within twenty feet of me, I pulled my gun off my shoulder."

"And you fired quick," says I, "and laid him dead at your feet."

"Not much," says he; "I only gave that gun two flourishes through the air, when he raised on his hind feet and started to walk toward me, and I made another rapid move of the gun when he stopped and we looked each other in the face for fully six hours, had each other by the eye, you know— "

"What," says I, "for six hours?"

"I knew," saye he, "that it was a matter of endurance, and just as the sun was going down, he began to groan and acted as though he was in awful pain, and his angry looks became mild and simple like that of lambs, and I then knew I had him because I understand their habits so well. Then he began to articulate (for those big bears talk, you know), and, says the bear, 'I feel kinder faint, what is that you hold in your hands that makes me feel so mighty queer?' says old Bruin. 'Quicker than lightning, says I: '40-90.' 'Then I'm a goner,' says the bear. 'Double barrel at that,' says I. 'I'm your meat,' says the bear; 'take me in camp.'"

Everything, Mr. Editor, in the northern part of the State is nervous when you talk of 40 caliber and 90 grains. It is more terrible to the natives than an eastern blizzard and tornado, and more fearful than the earthquake, and more deadly than the sirocco winds or the poisonous aroma from the upas tree.

Crook should have his Indian troopers armed with 40-90's, and then call for a flag of truce, and convince the bloody savages what death-dealing weapons were in store for them, and every squaw's son would surrender and forever after become good Injuns.

The Age of Sheep.

The books on sheep have seriously misled flockmasters on this subject. Almost any sheep-owner will tell you that after the first year the sheep gets a pair of broad teeth yearly, and if you show him that his own three-year-olds have four pairs of broad teeth he can only claim that they are exceptions, and protest that they do not exceed three years of age. Now, these cases are no exception, for all well-bred sheep have a full month of front teeth at three years old. Some unimproved flocks may still be found in which the mouth is not full until near four years old, but fortunately these are now the exceptions, and should not be made a standard, as they so constantly are. In Cotswolds, Leicesters, Lincolns, Southdowns, Oxford-downs, Hampshiredowns, and even the advanced Merinos, and in the grades of all these, dentition is completed from half a year to a year earlier. The milk or lamb teeth are easily distinguished from the permanent or broad teeth by their smaller size, and by the thickness of the jaw-bone around their fangs where the permanent teeth are still inclosed. As the lamb approaches a year old, the broad exposed part of the tooth becomes worn away, and narrow fangs projecting above the gums stand apart from each other, leaving wide intervals. This is even more marked after the first pair of permanent teeth have come up, overlapping each other at their edges, and from this time onward the number of small teeth and of broad, permanent teeth, can usually be made out with ease. Another distinguishing feature is the yellow or dark coloration of the fangs of the milk teeth, while the exposed portions of the permanent teeth are white, clear and pearly. The successive pairs of permanent teeth make their appearance through the gums in advanced breeds at about the following dates: The first pair at one year, the second pair at one and a half, the third pair at two years and three months, the fourth pair and last pair at three years. It will be observed that between the appearance of the first two pairs there is an interval of six months, while after this each pair comes up nine months after its predecessors. For backward grades and the unimproved breeds the eruption is about six months later for each pair of teeth, but even with them the month is full at three years and six months.

At the Woodard & Brassfield combination sale of trotting stock held at Lexington, Kentucky, April 24, 193 head were disposed of for $82,995, an average of $430 per head. The report says that Bndd Doble's stallion, Monroe Chief, was knocked down to Hugh White, of Benson, Arizona, for $10,000.

Sally Russell Unquestionably by Boston.

Major Benjamin Luckett was for many years proprietor of the Mansion house in Frankfort, Ky., and his neighbors regarded him as a gentleman of honor. Those who knew him best had faith in him. His word passed unquestioned. He owned Miss Shepherd, by Stockholder, and in 1833 he bred her to Thornton's Rattler, and thus got the bay mare Maria Russell. In volume IX of the *American Turf Register* there is a report of the Elkhorn, Kentucky, races, run in November, 1837, and from it we take the following summary:

Fourth day—Sweepstakes for three-year-olds that have never been in a race: subscriptions $50; mile heats.
Benj. Luckett's b f Maria Russell, by Rattler—by Stockholder.....1 1
Lewis Sanders Jr.'s (Burbridge & Harper's) ch c by Kosciusko—by Moses.....2 2
S. T. Dranes' b c by Woodpecker.....3 dis
Time—1:57, 1:58.

Capt. J. W. Russell was another prominent resident of Franklin county, Ky. He and Major Luckett were warm friends, and they had business transactions with each other. They owned horses in common, but in racing and breeding ventures only one name was sometimes used for the joint ownership. This practice was as common thirty or forty years ago as it is to-day. Capt. Russell married Miss Julian, and she is now a widow. He was a State Senator and a man of honor and veracity. He was a careful breeder of thoroughbreds, and among the mares owned by him was Mary Churchill, by Barefoot, out of Pocahontas, by Sir Archy. He sold to R. A. Alexander the chestnut mare Sally Russell, and he certified at the time that she was foaled in 1850, and was by Boston, out of Maria Russell, by Thornton's Rattler. Mr. Alexander was very well posted as to pedigrees, and he was a close investigator. He was not easily imposed upon. In the Woodburn catalogue of 1857 Sally Russell appeared as the daughter of Boston, and her age was given as seven. Major Benj. Luckett, Capt. Russell and others who kept sharp lookout for pedigrees were then alive, and they indorsed the published statement as true. Major Luckett died Jan. 17, 1868. Sally Russell's first foal was dropped at Woodburn in 1859. It was a bay colt by imported Scythian. Her second foal came in 1861, and it was a bay filly by imported Scythian. The civil war raged during the early years of these two foals, and we do not know what became of them. The war broke up jockey clubs, and thoroughbreds were pressed into the cavalry service. When S. D. Bruce was compiling the Stud Book, he received from John W. Russell the pedigree of Sally Russell as it has always been recorded. Capt. J. A. Holton, who bred Nantura, the dam of Longfellow, indorsed the statement of Capt. Russell, and Col. E. M. Blackburn, the father of the present Governor of Kentucky, and of the distinguished Congressman from the Ashland district, also positively stated that Sallly Russell was a daughter of Boston. She was entered as having been bred by Benj. Luckett, for the reason that Maria Russell ran in that gentleman's name in 1837. No man is perfect, and it is easy to make a slip of the pen in recording thousands of pedigrees. Maria Russell passed from Major Luckett's hands into the possession or control of Capt. John W. Russell.

Boston, the son of Timoleon, after a brilliant career upon the turf, entered the stud in Virginia, and subsequently found his way to Kentucky. He made the seasons of 1847, 1848 and 1849 at Col. E. M. Blackburn's farm, Equira, in Woodford county, Ky., and died early in 1850. He never stood at any other place in the Blue Grass State. The stud record of Boston was indifferently kept at Equira by a good natured young man of no literary acquirements. He wrote badly, and was economical of his letters in spelling. Uncle Ned, the head of the Blackburn family, was a man of great memory, and it was not necessary for him to refer to a ledger to verify a pedigree. But upon the faulty-kept book of Boston in the handwritting of young Blackburn appears the following:

"Capt. John Rusel, one-eyed mare, by the leap, May 26, 1849."

This record is confirmatory of the statements made to R. A. Alexander, to the author of the American Stud Book and others by such prominent and trustworthy men as Col. E. M. Blackburn, Capt. John Russell, Major Benjamin Luckett, Capt. J. A. Holton and Albert Bacon. The pedigree is too well established to be clouded by the ravings of an unscrupulous blatherskite. Sally Russell was unquestionably a thoroughbred, and she had thoroughbred foals before she was mated with Pilot Jr. and produced Miss Russell, the dam of Maud S. It is just as certain that she was a daughter of Boston as that Rysdyk's Hambletonian was by Abdallah.

The man who made haste to denounce the long-established pedigree of Sally Russell as a "fraud," simply and solely because the name of her breeder, through a slip of the pen, was incorrectly given in the Stud Book, falls into the error of supposing that George E. Blackburn, the son of Col. E. M. Blackburn, was alive in 1849. This gentleman died October 21, 1847. Even those who boast of being cock-sure every time frequently trip. The united and unwavering testimony of those who, when in the flesh, knew all the facts, cannot be set aside by throwing a world of emphasis on one little technicality. The misstatement of Wallace with regard to the brother of Governor Luke Blackburn is one of these technical errors. It does not establish beyond controversy that no book of Boston's services was kept, for such a book was kept, although indifferently, and by a Blackburn. It simply shows the absurdity of weighing a volume of truth in the scales against a misplaced grain of sand or a stray hair.—*Turf, Field and Farm.*

A breeding stallion should be kept in perfect health. No animal can be kept in health without exercise. Plenty of sound, good food should be given, equal to ten to sixteen quarts of oats per day, depending upon his size and exercise, and about what hay he will eat up clean. He should have some work twice a day, morning and evening, not so much as to make him dull, for he should always be spirited and lively. Driving him to the buggy, exercising him on horseback and doing any little jobs of light work will make him all the stronger; once or twice a week, before a light wagon, he can be allowed to trot at full speed, if he feels like it, a quarter or a half mile, and feel all the better for it, and be more likely to impart speed to his progeny. If he has a lot of half an acre or less, with a high plank fence around it, so he can be turned in and cannot get out, it will be beneficial to him, for then he can get the pure air and warm sunshine, and roll and plunge and play as he pleases. There is no greater evil in breeding horses than to keep a stallion in his stall without exercise. He is generally fed high and gets fat, his muscular organization gets no exercise or development, and his progeny will be far inferior to what it would have been had he had proper exercise.

The Central District Agricultural Society proposes to hold a fair at Marysville this fall, commencing September 4 and continuing five days.

Sale of Belle Meade Yearlings.

The annual sale of Gen. Harding's yearlings at Belle Meade on thr 28th ult. brought together the largest attendance of buyers ever witnessed at that farm. The Dwyer brothers secured the favorites. The prices realized were very satisfactory, the lot, numbering forty-two, selling for $27,430. During the sale a violent thunder and lightning storm, accompanied by a deluging rain, lasting half an hour, burst over the place, putting a stop to the sale for that length of time. The following is a list of the sales, with the names of the purchasers and the prices paid:

Emerson, b c by Enquirer, dam Jessamine, by Brown Dick; Col. Bruce, New York	$775
Thistle, ch c by Great Tom, dam Ivy Leaf, by Australian; Mr. P. G. Speth, Louisville, Ky	750
Bolter, ch c by Bramble, dam Quartette, by Jack Malone; Messrs. Dwyer Brothers, New York	575
Tallyman, ch c by Great Tom, dam Benicia, by Jack Malone; Mr. Louis Dunneman, Charleston, S. C	500
Electric Light, br c by Enquirer, dam Vesper Light, by Childe Harold; Messrs. Dwyer Brothers	3,500
Tantrum, ch c by Great Tom, dam Vanilla, by Jack Malone; Capt. Ed. Israel, New Orleans	325
Turbine, b c by Great Tom, dam Woodbine, by Lexington; Mr. G. L. Lorillard, New York	500
Escort, ch c by Enquirer, dam Planchette, by Brown Dick; Mr. P. G. Speth	750
Tecumseh, ch c by Great Tom, dam Fanny Barrow, by Albion; Mr. W. B. Lamb, Fayetteville, Tenn	225
Emmet, br c by Enquirer, dam Mariposa, by Jack Malone; Messrs. Dwyer Brothers	3,000
Tyrant, ch c by Great Tom, dam Mozelle, by Jack Malone; Colonel Bruce	300
Editor, gr c by Enquirer, dam Alice Murphy, by Bonnie Scotland; Mr. R. C. Pate, St. Louis	400
Tasso, ch c by Great Tom, dam Edna B, by Breathitt; Mr. R. C. Pate	700
Expert, ch c by Enquirer, dam Lady Lindora, by Australian; Mr. P. G. Speth	1,450
Fellowship, ch c by Fellowcraft, dam Blondina, by Bonnie Scotland; Mr. S. D. Bruce	550
Toronto, ch c by Great Tom, dam Mohur, by Gilroy; Mr. G. M. Neely, Franklin, Tenn	375
Echelon, br c by Enquirer, dam Bonnie Park, by Bonnie Scotland; Mr. P. G. Speth	825
Testator, b c by Great Tom, dam Mollie Saffle, by Lexington; Mr. R. C. Pate	450
Earnest, bh c by Enquirer, dam Jaconet, by Jack Malone; Mr. L. Van Kirkman, Nashville	550
Turnbull, b c by Great Tom, dam Fanny Mattingly, by Hunter's Lexington; Mr. R. C. Pate	200
Emissary, b c by Enquirer, dam Clara L, by Bonnie Scotland; Mr. J. G. Nelson, New York	450
Executor, b c by Enquirer, dam Brunette, by Bonnie Scotland; Messrs. Dwyer Brothers	1,400
Tarlton, ch c by Great Tom, dam Vocalist, by Vandal; Mr. G. W. Curtis, Mount Vernon, Ind	250
Erebus, blk c by Enquirer, dam Saxony, by Sexon; Mr. J. J. Greener, Nasbville	600
Esmeralda, ch f by Enquirer, dam Bergamot, by Bonnie Scotland; Mr. P. G. Speth	800
Eugenie, ch f by Enquirer, dam Capitola, by Albion; Mr. J. J. Greener	950
Trousseau, b f by Great Tom, dam Variella, by Vandal; Mr. Louis Dunneman, Charleston, S. C	425
Entreaty, br f by Enquirer, dam Silver Maid, by Bonnie Scotland; Mr. J. L. Harris, New Orleans	275
Termagant, b f by Great Tom, dam Tallulah, by Planet; Mr. J. L. Harris	275
Turmeric, ch f by Great Tom, dam Arnica, by Sovereign; Mr. Cin. Harper, Fayetteville, Tenn	210
Evelin, b f by Enquirer, dam Martica, by Daniel Boone; Mr. C. H. Douglas, Franklin, Tenn	260
Enquiry, b f by Enquirer, dam Sue Walton, by Jack Malone; Mr. P. H. Speth	1,025
Theresa, b f by Great Tom, dam Variety, by John Morgan; Mr. R. C. Pate	300
Eudora, ch f by Enquirer, dam Glendora, by imported Glengarry; Mr. J. L. Harris	325
Taoitba, b f by Great Tom, dam Valerian, by Vandal; Mr. R. C. Pate	550
Exultation, b f by Enquirer, dam Tribulation, by Jeff Davis; Mr. George L. Lorillard, New York	475
Talla Bena, ch f by Great Tom, dam Bonetta, by Bonnie Scotland; Mr. E. L. Israel, New Orleans	500
Essay, ch f by Enquirer, dam Bonnie Belle, by Bonnie Scotland; Mr. G. W. Curtis	300
Euphony, b f by Enquirer, dam Duett, by Higblander; Mr. G. W. Curtis	400
Talavera, ch f by Great Tom, dam Liza Davis, by Whirlwind; Mr. W. K. Den, Des Moines, Iowa	300
Elixir, ch f by Enquirer, dam Euchre, by Brown Dick; Mr. R. C. Pate	250
Exile, by Enquirer, dam Bonnie Meade, by Bonnie Scotland; Mr. P. J. Speth	320
Total	$27,430

Horse Slang.

The names that English horse dealers and jockeys apply to different specimens of horseflesh are curious and amusing. Horse slang there is clearly as common as in this country, and the vocabulary is yet more extended. Here are a few instances that we take from a London paper: When a dealer dashes into a fair, or a repository, or any other place of sale, he not only selects certain animals with a view to purchase, but, in his own mind, he also decides the class of work for which each horse is especially adapted. Regardless alike of education or previous occupation, he will nominate one horse as a hunter, another as a charger, or, as he calls him, "a so'dier," a third as a carriage horse, a fourth as a park hack, a fifth as a weight-carrying cob, a sixth as a useful ride and drive horse, a seventh as a "shoufle" or Hansom cab-horse, an eighth is a "growler," or four-wheel cabber, a ninth is a "half-busser," meaning that his place is to draw half an omnibus, while the tenth is a "flat-catcher," which means a horse that catches the inexperienced eye, but is an utter fraud and failure when put to hard labor; experts deeply steeped in horse lore make further subdivision and classification and keep in stock a whole set of names and technicalities, which enable them to describe to each other details that would not be at all understood by the rest of the world. Thus, a slow horse of sober and quiet disposition is called "an old man's horse," while one that is gay in manner, quick in movement, and full of nervous energy, is called "a young man's horse." Then a horse of somewhat showy but not so serviceable style is called "a peacock;" a dandy parading walker is "a dancing master;" a horse with straight neck that causes him to poke out his nose, and consequently to turn his eyes upward, is "a star gazer;" a tall, lanky, ill-shaped nag is called "a camel" or "giraffe," while a true-built, symmetrical horse is spoken of as "a gentleman," and so on ad infinitum.

The Iowa State Agricultural Society, appreciating the value of the Cleveland bay as a source of wealth to the horse interests of the State, has made for them a special class at the State fair, with prizes, to encourage their production. There are now some sixty imported Cleveland stallions in the State, and already the young half-bloods have attracted Eastern buyers and found a lively market at high prices.

The agricultural editor of the *Vermont Watchman* says: "We are done with poultry houses. For three winters we have wintered our fowls under a shed opening to the south, With a good pile of ashes to wallow in and a little meat scrap in their food every day they keep healthy, and have averaged an egg a day to every three hens all the past winter."

Breeding the Farmer's Horse.

The question of relative size of sire and dam has been extensively discussed in this connection. It is true that nearly all writers upon the subject have laid down the rule that in coupling the male should be smaller than the female; but it is also true that very many persons write dogmatically upon subjects that they know but little about; and it is further true that writers upon heredity, for years and years past, have done little more than to repeat each other, accepting what has been said by others as true, without question, not knowing or caring to know anything about the facts in the case. We imbibed this doctrine, that the male should be smaller than the female, from our early studies upon the subject, and began writing from the same standpoint; but very early in our career as a writer an old breeder, whom we knew as a very careful and close observer, called our attention to it, and said that he was fully convinced that the teaching of the books upon this subject was all wrong, and that, while he did not advocate great disparity in the size of parents, he was satisfied that when there was a difference it should be the reverse of what the books taught—that the sire should, as a rule, be the larger of the two. It was a startling proposition to us, but it set us to thinking and watching the subject closely; and now, looking back over more than a quarter of a century of experience, we say emphatically that nature's plan, as exemplified in all mammalia, is that the male parent shall be the larger of the two. In all animals, from the horse down to the pig, wild as well as tame, the male, as a rule, is larger than the female of the same breed. No observant man can have failed to notice this. What pure breed or race of animals, wild or tame, can be named as an exception to this rule? And is not this also true of the human race? In fact, by the time a man has supplemented his early reading by a score of years of close observation, he is quite likely to lose much of the veneration with which, in his earlier years, he was wont to regard the teachings of the books.

We would not recommend, neither does it follow as a legitimate deduction from this general law, that great extremes of size should be coupled. In fact, nature has herself interposed many obstacles to prevent such a course of breeding.

There is not, as has often been alleged, any increased danger in parturition from the use of sires larger than the dams. It is the dam that determines the size and growth of the fœtus, and not the sire. Wrong presentations, faulty construction of some parts of the organs of generation or of the pelvic bones of the female, an emaciated or too plethoric condition of the dam at the time of parturition, an unnatural or deformed fœtus, are the usual causes of difficult parturition, and these conditions are brought about independent of the relative size of sire and dam.

It goes for nothing to say that improvement in any breed has resulted from the use of males of a smaller breed upon females of a larger. If one desires to bring about improvement in any direction, he must select with a view to that quality, independent of other considerations. Were we desirous of improving the butter-producing quality of the Holstein cow we should use a Jersey bull, notwithstanding the male might be smaller than the female. We should couple large, coarse-wooled ewes with a Merino ram if we desire to increase the density of the fleece; and we would breed large draft-mares to thoroughbred or trotting sires if we desired to procure fine style, better action and greater power of endurance. But all of this is independent of, and does not conflict with, the general law of relative size, and does not disprove our proposition that it is nature's plan that the male should be the larger of the two parents.

In regard to comparative merits of large and small horses, and the profit in breeding the same, it is a chameleon sort of case—it depends on the standpoint from which you view it. The man who says it don't pay to breed mares to the large imported draft horses, and that good, serviceable horses cannot be raised from such a course of breeding, only shows his own lack of familiarity with the subject. It is an unmistakable, unimpeachable fact that the large horses that are to be seen harnessed to the trucks, drays and heavy express wagons of Chicago, St. Louis, Cleveland, Cincinnati, Pittsburg, Buffalo, Philadelphia, New York and other large cities, are almost universally produced by such a course of breeding, and that such horses will command in the general market at least twice as much as horses of moderate size, unless they possess exceptionally good qualities as roadsters, saddle or carriage horses, is a fact that the experience of every horse dealer will confirm. Not all imported horses are good sires, and certainly some notorious failures might be pointed out to confirm the views of those who oppose their use; but these exceptional cases should not be permitted to overbalance the overwhelming majority of instances in which those who have patronized these imported sires have found it a highly profitable course of breeding.

On the other hand, the fact that horses so bred are in active demand at remunerative prices for use on the heavy trucks and drays of our large cities does not prove that they are the best of all horses for the average farmer's own use. That occasionally horses possessing very fine action are so bred does not disprove the well-established fact that a large majority of them are not similarly endowed. The great fact remains unimpeached and undisputable, that all breeds and all races of horses, large and small, are improved in courage, endurance and stamina by an infusion of thorough blood; and that farmers who want to raise horses for their own use will usually secure better results by patronizing large, strong thoroughbred or highly bred trotting sires, than by a further infusion of the blood of the coarse, heavy draft horse.—*Breeder's Gazette.*

Five years ago Mr. F. M. Slaughter, of the Rincon, called on Mr. E. W. Noyes, the popular auctioneer, and asked him to name a filly by Echo out of Belle Mason. Noyes, who had the sale of books, reached to his shelf for a copy of Moore and read to Mr. Slaughter from Moore's "Paradise and the Peri." Mr. Slaughter said: "That settles it; my filly's name is Peri." The mare Peri was afterwards purchased from Mr. S. by C. A. Durfee and bred to Mr. L. J. Rose's Sultan, out of Sultana by The Moor. On May 1, she dropped a colt by Sultan, and Mr. Durfee asked Mr. Noyes, who had named Peri, to give his colt a name, and insisted that that name should be from Lalla Rookh, adding that it should be appropos. Instantaneously Noyes exclaimed: "Call him Casbmero." Our friend Noyes was also called upon, during the past week, to give a title to a yearling Richmond belonging to Mr. George A. Vignolo. With his customary felicity, he recurred to the last scene in Richard III, in which Crook Back exclaims: "What Ho! Another Richmond," and suggested that he might be called either "What Ho" or "Another Richmond." The owner selected What Ho for his flyer—truly a taking name on the turf.—*Los Angeles Herald.*

The Sixth (Los Angeles) District Agricultural Society will give a spring meeting of three days this year at San Pedro on July 2d, 3d and 4th.

TURF AND TRACK.

Last Day of the Blood Horse Spring Meeting.

The race meeting of the Pacific Coast Blood Horse Association, which came to a close Wednesday last, was one of the most successfnl ever held under the auspices of that society. For that matter it may he safely rated with those of auy club, and in all pertaining to the actnal racing it has been first-class. According to the time test the horses here rank far in advance of those which have rnn East this spring, and in two of the races the time was faster than ever has heeu made with the same weights. The mile of Joe Howell in 1:42 with 119 pounds has never heen equaled, the nearest heing that made hy Checkmate at Louisville last May, when, with 118 pounds, he ran in the same notch. The three-quarter-mile heats between Howell and Douglas have never heen eqnaled when the estimate is hased on the weight carried. The hest ou record is that of Howell made on the Bay District course last November, when, with 115 pounds, he rau the second and third heats in 1:14½ and 1:15. In the race of last week, with 117 pounds up, he won the first in 1:14½, and Douglas, carrying 120 pounds, won second and third in 1:15, 1:15¼. Another notable performauce was the 1¼ miles which Duke of Monday ran in 2:09, and, though he carried something less than the regular allowance, is not far hehiud the hest. It was a wise move of the association iu changiug the weights to the schedule which governs at Jerome Park, Coney Island, Monmouth Park and Saratoga, so that what our horses accomplished is accorded due credit. The first race on the programme was a two-year-old race, with the same conditions as the Gano Stake, the forfeits of which were "galloped over" for on Saturday and won hy Callie Smart. Mr. Winters put the amount up again, and the association added the same amonnt of money. There were five starters, each of which deposited $50, so that with ahout $1,000 in etakes and forfeits aud $250, there was a nice purse to contend for. The starters were Hirondelle, an unuamed filly hy Grinstead from a sister to Clara D, Lizzie Dunhar, Mariposa and Callie Smart. The order of positions were as the names are written, Mariposa and Hirondelle carrying the colors of Ranch del Paso, the Grinstead the gray aud Maltese cross of Santa Anita, Lizzie Dunbar those of W. L. Pritchard, and Callie Smart the orange and green of Theodore Winters. The latter was the favorite in the pools most of the time, though Lizzie Dunhar pressed her closely, and the others were hnnched in "the field." Through a hlunder of the trainer of Lizzie ehe was shipped to Sacramento on Sunday and returned Tuesday, which conld hardly be the right preparatiou for a race, and the way she ran gave rise to the impression that a hetter course of treatment would have changed the resnlt. The track was rather heavy, though in hetter order than conld he expected from the heavy raius, and there was a fair attendance.

The starting was delayed hy the fractiousness of some of the colts, thongh the greatest trouble came from the official who held the flag permitting some who had the horses in charge to order the jockeys what they should do, and setting at nanght the orders of the starter. Had he used the power which the rules give him, this hehavior would have heen followed hy pnnishment, and the annoyance of waiting for three-qnarters of an hour avoided. When the hell rang, much to the relief of the spectators the Grinstead had the advantage of being in front and also under the hest motion, so that by the time a furlong was run she was two lengths in the lead, and the others closely bnnched. At the half-mile pole there was little difference; hut in rounding the turn there was a change; Callie Smart drew up closer, aud Lizzie Dunbar took her place, eo that when they came into the stretch they were cloee on the Grinstead. Callie Smart soon after took the lead, and from there, though Lizzie made a good struggle, the race was never in douht, Callie winning with something to spare in 1:18. Behind Lizzie, and with her head on the hip of the Bazaar, was Mariposa, Santa Anita fourth and Hirondelle last.

The only starters in the race for three-year-olds were Gano and Laura, and the superiority of the former wae eo unanimously conceded that no one expected any contest. Thie estimate was sustained, as Gano won in a "hig gallop," doing the mile and three-quarters in 3:20. The next race was differently regarded, and speculation was as brisk as could be. It was a "coneolation purse" for heaten horses, with allowances as follows: One defeat eutitled a deduction of five ponnds, and two ten ponnds. The startere were Augusta E, 92 pounde; Atlanta, 103 pounds; Belehaw, 109 pounds, aud Inauguration, 113 pounds. At the first eales the rates were: Augueta E $20, Belshaw $20, the field $20; hut as the bidders hecame warmed to the work Augusta E hrought $40, and the field $36. A great deal of money went into the box, and in the interval hetween the other race there was an eager desire to invest. The race was heats of a mile, and the placing gave Belshaw the pole, Atalanta second, Inauguration third and the favorite outside. Augusta E carried the "gold and roee" presented hy Alma Stuart Stanley, and very bright they glittered on the back of the handsome filly. The etart was fair, Augusta E and Atalanta making the running as eoon as the flag fell. There wae not mnch difference hetween them, ae the quarter pole wae paesed in twenty-eix eeconde, though at the half in fifty-two seconds the favorite was two lengths in the lead, Belshaw and Atalanta conpled. Coming round the turn on the north side Augusta increaeed her lead and Atalanta left Belshaw. The race from the three-qnarter home did not change the complexion of affairs, Augueta E winning in the very good time, for the state of the track, of 1:45½. Belehaw was third. After the heat the pooling was $50 on Augueta E, $10 on the field and $5 on Belshaw. The takere of the odds relied on Inauguration, as it was evidenced he had not run for the first heat, and when the flag fell for the the start for the second, his rider commenced driving him with whip aud spur. There was very nearly a collision between him and Augusta E as he took the track from her ou the turn, and still under strong persuaeion he led at the quarter and half. The gold and rose emerged from the jumhle on the further semi-circle, and, galloping as gay as could be, brought the colors, the first time of wearing, under tho wire a winner in 1:46. Atalanta was eecond, Belshaw third and Inauguration last, the "three moneye" being awarded in tho same order. This wae called the Pernvian Bitters Purse, the proprietors of which donated $250.

The concluding race wae a hurdle race, heats of a mile, hetween Hattie B and Mollie H. In the previous contests Hattie B had exhibited a greater epeed and aleo a greater quickness in making the jumps, so that she was the favorite at $20 to $7.

Both are fine jumpers, and the race showed that they had speed as well, the first heat being won by Hattie B in 1:57, the eccond in 1:55½.

Gano Stake, for two-year-olds; dash of three-quarters of a mile; $50 each, $25 forfeit, $250 added, second to save stake. When any California two-year-old heats the time of Gano, 1:15 for three-quarters of a mile, the stake to he named after the colt which heats it.
Theo. Winters' ch f Callie Smart, hy Norfolk—Mattie A... (Duffy) 1
W. L. Pritchard's ch f Lizzie Dunhar, hy Bazaar—Tihhie Dnnbar........ (Howson) 2
J. B. Haggin's ch f Mariposa, hy imported Glenelg—Susie Linwood........(Thompson) 3
E. J. Baldwin's ch f hy Grinstead—sister to Clara D...... (Appleby) 0
J. B. Haggin's h f Hirondelle, hy Monarchist—Heliotrope (Kelly) 0
Time—1:18.

Spirit of the Times Stake; for three-year-olds; dash of one and three-quarters miles; $100 each, $25 forfeit, $300 added, $160 to second, third to save stake.
E. J. Baldwin's h c Gano, by Grinstead—Santa Anita..........(Garcia) 1
J. B. Chase's h f Laura, hy Shannon—Folly.................. (Kelly) 2
Time—3:20.

Peruvian Bitters Purse; a consolation purse of $250, donated by Messrs. Wilmerding & Co., of which first horse receives $176, second $50, third $25. Horses beaten once allowed five pounds, twice ten pounds, three times fifteen pounds; one mile and repeat.
Geo. Howson's h f Augusta E, hy Monday—hy Norfolk, 3 years; 92 pounds........ (Kelly) 1 1
Theo. Winters' s m Atalanta, hy Norfolk—Lady Jane, 4 years, 103 pounds........ (Luke) 2 2
J. & H. C. Judson's h g Belshaw, hy Wildidle—hy Hercules, 6 years, 109 pounds........(Appleby) 3 3
W. Boots' s c Inauguration, hy Wildidle—Miami, 4 years, 113 pounds........ (F. Ross) 4 4
Time—1:45½, 1:46.

Hurdle race; purse $200, of which $50 to second horse; entrance free; mile and repeat over four hurdies.
Theo. Winter's s m Hattie B, hy Norfolk, Maggie Dale, 4 years, 141 pounds........(Thompson) 1 1
Wm. Boots' h m Mollie H, by Wildidle—Mamie Hall, aged, 145 pounds........ (Stinson) 2 2
Time—1:57, 1:55½.

Spring Meeting at Portland.

The following are the entries for the summer meeting at City View Park, Portland, Oregon:

Running, one and one-eighth miles: R. E. Bybee's b f Neyella, 3.
W. A. Baskett's ch h Alhute.
Lee Knott's ch g Jim Renwick.
Jones & Gilmore's h h Forest King.
J. A. Porter's ch m Trade Dollar.
Running, three-eighths mile: W. A. Baskett's Cyclone.
Lee Knott's Jim Renwick.

Lee Knott's b h Milton Medium.
Jos. Bntchel's Florence E.

The Chicago Trotting Meeting.

The entries to the Chicago Trotting Meeting closed on the 1st hut the list has not yet come to hand. The wildest anticipation was more than realized, for in the seventeen races 276 entries were received.

All the events filled except the 2:14 class, which had but two entries, hy John E. Turner and Commodore Kittson; the 2:17 class had five entries—Charles Ford, Monroe Chief, Edwin Thorn, So So and Von Arnim; the 2:19 class had eleven entries, including J. B. Thomas, Romero, William H., Trouhadour, Monroe Chief, Doctor Norman, Alexander, Fanny Witherepoon, and Adele Gould; the 2:21 class had eleven entries, iucludiug Overman, Fred Douglas, Mattie Graham, Buzz Medium, Captain Lewis and Mamie; the five-year-old class had seven entries—Phil Thompson, Ed Geers, Adelaide, Bones, Wildflower, Bronze aud Jay Eye See; the free-for-all pacers had twelve entries, including Lucy, Buffalo Girl, Sorrel Dan, Mattie Hunter, Sleepy Tom, Gem and Little Brown Jug; the 2:20 pacing had fourteen entries, including Ned Forrest, Princess, Jack Rapid, High Jack, Warrior and Billy Scott; the 3-miuute class had 29 eutries; the 2:40 class, 28; the 2:35 class, 19; the 2:30 class, 24; the 2:27 class, 20; the 2:25 class, 12; the 2:23 class, 13; the 2:30 pacing class, 20.

Mr. P. Lorillard's three-year-old colt Massasoit was allowed a "walk-over" for the Camhridge Biennial Stakes at Newmarket on the 26th ult. The course was that kuown as "Across the Flat" (one mile, two furlongs, seventy-three yards). The stake closed with nineteen subscribers, of which Mr. Lorillard made eix. Of the remainder, four paid forfeit, oue was dead and one had heen sent to Buenos Ayres. The race was one with winning penalties aud maiden allowauces, and as Massasoit was entitled to the latter he was probahly considered hetter at the weight than any of the others.

At the city of Mexico ou the 30th ult., four French horses and one American horse, Ten Broeck Secoud, ran a race over the oue-mile course at Peralvillo for the Jockey Club Stakes, $2,500. Pablo Escaudon's Aigle won, with his mare Caradole second. Ten Broeck, who wae untrained, was fourth. This was his first race. The race was the leading event of the sporting season and was witnessed by President Gonzalee aud a large assemhlage. Edward Orrin's Kitty won a buggy race, defeating Thomas Moran's Flora.

Major B. G. Thomas, Dixiana Stock Farm, Lexington, Ky., entered his three stallions, imported King Bau, Lelaps and Fellowcraft, in the Champion Stallion Stakes of $500 for each etallion, that closed April 16. Major Thomas has uot a single yearling hy King Ban, hut he entered this stallion for the benefit of those who have yearlings by his horse. He has one or two hy Lelaps, in whom he has great confidence, and two or three by Fellowcraft.

An adjourned meeting of the Board of Review of the National Trotting Association will he held at the Grand Pacific hotel, Chicago, on Tuesday, May 16.

Trotting Evolution.

Mr. John Lewis, in his lecture on "The Evolutiou of the American Trotting Horse," gives the following history of records:

Date.	Best Record.	Date.	Best Record.
1814	3:00	1865	2:18¼
1824	2:40	1866	2:18
1826	2:34	1867	2:17¼
1830	2:32	1871	2:17
1834	2:31½	1872	2:16¾
1843	2:28	1874	2:14
1844	2:26½	1878	2:13¼
1852	2:26	1879	2:12¾
1853	2:25½	1880	2:10¾
1856	2:24½	1881	2:10¼
1859	2:19¾		

A horse fair with racing accompaniments will he held at San Luis Opispo on the 17th, 18th and 19th instants.

Golden Gate Fair.

The regular annual meeting of the directors of the Golden Gate Fair Association was held on Thursday, May 3, at the office of the presidant, A. C. Dietz, No. 9 Front street, San Francisco. By a nnanimons vote A. C. Dietz was re-elected president of the association, L. Walker Secretary, and the Union Bank of Oakland Treasurer. It was decided to hold the next fair at Oakland Trotting Park, heginning Septemher 3 and continuing through the week, ending in time for all exhihitors to attend the State Fair, which opens on the 10th of September. It is a pleasure to he ahle to state that the affairs of the Golden Gate are iu a highly prosperons and satisfactory condition, which is owing, it is ouly just to say, to a very wise and efficient administratiou on the part of the officers.

The association is now, after a hard struggle, on a very sound and safe hasis, and its annual fairs are getting to he very popular with all classes, who manifest their interest by an increasing attendance each year.

The success of these fairs more than justifies our statement, often reiterated, that the State never did a wiser thiug than to lend its aid to their support and maintenance, as the money appropriated will come hack increased a thousand fold in the development of the resources of the State.

We heartily congratnlate hoth the association and Mr. Dietz that he has again been called to the responsihle position of president, for his ahle administration in the past amply justifis the confidence reposed in him. He has the requisite technical knowledge of the duties required, with good administrative abilities, and the firmness to stand up bravely in the face of adverse criticism wheu he knows that he is right.

It is entirely safe to say that the affairs of the association will not snffer in his hands.

Only one spirit seems to animate all the officers, and that is, to make their association suhserve the ends and purposes for which it was created and endowed.

It hae our cordial good wishes for the futnre.

We may add that we hope to have its speed programme in time for puhlication in this number of the Breeder and Sportsman.

Reorganization of the Sonoma County Agricultural Park Aseociation.

A new departure has heen taken in the stock ownership and management of the Sonoma County Agricultural Park Association, with the view to the material improvement of the property and affairs of the association, and the conseqnent enhancement of the value of the property itself and the shares also. The ohject is to hetter place the stock, so as to make its acquisitiou more eought, and the investment more satisfactory in profitahle return, as well as in the gratification to he derived from the improved order of the annual fair exhihition hy all directly interested. Under this plan the former system of ten-dollar shares is ahandoued, and the new stock issued is in full sharee of one hundred dollars each. The advantage and henefit of this, to stockholders and to the permanency and character of the association alike, will he readily apparent on a little deliberation. There are, in the first place, a considerale numher of men who have no other occupation or visihle means of support than that which is every year more and more hringing the annnal faire of agricultnral societies into disrepute, and keeping from attendance at them the suhstantial, respectahle and desirable classes of farmers, stock-hreeders and fanciers, turfmen, and the general puhlic, npon whom all such associations aud exhihitions must depend mainly for support and enduring existence. These sharpers of raciug-tracks will have no hesitation in paying ten dollars for a share which will confer upon them the rights of a shareholder and membership, and they detract from instead of adding to the respectability and reputation of the association and its fairs and turf sports. Worse still, they deter the hetter classes of citizens from membership and attendance. Those who pay one hundred dollars for a share will first examine into the worth and affairs of the associatiou, aud the amount is enough to impress any shareholder with the fact that he hae something of tangible value, something to which it hehooves him to give fair attention. This plan naturally enlists in membership the solid and worthy citizen, who will constantly labor to promote the welfare of the association, and take good care to have it reputably and properly managed, in business matters and in the giving of auuual fairs and turf sports of the better order.

Under this new management the grounds of the association are to he groatly improved dnring the present season, to he in readiness for the fair and exhihitiou of this year. The association will he placed upon the rolls of the National Trotting Association, which will give it rank and fellowship and authority with every association of the kiud in the State and Nation, and the great patrons of the turf, the noted breeders, and the better class of turfmen will attend the yearly meetings. A fine and commodious paviliou building will be put up, to accommodate exhihitors of farming, mechanical, manufacturing and industrial products, handicraft, fahrics, inventions, machinery, etc., and the ohjects of art and heauty and elegance, which may be offered for exhihition. It will be an oruament to the park grounds, a great attraction, and a gatheriug place for visitore to the fairs; and it will add much to the attraction of Santa Rosa, in point of interest to persons visiting here from other parts of the country, in drives and entertainmeut at all seasons of the year. This city now really requires a fine resort of the kind.—*Santa Rosa Republican.*

Names Claimed.

Modjeska for brown filly, three white feet, foaled April 27, 1883; by the Grand Moor, dam Echorine, by Echo.
Newland & Pumyea, Oakland, Cal.

THE KENNEL.

Answers to Correspondents.

T. H. B.:

The best way to feed your dog is in the evening, and after he is fed let him rest. Exercise stops digestion and the dog to relieve hie stomach of a mass of indigestable stuff seeks relief in vomiting. The dog bas control over his stomach to a greater extent than any other animal and can almost be said to be able to vomit at will. Feed lightly in the morning, giving crackers, meal, bread or table scraps. Do not give any raw meat or potatoes. The chief meal of the day should be given at night.

The Late Bench Show.

EDITOR BREEDER AND SPORTSMAN: The bench show was a great success as far as the attendance was concerned; as for the management we cannot speak so highly; aufficient arrangements were not made for the exercise and feeding of the dogs, nor sufficient attendants to take them ont, which should be done twice a day. Then again, the judging of the sporting classes bas not given satisfaction and is admitted not to be so well done as at the last show, when one judge only made the awards. The exhibitors of English setters complain that they did not enter these dogs to compare with the field trial breed—or dogs known as Knox's Belton and Belle strain—and that it would bave been more correct to have kept them in the Llewellin class. The difference between the Knox strain and the Llewellin is so slight as to amount to "a distinction without a difference." They should have been all judged as English setters, or the three distinctions kept up and compared with each other. The judges were also illiberal in not giving V. H. C. to many dogs which were well worthy of it. Probably among these were several Irish, Gordon and English setters, also Platt's Joe, who received second prize at the last show, and is acknowledged by all who have seen him work as one of the best field trial dogs in the State. They profess to judge by Stonehenge's standard, but that is really no guide at the present day. It is departed from in many instances, notably in "Berkley-Moore's Irish Setter and Champion Prize Winner," and in the new standard for Gordons. Should we have another bench show, it appears to me that the proper way would be to have one judge, and request all parties entering sporting or any other kinds of dogs to name in their entry the name of one person for judge, and the person receiving the majority of votes should he requested at a liberal remuneration to accept the office, and should he decline, the next highest should be selected. He should make a thorough and close examination of the dogs and not decide by a mere cursory examination of a few minutes' duration, in which time we contend it is impossible to do the dogs full justice.

AN EXHIBITOR.

A Carping Critic.

EDITOR BREEDER AND SPORTSMAN: My attention has been called to the article in your issue of April 28, entitled "A Carping Critic," and having reference to the separate classes of Laverack and Llewellin setters made by the Pacific Coast Kennel Club at their bench show, which was to be held April 27. I do not, as a rule, notice criticisms of the *American Field* which are unjust; indeed this is the only occasion I can call to mind that I have done so; but the article is so reckless as to fact that I deem it only right that it should not pass unnoticed. Had the writer been more careful he would have observed and stated that the remarks referred to were not editorial, but the substance of a communication from Sacramento, and signed a "Constant Reader." Now, Mr. Simpson is too old and experienced an editor not to bear me out that the opinions of correspondents can not be quoted as the opinions of the editor when in the same issue so often are many communications on the same subject diverse in the views they contain. Moreover, the *American Field* has said "lots of kind things" about the Pacific Coast Kennel Club; and I think very many of the members of the club know the kind feelings the *American Field* has entertained for the club and the full measure of success it has wished it.

N. ROWE, Editor *American Field*.

Chicago, Ill., May 4, 1883.

A Novel Pointer.

Mr. Samuel J. Dixon of Philadelphia tells the following story: "During a visit to my farm yesterday afternoon I noticed one of my Gordon setter bitches, which has been allowed to run wild, standing at a mouse hole, and about twenty feet back atood one of my Skye terriers backing her. His muscles were as fixed as a piece of statuary, in which position he remained until the bitch moved on, when he made for the hole and went to work to scratch with all the energy of a true Skye terrier. The bitch is evidently in the habit of finding holes for the little terrier, for it seemed thoroughly understood by them both. I anppose the setter's acenting powers to be much more acute than that of the terrier, which enables him to discover the holes with greater ease."

Mr. Bird of Bird's Point, Alameda, had an old greyhound bitch called Lady Bird that possessed the finest of noses. She would go out quail hunting with a fine Gordon setter and of the pair found far the more birds. She would point stannchly and was an excellent quail dog in every respect except that she could not be induced to retrieve a bird without biting it.

New York Dog Show.

Nearly 1,000 dogs are on exhibition in Madison Square Gardens, where the Westminster Kennel Club's bench show is now being held. It will be remembered that Mr. Lotz of Chicago, at the time of the Cleveland show, offered a gold medal for competition between his greyhound Doubleshot and Mr. C. E. Dawson'a greyhound Spring. The dogs were to have met in London, Ont., soon after the Cleveland show, but Doubleshot being out of condition, Mr. Dawson won the medal by default. He has placed it in the hands of the *Forest and Stream*, to be given at the Westminster show, and they have decided to offer it for the best greyhound dog or bitch in the show.

In addition to this, twenty other special prizes were given by various sportsmen, many of the prizes being very valuable. At the close of the show a meeting of greyhound fanciers will be held with a view to establishing in the East a coursing club similar to those in this State.

Value of Pedigree.

The following letter from Geo. D. McDougall and published in the *Forest and Stream* should be carefully read by all who take an interest in dog breeding:

"It has been my lot to see and be concerned in a great deal of miscellaneous breeding, and being always an earnest searcher after the true *raison d'etre* of the various dicta in the science of breeding, I have, of necessity, come to various conclusions of my own respecting the most desirable crosses; that is, the ones most likely to produce the desired results. I may be accused of overweening self-confidence in advancing my opinions in the face of the writings of older and wiser men, but surely a man has a right to form his opinions, and to express them too; and those who do not think I am right have only to forget my letter as soon as read. I think, however, that a great many will agree with my main proposition, for even though the idea may seem new, they will find that they have really believed it for many a long day. I have seen in several works the same statement that I am about to make, but not advanced to the absoluteness with which I believe it, consequently, though I cannot claim absolute originality, I can say that I go further than any previous writer.

My proposition is this, that nearly if not quite all the inherited merit comes from the dam. I do not deny that the sire often influences the shape and looks, but even here, in a litter of pups, more will resemble the dam than the sire, and the exceptional cases in which the pup takes after the sire in temper, pluck, nose, pace, style, etc., only go to prove the rule. Notice the progeny of any really good bitch, and compare them with those of the best sires of the day. Leicester is one of the best sires we have ever had, but notice how much better his pups out of Dart have been than out of any other bitch. I do not mean to say that Dart is the only good bitch that Leicester has ever covered, but use her name as that of a bitch whose merit is undeniable, and I still think that the Leicester-Darts are the cream of Leicester's get.

Go back a step to Dora, dam of Dart, Davidson's Doll, Druid, Champion Drake, Dimple, etc., and back of that again to Phœbe, probably the best brood bitch that has been known in modern times. Think how many of the winners of the Llewellin blood have descended in the female line from Phœbe, and also on the fact that Phœbe produced field trial winners in every litter that she bred, and I think that my readers will acknowledge that I have some grounds for my belief. Let every reader of this article look back at the best dogs that he has bred, or owned, and how many of them take after "the old bitch?" I have noticed it time and again in my experience, and to-day, after eight years of breeding dogs, of five or six different breeds, I pin my faith on the dictum that "most of the inherited merit comes from the dam."

I do not, by any means, wish to underrate the importance of a good sire, for I regard that as indespensable; but my standpoint is, if a man wishes to breed good pups, let him get a really good bitch, whose dam and grandam he knows to have been good, and then, with the best sire to he got conveniently, he may rest assured that if the pups are well-reared he will have three or four young dogs that will gladden the heart of a sportsman.

In every large kennel, and I have seen a good many, there will be one or two good stud dogs, perhaps a few fair bitches, but often a collection of "scrubs" that are worse than useless. If a bitch is too ugly to show and too worthless to train, never mind! she will do to breed from, as long as her pedigree is all right, and often even if it isn't; the result of which is that the country is inundated with worthless dogs with long pedigrees, deceiving tyros and bringing high-bred dogs into disrepute among men who would otherwise admire them. It is the same with racehorses; after a mare has been trained and raced and hacked about till she is a walking mass of blemishes and unsoundness, put her to stud, breed her to a fashionable stallion, and get a second Luke Blackburn. Then loud are the complaints when the colt is useless, and another instance is given to the many who decry "blood."

Trotting men usually have more sense, lately, at all events, using, for breeding, stallions that never have, and never will be, trained; breeding two or three foals from their young mares before they are trained, and choosing the best of them to do nothing but produce foals year after year.

It is very easy to trace the prevalent blind faith in a "fashionable" sire. A man has an indifferent bitch, and, wishing to breed some pups to sell, what does he do? He tries to hide his bitch's lack of merit by breeding her to a fashionable sire, while a man who has an indifferent dog puts him to one side and sends his bitches to the nearest "crack," and his dog does not perhaps cover a single bitch in his lifetime, unless he does it on his own account, consequently the sires are few and select, the dams numerous and of very mixed quality. Let the owner of the indifferent bitch continue to breed her to the best attainable sire, however, unless he does better than that and consigns her to the same seclusion that surely swallows the indifferent dog. It would be much better for all parties if there were fewer and better pups bred, so that the country would not be flooded with such dogs as every sportsman has seen and probably owned, that are simply not worth their salt. If the breeder would be sure not only of profit, but of success and reputation, let him look to his bitches and determine never to breed but from a good bitch, instead of pinning all his faith on his fashionably bred, prize-winning sire. One good bitch will do more to advance a breeder's reputation and stock his kennel with dogs worthy of the time and trouble spent than a small fortune spent in stud fees to "fashionable" sires for covering second-rate bitches.

In Llewellin setters particularly my belief is in the female line, tracing from old Phœbe. The best setter I ever owned, or ever saw for that matter, was a bitch out of Doll, out of Dora, out of Phœbe, and as she has left no progeny behind her, I am on the look-out for a nice young bitch of the same blood, a daughter or granddaughter of Dart or Doll Dimple.

A clerical error on the part of a volunteer secretary caused the San Francisco press to do an injustice to the judges of sporting dogs in the late show. There were no pure Laverack dogs on exhibition and no prizes were awarded in that class, all reports to the contrary notwithstanding. We have tried to procure the official list of awards but so far have not succeeded. Mr. Orr, one of the judges, has taken some pains to get the list, but has not yet succeeded. When it comes the correct and official awards will be made public.

Shooting Knights.

At the anniversary picnic of the Knights of Pythias at Schuetzen Park, Alameda, last Tuesday, the following gentlemen were the prize winners at the public target, 200 yards, 12 rings, 2 shots, military rifles:

1st, Lieut. H. J. Mangels	9 11—20
2d, Sergt. N. Williams	9 10—19
3d, Corp. D. B. Bankhead	7 9—16

BASE BALL.

League Games.

Games won and lost by clubs of the California Base Ball League from April 1 up to May 5, 1883:

	Niantic.	Haverly.	California.	Redington.	Total Games won.	Runs Made.	B. H. Made.
Niantic	.....	.....	1	1	2	14	23
Haverly	1	.....	1	*	2	10	16
California	.....	.....	.....	1	1	13	12
Redington	.....	*	.....	.....	0	4	5
Total Games Lost	1	0	2	2	5	49	56

* Game postponed on account of rain.

The announcement made in the daily press to the effect that the proposed Oakland League had fallen through appears to have been somewhat premature. Arrangements were entered into last week and perfected this week, by which the league will be organized in a few days, and will be composed of the Howards, a team from the University and the Olympics. Previous to any schedule being adopted, however, the teams will compete for the trophy presented by Captain Howard, and which consists of a silver ball, strikingly resembling the real sphere, with stitched cover. The games will be played on the Oakland grounds where the diamond is as smooth as a billiard table.

The inclemency of the weather on Sunday last sadly interfered with the schedule of the California League, and occasioned a postponement of the game between the Haverly and Redington Clubs till the end of the season. By a wise provision incorporated in the rules of the league all postponements will take the same course, and by this means the schedule originally adopted will be played on the days set apart for each club.

The Haverlys will put in the field the following players for to-morrow's game: Meegan p., F. Carroll c., Barnes 1b., Gagus 2b., Morris 3b., Sheridan s. s., Sobr l. f., Levy c. f., Johnson r. f. The Niantic play for the same game: Sweeney p., Lawton c., Egan, 1b., J. Carroll 2b., Finn, 3b.. Donobue s. s., Fogarty l. f., Lyman c. f., Sullivan r. f.

Sweeney, who formerly played with the old Camornia Club of this city, has done excellent service in the East as pitcher. Base hits have been remarkably scarce, and his delivery seems to puzzle some of the tried veterans. Lackawanna Bill, as he was popularly known here, figures as conspicuously at the bat as he does in the field.

A local base ball critic thus treats of a recent game: "No chances were offered, and hence no plays." Possibly he might be induced to explain where he managed to obtain his score of errors or assists if no chances were accepted.

Frank Smith, formerly one of the crack short stops in the city, should be secured by one of the clubs for that position.

Cullen was disgusted with his recent experience on the diamond, and is represented as saying that he has permanently retired. John should have retired long ago.

Officer Peckinpah is reported as anxious to organize a team in the Department. A match could probably be arranged with the Milpitas club.

YACHTING.

Opening Day of the P. Y. C.

The opening day of the Pacific Yacht Club, which was postponed last week on account of unfavorable weather, will occur to-day. The programme for to-day and to-morrowe is indicated by the following orders made by Commodore Phil Cadue:

Order No. 1—The yachts of the Pacific Yacht Club will assemble off Front St. Wharf on Saturday, May 12, 1883, at 12 m.

At 12:15 p. m. a gun will be fired by the Commodore, at which signal the yachts will prepare to get under way.

At 12:30 p. m. a second gun will be fired by the Commodore, at which signal the yachts will get under way.

The course will be around Mission Rock, passing same on east side, returning on the west; thence along the city front to the anchorage off the club house, Old Saucelito, where they will occupy positions most convenient to each.

Yachts will immediately dress ship upon coming to anchor.

Yachts will observe gun-fire from the flagship, for hauling down and hoisting colors, at sundown and at at 8 a. m.

Yachts of the club will carry the club flag.

Other vessels accompanying the fleet are respectfully requested to comply with these orders.

Members and guests will take the 1:30 p. m. boat for Saucelito, returning at 7:30 p. m.

Order No. 2—The Pacific Yacht Club Squadron will assemble off the club house at Saucelito on Sunday morning, May 13, at 10:30 a. m. At 10:45 a preparatory gun will be fired, and at 11 a. m. a second gun will be fired, at which signal the yachts will get under way.

On leaving Saucelito the yachts will sail in line, following the movements of the Commodore until the stake boat off Hunter's Point is passed, when the squadron will try rate of sailing back to club house, passing the mid-channel buoy on the starboard hand, thence to the club house at Saucelito.

Time will be taken upon passing the stake boat at Hunter's Point and on arrival at the club house.

The Force of Habit.

A lot of old timers were assembled in the members' stand at the Oakland track last Wednesday. Old reminiscences were in order, and when the stock stories were exhausted Jim Roff told a new one about Hoosier Dan, the noted card sharp. Dan always looked for the best of a game and usually stood in with some one else. When he fell into a game among strangers he would nudge his neighbor under the table to intimate to him that he wanted a partner in crime. This got to be a habit of Dan's, and was so strong that Jim declared he saw him at Sacramento one day playing solitaire, every once in a while nudging the leg of the table to "stand in." Jim told another story, about Jack Gamble, who walked twenty-four miles barefoot, when a boy, to see a quarter race. The horses scored for two days, and getting thirsty, Jack went to a saloon on the track to take a drink. He was only gone a minute, but before he returned the race was over and his walk and long wait went for nothing. This is what Jim calls hard luck.

HERD AND SWINE.

A Nebraska Creamery.

The West Point Creamery, located in Cuming county, in this State, is owned by an association of eastern men who have invested $80,000 in lands, buildings and fine high bred cattle. The returns so far have been satisfactory. B. D. Brown of Indianapolis is president, W. B. Eager vice-president, Chauncey Hale secretary, and Thomas King treasurer, all of Orange Co., N. Y., with J. J. King superintendent.

The creamery, and some twenty barns for cattle, hogs, storage, etc., are located half a mile from the railway station on a slope which affords excellent drainage, and protected by hills planted with groves of timber. In connection are 260 acres of the finest farming lands, and ten miles north a stock and grain farm of 2,300 acres, which is well supplied with a large farm-house, barns, wind-mill, etc., where are now 600 head of cattle. Here the young stock is grown till it reaches an age for use at the creamery, and the males are fattened for market. In the receiving room of the creamery, 25 by 50 feet, are two vats of the pool system filled with cans of milk floating in water at 40 degrees, where it is allowed to stand 24 hours. The churning room contains three Boss churns which will be increased to five, and some small churns of the same kind for testing the milk of single cows. Beside these these are packing and refrigerator rooms, etc. In the second story are pleasant family rooms, office and sleeping rooms for the forty men employed. A five-horse power engine, fed by cobs from the corn sheller, furnishes all the power, and heats the whole building. Three hundred cows are stabled in barns, which hold 100 each, are warm, clean and well lighted. Entering the barn a row of heads is presented on each side of an alley seven feet wide. The platform where the cow stands is well bedded and dry, so that the cow's bag is always clean. Behind this is a fourteen-inch gutter and thirty inches to the back wall. On the clean boards in front of the cows are placed full rations twice a day of corn fodder, which was cut and cured in August from a crop of eight tons to the acre. With this at each feeding is a ration of five quarts of bran and three quarts of corn meal. Mr. King says always grind the feed fine to aid digestion. The more the animal can digest, either for milk or fat, the more the return. A feed of well-cured prairie hay is also given once a day.

After each feeding a plank is turned back in front of each row of cows, showing a clean trough, into which is pumped a clear stream of water, at a temperature not less than 50 degrees—a great advantage in winter over the cold stream which runs through the yard, which is 15 degrees lower. The animals are turned out once a day into the yards, where, in pleasant weather, they stay two or three hours, and in the mean time the stables are well cleaned and ventilated. Every particle of manure is saved and goes back on the farm. Every cow is marked with a number on her horn, and the books show her complete history, date of her calf, its sire, the amount of milk she has given, and her butter product. No cows are kept which will not come up to the standard, which is an average of one pound of butter per cow for every day in the year.

Up to the present time butter has been made only from the milk of their own cows, but this spring they will commence cream-gathering from other farms. At the beginning they bought 300 good grade cows, and on these have bred Guernseys and Jerseys, which have given the desired increase in milking qualities.

One of the barns used for storage—44 feet by 340, built on a side hill—has a basement opening to the south, well lighted, where are pens for 200 calves, and calving pens for the cows. The calves are brought up by hand after three days old, being fed at first fresh milk, and then skim milk mixed with oil meal and ground oats. They are full fed from the start, and as soon as there is an abundance of grass they are sent to the farm. Two thousand bushels of oats are on hand for young stock; 1,500 bushels of rye, to be ground and fed with milk to young pigs, and they will carry over 20,000 bushels of corn for fall feeding of hogs and cattle. At present they are fattening 400 hundred high crossed Berkshire and Poland-China hogs. These are April and May pigs, which weighed, Nov. 1, an average of 175 pounds. These are in pens, seven hogs to each, in warm, well-lighted barns, fed on the milk from the creamery, mixed with ground feed, and for two months before being sent to market on shelled corn. One lot, fed last year, averaged 337 pounds. Shipments of butter last year showed a return in New York of 46 to 49 cents. At present most of it is sent to the Omaha market, where it sells at 40 cents. The great demands from the West cannot yet be filled. Breeding the highest qualities of milking stock will be carried on to the full extent of the grain production of the farm.—*Country Gentleman.*

Under no condition should the hands be allowed to come in contact with the butter. Not only does the touch of the hand by heat injure the grain, but it also imparts a taint. One of our best butter makers says the cleaner the dairyman's hands the easier the escape of the effete and waste matters of the system, and the greater the human taint which may attach to the butter. If a person was so unhealthy as always to have cold hands and never perspire there would be less danger of taint, but even then it would not be well to risk the chances. If a person be in a state of health the hands will be too warm, and in health or otherwise there are emanations from the pores of the skin that should be kept away from so extremely sensitive a thing as butter. The material to be brought into contact with butter is wood, sponge, cloth, etc. For working very small quantities a wooden bowl and ladle, or a table and paddle, may do; but for general dairy purposes, where butter is to be packed, a "butter-worker" is very necessary. Our best butter buyers can easily detect a parcel of butter worked by hand, and such lots do not command the highest price. Again, the health of the operator should always be an element in the calculation. The hands in constant contact with a cold mass of butter affect the general circulation, and strike a chill through the whole system.—*American Cultivator.*

Mr. Cranston, manager of the Duke of Buccleuch, some time ago made the experiment of crossing the illustrious Galloway bull Black Prince of Drumlanrig (546) with two carefully-selected and well-bred long-horned West Highland heifers. The first years' produce, says the *North British Agriculturist*, were two black polled heifers, which not only showed no trace whatever of horns, but which bore so close a resemblance in every other respect to pure-bred Galloways that at the time when they were about sixteen months old a dozen of the most eminent and experienced breeders of Galloways were asked to point out the Highland crosses from a lot of nearly twenty pure Galloway heifers of the same age, which were grazing together, and in every instance, without exception, the wrong animal was selected.

Practical Suggestions.

In an article in the *Breeder's Gazette* Harvey Sodowsky, the veteran champion of Shorthorns, from the depth of his good sense and long experience, makes these advisory remarks:

I have been an exhibitor of different kinds of stock for many years in the various State and County fairs of the West, and in the course of my experience in the ring I have had many different kinds of men to deal with. It is a pleasure to recall the names of some who were always straightforward and honorable in their dealings, but it is to be regretted that in the scramble for ribbons many have not been as careful as they should have been concerning their integrity and good name. A man may gain a prize by selfish actions, but in the end such a practice will not be found to pay very big dividends. Whenever I see a man squirming and twisting and objecting to this man and that who may be offered as a judge, I always feel that he has no confidence in his own stock. As a rule, I believe that the managers of our fairs honestly endeavor to select good and competent men to make the awards, and if allowed would go ahead and tie the ribbons, in a majority of cases, about where they belong; but the exhibitor who is aware of the defects of his own stock imagines that by annoying the officers of the society and getting the best judges thrown off, he will have as good a chance as his better fortified competitors. With such a committee he knows it is like tossing up "wet and dry," as we used to do when I was a boy.

I would suggest that societies use the judges first selected, unless, of course, some serious objection was urged, such as relationship or interest in the stock to be shown. All men should have a fair tribunal to settle all controversies, and known advocates of certain breeds should not therefore sit in judgment where their favorites are parties to the suit; but this thing of objecting to Brown "because I don't like him," and kicking against Smith, because somebody does know him, is getting to be an abuse and ought not to be tolerated. These associations are called fairs, and the spirit of that word ought to pervade all the acts done under the direction of their managers.

In this connection I will state what, in my opinion, should constitute the most perfect herd of cattle. This is a question worthy of the deepest consideration of fair managers, and concerning which there should be more uniformity of meaning, as the term is used in different senses by the various societies. The model herd may be limited to five females and one male, of which one cow should be four years old or over; one three years old or over; one two years old or over; one yearling, and one under twelve months. The male should be two years old or over. This sort of a make-up would give the exhibitor a chance to show the females in the different class rings, and the same animals in the herd ring, thus obviating the necessity of shipping two car-loads of cattle to make up the herd and fill the other rings. I should like to see this matter brought before the boards of the more prominent shows at least. If some such scheme should be adopted, I am confident there would be a better show than ever before.

Some of your readers having asked my opinion as to what age to breed heifers I will briefly state my views. If the heifers are spring calves I would say breed them in June at two years old, so that their calves will come the following March; and if you want to breed steers for profit, by the time your calves are thirty months old they are ready for market at as good a price as a three-year-old steer that was calved in the fall of the year. You have three summers and two winters, which is fully as good as a longer time in rougher weather. Calves coming in the spring will grow off better than fall or winter calves. It will do to breed heifers at eighteen months if they are well grown; but if they are bred at one year old it is better to let them miss the next year, otherwise they will be run down in size and lose their fine shape and form. In breeding old cows, when they become very fat and fleshy or doubtful breeders, I use a young bull; a well-grown youngster of ten or fifteen months is about the right age. I have tried this experiment a number of times and it has almost invariably proved successful.

There is another subject of the utmost importance to Shorthorn men at present, which I should like to see agitated until a reform is brought about. I refer to the importance of trimming inferior bull calves instead of selling them for breeding purposes, and also to the necessity of using the knife upon some of our finest calves to feed for exhibition. I am now castrating the majority of my bull calves as they come, and a few weeks ago altered the best one I have seen in many a day. I intend to feed some of them to see what they will make, and don't propose to let any of them lie down hungry. One of them is by General Custer 4th, out of Airdrie's Bloom by 21st Duke of Airdrie, tracing to Gloster's Bloom by imported Duke of Gloster 11,382. Another is a Frantic, and still another a Rose of Sharon and Cambria, with crosses of imported Baron Booth of Lancaster 7,535. I think if Shorthorn breeders generally would weed out their bull calves and use the knife more, the rest would bring better prices. If our farmers can afford to raise and feed common cattle and make it profitable, surely men who have thoroughbred cows and bulls can afford to alter more of their meaner bull calves. I have seen too many good steers spoiled to make mean bulls. Let us, therefore, begin right now to multiply the number of Shorthorn steers and work a corresponding decrease in the ranks of indifferent bulls. Let us also trim some of our very best too, or some other breed will lay us in the shade. We must put our best foot forward, as did the Hereford men last November, and slaughter our choicest bullocks. Had I been in the ring with Tom Brown, or the best steer, I should not have hesitated to put him to the test of the block. It was a great mistake that this was not done. When I start out to win I intend to do so if I can, and this is the reason I have sacrified one of the best bull calves that ever stood on my place.

Prevention is better than cure. It is better to supply animals with what their systems need than to have them become sick for the want of it. Some persons never think of giving salt to hogs, when they need it just as much if not more than cattle, sheep or horses. They will not thrive well without it. But charcoal is very desirable for hogs. We are reminded of this as we sit at the depot waiting for a railroad train. All along the railroad track are hogs eating the coal that has dropped from the furnace of the locomotive. They eat the coal as they would corn. Have farmers never seen their hogs eat the coal in the ashes they threw out? For many years we have made a practice of burning charcoal for our hogs—not a large pit, but enough for the hogs for a year. This is fed to them occasionally, and they go for it like children for candy. Our hogs are always healthy. They have had no cholera or other diseases. They have pure water salt twice a week, charcoal thrown to them once a week, and they thrive and keep in good order all the while. If farmers would pursue a similar course with their hogs, we are sure that we should hear less about deaths from hog cholera.—*Rural World.*

Cattle Shipment for Nevada.

The Reno *Gazette* compiles the following figures of cattle shipments westward from that point for the season: There were none made before December. The total shipments were 422 cars, containing 7,878 head, all of which were for food, except 20 head of work oxen that went to S. C. Chase, Sacramento. San Francisco absorbed 285 cars, 7,334 head; Stockton, 18 cars, 345 head; Sacramento, 4 cars, 58 head; Dutch Flat, 6 cars, 13 head. The amounts shipped in the different months were:

Month.	Cars	Head.
December	36	674
January	54	1,054
February	101	1,825
March	93	1,850
April	138	2,475
Total	422	7,878

The consignees were:

	Cars	Head.
Hayes, Carrick & Co	139	2,413
Horn & Chapman	19	349
Grayson, Howell & Co	130	2,396
Poley, Heilbron & Co	12	231
H. Fish	5	100
Miller & Lux	10	187
Schubert, Beale & Co	5	90
J. Schoenfield	11	230
Emerson & Co	14	256
Brandenstein & Co	10	187
Crandall & Co	12	202
E. & H. Moffit	40	703
S. C. Chase & Co	2	20
A. R. & A. J. Cook	2	38
L. Dean, Stockton	18	345
C. Cier, Dutch Flat	2	40
Pierce & Kerr	2	45
L. J. Corr	2	46

In addition to these there were 204 head of hogs and 591 head of sheep. Estimating the beef cattle at $40 per head, these were worth $364,570.

Swine breeders have not sufficiently borne in mind the variation in the amount of lean meat found in carcasses of different hogs. The Berkshire is universally credited with having more lean than any other breed; but even Berkshires vary in this regard, as do all other classes of swine. Hence, by closely scanning the cut-up carcasses, giving preference to certain families showing liberal presence of muscular substance, these to be used as breeders, the relative quantity of lean could be increased in any family or breed. It is well known that some hogs, when reduced to an impoverished state, are really very thin, as the term is understood, while others have as meager an amount of fat as the thinnest, yet have greater fullness of all the parts, and under no circumstance do they become so lean in appearance as the others. This difference is owing entirely to the greater size of the muscle—the motive parts—and this difference is invariably shown in the cut-up meat. So it will be seen that there are two modes of making a very correct estimate of this peculiar difference in swine—by comparing animals that are, so far as we are able to judge, alike reduced, then again scanning the fat carcasses as they lie side by side upon the block.—*National Live Stock Journal.*

Raising Pigs.

The true farmer will keep a pig. He will commence with a breeder. What breed? In an experiment with all or nearly all, breeds, Columbia County, Chester White, Poland, Suffolk, Berkshire and Essex, I settled on the last two as the best fitted for all purposes. The farmer wants his pig to have the meat properly proportioned; he wants the chime and spare-rib to have as little fat as consistent with the relish of eating those pieces. And while he wants good thick middlings, he wants some lean on them. If there is much he can trim it off, to fry fresh, or make into sausage-meat. The ham and shoulder he wants streaked with fat, or it will be dry and hard. He wants to fat his hog to get as much lard as possible, and not affect the pieces designated. All these qualities are combined in the Berkshire. The Essex nearly as much so, with the advantage of maturing earlier. The Berkshire has my preference as the hardier of the two. The Berkshire is the most thoroughbred hog in the world, from which the Essex is an outgrowth. The pure bred Berkshire is black, will have four white feet with a star on his forehead. The hams will be streaked with fat, not dry. The Essex is entirely black. There is a breed of hogs of a russet color, a cross from the Berkshire. I have not tried it and cannot speak from knowledge. More depends upon care and attention than on breed. While it would take a great many years to breed a hog as perfect as the Berkshire, there is no class of animals can be improved so rapidly by inbreeding as—requiring no science or skill in that respect—as cattle. If your sow has more than six pigs, destroy all over that number. A good foundation for six is better than a poor start for more. A good start is what succeeds at the end of the race. Remember, in the breeding of animals a few good ones and not more than you care and provide for are better than many inferior ones. The care of hogs should not be neglected. First of all is cleanliness. The hog is naturally neat, unless you compel him to the contrary. A good, warm sty in winter, a cool place in summer. Have the yard dry, with straw for bedding, and remove it every week for fresh straw. Never bed with hay, especially swale hay. It is poisonous. Forest leaves will do. Be at all times familiar with your pig. Domestication is the true theory. I know you will hate to kill him, and so should I. When every one shall do his share of labor, perhaps we will not destroy even animals. But I confess to loving a chime of pork and a slice of ham, and a piece of middlings does season cowslips and lima beans; and then what could we do with baked beans without pork, or how fry doughnuts, or make pie crust?

I was going to tell how to feed hogs. You had best breed your own hogs. Do not wean all the pigs at once. Take off a pair at eight weeks old. Don't put them in the barn nor under the barn. Nothing is so bad for hogs to root in as earth that has been covered up for years by a building. Saltpeter or brine is poisonous to hogs. Have a small temporary pen, wean them two at a time at intervals of two weeks, let the last one or two remain twelve weeks. This will be the preminm pig, and the sow's udder will not get inflamed. Feed the little pigs with skim milk. If your pigs come in March or April, with proper care you can make them weigh 250 to 300 pounds by December. Put away at least two for yourself; you don't know what may happen. I would not keep the sow but one season; it won't pay. Be sure, she will have more pigs the second and third litter, after that she will decrease in numbers. Cut the ham pretty well on to the rump if you prefer smoked meat. Cut the shoulder large; smoke your own hams; you will like them better. Take a syringe, run the tube two inches beside the bone into the ham and blow the ham full of strong, sweetened pickle around the bone. Never mind if the ham does swell. When ready for smoking, dig a trench in the ground the depth of a shovel,

ten feet long; put a flour barrel at one end with the hams in it. Lay a plank over the trench and build a fire with green bark or hardwood twigs at the other end; the green earth draws the smoke to the hams. Before warm weather pack the hams in whole corn or oats; no flies will get at them. The breeder must not be fed too high for a few weeks before breeding. If solid, firm pork is desired, two weeks before slaughtering feed nothing but dry grain twice each day, with all the cold water the hog can drink at noon. During these two weeks clean the nest out every day, and the meat will not smell disagreeable in cooking.—*George M. Davenport in American Dairyman.*

Cattle Diseases.

While the recent Congress had under discussion the questions of tariff, civil service reform and various other questions of more or less importance to the advantage of the two great political parties, nothing was done looking to the suppression of contagious cattle diseases, which many think are on the increase in this country. The politicians are always willing to legislate on the tariff, civil service reform, etc. A tariff or civil service bill pleases a large number of their supporters who have nothing to do with a tariff or civil service, and are only interested in the political and social consequences which they suppose likely to follow from their agitation.

The prevention of cattle diseases has little or no interest to the average politician. In theory and promises they are warm advocates of all measures which have for their object the benefit of the farmer, but as a rule they fail to practice what they lavishly profess to preach. Congress has been urged for the last three or four years past to take steps to prevent the importation of diseased cattle to this country, and to stamp out the disease in such localities as it already exists. The only way we know to reach the subject is for the farmers interested in cattle to call a convention, and let that convention voice their views, by demanding of Congress to take such steps as will prevent the importation of diseased cattle and stamp out the disease where it already is to be found, and we know of no place so appropriate for holding such a convention as at the Fat Cattle Show at Chicago in November next, just preceding the assembling of the new Congress.

The question of preventing the importation and spread of cattle diseases is one of vital importance to our farmers, and they should insist upon the Government doing something to check and suppress it. Left to themselves Congress would probably do nothing, as a majority of the members know nothing on the subject of the meat supply, their acquaintance with beef beginning and ending when it is cooked and placed on the table. We have no foreign competition in meat supply, but are large shippers to Europe. With the severe winters and storms in the Northwest for the last few years many thousand head of cattle were destroyed, and with this loss, the rapid increase of population and the foreign shipments, beef has advanced rapidly; should pleuro-pneumonia or any of the contagious and fatal cattle diseases get among the cattle of the West and Northwest, beef would go to famine prices. To guard against such an accident it is the duty of Congress to pass stringent laws to prevent and stamp out these deseases. The convention of cattle breeders at Chicago this fall should send a petition to Congress with all the evidence obtainable, showing the necessity of the passage of such laws as will prevent the importation of diseased cattle, and the extinguishment of the diseases where it already exists in this country. A concert of action by the agricultural press of the country will do much to forward this very important matter.—*Live Stock Record.*

A pig farrowed in April and slaughtered about Christmas will more than repay his cost; during that period he will be but a pig, and the earlier feedings small in quantity. He should weigh about two hundred and fifty pounds when killed, and the carcass will contain a fair admixture of lean and fat. The quality of the meat influences the price, and the difference of only one cent a pound amounts to quite a sum in the whole. The profitable hog is the one that is grown and fatted without delay.

An Angora Hegira.

Among the stock breeders of this Coast who have been attracted by the broad pasture lands of Texas, is Mr. W. M. Landrum of Watsonville, the pioneer and most extensive breeder of Angora goats in the State. Mr. Landrum was the first to introduce the Angora to this Coast, having brought two bucks across the plains in the summer of 1860. They were bred by Col. Richard Peters, of Atlanta, Georgia, and were of the finest strains. A few years spent in raising graded goats demonstrated that plebian blood produced an unmarketable hair, and in 1867 Mr. Landrum commenced a series of importations of pure bloods exclusively, selecting the finest bucks as stock bucks from every importation but two or three that ever came to America, and over a hundred fine ewes. The history of this flock of goats is almost the history of the Angora on this Coast. In 1870 Mr. Landrum sold to James M. Rodgers a half interst in the business and two years later the firm purchased nearly the entire band belonging to Col. Peters and brought them to this State. For twenty-two years Mr. Landrum has followed the business with admirable system, aiming at perfection, and unquestionably the band is the finest collection of pure breds and high grades in America. But the influx of settlers and the encroachments of grain fields on the ranges of the southern part of the State have compelled breeders who required room to move toward the edge of civilization, and Texas is now the promised land for extensive stock raisers. Mr. Landrum has purchased the interest of his partner, and started his stock overland for Uvalda. He has associated himself with the Rowan Bros. and other capitalists of New York who have large landed interests in the lone star State, and will conduct the business of goat and sheep raising on a large scale. The business will be under the personal superintendence of Mr. Landrum.

The sheep for stocking the ranges will also be drawn mostly from California. The property where Mr. Laudrum will have headquarters is known as the Adams ranch. It contains 20,000 acres of the finest pasture lands in Texas, situated at the forks of the Nueces river, four miles above where the Southern Pacific Railroad crosses the river and near the railroad running via Eagle pass into Mexico. The ranch is covered with two varieties of mesquite grass and, on the high land, sotol and cactus enough to carry all the stock through in a dry year. The parties also own a tract of 14,000 acres, twelve miles below the Adams, which is well adapted for sheep and will be stocked with grades for wool and mutton.

The Lakeview Jockey Club of Lakeview, Oeregon, will hold a three days' meeting on July 3d, 4th and 5th. They claim to have one of the best and fastest tracks in the northern country.

FISH.

Work Contemplated by the Fish Commission.

A meeting of the Fish Commissioners was held in Sacramento on Saturday last at which it was decided to rescind the resolution previously adopted asking for bids for hatching the salmon required during the present year. The reason for this action is that the purchase of government hatcheries is contemplated because of it being less expensive and fully capable of meeting the wants of the commission. Some misapprehension appears to have existed in connection with the matter of the State appropriation which it was errrently reported would be expended entirely in the cultivation of salmon. This impression seems to have been created by the fact that one of the Commissioners is prominently identified with canning interests, but a representative of the BREEDER AND SPORTSMAN has been assured that no such course was contemplated. The Commissioners, however, seem to incline towards salmon interests to the exclusion of trout culture as, shown by their proposed trip to the McCloud river where they expect to hatch some two million salmon while beyond merely stating that they would obtain 25,000 trout eggs from Modoc county, and, when hatched, the young fish will be distributed in the central waters of the State, trout culture has been ignored. A committee has been appointed consisting of Messrs. Redding and Buckingham to take steps towards the prosecution of the violators of the law at Vallejo, Rio Vista and Carquinez.

The following resolution was adopted:

WHEREAS, It is apparent that a general disregard of the lawe in relation to fishways and fish ladders now exists throughout the State,

Now, therefore, the California Fish Commission respectfully calls the attention of the several district attorneys of the State that they may make immediate and particular inquiry to ascertain if the natural passages for fish throughout their several districts are obstructed by artificial dams, etc., in any of the streams, and that they may proceed at once against each and every violator of the law in relation thereto to the full extent of the power in them vested.

Furthermore, the Commission calls the attention of the people of this State to the necessity of constructing fish ladders where the streams are obstructed by natural dams.

The Commission will furnish plans for ladders and fishways whenever requested, upon receiving the necessary information.

The Commission requests that the papers of this State may publish the above resolution at least once, that the importance of these matters may be brought before the public.

The Angler's Paradise—Trouting in the North Pacific Region.

The clanging wild fowl are flying northward, and the frogs have started up their concerts in the plashy fens. Spring is fairly upon us, and the cherry blossoms are falling from the trees. In the dense forest the white blossoms of the dogwood light upon the woodland aisles, and all nature, save the locust trees, wears its wedding garment to the vernal feast. The law regulating the taking of brook trout by rod and line expires on the 31st of March, but April came in with a spell of weather that was fairly winter in its violence. The rains came pelting down and the winds blew in fitful gusts for a week, while the streams were so muddy that the trout could not see the fly. For my own part I stayed home, enjoyed my book and pipe, and contented myself with sorting over the flies in my book, and getting ready for "a vigorous prosecution of the war," when brighter skies and warmer days should come to greet the devotees who revere the name of Izaak Walton and worship at the shrine of Dame Juliana Berners. Certain it is that no streams in America can surpass the tributaries of the Willamette and Columbia for fine fishing; nor is there any region along the Atlantic coast which has one continuous season of fishing from May to October, like ours. In May, try the Cowlitz, the Toutle, and the smaller tributaries of the Tualatin; in June, your fishing takes in the creeks that debouch into the Mollala, the Santiam and La Creole; in July, when the Washougal and Lacamas are no longer fit for the fly, then try Hood river, the streams debouching into the bay of Astoria, and the two beautiful little rivers that flow into the bay of Tillamook; in August, try the head waters of the Sandy and the Clackamas, taking the wagon road known as the Barlow gate; and in the sweet September days, take the McKenzie from Eugene or the Mattoles from the Dalles. Eastern fishermen have no idea of the extent of trout fishing in Oregon and Washington Territory, nor will they ever have till they have come here. Talking with James B. Montgomery, the other day, that gentleman said: "When I first read Dr. Murray's bewitching stories of the Adirondacks, I thought he had drawn more upon fiction than upon facts in the structure of his work. The wild beauty of his forest scenes and the large catches of fish that he described all bordered upon the miraculous. But last year I spent my holiday in September at the Belknap springs on the upper McKenzie, and after what I saw there, Dr. Murray's book reads like a very tame affair. There are no such baths anywhere else besides as good fishing; and as for scenery, there is nothing like it, except it may be in the canyons of Colorado. You go to the Hot Springs of Arkansas, and you have nothing but the healing waters; in the Adirondacks you have nothing but the fishing, but at the McKenzie you have everything." The Eastern lakes lying in Idaho Territory, along the line of the Northern Pacific railroad, are said to be the Mecca and Medina of anglers. One of these lakes is the Coeur d'Alene, where is located the most beautiful military post in America, and where some catches of trout have been made which border upon the marvelous. Another is Lake Cocolalla, whence our city derives a large quantity of its ice for summer consumption. The water in this lake is intensely cold even in the summer months, and the fish are necessarily fine and sweet. The streams flowing into Pen d'Oreille lake are all filled with splendid trout, and a five-pounder is no great novelty. For sport nothing can surpass the angling at Spokane falls, but for the table the fish are inferior to those taken in any of the lakes above named. Indeed there is no uniformity among Pacific coast trout like there is among the speckled beauties of the Atlantic streams. Fourteen distinct species were distinctly described in the *Rural Spirit* about two years ago by an English gentleman residing in Wasco county, who was evidently not only an ardent angler but a highly educated anatomist. The trout caught near the White River falls, where the stream is full of glacial deposit, he describes as being scarcely fit to eat, while those taken in Badger creek, scarcely four miles distant, were pronounced fit for the table of Lucullus himself. A singularly marked fish is to be taken during July in the basin at Multnomah Falls about thirty-six miles from this city on the O. R. & N. line to eastern Oregon. If you can imagine a merk like a letter Z, with the upright part perpendicular instead of slanting, you can imagine this very pretty fish which takes the fly with the greatest gameness and gives a severe battle when hooked. The trout taken in the small lakes on the summit of the Blue mountains whence eprang the Powder and John Day rivers, is a species never caught in any of the western Oregon streams, but is *de sui generis*. It seldom exceeds thirteen inches in length, and is a broad fish like the eastern trout, with a black mouth, and belly of a dull gray. Its sides gleam like burnished silver, and undergo some strangely beautiful changes of color while it is dying. For August fishing and good deer-hunting these lakes cannot be surpassed by anything on this coast. The trout taken in the Mattoles river in Crook county, near Camp Polk, are very much like those taken in the Sinnecaquitaine and other tributaries of Pen d' Oreille Lake. Those caught on the McKenzie are entirely different from any ever taken around here, and surpess all others in gameness, as well as in delicacy of flavor. The Puget Sound streams have splendid trout, which we attribute to their habits of going down into the salt water to rid themselves of parasites which attach to them during the spawning season. Those who have fished the Des Chutes at Offutt's and at Hays' meadows can testify to the gameness of the speckled beauties in the stream. It is pleasing to note the growing demand for artificial flies and less of a desire merely to make a big creel. And speaking of fly-fishing reminds me of some very artistically tied flies made by Harry Gordon of this city, on large hooks for use in the Tillamook and McKenzie rivers. His speciality in tying is that the wings are not alike in any one fly. This is an experiment, the value of which is yet to be tested.—*Oregonian.*

Newton Hornbuckle caught a trout near Buena Vista which was covered with red spots instead of black ones. Several other instances are on record of red speckled trout being caught in this section. Either the trout, unlike the leopard, can change its spots, or else some eastern brook trout have been put in the Willamette.—*Portland Oregonian.*

George Carrol of Santa Clara reports good trout fishing in the vicinity of Gilroy.

John P. Ainsworth at Saucelito caught fifty rock-cod on Sunday.

Mission rock is a favorite fishing point for emelt.

High Sport at Willows.

G. W. Potts of Willows, Colusa county, has a pretty good mare of Hambletonian stock that can get over the ground in a way that must convince all competent judges of equinary merit that she has a good strain of blood coursing through her veins. A crowd of gentlemen of sporting propensities, Mr. Potts being of the party, stood in front of the Alhambra saloon on Sunday afternoon discussing the merits of the mare as a stepper, when Sam Culver offered to wager $20 that she could not make a single dash of a mile in four minutes. Now, everybody in this community knows that when Sam Culver starts in for a little sport he will be on hand at "every turn," and when Potts slapped his twenty in the pot Sam's twenty made it jingle. The mare was accordingly prepared for the contest against time. Potts assumed his position on the sulky, and the word "go" was given. Bud Doble, in all the glory he frequently won by going through the air with lightning velocity behind Goldsmith Maid, could never have felt more like a king of the jockey world than did friend Potts as his "fiery steed" amid the deafening shouts of the assembled multitude passed the judges' stand in 3:28½. Potts won the twenty and was elated. Success begets ambition. The more success a man has the more ambitious he becomes. The crowd returned to the Alhambra and resumed the discussion of the horse-flesh subject. Potts was there, his countenance wreathed in smiles occasioned by his victory and one hand was busily employed in rattling two twenty-dollar pieces, one of which having been added to his taxable wealth by the celerity of the movements of his little mare. Now, there's our merchant friend, Jake Kahn, as fine a little man as ever sold a Havana cigar, who thinks he has the boss, in his nine-year-old "hoss," and in a race no local trotter will he bar. He listened to their talk, and straightway did he walk to his store, which is a very fine place; he got a twenty-dollar piece, saying: "I vill dry und make some 'bish,'" and he shook the Mammon chunk in Potts' face. And he said: "If you dank you've de boss, shust put up uud dry my horse, und ve makes de times a leedle more alike, and ve'll go over mit de track, und if your maire vas dake de cak, you shust dake dis piece if she do it in dree und five." Potts jumped on Jake's twenty like a June bug on to a mosquito, and the race was made. The race was to have taken place that afternoon, but by the time the fleet-footed steeds were gotten on the track ready for the contest, it had grown so late that it was decided to postpone the race until the next day (Monday) at 2 o'clock p. m. At the hour named on Monday a large number of people gathered at the track. Judges were selected, and Jimmy Sullivan was secured as the driver of the bay mare, while Fred Crawford held the ribbons on the grey horse. Pools were sold by Zeal Bates, and the grey was the favorite. After a little brushing, the horses were started and the grey won the heat in 3:03. The second heat was won by the grey in 2:58½. Jake was now experiencing the ne plus ultra of happiness—his joy over the excellent strides his horse was making for that "swausy" dollar piece was, we judge, almost equal to that felt by the doomed Anthonio when the cruel Shylock was deprived of the pleasure of taking a pound of flesh from his body. He found himself unable to hold his enthusiastic feelings, and he exclaimed: "Yah, of money I have lots, und I'll bet some more mit Potts, if de word he'll shoost come oud nud say, dot dish r-a-c-e I'm bound to beat, for I'll vin dot under heat, und dere beoples will hurrah for my old grey!" But friend Potts at this juncture gave the race up and Jake triumphantly carried off the honors of the day and the bullion. The race was made quite exciting by the interest taken in it by the friends of both parties. Both gentlemen have good horses. With some training Jake's horse could, we believe, be brought down to 2:40.—*Willows Journal.*

Maggie B B, the dam of Iroquois, dropped recently a chestnut colt by Alarm, on the same month and day of the month on which Iroquois was foaled, and, as coincidences are striking, the career of this colt will be watched with considerable interest.

The Directors of the Santa Cruz Agricultural Fair Association have decided to hold the races this year at the Bay View Driving Park, between August 15 and 20.

Willita, Mendocino county, will have a race meeting on the 5th and 6th of July.

A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion

San Francisco, Saturday, May 12, 1883.

THE DEATH OF RIFLEMAN.

As nearly as can be discovered the last entire son of Glencoe has paid the debt that all horses have to liquidate, and though there are, perhaps, a few daughters alive, the nearest of kin to that great horse are those of the second generation. Rifleman has figured prominently in the horse stock of the Pacific Coast, and with the exception of Belmont his blood is more widely diffused than any other stallion which has lived in this country. On the racecourses, the trotting tracks and the quarter paths there have been distinguished performers which trace their descent from Rifleman, and in Oregon and the northern portion of this State they have been found as serviceable for the work of the farm and for use on the road as any strain. Combined with the Lummux and Henry lines of blood, that are peculiar to that country, an "all-work" horse has been developed that is hard to excel, and in this branch of horse-breeding our neighbors have been very successful. As a general rule families of horses which have gained distinction for speed for short distances are among the best of farm horses, and as the crosses of Rifleman and those of so long established merit are of fine size, there are a number well suited for the coach and carriage. We have not sufficient data to give more than a sketch of what has been done by the sons and daughters of Rifleman, and the records of racing when most of them were on the turf, are so meager as to present little only a portion of their feats. Nell Flaherty was probably the best known and in addition to being a fine race mare was also of very high form. Nettie Brown was very fast and as she is the dam of the flying filly, May D, and other promising colts, she is likely to gain still more celebrity in the stud. Rifleman had a very slight chance to get racehorses, his location being where there were few broodmares, and, in fact, at a distance which precluded many being sent to him. He stood at Red Bluff in 1861, which we believe was soon after he was brought from Oregon, and in 1862 and 1863 between Tehama and Red Bluff. In 1866 he was at J. C. Tyler's ranch, who owned him from that time, and probably before, until his death. Mr. Tyler had a few thoroughbred mares and bred Nell Flaherty, Nettie Brown and others. The blood of Rifleman is likely to be of great value in the trotting pedigrees.

Colonel Lewis was a "wonder." When so crippled that a majority of horses would have given up, he trotted in 2:18½, and there is no good reason to forbid the claim that if sound, properly handled from a colt, and escaped accidents he would have been one of the fastest horses ever hitched to a sulky. This he displayed, and it is better to state that with good luck he would have made a mark close to the top notch. The grandam of Marlette is Ida Martin by Rifleman, and we have it from good authority that she was a good performer on the turf.

We will endeavor to obtain information that will enable us to write a full history of this notable son of Glencoe and the Rodolph mare, and will be obliged to those who know his history, especially his early history, to send a statement to this office.

Oroville wants a racetrack.

THE CLOSE OF THE RACE MEETING.

The fifth spring meeting of the Pacific Coast Blood Horse Association has come to a close, and in many respects it has been both successful and brilliant. Successful in a pecuniary sense, for had it not been for the rain that precluded the racing on Saturday last, the credit side of the account would make a good showing. We have not the least hesitation in pronouncing several of the performances brilliant, and two of them are the best on record when the weights carried are considered. These are the races of Joe Howell and Douglas, and the mile of the former in 1:42 with 119 pounds, and the first heat of three-quarters in 1:14½ with 117 pounds, and the latter's performance, especially the second and third heats in 1:15 and 1:15¼ with 120 pounds, take the first places in the calendar. The Cup race won by Fred Collier, the 1¼ miles of Duke of Monday in 2:09, the 1⅜ of Lucky B in 2:24, and the doings of the colts are all worthy of being rated very high. Of the youngsters who made their initial performances it can be truly said that they are far above an average. Prince of Norfolk may safely be rated as No. 1, and Lizzie Dunbar, John A, Callie Smart, Mariposa, Hirondelle and the Grinstead filly, from the sister to Clara D, are likely to occupy prominent positions. The place which Gano took among the two-year-olds of last year deterred owners from doing much with the three-year-olds that were named against him in the stakes, and when his stable companion Lucky B was so nearly of the same caliber there was still less inclination to contend. Then the "distemper" and accidents made inroads on the foals of 1880, and the only one of that age outside of the Santa Anita flyers which gave any show of merit is Augusta E. This strapping big daughter of Monday is likely to develop into a fine race mare, and should nothing happen her in the way of bad luck by this fall she will be troublesome.

There were only two drawbacks to the complete absence of anything to justify adverse criticism. One was the "starting" in some of the races, the other the postponement from Saturday until Wednesday.

The office of starter is the most unpleasant position there is connected with a race meeting, and the person who fills the place has a duty to perform which is nearly certain to awaken the animosity of some who imagine they have been wronged.

In the first day of the meeting the errors were in not compelling the horses to go back of a line marking thirty feet from the starting point and in delaying the dropping of the flag until the horses were in front of the flag. Although it cannot be sustained that the rule was violated which compels the start being made from the right side of the post, the delay in dropping the flag gave a coloring to the supposition that the "wrong side" was reached ere the signal was given. That was corrected, however, after the first day, and the greatest trouble thereafter arose from the good-nature of the starter in permitting trainers and jockeys to set at naught his authority and to usurp his functions. The most palpable violation was in the two-year-old race that was run on Wednesday. Nearly an hour was lost in getting the colts started, and this delay, so trying to the spectators, arose from the trouble alluded to. To providing an adequate remedy, a rule was framed to cover such cases. That empowers the starter to impose fines which the judges or associations cannot remit when the amount does not exceed $25; and in case one does not effect the purpose, he can "repeat the dose," until the desired effect has been accomplished. In the race allnded to trainers gave the directions, ordering their jockeys to "turn" when the starter had forbidden such a course, and so flagrant were their misdeeds that had he recommended a still greater punishment than fines, the association would have supported him by the infliction of severe penalties. There is little danger of a repetition of the offense and hereafter measures will be taken to correct the evil. These trainers who think they can ride over the association by treating with contempt the mandates of the starter will be taught a lesson forcible and emphatic enough to cure the evil, and if the starter shuns his palpable duties, they will be taken in hand by those who have the determination to eradicate a propensity which is subversive of the interests of the turf.

Postponements in a large majority of instances are detrimental to the attendance, and at times work injustice to those having engagements that they expect to meet on a specified day. The importance of running "fixed events" on the day selected has been so generally recognized that in all the main racing associations of the East and in all the jockey clubs of Europe, the rule is rigidly adhered to, and rain or shine, mud or dryness, the affairs are decided. The Derby has been run in a snow storm, frequently some of the largest stakes in the East have been decided when there were torrents of rain and the track mud to the fetlock, and this without question is the wisest course to pursue. The added money is generally far below the amount which the owners put up and the forfeits even far in excess, so that those who contribute should be allowed to rule. By making it obligatory to run at the time agreed the subscribers to stakes know just what is required them. If the power is left to an association to say whether they shall be run or not, there will always be grumbling and charges that some one has been favored hy the postponement. There is little question that if the public fully understands that the races are to be run regardless of the weather, there will be more people on that day than when it is postponed to a further time.

Racing is entirely different from trotting in respect to weather. The incumbrance of wheels is serious when mud has to be "negotiated" and the shoes of the trotter are more likely to lose their hold than a racing plate and thus be dangerous when there is little risk to the galloper.

In all other respects the past meeting has been eminently satisfactory. Every race has been honestly run and the decisions have not been questioned in a single instance. There was not an accident to record, and only one claim of "foul riding."

FALL RACE MEETING.

The Trustees of the Pacific Coast Blood Horse Association met Thursday evening, and after going over the figures showing receipts and expenditures of the late meeting took the preliminary steps towards the arrangements for that to come. The dates fixed were the 11th, 13th, 16th and 18th of August, and the selecting so much earlier time than has been customary will be more satisfactory to all who are interested in the horses, and assuredly better for the race-going public. As the meetings of this association are the only ones entirely devoted to racing on this coast, it follows that the entries are more numerous and with large fields of starters. In August there has been plenty of time to recover from the spring campaign, and the contestants will be fresh and in full vigor. Should there be casualties or loss of condition in making the circuit of the fairs the drawback is avoided, and there is a freshness which is lost when November is the date. Then the days are growing short and there is a likelihood of rains interfering. The absence of rain in August can be relied upon with a degree of certainty that bad weather does not come into the calculation, and an assurance of a "good track" beyond doubt.

There is another good result. Coming before the opening of the Golden Gate fair, the horses will be on hand to participate in the purses offered by that institution, and the managers can feel justified in offering inducements that they could not under other circumstances. There will be plenty to run, and in contradistinction to previous years there will be large fields engaged. It is scarcely necessary, however, to amplify on the advantages which the early dates give, as they are so apparent as to be acknowledged at a glance.

A committee was appointed to arrange the details, the members of which are P. A. Finigan, Henry Schwartz and Jos. Cairn Simpson. The "fixed events" to be decided have the longest list of nominations ever made in California, and the rest of the bill will be liberal and comprehensive. The closing of additional stakes and the entries for purses will probably be fixed on the first of August, so that this will come at the regular time and also when the fair entries close.

There will be another committee provided for, viz.: a commission to look after the interests of the turf. The members of it will be appointed hy the President, and the resolution empowers him to delegate whoever he thinks will best subserve the interests at stake, and to make such changes and additions as he deems necessary. This is a capital idea and when fully understood will meet with hearty concurrence of all who are real well-wishers of the sport. It will be a terror to those who contemplate mischief when they are aware that their actions are watched so closely that there will not be the slightest chance to escape punishment. There is not time at present to amplify on the advantages that will accrue, and hereafter we will give it the attention demanded.

TROTTING BROODMARES FOR SALE.

As will be learned from an advertisement, C. A. Umbstaetter of Lake county, Ohio, offers three very desirable broodmares for sale, and the prices are surely low for the class of animals. Hecla is royally bred, being nearly of the same blood as Piedmont, and the conjunction of the Hambletonian and Mambrino Chief blood has proved to be such a "happy nick" in so many instances that it has taken the highest place in the books. Minnie H is a scion of distinguished families on every side and so is Varilla, and the colts by Orange Blossom and Meadow Chief can scarcely fail to come up to high expectations. It is unnecessary to add to the full information contained in the advertisment further than to state that we are assured from a thoroughly reliable correspondent that they are fully up to the standard claimed.

THE CROP OUTLOOK.

It was a gloomy May Saturday for California a week ago when the race meeting should have come to a close. There was mud below, drizzling rains from above. But the disagreeable was overshadowed by the good that would result, and the annoyance more than balanced by the culmination of what is nearly sure to make the season of 1883 one of the most bountiful ever known. Even the farmers are not more dependent on a good crop than those who trust to racehorses and trotters to balance the debit side of the account, and though there would have been gratification had the rain come a few days later too much good resulted to warrant the slightest repinings. A few weeks ago there were dire forebodings. The lightest-hearted wore a somber visage, and the ultra-sanguine had to nerve themselves to meet the situation. Two weeks more of dryness and the lugubriousness would have been succeeded by despair, but at the right moment the rains of March came, and when it became evident that there was quantity sufficient, and better yet, widespread, fructifying the whole country, there was relief and joyousness. With that there was a feeling of regret that there had been distrust, self-accusation at the pessimistic thonghts which were harbored. Although few localities were suffering the late rains came opportunely—in time to insure the grain heads filling with swelling kernels, and that which was late-sown to make vigorous growth. It brought fresh feed in pasture fields which were getting short, and caused a flow of milk to make the playful foals still more gleesome. It gave the hills a fair chance with the more fertile plains, and on those "mesas" which lie within the dry belt it gave hopes to the husbandmen. In vineyard and orchard the good work went grandly on, and the wine press and cannery will be full of business when the clusters grow purple, and red, and tokay-colored under the August sun, and the branches beg for support to sustain the load of lusciousness which threatens destruction. While the utile is thus blessed there is a wealth of adornment made bright and glowing from the rains of early May. California is one vast flower garden, and the beauty there is on every hand is indescribable. Cottages enveloped in a mass of color that nearly hides the verdant foliage, lawns where grass, flowers, shrubs and trees vie in freshness of coloring, and the air impregnated with perfume. Heretofore the rains have come when there was a lot of hay in swarth, winrow and cock; that is, in the ten pluvial visitations in May that we have seen. This year the "haying" was scarcely begun, not one-thousandth part cut of this year's crop, and it is long odds now that the "clearing up" will bring a "spell of weather" that will be just right to cure the California forage in the best manner. We have little patience with the croakers who tell of grain beaten down, and the rust which is to overwhelm the fairest crops which ever decked the soil of the coast. The northwest wind will shake the superfluous moisture from the drooping, bearded heads, and following the valleys lick up the excess of humidity that, reinforced with a hot sun, might do damage. This is bound to be a grand year for California, and as a natural sequence a grand one for the fairs. There will be tens of thousands of happy people to join in the "harvest home," and glad voices in the chorus of thanksgiving and contentment. There is much to return thanks for. When we read of the terrible hurricanes, the devastating floods, the snowfalls and the storms of springtime in the East, and in contrast this favored clime, what an ill-constructed mind the person must have who rails in advance over what is so unlikely to happen. As nearly as anything that has the least uncertainty can be foretold, the crop of California this year will be abundant, with a strong probability that it will exceed in amount that of any previous year, and that prices will be such as to bring plenty of money into the hands of the fortunate farmers.

DR. PARDEE ON THE RIFLE.

That "good wine does not need a bush" is an axiom that receives universal acknowledgment, though it may be that some who would like very well to obtain the true juice of the grape require to be directed to the location if the bush which is superfluous after acquaintance has been made. Thus it is not necessary to refer to the articles of Doctor Pardee to those who have read what has been published, but as many of our subscribers have become readers since the break in the series (occasioned by sickness of the author) we again call attention to them.

There have been so many encomiums from those who are thoroughly acquainted with the science of rifle shooting that it gives us still more confidence in expressing our views, and the coincidence in the estimation of their value is very gratifying. In this number the doctor deviates from the actual delineation and concludes with a *veritable* bear hunt.

There may be those unacquainted with the habits of the mountain terror who will think the tale something of the Munchausen order, but surely a man who has a constant lesson before him of the value of truth as exemplified by the straight barrel and "true twist" will not deviate from its limits. Although the relator does not indorse the statements of his correspondent he may have thought that it would be superfluous to make the attestation.

VIEWS OF CORRESPONDENTS.

In the article from N. Rowe, editor of the *American Field*, which appears in this issue, he alludes to the well-known fact that an editor is not responsible for the opinions of correspondents. It appears that this was lost sight of by the person who wrote the criticism, and we are much pleased to give place to the correction.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

A bets B that C can beat D a match of ten birds, and the money is put up. C on being told of the match declines to shoot. Has A the privilege of drawing his money or does he forfeit it? EUREKA, NEVADA.

Answer—The money should be drawn.

ATHLETICS.

A New York Athletic Park.

The work of grading and preparing the piece of property recently leased by the Manhattan Athletic Club has already commenced. The property consists of the entire block between Eighty-sixth and Eighty-seventh streets and Eighth and Ninth avennes. On this will he laid out a quarter of a mile track, with graded turns for bicycling, and along the Eighty-seventh street side of the ground a straightaway track of 220 yards in length will be made. The track will thus be an exact counterpart of that of the London Athletic Club, except that the finishing point for all races run on the quarter-mile course will be on the Eighty-sixth street side and close to the grand stand. Water pipes will be laid down by the edge of the track, so that it can he sprinkled in dry weather. Inside the running track a basehall diamond will be prepared and the border of the track will he leveled with the turf center field, so as not to interfere with the players in running after the hall. At the Ninth avenue end a large space will he allotted to lawn tennis courts, and will include nearly all the ground between the running track and the fences. This portion will he partitioned off with a rail fence and sunk four feet helow the track level. Dressing rooms for ladies and gentlemen using the courts will he erected within the inclosure. At the Eighth avenue end the club honses, grand stand and gymnasium will he situated. The stand will be of very artistic design and capahle of accommodating 1,500 people. It will he reached hy a bridge similar to that in nse at the Polo Gronnd, so that the visitors will he prevented from getting on the track and getting in the way of officials while in the discharge of their duties. Underneath the grand stand there will he fonr large dressiug rooms, together with bath and toilet rooms and every convenience for the athletes. These rooms can he reached by a wide passageway running from the track to the hack of the grand stand. The gymnasium, which will be erected in the fall, will be on the north side of the grand stand, and will be fitted up with all the best and most useful appliances.

The Manhattans have always made it their endeavor to lead in athletics, and to-day they enjoy the proud distinction of being ahle to pnt a team of club men in the field capahle of holding their own against any club in the world. The new grounds are to be completed hy May 9 and will cost $10,000. —*Herald.*

The suggestions contained in this column last week have heen productive of some good, as the nnmher of entries for the Olympic club meeting, which takes place at the Oakland gronnds on Decoration Day, have heen coming in with a fair prospect of a large and interesting field. For some reason or another, best known to himself, Haley has announced his intention of withdrawing from the sports of that meeting and ingloriously leaves the honors to his former rival, Masterson. It is useless to say that this step has created considerahle comment, as it was expected that the two would embrace the opportunity to settle their claims for supremacy. As it is, Masterson is only harred from the 220-yard race, and may reasonably be connted npon to walk away with the varions prizes unlesa tbe handicaps are such as to equalize matters. Those already entered repreaent the Merion Cricket club, the Golden Gates and the University Athlectic club. Some changea have been made in the programme, notably ao in the maiden race, which has been limited to memhers of the Olympic club. Tbia was found necessary on account of the difficulty which would he experienced in determining whether outside parties who wonld enter for that event had ever competed in any race previous to that time. Nothing has yet been done in tbe way of including a tug of war in the list of events, though it ia highly prohahle that aome such arrangement will be made during next week. Tbe club bas decided to allow the various cluha represented in the meeting to select their own judges according to representation, and thus aomé of the objectionable comments usually passed on similar occasiona will he in a measure provided against. Letters to that effect have heen addressed to tho cluha. The grounda are reported in excellent condition and quite favorahle to good time. Entriea close on 25th instant.

At a recent meeting of the Board of Managers of tho Manhattan Athletic Club, of New York, it was agreed that should W. G. George, tbe English champion, come over to this country for the purpose of trying conclusiona with L. E. Myers, the distances to be run ahould he 1,000 yards and 1,200 yards and three-quarters of a mile. It ia expected that at these distances tbe men will meet on equal terma and that the events, ahould they he contested by them, will he close and exciting.

A sparring tournament ia among the attractions at the Olympic club, for wbich a large numher of entries is promised. Tbe events will, nnless some supervisiou ia exercised, he considerably mixed, as tbere ia some talk of heavy weights going in for middle weights, and tbe latter for light weighta. Gold and silver medals are offered for first and second prizes.

Tbe Golden Gate Athletic cluh at its last meeting elected to honorary membersbip M. Price, who had assisted the club with a donation of boxing gloves. T. Flynn, representative of the BREEDER AND SPORTSMAN, was also elected an honorary member. The club gave a private exhibition on Wednesday nigbt when George Lloyd and T. Flynn of the Pioneer Rowing club sparred with T. J. Pettit and Wm. Welch of the Golden Gate clnb. Lloyd had the advantage of Pettit in size hut the latter offset the handicap hy clever sparring. The set-to was scientific and pleasant. The heavy weights went in for solid work and sparred three very lively rounds, in wbich Welch showed great gameness. He has the requisite qualities of a good hoxer—quickness, hitting power and the resolution to go in and punish. The boxing of botb light and heavy weights elicited much applause. P. Tormey gave an exhihition of wrestling and thew a numher of altbletes half a foot taller than himself with consnmmate ease. Tbe Golden Gate club is certainly a vigorons young organization, for out of its comparatively small membership it can put forward a good man in nearly every branch of sport.

The annual run of wheelmen to San Jose will take place to-day, the start heing made from the Oakland side. The programme carried out on similar occasions consists of a run through the towns of Haywards, San Leandro, Niles, Milpitas, Alviso and San Jose where the party arrives in time for dinner. On the following day a visit is made to the Alum Rock road, usually returning to San Jose in time for the evening train for the city. It is probahle that some of the wheelmen will go as far as Gilroy.

William Muldoon having challenged all comers to a wrestling match has been accommodated by Donald Dinnie, the Scotch athlete, and $50 forfeit has heen deposited by both parties. They will meet next Monday evening to draw the articles. As Muldoon affects the Greco-Roman and Dinnie makes a speciality of the Cumherland style a waiver will be necessary from one or hoth if a match is made.

Harriman having settled down in the saloon business at Truckee bas fitted his place with a track and other accessories for pedestrian exhihitions. He announces that he is negotiating with O'Leary to visit that altitudinous town when he returns from the colonies and make a display of his powers.

The Golden Gate Athletic Club proposes to bold forth at the Bay District Track. No particulars are given.

The Mission Athletic Club will hold a meeting some time next month at which prizes will he given.

The University Cluh has abandoned the idea of holding a meeting dnring the snmmer.

George L. Rohinson is training for long distance races.

BICYCLING.

The Wheelmen's League.

The arrangements for the third annual meet of the League of American Wheelmen, which is to take place in New York Wednesday, the 28th inst., are pushing forward hy the committee having them in charge, and it is expected that the meetiug will he tbe largest ever held in this country. At a recent meeting of the Park Commissioners a petition requesting the use of Central Park and Biverside Drive for the use of the hicyclers on the day of the meet was presented, and the nse of the West Drive of tbe Park and the Riverside Drive hetween 3 and 5 o'clock on that afternoon was granted. This concession is hailed with delight hy the wheelmen of New York, as the Park Commissioners have heretofore refused to allow them the use of any portion of the Park.

It is expected that fully 1,500 riders will be in line on the day of the parade. These will represent cluhs from all parts of the country and will he divided into three divisions. The commander-in-chief will he Mr. W. M. Beckwitb, of the Citizens' Bicycle Club. The first division will he commanded by Fred G. Bourne, of the Citizens' Bicycle Club. This division will consist of the members of clubs helonging to the League. Division No. 2 will he under the command of William R. Pitman, captain of the Ixion Bicyle Club, and will include clubs not membera of the League, but who bave memhers who are individually connected with the psrent orgauization. George R. Bidwell, of the Kings County Wheelmen, will command the third division, whicb will take in cluhs and individuals who arc in no way connected with the league. These will form in line in the ahove order on Fifth avenne, the head of the line facing south, at Seventy-second street. At 2 p. m. the order to start will he giveu and tl e procession will move to Fifty-ninth street and then counter on Fifth avenue to One Hundred and Sixteenth street, to Seventh, then to Central Park, through the park hy the West Drive to Fifty-ninth street, then hack througb the park to Seventy-second street, to the Riverside Drive, to One Hundred and Twentieth street and retnrn to "Mount Tom" on the Riverside Drive, wbere a drill will probably take place, after which the men will he photographed and the parade will then dishand. This route will be a most charming one for men wbo come from distant cities, as it will show to them the spring heauties of "New York's hreathing apot" and will also give them a view of the Hudson and the Palisades on the Jersey shore. In the evening there will he a dinner at the Metropolitan hotel, to which President Arthur, Governor Cleveland, Mayor Edson, Mayor Low, ex-Mayor Smith Ely Jr., the Park Commissioners, Isaac H. Bailey, Jackaon Schultz, General Grant and Robert Center have beeu invited. Among the prominent people that will he preseut are Charles E. Pratt, ex-President of the Common Council of Boston; Albert S. Parsons of Cambridgeport, Mass.; W. H. Miller of Columbus, O.; Richard Ganey, St. Louis; W. V. Gilman, Nashua, N. H.; J. O. Blake, Chicago; Fred T. Scholes, Cleveland, O., and Leland Howard, Washington, D. C.—*World.*

Mr. James B. Cbase of tbis city haa had the misfortuno to lose his fine hrood mare Folly. She died at Mr. Chase's farm in Sonoma county on Wednesday morning of inflammation of the howels. Her colt, three months old, by Wheatley, is doing well. Folly was hred hy A. J. Alexander of Woodhurn, Kentucky, and foaled in 1875. She was sired by Planet, first dam Miranda, by Lexington; second dam Miriam, by imported Glencoe; third dam Minerva Anderson, by imported Lutzborough; fourth dam by Sir Charles.

Geo. W. Woodard will give a purse of $250 for all foals of 1883 sired hy his borso Alexander Button, the purse to he trotted for over the Woodland course on tho first Saturday after tbe first day of Septemher, 1883. Tho race will he mile heats, best two in three, to harness and to rule.

Tho average period of gestation in 300 marca selected for the purpose of testing the matter was 342 days, or al months, the shortest period of producing a foal whic being 313 days, whilo the longest 370 days, a dif 57 days.

THE GUN.

Wet Fun.

The rain of last Sunday did not prevent the $75 match among Edwards, Muller and Gonld from coming off, but at an early hour in the forenoon the trio and twenty-five or thirty other sportsmen were at the pigeon grounds of Oakland Trotting Park ready for tbe fun. Shower after shower passed over but the shooters did not seem to mind the water and shot with as much interest as on any day, running out in ths mnd and wet grass to retrieve their wounded birds with cheerful indifference to the effect ou their raiment. Tbe conditions of the match that called these men together were: Twenty-five dollars each, at 25 pigeons, 21 yards. Tbe one making the best score to have $60 and the second best $15. The pigeous far this match were picked hy A. E. Burbank and were a very good lot. The shooting was very eatisfactory, as the kills and misses were made clean, only one bird, Gould's fourth, dying out of bounds. Following are the scores:

Edwards, 10111 11110 11001 10111 01101—18.
Muller, 01110 11111 00001 11110 11111—17.
Gould, 110°0 11111 11110 10111 00110—17.

As above seen Edwards was the winner of the first money with 18 kills against two scores of 17 each. It was decided that the ties should be shot off for secoud money at tbree pair of double birds; in this Muller was the winner with four of the six against Gould's three, as this shows:

Muller	10 11 01—4	Gould	10 10 01—3

After this came a $2 50 sweepstakes at six birds, twenty-one yards rise. Thirteen entries were made, hut all of those who missed the first withdrew to save birds, leaving ths game, so to speak, in the hands of four or five shooters: The scores etand:

W. Golcher Jr.	1 1 1 1 1 1—6	Eyre	1 1 1 1 1 1—6
Lacbman	1 0 w —1	Broden	0 w —0
King	1 1 1 1 0 1—5	Putzman	1 0 1 0 1 w—3
Slade	0 w —0	Brown	0 w —0
Pearson	1 1 1 0 w —3	Gould	0 w —0
Lambert	1 1 1 1 1 1—6	Edwards	0 w —0
Overman	1 1 0 1 0 w—3		

It was the intention to have the purse divided into 50, 35 and 15 per cent to the first, second and third best men, but Golcher, Lambert and Eyre, tying on a clean score, the lucky men thought better to take ten dollars each, and remember the trapper with a liberal donation than to wasts more than the stake shooting off the tie. The next match arranged was a four-bird "miss and out," commonly known as freeze-out. The shooting was at thirty yards rise, both barrels, $5 entrauce, the best man to take the purse. Six entries were made and the shooting throughout was even and pretty. Though King missed his first, which spoiled his chance for the purse, he continued to shoot as he and Gould had a private bet. After these two gentlemen shot and tied on eight pigeons they drew down their money. But to the match proper: Lambert, Pearson and Broden killed their four straight, as this shows:

Lambert	1 1 1 1—4	Broden	1 1 1 1—4
Pearson	1 1 1 1—4	Gould	1 1 1 0—3
King	0 1 1 1—3	Smith	1 1 1 0—3

The tie among ths three named was shot off on the "miss and out" rule. Up to the fourth pigeon they all held together but on the fifth Lambert broke down, on the sixth Pearson fell from grace and ae Broden killed his sixth hs got the purse of $30. This is the tie:

Lambert	1 1 1 1 0 —4	Broden	1 1 1 1 1 1—6
Pearson	1 1 1 1 1 0—6		

Mr. Howard Black officiated as judge to entire satisfaction of all interested.

Vacaville Gun Club.

EDITOR BREEDER AND SPORTSMAN: Only a few members of the Vacaville Gun Club were on hand to coutest for the Club'e gold medal on the 28th, a number being absent luring the speckled beauties in Lake and Napa counties, while others were too busy to attend.

The following named faced the trap. Conditions, twenty clay pigeons, twenty-one yards rise. Six to left, six straight away and eight to right:

H. Bassford, 10111 01111 11111 11111—18.
A. R. Long, 11111 11111 11111 10101—18.
Ed Whitby, 11011 11110 10101 01100—13.
S. Dobbins, 11111 11111 00100 01010—13.
J. M. Bassford Jr., 10111 11011 11111 11111—18.
J. Dobbins, 11110 11111 11101 11101—17.

H. A. Bassford, J. M. Bassford and A. R. Loug shot off at ten pigeons, straight away, twenty-one yards, with following result:

A. R. Long	1 0 0 1 1 1 0 1 1—7
H. A. Bassford	1 1 1 1 1 1 1 1 1—10
J. M. Bassford Jr.	1 1 0 1 1 1 0 1 1—8

H. A. Baseford took gold medal. J. M. Bassford, second prize.

Nearly every one expected Mr. Long would win the medal, but he did uot hold out. Hs shot eplendidly up to the 17th bird.

Pool ehooting was then in order. First shoot, fivs hirds, 21 yarde rise:

J. Bassford Jr.	1 1 1 1 0—4	H. Bassford	1 1 1 1 1—5
M. J. Reams	1 1 1 0 1—4	A. Long	1 1 1 1 1—5
J. Dobbins	1 1 1 1 1—5	S. Dobbins	1 1 1 1 1—5

Ties on five shot off "miss and out":

J. Dobbins	1 1—2	A. Long	1 0—2
H. Bassford	1 1—2	S. Dobbins	1 0—1

Divided by J. Dobbins and H. A. Bassford.

Next match twenty-eix yarde straight away, miee and out.

J. Dobbins	1 1 1 1 1 1 1—8	S. Dobbins	1 1 1 1 1 1 0—7
C. Losee	1 1 1 0 —3	H. Bassford	1 1 1 1 1 1 0 —6
M. Reams	1 1 0 —2	J. Bassford	1 1 1 1 1 1 0 —6

Won by J. Dobbins. X. X.

Ths firet match at the trap sver held at Yuha City came off last Tueeday. The participante shot at ten ghes balls and got on the record tbus: G. W. Bensou 8; M. E. Sanborn 7; S. E. Wilcoxon 7; Shaw Rex 6; C. E. McQuaid 4; Chas. Alvord 2. A gun club is being organized.

At Chico last Wednesday a match at 50 glase balls for $100 a side was shot between J. T. McIntosh of Chico and George Dietzler of Bigge. Ths score wae McIntosh 47, Distzler 43.

Teame of four men from the guu clube of Willowe and Orland, Colusa county, will shoot a match to-day, the Orland team being ths challenging party.

"Biled crane," and crane on toast, are among the new-faugled luxuries of Modoc county epicnree.

State Sportsman's Association.

The third annual meeting of the State Sportsman's Association took place at Gilroy on the 3d inst., President J. K. Orr presiding. A committee on credentiale was appointed and an adjournment moved until 8 o'clock p. m., as all the members expected would not arrive till 6 p. m. In the mean time tbose already assembled were invited to partake of a shoot at clay pigeons on the racetrack, where everything was in readiuess to receive them. Mr. Jno. Paine kindly volunteered the use of his four-horse coach to convey the parties to the grounds. Some good shooting was exhibited, but the great cracks from San Francisco did not distinguish themselves greatly. On assembling at 8 p. m., the committee reported delegates from the following clubs as entitled to seats in the convention: Butte County Club—T. J. McIntosh, N. B. Scott; California Wing Shooting Club—Crittenden Robinson, T. A. Pearson (Robinson proxy); Folsom Gun Club—E. Christy, C. L. Ecklan (Christy proxy); Gilroy Gun Club—D. M. Pyle, J. R. Payne; Gun Club of San Francisco—Ramon E. Wilson, W. J. Golcher; O'Neil Gun Club of San Joaquin—C. A. Merrill, J. P. Spooner; Stockton Gun Club—W. R. Fisher, C. J. Haas; Tule Shooting Club—Gen. E. Kirkpatrick, C. Robinsou; Recreation Gun Team of Los Angeles—H. F. Hazard, H. T. Payne; Grass Valley Sportsmen's Club—E. A. Roberts; Sonoma County Club—J. H. Burnett, B. F. Cockrill. Antioch Club, Woodbridge and Yolo had no representatives. The treasurer read his report, which showed $455 20 on hand, and was accepted. Interesting papers were read by President Orr, Secretary Spooner, Ramon E. Wilson and H. M. Briggs, which will be published when received by this paper. Ralph Turner, hy special request, read two poems: "The Loved Ones at Home" and "The Huuter's Song." Mr. Turner has written some good poetry under the nom de plume of "Elsie Warner." It was decided to hold the next maeting at Los Angeles on the first Thursday in October, 1884, and thereafter the association will meet annually in the same month. In October the members of the association will be more at liberty and can spare the time better than in May. The president was instructed to appoint a committee of six to suggest game laws adapted to the various climatic conditions of the State. The present law works an injustice in some placcs to the sportsmen, and in other places to ths game. The president was given time to appoint the committee.

Ths following gentlemen were elected officers for the present year: President, M. M. Estee; Vice-President, D. M. Pyle, Gilroy; Treasurer, Sidney Newell, Stockton; Secretary, J. P. Spooner, Stockton. Directors: C. Robinson, San Francisco; H. T. Payne, Los Angeles; Dr. J. W. Hays Jr., Grass Valley; R. E. Wilson, San Francisco; J. T. McIntosh, Chico.

The State Shooting match was held under very unfavorable conditions, the beautiful rain coming down copiously. There were twenty-two entries, the rules being twelve pigeons each, 21 yards rise, use of one barrel. The shooting was good, with the following score:

F. Maskey	1 1 1 1 1 1 1 1 1 1 1—12		
J. T. McIntosh	1 1 1 1 1 1 1 0 w — 7		
C. Robinson	1 1 1 1 1 1 1 1 1 1 1—12		
S. E. Knowles	1 1 1 1 1 1 1 0 w — 7		
R. E. Wilson	1 1 1 1 1 1 1 1 1 1 1—12		
N. B. Scott	1 1 1 1 1 1 1 1 0 w — 8		
F. Post	0 1 1 1 1 0 w — 4		
Jno. Swain	1 1 0 0 w — 2		
C. Merrill	1 1 1 1 1 1 1 1 1 1 1—12		
F. White	1 1 1 1 1 1 1 0 w — 7		
D. M. Pyle	1 1 1 1 1 0 w — 5		
D. L. Duncan	1 0 1 1 1 0 1 1 1 1 w — 8		
— Roberts	1 1 0 1 1 1 0 1 0 w — 6		
J. R. Payne	0 1 1 1 0 0 w — 3		
C. J. Haas	1 1 1 0 1 1 0 w — 5		
W. R. Fisher	1 1 0 0 w — 2		
F. N. Lastredo	1 1 1 1 1 1 1 1 1 1 0—11		
E. Leffler	1 1 1 1 1 1 1 0 w — 7		
E. H. Farmer	1 1 0 1 1 w — 5		
H. M. Briggs	1 1 0 1 1 0 0 w — 4		
H. Frutig	1 1 1 1 0 0 w — 4		
Jno. Paine	0 1 0 0 1 0 0 w — 2		

On account of the unfavorable weather for out-of-door amusements, the Gilroy club did not have the opportunity of showing their sporting visitors the many pleasant things they had in store for them, among which was a social picnic at Sargent's Station, with clay pigeou shooting and other agreeable accompaniments. Nevertheless, the sportsman can, of all meu, adapt himself to his surroundings, as he is accustomed to all kinds of luck and puts up with it, with stoical indifference. Besides many of them are engaged in agricultural pursuits, aud rain at this time of the year in California is too great a blessing to make any oue complain of a little temporary disappointment.

The holding of the next meeting at Los Angeles is a good idea, and we hope to see it carried in due course to San Diego and even to Oregon, as the Pacific Coast is alike interested in the proper protection of game. Ws think it would be good to have a Pacific Coast Sportsman's Association, in lieu of the present organization and include Oregon, Nevada, Arizona and New Mexico. The time is come when sportsmen everywhere must come to the rescue, or in a few years the game will be wantonly, thonghtlessly destroyed. We think with the handsome balance in hand, the Sportsman's Association would act wisely by importing and propogating some foreign game, such as the bob whites and the various kinds of pheasants, for which our wooded ravines are so admirably adapted.

The English partridge might also he experimented upon in our large stubble fields. We hope the directors will spend the whole amount in hand in importing foreign species, and trust to the incoming revenue for prosecuting tresspassers and violators of the law.

A Mr. Graham of London has issued a challenge to the pigeon shooters of the world, to shoot at 100 birds for $1,000 a side. He prefers an American competitor and invites Bogardus, Dr. Carver and Mr. Mitchell to respond. Mr. Graham also offers to make a second match for $1,000 a side under the following conditions: Mr. Graham to stand at twenty-six yarde rise and uss one hand only, the other competitor to staud at thirty-two yarde and use both hands.

The challenger is a member of the Union Gun Club of Hendon. His handicap is thirty yards, and on March 30, 1882, he beat a Mr. Johneon in a one-hand match, killing twenty-threo out of twenty-five at twenty-five yards. Mr. Graham also won a challenge cup at Heudon in October, killing nine straight at thirty yards, and in Novemher became the holder of the Warner Challenge Prize by killing eight at thirty-one yarde from a field of thirteen. Mr. Graham is also recorded ae the winner of eeveral small affairs in the Englieh provincee. This year, on the 14th of March, he ehot a match at the Abbey Hey Grounds, near Manchester, for £50, when he was beateu hy Mr. T. Ranthmsll. They sbot at 100 hirds, at twenty-five yarde, with half an ouuce of ehot. Ths wiuner scored fifty-three out of 100, to Graham's forty-three out of ninety-one. The birde furnished were described as ons of ths fasteet lote ever trapped at Manchester.

The Trap at Ventura.

Tbe Ventura Gun Olub held their first formal club shoot on May Day. They shot by teame at twelve clay pigeons and the first match resulted as follows:

BONESTEL'S TEAM.		EASTIN'S TEAM.	
Coffman	111111000000—6	Foulks	101101011010— 7
Goodwin	111111010100—8	Kaiser	111111111001—10
Leech	100111000001—5	Warring	101110100010— 6
Charlebois	111101100111—9	Sifford	110111100100— 7
Tom Chrisman	110101100100—6	Chrisman	111111010000— 7
Newby	111111101000—8	Abbott	001110000000— 3
F. Sheldon	111100001110—7	Vickers	110110010001— 6
Bennett	001100100011—5	Pixley	101001110000— 5
Sheldon	001110101000—6	Beal	111111010001— 8
Hall	011111000000—5	Steepleton	011001011000— 5
Barnard	111101101011—9	Reilly	110010000100— 4
Donlon-Granger	000010100000—2	Granger-Donlon	000010100000— 2
Bonestel	011110101000—6	Eastin	011111111001— 9
Total	82	Total	79

Second match for a purse of $15; five birds.

Goodwin	4	Chrisman	3
Charlebois	1	Pixley	2
Foulks	3	Abbott	2
Leech	3	Hall	3
Sifford	4	Bonestel	5
		Kaiser	4
		Coffman	2
		Beal	4
		Warring	2
		Eastin	4

Bonestel took first money. In shooting off ties of four Sifford and Kaiser missed first bird and Eastin dropped out the second. Goodwin and Beal finished as follows:

Col. Goodwin.....1111111111—10 | Miller Beal.....1111111110—9

Goodwin second money and Beal third.

Farm Accounts.

An important difficulty in keeping accurate farm accounts lies in the fact that there are many expenses which it is not easy to classify or charge against any particular crop. Such iteme can only be deducted from the final showing of profits at the end of the year. In striking a balance with each crop separately sometimes an apparent profit is shown, yet it is quite rare to find the supposed gain in ready cash at the end of the final accounting. A little thought will convince each farmer that there are many little nnnoted items of expense and loss which detract from the apparent gains on ths farm. Thus in all northern sections a large proportion of the hay, etraw and coarse fodder, besides some corn and oate which were harvested in the fall, have been consumed in the feeding of stock of various kinds, and which it was necessary to keep for the proper working of the farm. The keeping of a team of horses may cost the farmer from $250 to $300 per year, rating the expense of feed at the ruling market price, and unless the farm is so managed as to give employment to the horss labor during most of the year, much of thie outlay must prove a clean lose and must be deducted from the apparent profits in other branchee of farm economy.

To the credit of the unworked team there is, to be eure, a small item in the manure pile as an offset to ths hay and grain fed out, yet if this, too, is half wasted in its management, as is too often the case, the farmer would be better off to sell his team and hire hy the day euch service as he requires. Observation shows that there are many farms which, from their limited area or want of thorough tillage, do not warrant the expenee of keeping a team, yet we can find hnt few owners of such farms who are willing to acknowledge this as one canse of their ill-success, though they are ever ready to complain that they cannot make both ends meet. If a careful account of the cost of keeping and the returne of each farm animal were kept, there would soon be a general clearing out of such old and worthless stock as is now kept only because it cannot be sold at a profit. A poor, inferior animal is dear even as a gift if it must be fed and kept up. When it requires good management to make the choicest animals pay a small percentage of profit over the expenses, there certainly can he no gain in feeding the poorest stock.

The same principle holds true respecting farm crope. Very fsw farmers can state with any degree of certainty which of their crops pay a profit and which do not. They grow certain crops from motivee of habit and tradition, because their fathers did so before them or because their neighbors set the example. Particnlar crops are raised from their certainty of yielding money receipts, yet the actual cost is seldom regarded. If such cash crops demand in their prodnction the hand and team labor of tbe whole farm, together with most of the mannrs on the place, then oftentimes the profit therefrom is seriouly reduced or perhaps wiped out altogether. It is this absence of close calculation that bas been the ruin of thousands of farmers. Not knowing where to look for the leaks in their business management, tbey are often unable to check tbe errors until the moet serious consequnces have been incurred. The more accurate accounts of the merchant and the manufacturer enable them to determine whicb brauch of business yields the profit and which neede to be abandoned.

Just before entering upon the summer campaign, is an excellent time for the farmer to make an inventory of his real and personal property. An annual practice of this nature would soon determine the actual profit or loss of tbe business, and lead the farmer to select such stock or such crops ae showed the best returns in their management. It is worth some trouble to know just what property is scattered over tbe farm. Some of the shrewdest farmere in the country have a clearance sale every few years at auction, of old tools, implements, wagons and the like, huy anew and take a fresh etart. Others, less shrewd, are always on hand at such auctions to pick up that which they are pleased to denominate as hargains. Possibly there are a sufficient numher of exceptious to coufirm the rule, hut it rarely pays to huy or use anything at second-haud. An old wagon may and probably will give out just at the time when labor is scarcest and when crops are most in need of being gathered into sacks or harne. The failure of an old reaper at the critical time of harvest may cause loss sufficient to huy a new one, that with proper care will be just as good after the first harvest as before it began. We have seen farmers market an entire crop of grain in hags which would waste enough in going to market to purchase new ones three times over. The farmer'e business ie made up of a succession of small items, and it is only by attention to these innumerable details that it can be made a success. Many a man goes to work with extravagant expectations of profits which for a time he may believe he is realizing, hut if he does not attend to the minor details, if he doee not keep an accurate account with his animals and his crops, his failurs is only a question of time.

A USEFUL ARTICLE.—Rawson's U. S. Army Suspsnsory Bandage is, ae the cnt connected with the advertisement elsewhere clearly shows, a complete relief and eupport, and should be in general use. It is self-adjusting, and displacement ie impossible. It counteracts nervous tension and other ille that mankind is heir to. Sold hy all druggiets. Can be sent hy mail safely. Addrees S. E. G. Rawson, patentes, Saratoga Springs, N. Y.

ROWING.

Peterson's Victory.

Owing to the roughness of the water on Sunday the single-scull race between P. J. McInerney of Lowell, Mass., and Henry Peterson of the Ariel Rowing Club of this city was postponed until Tuesday at 10 a. m. There was much dissatisfaction among Peterson's backers at the postponement, as the rough water was to the advantage of their man, and it was believed that delay would enable the Eastern sculler to improve his condition, which was not of the best. McInerney had had but little practice in his boat, which was delayed on the railroad. Most of his work had been done on land, and however healthful walking may be, it is but a poor substitute for hard work on the water. The referee, Capt. Brannan, was, however, inflexible in his determination to postpone the race so as to give the stranger a fair show, and despite the protestations of Con Lynch, Peterson's mentor, the race was set for Tuesday. On Sunday evening McInerney took a spin over the course, which was then smooth as a mirror. He showed considerable dash, and those who saw him scull and had their money on him felt encouraged. On Monday he was in his boat twice and expressed himself perfectly satisfied with his rig. On Tuesday morning the wind was from the west and was just strong enough to ruffle the bay and yet leave the water in tolerably good condition for sculling. Any San Francisco oarsman would have been perfectly satisfied to row through such water, but the Lowell man did not quite like the looks of the course, over which several yachts were scudding merrily. The referee, who appeared extremely anxious to give fair play, decided that the race should be rowed, and after the usual and painful and seemingly inevitable delay, the stake boats were set and everything ready for the commencement of the race. By that time the Long bridge was black with people. The crowd was the largest that had ever assembled on the bridge to see a boat race, and, considering the busy hour and the day, was doubly remarkable. Pool selling was lively, with McInerney the favorite at 100 to 80. On Sunday the Eastern man sold readily at 2 to 1, but the state of the course increased the confidence of Peterson's backers, and they were willing in some cases to lay even money. At noon the referee called the men out. Peterson was the first to show up and was loudly cheered. He wore the Ariel colors, white and blue, and as he pulled slowly down towards the line he seemed in the pink of condition. McInerney followed and looked somewhat anxious. The tide was running in like a mill-race and the "rip" seemed to trouble him. As he pulled down towards the start, however, he showed good form and the opinion strengthened that the race would be a good one. It proved anything but that. McInerney was the first to catch the water, notwithstanding the assurances of several of the morning newspapers which made a queer hash of the report of the race. The Eastern man won the toss and chose the inside, which was no advantage as the tide was equally strong in the stream. Had he led to the stake boat and been able to fight his way home, the inside position would have helped him, but it proved no benefit. Before the word was given McInerney took the water. One of the judges said something and the Eastern man stopped. As he did so the referee said "go" and Peterson commenced to row. The result was that the two boats got off pretty nearly even, notwithstanding the hasty start of the Lowell man. In the first 200 yards the scullers passed each other three times. McInerney shot the bow of his boat to the front ten feet. Then Peterson dashed in front. McInerney came up with another spurt and then both settled down to steady work and Peterson began to draw away very slowly but steadily. As the men passed the bridge the crowd shouted and the San Francisco man responded with a spurt that gave him half a length advantage. On passing the bridge McInerney seemed to be afraid of running into the yacht which lay ahead on the side of the course and looked over his shoulder anxiously a couple of times. Peterson kept on his way with hardly a glance ahead, steering as steadily as a ship, and soon had a clear length of the Eastern man. Off the ship yard, about 1,000 yards from the start, he was clear of McInerney, who was doing the best work he had so far shown. The Eastern man was rowing 36 and putting all his strength into the strokes while Peterson was rowing 32 and driving along at a fine pace over the lumpy water which had seemed to give him no concern whatever. About 200 yards from the ship yard the Eastern man made his last effort. He closed up the gap a few yards but the attempt exhausted his speed and he began to fall back at once. The hot pace so far had unmistakably pumped him and he was content to peg along at amateur speed and fall further and further behind. At the mile and a quarter there were three lengths of open water between the boats, and when the Eastern sculler looked over his shoulder and saw the condition of affairs, the last spark of hope left him. He lost another length in the next quarter but gained three in the turn. Peterson had been swept about forty feet up in the strong tide and had to row in to turn his stake boat "from inshore out." McInerney being well inshore got straight to his boat. He was a beaten man, however, and the advantage helped him none for he ran up in the tide and straightened for home so slowly that the Ariel champion regained his lead. Peterson steered an admirable course home. He worked gradually from the strong tideway into the lee of the Rolling Mills wharf and, hugging the shore home, continued to gain on the Eastern man until the procession was melancholy. At two miles, McInerney was about 100 yards behind. The winner finished in 22:27½, which, considering the state of the water, was fast time. The manner in which the course had to be rowed to escape the force of the tide made the distance somewhat over three miles. McInerney was beaten one minute and forty-seven seconds.

The victory of the San Francisco boy was of course received with tremendous applause. On stepping out of his boat, the champion who looked as if he had taken a practice pull, was presented by President Growney of the Ariel club with a beautiful gold medal, the gift of Alma Stuart Stanley.

Peterson's performance shows that he is a remarkably good man, and it also tends to prove that if McInerney is a "second rater," as classified by some Eastern journals, we have several men of that class here. There are at least three men here who can finish far closer to the champion than McInerney did. It is very likely that the Eastern man was not in good condition, but no training will make him beat the Ariel sculler. In the last week of his training the Eastern oarsman began to have an improved opinion of the San Francisco oarsmen, and said to an admirer of rowing that he was greatly surprised to find so many good scullers here where there is so little talk about rowing and so little of it done.

Much sympathy was felt for the defeated Eastern man, who during his sojourn here has acted in a very manly and straightforward way and by his conduct won numerous friends. Although McInerney is a much larger man than Peterson, standing 6 feet 3 inches, and weighing in condition 185 pounds, he seemed smaller in his boat than the San Francisco boy, who is 5 feet 10 inches and 173 pounds in condition. Peterson is a professional waterman, and has attained his knowledge of sculling under the careful and intelligent tutelage of Con Lynch, who deserves great credit for the manner in which he prepared the boy for the race. Lynch backed the lad for all he was worth and the result shows that his intelligence was as good as his nerve. Peterson is about twenty years old, so that his chances of getting into the first class make that contingency not only possible but exceedingly probable. The stakeholder in the race of Monday was Supervisor Griffin; the judges, for Peterson, Alfred Branch and Con Lynch of the Ariels; for McInerney, Hamilton Dobbin of the Golden Gate club, and J. Shelley of the Alert club of Vallejo. The stakes, $1,000, were paid without any objection.

It begins to look as if the Ariel four who won the BREEDER AND SPORTSMAN's cup on last Thanksgiving Day are not to be allowed to retain undisputed possession of that trophy. The Pioneer Club is bestirring itself to form a new crew and evinces signs of renewed activity that promises good results. The club has been woefully inactive and unsuccessful, and the bad fortune has been the result of indolence and carelessness. The club should be one of the very best on the coast, as it has a good membership and plenty of boats. There is no doubt that if an earnest effort be made, the club can put forward a crew that should be able to do it credit in the next race for the cup, and if beaten will not be disgraced. Next Sunday the club will hold a meeting and take the first step towards selecting a crew to row for the BREEDER AND SPORTSMAN cup. The Pioneers show an earnestness in the matter that augers a good race and a restoration of the old club to a justly prominent place in aquatic affairs.

Henry Hussey says that it was no wonder McInerney got beaten with the sculls he used, a pair of London make, which Jack Largan used in his late races in Australia. Peterson used a pair of Henry's own make, and they certainly did good work. Altogether it was a great day for California and the only sad man was John Twigg, for if Peterson had used John's boat he would have won just as easily.

President Growney of the Ariel Club, who is a very popular and withal modest gentleman, is an ambitious boxer, as well as an aspiring oarsman. He would make his mark with the glovee, only that he can't afford to discard his intellectual epectacles, and the amateur boxing rules forbid any competitor from glaring at his opponent through a pair of blue goggles.

The oarsmen of this city are anxious to know when the Amity Rowing club of Stockton is going to buy the boats it has been examining. The boys here begin to think the Stockton oarsmen do all their rowing on land. The Stocktonians might get up a crew or find a sculler and send them or him down to remove the unfavorable impression.

Assemblyman Murphy witnessed the boat race from the top of the Potrero gas works and yelled so lustily when the Californian oarsman turned his stake boat first that he almost dislocated his jaw. Considering the strength of the organ, this was a most remarkable incident. Ever since the athletic Assemblyman has been complaining of neuralgia.

Louis White won a pot of money on Peterson and has sent East for a new paper shell, in which to row Griffin. Louie cannot swallow his defeat by the featherweight sculler and is bound to have another trial. Fit and well he will give Griffin a hard race, as he rows fast and only needs condition to stay the distance.

Con Lynch, who brought out and trained Peterson, gave up a position at $5 a day to attend to the lad and staked several hundred dollars of hard coin in his protege. Everybody thought Con was taking desperate chances and he certainly gave a good exhibition of nerve.

Dan Leahy lost some money on the Peterson-McInerney boat race. The aquatic peeler bet with Louis White that 23 minutes would not be beaten. White had a close shave, as he laid odds that the race would be rowed inside of 22:30. It was rowed in 22:27 1-5.

The most disgusted man on Long Wharf last Tuesday was Leander Stevenson. "Golly!" said the disheartened supporter of McInerney, "Pete got away with him bad, but wait till Pete tackles my big brother. Gosh! won't the long fellow warm him."

Peterson has a young brother who will, one of these days, be making it exceedingly lively for the champion. Even now he can make his big relative extend himself.

Iron's Cadmus.

Mr. Wm. H. Bennett, of Richmond, Ind., has written to a local paper some facts in relation to the history of Iron's Cadmus, the paternal grandsire of Smuggler, whose record of 2:15½ is the best ever made by a stallion. Mr. Bennett says:

"About forty years ago, Goldsmith Coffeen, the great 'harness man,' whom turfmen will all remember as the pool buyer at all the races in this country (and, by the way, considered a crank), bought an old thoroughbred mare in Kentucky, sired by Sumpter, a horse whose pedigree can be found in the stud book. I think he was by Sir Archy. She was a pacer, and never known to trot. At the time he bought her she was said to be in foal to a thoroughbred horse. Old Goldsmith sat up with her of nights until she foaled, and to his great surprise and disgust he was presented with a mule colt. He then bred her to Beach's Cadmus, a black horse with white points, a son of American Eclipse, and Iron's Cadmus was the result. My old partner, Wm. F. Spinning, bought him of John Iron, I think about 1848. He made two seasons here, and two more at Liberty. He then went back to Middletown, O., where he sired my old stallion Red Oak. He went from there to Wheeling, Va., where he sired Blanco, the sire of the great Smuggler. He was then purchased by a company in Missouri, and shipped by steamboat, but died on the passage, of lung fever, at the age of about twenty-three.

"When Iron's Cadmus was first broke he was used as a fox-hunter, and, it was said, could jump a higher fence than any other horse in Ohio. He stood first at Lebanon, O., at $3 to insure, with very poor success. When he came to Richmond, my partner, regarding him as a very fine horse, which he certainly was, raised to $5, but he did a very moderate business. Mr. Sutton stood him at Liberty at $7, with about the same success. At Middletown, near where he first saw the light of day, he stood at $20 and did a good business, and at Wheeling his services were in great demand at $50."

The report that Piedmont would be campaigned in the East this season is incorrect. The representatives from Palo Alto will be all youngsters.

Farewell to Felters.

Not very many places in New York have been better known in days gone by, to men who like good drinks and good stories, than Harry Felters' old grocery store and "California side-board house," on Broadway, near Prince street. For forty years it has been the resort of all classes, law abiding and not law abiding, but now it is to be pulled down, for it stands in the way of modern improvements. So the old order changeth.

"Forty years ago Prince street was on the very verge of civilization," said the late Abram C. Dayton in his book entitled "Last Days of Knickerbocker Life in New York." Since then Prince street has been during a long period the very heart of the metropolis, and more reminiscences cluster about the neighborhood than any other locality in the great city. A business which has existed in this part of the town during the whole time referred to by Mr. Dayton must in itself be a history of the locality. Such is the story of Felter's, and it is the only business in the neighborhood which began with the improvement of this part of the city and has outlasted the onward and upward march of population.

Harry Felter's first customer was John Jacob Astor, whose descendants are now tearing down the old building for a block of shops. The office of Mr. Astor remains now where it was then, but times have changed and Felter's could not change. His second customer was Billy Niblo. Niblo had been a carterer on Pine street, but as early as 1828 he opened a suburban place of entertainment and refreshment at the place which was then and is still called Niblo's garden. In the years that intervened before Felter's advent many changes had taken place in the neighborhood, and Niblo's was, what it now is, Niblo's theater. When Harry Felter began business at the corner of Prince street, opposite Niblo's saloon, on the northwest corner of Prince and Broadway, and not No. 560, to which he subsequently removed and remained so many years, the garden was then the favorite summer theater of New York. John Sefton was the stage manager. Further down the street the little Olympic, with Mitchell at its head, was in the height of its popularity. The New York of the time lay to the south, the east and the west, but already had begun that upward movement which was to transfer the fashionable quarter of the metropolis to Bleecker street as only a temporary stopping place on the march towards Murray hill. Commercial New York was, however, as it ever must be, in the narrow and crooked thoroughfares, which for went of a better name can only be described as "down town." It so happened that, although when Mr. Felter first went into business Prince street was on the very verge of civilization, the fashionable part of New York was soon clustered above and around him, making the locality the center of life and population. In those days Felter's became a favorite resort for our fathers and grandfathers.

Felter belonged to a type of which he is the last living representative—a type which bound the New York of the last to the New York of the first quarter of the nineteenth century. So remarkable was his personal magnetism that in all the years he was in business he always made a friend when he made a customer.

Felter's was not a "saloon," or a "gin-mill," or a "bar-room," but one of the first—if not the first of the "California sideboard houses." In a back room, behind the hams and piles of cheeses and sacks of coffee and barrels and cases of wines and liquors, were a score of easy chairs and a side-board, with an attendant. There was no bar. The store was for men exclusively, not for women. Heads of families stopped and ordered supplies sent home, cracked jokes and went to their business. Harry was an accomplished horseman. He was exceedingly well versed in the mysterious "lingo" of the road and the racecourse, and he was equally an authority upon the sporting intelligence of the present and the sporting history of the past. Tattersall's was in Broadway between Howard and Grand streets, when he began business at Broadway and Prince streets, and the horsemen of that time were among his constant visitors. The horse talk at Felter's during the last five and forty years would comprise a complete history of the American turf. From the time when Boston and Fashion contended for victory—from the time when Flora Temple gained those marvelous triumphs which compelled her acknowledgment as the Queen of the Trotters down to the epoch of Dexter and Goldsmith Maid, and so to the present the sideboard at Felter's has been the silent listener to the glories, secrets and confidences of the racecourse. William T. Porter, "the tall son of York," and founder of Porter's *Spirit of the Times*, many times discussed with his friend, the host, the merits and claims of Confidence over Ahdallah. Henry William Herbert, whose works on the horse are still text-books among American breeders, came too, sorry to see his chief yielding more and more to the appetite for strong drink. There, too, one would often see George W. Miller, of the New York Tattersall's, just in from speeding his Pegie Magie and Ice Pony; William Cowan of the Crosby Street Bazaar, relating stories of the achievements of his Sally Miller; General Dunbam, with tales of his powerful Moscow; John C. Perrin, the first owner and driver of Flora Temple, who, shrewd horseman that he was, picked her out from a herd of common animals and bought her for $80, and Sam Segue, a name unknown to New Yorkers of this epoch, but that of a man who well deserved fame, as is proven by the fact that he was awarded the first premium at Tattersall's as a talker. Segue was the typical horse dealer of his time, whose horses were "pictures" or "star gazers"—"no mud turtles." Often vis-a-vis with him was Commodore Vanderbilt, whose love of a horse was as great as that of his son William H., and who was as readily tempted to buy a "flyer" as a steamboat or a railroad. One of the most noteworthy, because one of the most accomplished, horsemen who visited Felter's was Hiram Woodruff, and with him would be seen upon occasion Jo Elliott, still sound in limb and strong of head though he has passed the allotted three-score and ten; Geo. Wilkes, Colonel Bruce and other writers on the subject in which Woodruff took a deep interest; Backman and Dryadick, well known in connection with the introduction of the Hambletonian stock into this country; George Alley, the first owner of Dexter; Horace Jones, James McMann and Charley Brooks.—*World*.

The trotting stallion Mars, belonging to John Reber of Lancaster, Ohio, ran away and killed himself one day last week. Mars had no record but was valued for his breeding. He was a chestnut, sixteen hands high, four years old, sired by Great Western, son of Mambrino Patchen. First dam Orino, by Miller's Hambletonian; second dam by Alexander's Edwin Forrest; third dam by Berthune (thoroughbred); fourth dam by Blackburn's Whip.

The California Schuetzen Club held their monthly prize-shooting Sunday last at Alameda Schuetzen Park, with the following result: Champion goblet and first-class medal, F. Freese, 422 rings; second-class medal (finally), [illegible] mann, 384 rings; third-class medal, C. Lingenf[illegible].61 rings; fourth-class medal, Roschell, 257 rings.

Eel River Fisheries.

Near the close of last month the State Fish Commissioners held a meeting in San Francisco, at which the proposition of establishing a salmon hatchery at Eel river was discussed.

In the course of that discussion Mr. Buckingham made the uncalled-for and unwarranted statement that a hatchery in Eel river would benefit one man—intimating that it would not be of general benefit—a statement which it is hardly necessary to denounce as false and fictitious. The following communication from one of the oldest residents in Eel River Valley furnishes facts which are correct in every particular, and places Mr. Buckingham's statement in the position which it properly merits:

TO FISH COMMISSIONERS DIBBLE, REDDING AND BUCKINGHAM, SAN FRANCISCO, *Gentlemen:* I wish to call your attention to the importance of establishing a salmon hatchery on Eel river. Salmon fishing has been carried on in Eel river every season from 1852 to the present. From 1852 to 1860 about 2,000 barrels of 200 pounds each was an average catch. Up to this time there were many Indians living along the river from its month to its source, and of course they caught large quantities of "seed" salmon on the spawning grounds. Then the Indians were all removed to the reservations, and the settlers caught but few, so the "seed" salmon had almost a free run, and the regular run of salmon began to increase largely until in 1880 there were salted and canned the equivalent of 5,000 barrels of 200 pounds each.

At this time the price of salmon being better and the demand large, a great many persons engaged in fishing, and a general law being passed changing the open and close season for the "rivers of California," was decided by our District Attorney to repeal the close season as provided in the Eel River law, and since then salmon fishing has been going on almost all the year—catching the "seed" salmon while on the spawning grounds through the months of December, January and February, when they are unfit for anything but the barbarous appetite of a Chinaman or an Indian. Then the small fry that are hatched out the latter part of the winter and early spring show themselves in large quantities in the river in August and September, and are caught in small-meshed seines and sold for front. They are really young salmon, weighing from one to two pounds each. They have neither milts nor spawn, which would be the case if they were trout or mature fish.

The yearly catch has materially fallen off the last three years. At the proper time we hope to have legislation adapted to the wants of Eel River. A general law, or a law that fits the requirements of Sacramento River, will not do for Eel River, because our open season should be through October and November.

About 75 years ago Eel River ran along the north side of the valley and emptied into the Ocean near the end of Table Bluff. Up to that time, the Indians tell us, there was a regular spring run of salmon, as well as a fall run, and that the spring run was greater than the fall run. Heavy freshets then caused the river to cut a new channel near the south side of the valley, and made a new entrance about twelve miles south of the old one. The spring salmon have not entered the river since. The mouth of the river is now about half way between the two extremes.

About twelve miles up Eel river is a never-failing stream coming from the redwoods, and carrying about ten inches of water throughout the dry season (and much more in the winter), where a flume can be built to take as much water as is required for hatching troughs, where they can be set out of reach of the freshets in the river, so that the works would be permanent. The proper site for this hatchery is on lands belonging to Hon. Joseph Russ, who, with reputed liberality, offers to contribute as much privilege as may be required for that purpose. I am confident if a hatchery is established here, and the spawn of Sacramento and Columbia spring salmon are propagated and turned loose, we would soon again have a regular run of spring salmon. There is a good opportunity to catch as many "seed" salmon as wanted out of the river near our proposed hatchery in the month of December.

Another reason for the opinion that a spring run of salmon can be introduced in Eel river is that the mouth of Klamath river is only thirty-five miles north, where there is a regular and large spring run, but it is not much utilized by the whites from the fact that twenty-five miles of its length is occupied as an Indian reservation.

The salmon coming into Eel river are not what may be called "coast salmon." Coast salmon proper run into such streams as Russian, Mattole, Bear and Mad rivers, the mouths of which are closed up by sand during the summer season, so that salmon cannot get in till opened by the winter freshets.

Eel river is a larger stream, probably 200 miles in length, and ten or twelve feet of water on the bar at its month all summer. The quality of Eel river salmon for salting and canning is first class, and has long borne a high reputation (see Cronise's "Resources of California".) There were employed in fishing on Eel river last season 25 seines, 60 nets, and about 300 men, not including those employed in the canneries.—*Eureka Times-Telephone.*

Coughs and Colds. Those who are suffering from Coughs, Colds, Hoarseness, Sore Throat, etc., should try BROWN'S BRONCHIAL TROCHES. Sold only in boxes.

Borrowing Fowls for Exhibition Purposes.

I wish to enter an earnest protest against the meanness and dishonesty of borrowing fowls to exhibit at the fairs in competition with the fowls shown by their breeders. The fairs are intended to bring forward the best results of a man's honest skill and investment, and when an exhibitor is allowed to show borrowed birds it defeats the aims of the fair, deceives those who purchase stock from him, and is in every way an unworthy proceeding. And yet this has been done by a man who pretends to prominence in the poultry business, and by his action I was defrauded of some premiums to which I was honestly entitled. I desire to make this prominent mention of these facts that visitors at the fairs may know beforehand the tricks of some exhibitors, also to warn those who propose to get premiums in this way that their acts will not be passed over in silence in the future.

THOMAS WAITE.

Brighton, Sacramento County, Cal.

THE SCOTTISH THISTLE CLUB

HOLD THEIR PICNIC AND GAMES AT BADger's Park, Oakland, on

MAY 12.

Donald Dinnie, champion athlete of Scotland, and Wm. F. Farrell, champion of this Coast, will contest in wrestling for the championship of the world.

100 Prizes, from $2 50 to $50

each, will be given to the winners of 35 games at this gathering of the clans. Tickets for sale at 603 and 781 Market, 238 Kearny and 3 Montgomery streets.

J. D. COULIE, Chieftain.

CHOICE Brood Mares FOR SALE.

ON ACCOUNT OF THE OWNER'S ABSENCE abroad, which prevents his giving his personal attention to his stock, the undersigned has been requested to offer for sale the following choicely-bred broodmares. These animals are just as represented. In breeding, health, form, size, color and disposition—in everything that goes to make up desirable stock for breeding purposes—They present an exceptional opportunity. They are not discarded, broken-down trotters, but are in their prime, perfectly sound and in vigorous condition. Like their sires, they are themselves trotters and are all purely gaited. Their breeding qualities have been tested. The get of each is highly promising and not for sale. To save time and correspondence, full and correct pedigrees are given below and from the prices named there will be no deviation:

HECLA.

(Standard. See "Wallace's Trotting Register.)" Bay mare; sixteen hands high; foaled 1873; got by Almont (sire of 70 winners of contested races, 20 with public records below 2:30), son of Alexander's Abdallah; dam Haidee, by Mambrino Chief; second dam Zenith (5940); bred by D. Swigert, Esq., Kentucky. Hecla is pronounced by competent judges to be one of the finest broodmares in America. Has had three fine colts, one of which, a yearling by Orange Blossom, may be seen with her. Is again in foal to Orange Blossom. Colt due end of June next.

Price $1,200.

MINNIE H.

Brown mare; sixteen hands; three white feet and blaze in face; foaled 1875; got by General Knox (sire of Lady Maud, 2:18, Camors, 2:19¾, and about ten others in the 2:30 class); dam Sallie Groves, by Prince Moscow Jr.; second dam Tuck (a fast pacer), by blind Tuckaboe; bred by Hon. H. B. Holton, Powhatan, Md. This mare trotted in 2:36 while in Mr. Holton's possession, previous to being put to breeding. Has fine yearling filly and has not yet been bred this spring.

Price $750.

VARILLA.

Bay mare; very nearly sixteen hands high; a trifle white on one hind foot; as near as could be ascertained by the owner the age of Varilla is twelve years; got by Middletown (sire of Music, 2:21, Nellie Irwin, 2:23, Orange Blossom, 2:26¾ and others), by Rysdyk's Hambletonian; dam by Hector, by Latourette's Bellfounder; bred by D. B. Irwin, Esq., Middletown, Orange Co., New York. The present owner of this mare has three of her colts, all of fine size, weight and promise; one, a four-year-old, has been sent to Dr. Herr, Lexington, Kentucky, for training. Varilla has a filly, foaled April 14, 1883, by her side by Meadow Chief, be by Hamlet (sire of Lcontine, 2:21½, Brookside Flora, 2:29), by Volunteer, and has not yet been bred this season.

Price $750, or $900 for mare and foal.

To one purchaser the three mares will be sold for $2,500 cash. The owner respectfully refers to the "Spirit of the Times," New York, and to Joseph Cairn Simpson, editor "Breeder and Sportsman," San Francisco, Cal. Address, or call on,

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY
Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23¼; another with a record of 2:26, made in 1882; another with a record of 2:28¼, and a grandson with a three-year-old record of 2:23¼, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20½ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15½ to 2:27½. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23¼ to 2:28¼, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¼, by Happy Medium Jr.; and Carrie B, 2:28¼, by Elial G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address

WILLIAM T. WITHERS,
2-13y1 Lock box 392, Lexington, Ky.

ASHLAND PARK
TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

2-17y1 **B. J. TREACY**, Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TO

Sportsmen & Pleasure-Seekers.

THE

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT ROOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA THE

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggageman. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞ In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt Agt.

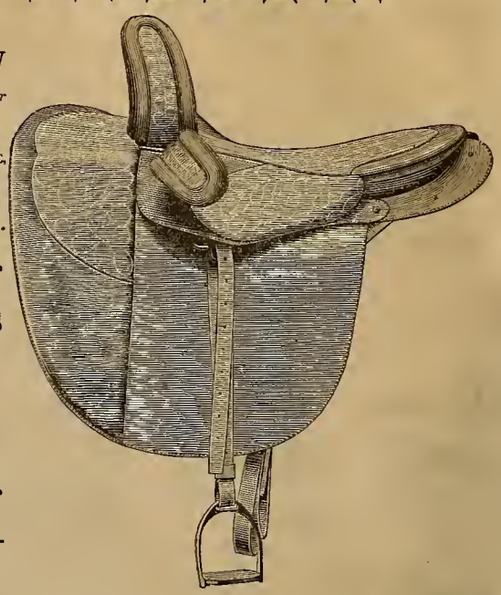
Whitman Saddle Company

For the Pacific Coast, I have in stock full lines of their celebrated goods.

SADDLES FOR ROAD, RANCH OR PARK USE, With or without the California horn.

TRAINING SADDLES.

Ladies' saddles on hand or made to order in special styles



THE TRADE SUPPLIED

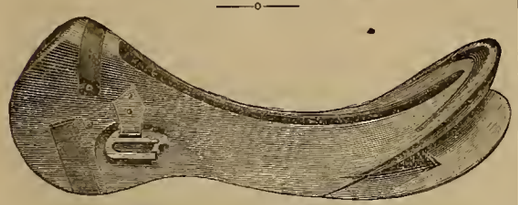
AT MANUFACTURERS' RATES.

An Inspection of these Goods is Invited.

Illustrated Catalogues sent free on application.

JOHN A. McKERRON, 230 and 232 Ellis Street, San Francisco.

WHITMAN TREES.



HAVING ON HAND A LARGE SELECTION OF

WHITMAN TREES,

I AM PREPARED TO MAKE UP SADDLES IN ANY STYLE DESIRED BY CUSTOMERS, WITH OR WITHOUT THE CALIFORNIA HORN.

Trees for Sale to the Trade

IN QUANTITIES TO SUIT,

AT MANUFACTURERS' PRICES.

JOHN A. McKERRON,
230 and 232 Ellis street,

SOLE AGENT FOR THE PACIFIC COAST.

WHITMAN PARK SADDLE.

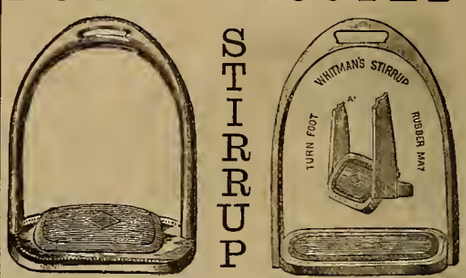
EASY AND SAFE

Riders or those who intend to become good riders should try these saddles. In conjunction with the WHITMAN COMBINATION HALTER-BRIDLE and the WHITMAN RUBBER-FOOTED STIRRUP these are the most stylish and comfortable outfits in use. They can be finished to suit any taste at from $15 upwards.

JOHN A. McKERRON,

230 and 232 Ellis St., Sole Agent for Pacific Coast.

WHITMAN'S RUBBER-FOOTED STIRRUP



THESE STIRRUPS ARE VERY HANDSOME AND THE RUBBER MAT A GREAT CONVENIENCE AND COMFORT TO THE RIDER, AS THE SLIGHT AMOUNT OF ELASTICITY PREVENTS SHOCK, WHILE THE ADHESIVE PROPERTY OF THE RUBBER HOLDS THE FOOT IN PLACE WITHOUT EFFORT.

No person ofter once using them will use any other.

JOHN A. McKERRON,

230 and 232 Ellis Street, Sole Agent for the Pacific Coast

ANTEEO.

13th " By Spanker.

See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.
Will make the ensuing season, 1883, from February 15th to June 15th, at the Oakland Trotting Park. Terms $50 the season.

JOSEPH CAIRN SIMPSON,
Oakland or 508 Montgomery street, San Francisco.

THOROUGHBRED STALLION

X X,

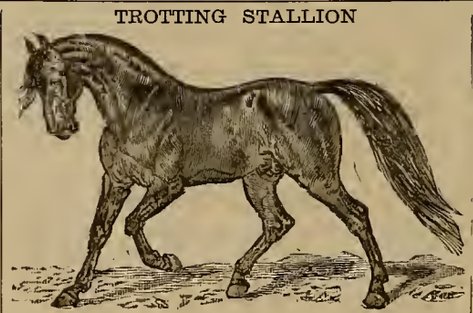
BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by Imported Bonnie Scotland, his dam, Columbia, also by Imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wanamita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland,
or 508 Montgomery street.

Mares intended for either of the above stallions, and sent by Donahue's Petaluma, Sacramento or Stockton boats consigned to J. W. Morehead, City Front Stables, will be received, good care taken of them and forwarded to Oakland.

TROTTING STALLION



Eugene Casserly.

SIRE OF SWEETBRIAR, 2:23¾; NAPA QUEEN, 2:28¾; ROCKwell, 2:39; Bill Woodward, 2:40; Smoothbriar, two-year-old record 2:57; May Day, two-year-old record 2:59¾. Will make the season of 1883 at Oakland on Thursdays, Fridays and Saturdays and at Walnut Creek Sundays, Mondays, Tuesdays and Wednesdays. He was sired by General Taylor, dam Jennie by Lexington. Terms $30 for the season. Good pasturage at reasonable rates. No responsibility for accidents or escapes. Address

THOMAS S. BREMNER.
Seventeenth street and Telegraph Ave.,
Or J. M. Heinold, 1426 San Pablo Avenue, Oakland.

TROTTING RULES.

RULES OF THE NATIONAL TROTTING ASSOCIATION FOR sale at this office. Price 25 cents per copy, paper. Pocket edition 50 cents. Also

"THE TURFMAN'S DIRECTORY,"

Compiled by Thos. J. Vail, Secretary of the National Trotting Association.

THAD STEVENS.

THIS THOROUGHBRED HORSE WILL BE AT AGRICULTURAL Park, Sacramento, for the season commencing Feb. 1 and ending the 1st of July next. Good pasturage for mares will be provided at $3 per month. For terms and particulars apply to or address

W. M. MURRY, Agent,
Sacramento Racetrack.

THE CELEBRATED TROTTING STALLION

ERWIN DAVIS

WILL MAKE THE SEASON OF 1883 AT OAKLAND TROTTING park.

DESCRIPTION.

Erwin Davis is a beautiful mahogany bay with very black points and one hind foot white; 15 hands high; of superior good disposition and fine trotting action.

PEDIGREE.

Erwin Davis was sired by Kentucky Hunter (Skenandoah) by broken-legged Kentucky Hunter (the sire of Flora Temple) by Ferguson's Kentucky Hunter, by old Kentucky Hunter, by Highlander. Erwin's dam was Lost Diamond, by Vermont Hambletonian.

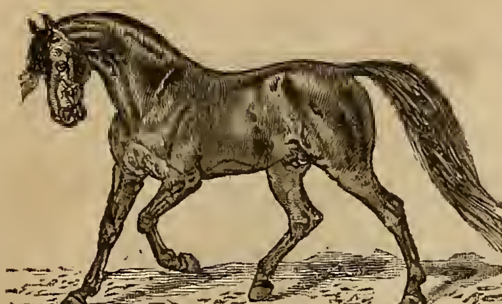
TERMS.

Twenty-five dollars fort he season, payable at the time of service. Good pasturage at $5 per month. No responsibility for accidents or escapes. For particulars apply to

JOHN ROGERS,
Oakland Trotting Park.

STALLIONS.

UNDERMAN.



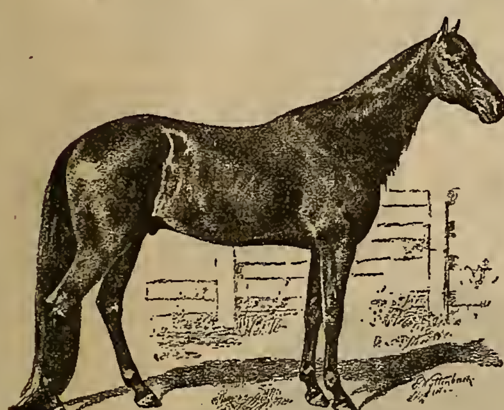
SIRED BY ELMO, DAM BY TOM HYAR SON OF OLD Belmont, will make the season of 1883 from March 1st to July 1st at the Bay District Track, San Francisco.

Underman is a dark chestnut, with blaze face and left hind foot white. Coming six years old, 15¼ hands high and weighs about 1,100 pounds.

Terms, $20 for the season. Mares not proving w'th foal can be returned next year free of charge. No responsibilities assumed for accidents. Apply to

FRED RENNETT.
Bay District Track, San Francisco.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2:21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Columbus. Woodford Mambrino by Mambrino Chief, his dam Woodbine by Woodford, a thoroughbred son of Kosciusko.

Woodford Mambrino is recognized to be the best son of Mambrino Chief. His own record is 2:21½, and there are a large number of his get in the 2:30 list. Among them: Abbottsford, 2:21½; Convoy, 2:22½; Magenta, 2:24½; Lady McFatridge, 2:29; Dacia, 2:29½; George A. Ayer, 2:30.

Besides those having public records, he is the sire of the two celebrated mares owned by Robert Bonner—Manetta and Malice. Manetta, with a running mate, and harnessed to a road wagon, trotted two miles in 4:27¼, and Malice trotted a trial, on the same track, a mile in 2:19¾. Woodford Mambrino is also the sire of Princeps, the sire of Trinket; record, 2:14. Woodbine is also the dam of Wedgewood, record, 2:19. Young Columbus, the sire of the dam of Abbottsford, has nine of his get in the 2:30 list, so that on both sides of the house there are notable performers. Abbotsford is a rich rosewood brown, 15¾ hands, and of very high form. His get are very promising, his daughter Jasmine having won the Embryo Stake for yearlings in 1881, and every one which has been put in training has shown good speed.

TERMS.

Seventy-five dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

LOCATION.

Abbotsford will make the ensuing season, 1883, on the ranch of S. B. Whipple, Esq., San Mateo, season commencing February 15th and ending June 1st, 1883. For full history see the issue of BREEDER AND SPORTSMAN of August 5th, 1882.

GEORGE BAYLIS, Agent, San Mateo, Cal.

MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,260 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

☞ George Wilkes has twenty representatives in the 2:30 list, of which 10 have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.

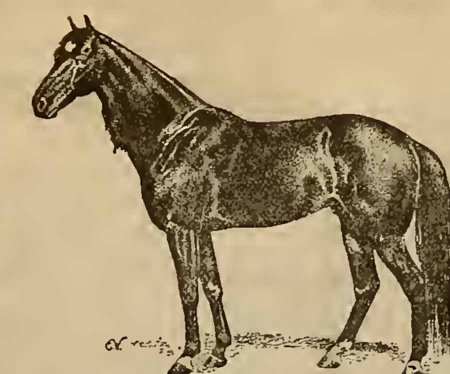
Will make the ensuing season, beginning February 1st, 1883, at STOCKTON.

In putting the price by the season at the low figure of $40 the owner does not acknowledge, thereby, any inferiority on the part of this horse to any other sire of Trotters.

IRVIN AYRES.

STALLIONS.

THE TROTTING STALLIONS



SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMING SEASON, FROM Mach 1st to July 15th, 1883, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

PEDIGREE.

Singleton is by Willie Schepper, a son of Rysdyk's Hambletonian, his dam Lightfoot (the dam of Pride) by Flaxtail, a son of Pruden's Blue Bull.

DESCRIPTION.

Singleton is a dark brown horse, tan flanks and muzzle, a little touch of white on hind feet and one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was bred by Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

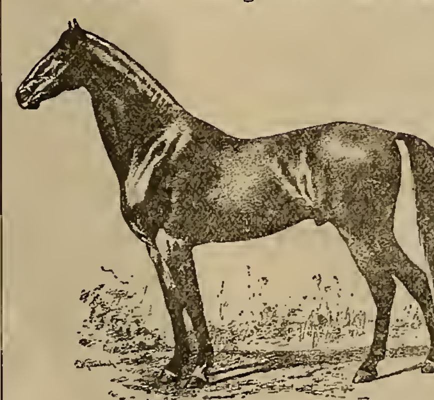
Fifty dollars the season. Mares not proving in foal will be bred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner their owners desire, at reasonable rates. There is every convenience on the place, boxes, paddocks and plenty of shade and water.

LA HARPE

Will also make a short season at the above place on private terms. La Harpe is by Fame, a son of Alexander's Belmont, his dam Prairie Bird by Flaxtail, the dam of Flight and Prompter. Address

J. T. McINTOSH, Chico, Cal.

The Fast Trotting Premium Stallion



ALEXANDER

WILL STAND THE PRESENT SEASON AS FOLLOWS: MONdays, Tuesdays and Wednesdays at Clark's stables, Santa Rosa. Balance of time at Fashion stables, Petaluma.

Alexander is by Geo. M. Patchen Jr., the sire of Sam Purdy (2:20½) Starr King (2:22) and Vanderlynn (2:22). Dam Lady Creim, by a son of Brown's Bellfounder, by imported Bellfounder. For full description see BREEDER AND SPORTSMAN of Sept. 9, 1882.

Of Alexander's get Tommy Dodd has a record of 2:24, Reliance 2:22½, Nellie Patchen 2:27¼, Eudora 2:34½, Inauguration three miles in 7:29—last mile in 2:26, Sonoma Boy 2:37. Alex. Button proved by his performance in 1880 to be one of the best three-year-olds which have ever appeared in any country. He won the stake for three-year-olds at the State fair, beating Belle Echo, Annie Laurie, Len Rose and others, winning the first, third and fifth heats and making a dead heat with Annie Laurie in the fourth; time, 2:31½, 2:30, 2:29, 2:30¾, 2:35. At the fair of the Santa Clara Valley Association at San Jose he won, beating Belle Echo and Len Rose; time, 2:28¾, 2:30¼, 2:33¾, 2:31¾. Belle Echo won the first heat. He won at Stockton, beating Honesty, Len Rose and Upright in straight heats; time, 2:32, 2:33½, 2:32½. In 1881, as a four-year-old, Button mdaea record of 2:26¾ over the Santa Rosa track. Dot Craig, by Alexander, has a private record of 2:29.

The Frasier team took first premium at the Sonoma and Marin District fair; also at Oakland for best carriage team.

Mares left at the City Front stables, San Francisco, will be forwarded. For further informatian apply to

T. T. UNKLESS, Petaluma.

STEINWAY.

TWO-YEAR-OLD RECORD 2:31¾; 3-YEAR-OLD RECORD 2:25¾.

TERMS

WILL SERVE MARES THE PRESENT SEASON AND ENDING July 1, 1883, at the stock farm of the late Daniel Cook, Danville, Contra Costa county, Cal., at $100 for the season, payable before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage at $6 per month, and extra pains taken with mares in attendance, but no liability for accidents or escapes. Mares sent in care of of McCleverty & Noblett, Fashion stable, Oakland, S. J. Bennett, Martinez, or D. S. Smalley, Haywards, will be forwarded immediately to the farm.

DESCRIPTION.

He is a rich bay; 15¾ hands high; long, flowing mane and tail; two white hind ankles; remarkable style and lofty carriage; has a good, resolute head, set on a stout neck; his shoulders are of the Hambletonian form—do not mount very high at the withers; has great length and capacious middle piece; plenty of bone and substance, and his gait is big and square.

PEDIGREE.

Steinway was sired by Strathmore.

First dam Abbess by Albion, the sire of Vanity Fair, with record of 2:24.

Second dam by Marsbal Ney, by imported Emancipation.

Third dam by Bertrand, by Sir Archy.

Steinway's dam is the dam of Solo with five-year-old record 2:28½, and also the dam of W. S. Buckner's colt Currency that trotted as a yearling last fall in 2:46. See N. Y. "Spirit of the Times of November 18, 1882. Strathmore is the sire of Santa Claus 2:17½; Chestnut Hill, 2:22½; Steinway, 2:25¾; Alice Stoner, four years old, 2:24; Nannie Talbot, four years old, 2:29; Solo, five years old, 2:28½; Monitor, five-year-old record 2:29; by Rysdyk's Hambletonian, the sire of 35 in the 2:30 list. Address

SAMUEL GAMBLE,
Danville, Contra Costa Co., Cal.

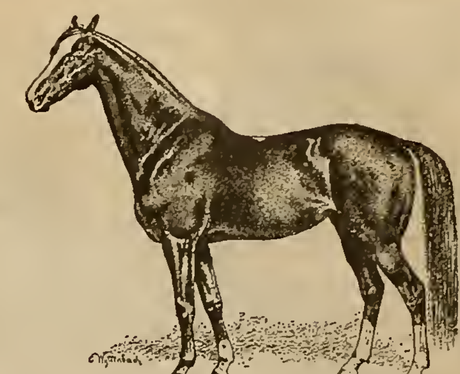
THE THOROUGHBRED STALLION



WHEATLEY

WILL STAND THE ENSUING SEASON, ENDING JULY 1ST, 1883, at the Oakland racetrack.

TERMS—$50, payable at the end of the season. Satisfactory arrangements can be made for pasturage near the track for mares from a distance.

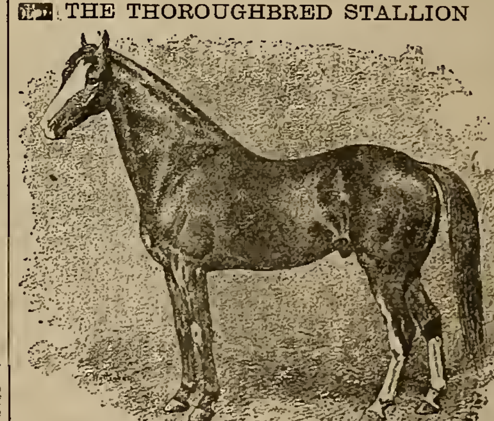
PEDIGREE AND DESCRIPTION.

Wheatley is a golden chestnut, 15 hands 3 inches high, and of fine style and appearance, and is by War Dance.
First dam sister to Pryor, by imported Glencoe.
Second dam Gipsy, full sister to Medoc, by American Eclipse.
Third dam Young Maid of the Oaks, by imported Expedition.
Fourth dam Maid of the Oaks, by imported Spread Eagle.
Fifth dam Annette, by imported Shark.
Sixth dam by Rockingham.
Seventh dam by Baylor's Gallant.
Eighth dam by True Whig.
Ninth dam by imported Regulus.
Tenth dam imported Duchess.
Eleventh dam Grisewood's Lady Thigh by Croft's Partner.
Twelfth dam by Greyhound.
Thirteenth dam Sophonisha's dam by Curwen Bay Barb.
Fourteenth dam D'Arcy's Chestnut Arabian.
Fifteenth dam by Whiteshirt.
Sixteenth dam Montague mare.

War Dance by Lexington.
First dam Reel, by imported Glencoe.
Second dam imported Galiopade, by Catton, the sire of Trustee.
Third dam Camillina, by Camillus.
Fourth dam by Smolensko.
Fifth dam Miss Cannon, by Oroville.
Sixth dam by Weathercock.
Seventh dam Cora, by Matchem.
Eighth dam by Turk.
Ninth dam by Cub.
Tenth dam by Allworthy.
Eleventh dam by Starling.
Twelfth dam by Bloody Buttocks.
Thirteenth dam by Greyhound.
Fourteenth dam Brockelsby Betty, by Curwen's Bay Barb.
Fifteenth dam Mr. Leedes' Hobby Mare, by the Lister Turk.

For further particulars apply to
MATT STORNS, at the Oakland Racetrack.
Or to Jas. B. Chase, 900 Front St., San Francisco.

THE THOROUGHBRED STALLION



JOE HOOKER,

BY MONDAY.

First Dam Mayflower, by imported Eclipse.
Second dam Hennie Farrow, by imported Shamrock.
Third dam Ida, by imported Belshazzar.
Fourth dam Gamma's dam, by Sir Richard.
Fifth dam by imported Eagle.
Sixth dam Bet Bosley, by Wilkes' Wonder.
Seventh dam by Chanticleer.
Eighth dam by imported Stirling.
Ninth dam by Clodius.
Tenth dam by imported Silver Eye.
Eleventh dam by imported Jolly Roger.
Twelfth dam by Partner.
Thirteenth dam by imported Monkey.
Fourteenth dam imported mare from the stud of Harrison of Brandon.

TERMS—$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at $4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento on the Freeport road.

This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN Jan 20, 1883.

THE STABLE.

Trotting Action.

A visit to any trotting stable which is under the charge of a man who has studied the business will disclose that there are a vast number of accessories which he deems are of service, and many of them that he will tell you cannot be dispensed with in the education of his pupils. At least that without them he would expect to be in continued trouble, as at a fair estimate three-quarters of his horses would soon be injured if their use was debarred. These are "boots," and though it may appear anomalous to call the coverings that are placed above the feet by this name, long custom is the sponsor which is responsible for the christening.

Should the visitor be from a country where the fast trotter is not known he will be at a loss to understand what possible benefit can follow the application of so much leather and kersey, and before he was informed would come to the conclusion that an animal must be so hampered that speed would be out of the question. The trainers of a third of a century back would be nearly as much in the dark, and be equally as much at a loss to imagine what they were to be used for. There are hundreds of patterns for the dozen different places that require protection, and the inventive faculty of the trainer has been sharpened in the endeavor to improve, the skill of the workman who fashions them seeked to the utmost. On the fore extremities are worn quarter, ankle, shin, knee, arm and elbow boots, and in some cases a pad is needed to guard the lower part of the chest which I have also heard called a boot. On the hind there are toe, pastern, ankle, shin and hock boots. These boots have been looked upon as guards against injury and little thought given comparatively to their effect on the action, and yet the latter question is of great importance and well worthy of attention. The usual plan after the colts have been broken is to drive them without boots of any kind until there is a token in the shape of cuts or bruises that the protection is imperatively demanded. As long as the gait is slow it is deemed superfluous to use them as the impression is general that a certain degree of speed is necessary to inflict injury. In the old days when a horse cut his hind legs between the ankle and foot it was termed "speedy cut," as that was thought to be an indication of future celerity. Before that when racehorses wounded the inside of the hock or the upper part of the shin, that was given the same appellation, and the hopes were that as the animal progressed in its training the fault would be overcome. When it is fully realized that a large proportion of trotting-bred colts will be benefited by applying the guards at the commencement of their education, the first place to protect will be the front part of the hind foot, and a properly-constructed scalping-boot is the first article of the kind to be used. Informer articles it has been shown that a fast gait was not the only one which was likely to bring fore and hind feet into collision and that when this occurred it would be followed by a change in the gait. In a few instances the change may be such as to remedy the trouble without the action being faulty, though in general there will be a resort to a method of handling the limbs inimical to progress. Even the bare foot can cause serious injury, and with shoes there is an aggravation. The hoof is the part that is struck in the early stages, then the pastern and afterwards the inside of the shin. The tendency to strike is increased by the curves of the track, and there is no question in my mind that "straight work" will be found better in the primary stages of the education. When going in a straight line it is evident that there will be greater freedom of motion than when the arc of a circle has to be compassed, and, though it will be claimed that as the trotting has to be done on such ground, the lessons should be given under analagous circumstances, yet if the action which is favorable for speed can be sooner acquired on a tangent than when tangents and semi-circles are joined that much is accomplished and the habit of getting around a turn in proper shape can be fixed afterwards. The system of training adopted at Palo Alto is proof of the efficacy of this kind of treatment. Restricting the "brushes" to furlongs and quarters enabled the giving of fast work to be limited to the straight portion of the track, and while there was the beneficial effect of freshness of muscle and clearness of breathing, there was also the advantage of perfecting the action without so much liability of injury when acquiring the proper step. There is additional testimony in favor of this position. In the Eastern States where the winters are so severe as to freeze the lakes and rivers solid enough to permit driving on the ice for months, it is well known that colts will make greater progress, notwithstanding the drawbacks peculiar to the season, than in a corresponding length of time of track work. When a resident of Iowa I knew of many colts which were benefited by ice work, the most notable being Blackbird, the horse now owned by D. Reavis of Butte county. He was broken the summer he was three years old and trained on the track at Maquoketa. To the best of my recollection the fastest mile he showed was 3:19. During that winter he was driven on the ice on a pond near where he was kept and made marvelous progress. His trainer was so elated with the improvement that he continued to drive him after the ice was unsafe, and had it not been for the assistance of some of some boys who were skating his career would have come to a watery end. He broke through and was saved with a good deal of difficulty. When the track work was resumed he was an entirely different colt, and the rapid pace acquired by the straight driving on the ice was not relinquished. There is a peculiarity in trotting on the ice which suggests reasons why it should be advantageous. The action is quickened and the stroke is not only more rapid, but also "cleaner." There is nothing like the tendency to break from the trot into a gallop, and horses which were notoriously unsteady on the track would "stick to the trot" with the greatest pertinacity on the ice. The animal evidently is in fear at the novelty of the situation, and the longer bound of the gallop and the concussion attending the alighting deters it from the fastest pace. There is a wide difference between trotting on the ice and the hardened snow, that makes fully as firm footing, which covers the land. No matter how smooth the road may be there is an inelastic frozen stratum of earth below, while on the coating that covers the water there is some yielding. Then the ice is far crisper than any snow-path, no matter how hard it is packed. The calkins must be sharp in either case, and the cutting edge breaks the jar. This is readily illustrated by striking against a log with the pole of an ax after giving a blow of equal force with the edge. In one case there is quite a shock to the hands; in the other it is not felt. It is manifest, however, that there must be a great change in the action or the sharp calkins would seriously wound the coronet if the fore foot struck it, and that this difficulty is avoided is certain as I do not remember an instance when the injury occurred. Horses were also inclined to trot squarely, and though it may be that the long interval that marks the time since the experience has obliterated the fact, I cannot recall a single case of any of the horses I have driven that "hitched" or "hobbled." Those which "pointed" and "dwelled" in their exercise on the track would have sharp knee action and send a shower of fragments that the calkins cut against the dashboard of the sleigh. In the winter of 1869 Mr. Robert Bonner sent me a "rolling motion" shoe with calkins to fit it for driving on the ice. The difference from the ordinary shoe consisted, in place of the toe-calk, which for ice work was made long, horizontally, of there being two set some distance back from the toe. I had a set of them put on A. W. Richmond, and the first trial I gave them was to a skeleton cutter with a seat elevated enough so that with ordinary shoes the driver was protected by a dashboard of usual size. With the rolling motion shoe there came such a hurricane of particles that I was glad to stop him, and further tests were made in the safer seat of a sulky. I firmly believe that Richmond could show a two-minute rate on the ice, and this was entirely due to the quickening of the action. The effect of setting back the calks was to increase the rapidity of the movements of the feet, and the combination of shoe and ice sufficient to warrant the comparison of likening it to a "boy beating a snare drum." This horse was naturally a very long strider, and all that prevented him from proving a very fast trotter was an injury which came from his first lessons being given on a track with very short turns. It was the same on which Reavis' Blackbird was broken, a half mile in circuit, and the shape of a badly-formed letter D. There was an irregular semicircle with a short stretch to connect the ends. He could trot fast the first time he was hitched to a sulky and in making the turns struck his leg. This was seventeen years ago, when Richmond was a four-year-old, and at that time in Iowa little was known of hoots, and his driver totally ignorant in everything pertaining to training trotters. He drove him daily even after the continued hammering had lamed him, and kept driving until he was on three legs. In less than a month he was so lame that his owner could not get him home for some time afterwards and the injury he never recovered from. Had this promising young trotter been fortunate enough to commence his education with straight work, had he been properly protected with hoots, or if his driver had been gifted with sense enough to lay him up, and stop exercise that was so palpably wrong, all would have been overcome. Blackbird also became lame when working on that track and was more rationally treated by being stopped in his work until he recovered from his lameness, and then the "straight ahead" work on the ice perfected the fast-trotting step, and taught him the right way of going with comparative safety. Although the sire of Romero would stand driving on the road, no matter how fast, a short period of track work would invariably result in a return of the lameness. From the spring of 1870 until I came to California, April, 1874, I used him for that purpose, and on several occasions was tempted to try a return to regular training from the speed and endurance he exhibited. The injured leg was "fired," thinking the actual cautery might effect a cure, but this was also a disappointment, and from my experience this treatment, so highly extolled, is not nearly so efficacious as it is thought to be. In the case of Richmond there was a palpable injury, as it was a long time before he recovered sufficiently to be driven on the road, though it gave an illustration of his resolution. The veterinarian who performed the operation preceded it with the same treatment on another horse. He was "thrown," and in spite of all the appliances to hold him down, he battered his head terribly in his endeavors to resist. With Richmond the opposite leg was strapped up, a twitch applied, and after one or two efforts when the iron first touched the skin, he stood quietly. Had this horse been protected with hoots as completely as would be done in a similar case at the present time, even the damage caused by the abrupt turns of the track might have been limited to a temporary infliction. This was a case where good natural action was rendered useless by a lack of knowledge on the part of the trainer.

While the benefits of ice-trotting cannot be utilized in California, there are superior advantages offered by ground that is never frozen, and which has more elasticity in the winter months than at any other period of the year. For the education of young colts the opportunity to keep them at constant work is a great boon to the breeder, and there are few breeding farms where a straight drive of sufficient length cannot be easily and cheaply made. I have the fullest confidence that if the lessons were continued on this kind of a track

til the animal had become established in the "right way of going," there will be far less trouble, and the change from a true, square gait will be less frequent. Especially if early measures are taken to prevent the pain which is caused by a blow on the hoof, coronet, pastern, ankle or shin, for though there is less risk than when going on a curve, there is a chance for injury. It may be accepted as a general rule that the nearer the limbs are carried in a straight line the easier it will be to keep up a rapid flight of speed, and consequently more endurance. The carrying the feet close together, however, is more likely to bring collisions. For instance, if the hind foot passes outside of the fore so as to clear it entirely there can be no danger of scalping, and a still more "open gait" prevents the shin being wounded. But this straddling action is inimical to endurance, and in my opinion is also detrimental to the highest degree of celerity. The proper effort then is to endeavor to obtain the benefits and overcome the drawback by reducing the danger of striking to a minimum. The obvious result arrived at is to teach the pupil to such an acceleration of the movement of the fore feet that they will be carried out of the way of the hind. There must be a more rapid motion in the anterior limbs and it is easier to affect the fore feet than the hind. Owing to the greater elevation of the fore feet when trotting the portion of a circle which the fore foot inscribes has a shorter radius than that which marks the arc which the hind foot traces. In its passage the fore foot is turned from a position in which the sole touches the ground to that of being nearly level again, but with the ground surface of the foot above and in some horses almost touching the chest. The hind foot is partially reversed when thrust back but it is never elevated to one-half the height of the fore. The action of the fore leg is marked by bending the knee and ankle, carrying the foot so as to form quite a section of a circle, the chord of which is in the case of Edginton eighteen feet three inches, and with a measurement from the center of the chord to the center of the arc of over thirty inches. The action of the hind leg is more sweeping, the chord of the arc being the same length but in place of thirty-odd inches being the measurement from the center to the middle of the curvature, it is only a little more than one-third of it. To prevent the feet from coming together the motion of the fore will have to be accelerated or that of the hind feet retarded, provided the object be to continue the straight action. The former practice has been to change the action into a wider sweep of the hind legs, and, to effect this, unequally weighted shoes and side-weights were used. As weight on the feet is supposed to have a tendency to make the action higher, light hind shoes are regarded with the most favor, and thus a lower, easier sweep is gained. As the same ground has to be covered, the quickening of the motion of the fore foot, as it leaves the ground, must be followed by a corresponding dilatoriness in thrusting it forward. By a nervous jerk the foot is brought up quicker, immediately after it leaves the ground, and there is more room for the hind foot to pass under it without interference. Then the low motion of the posterior foot is in favor of avoiding collision, and the aim will be to bring these two into harmony. From the ice particles being hurled with such increased velocity from the calkins of the rolling motion shoe, it is evident that part of the business was accomplished, and that the fore foot made the effort before it left its hold of the ice. There are sound reasons why this should follow the placing of the calkins some distance behind the toe, and these will be given in a subsequent article.

According to Prof. Johnson, over one-half of the saline matter of blood consists of common salt, which is discharged every day through the skin and kidneys. The bile also contains soda, one of the ingredients of salt, and so do all the cartilages of the body. Stint the supply of salt, and neither will the bile be able properly to assist digestion, nor the cartilages to be built up again as fast as they naturally waste. It will be seen from the above, how necessary it is for the good health and growth of animals that salt should be placed where they can get it as desired. Then they will take it just as often and in the quantity nature requires at each time. If salt is given to animals only once or twice per week, we do not know how to gauge the quantity necessary for each; and they are so greedy for it, they often take an excess, doing themselves thereby, perhaps, more harm than good. Those living near sea-water find it an excellent thing to wash the feet and legs of their horses in it in summer. It is also asserted that strains in the sinews of the back, sprains, curbs, and some other ailments, are cured by making the horse stand in sea-water several hours a day in succession. Those who do not reside near the ocean, can make up a mild brine, and bathe their horses with it. This might answer a good purpose, but of course it would not be so effectual as to have the diseased parts of the animal completely immersed, as they could be on the borders of the ocean.—*Live Stock Journal.*

The *Country Gentleman*, in response to a request from a correspondent for a cure for horses that have contracted the habit of pulling at the halter, says: Take a sufficiently long piece of half-inch rope. Put the center of it under the tail like a crupper, cross the rope on the back and tie the two ends together in front of the breast snugly, so there is no slack, otherwise it would drop down on the tail. Put an ordinary halter on (a good one) and run the halter strap or rope through a ring in the manger or front of the stall and tie it fast in the rope on the front of the breast; then slap his face and let him fly back. He will not choke, nor need telling to stop pulling back. Let him wear it a while, and twice or thrice daily scare him back as suddenly as possible. After one or two trials you will see that he cannot be induced to pull back.

Horses kept in close stables, especially if underground, are apt to suffer from sore eyes, caused by the ammonia from their urine. A little land plaster or gypsum scattered in the stables will absorb the ammonia and save its valuable fertilizing properties. Diluted sulphuric acid will do the same; but it is not so convenient as the gypsum.

The Idaho and Oregon Stock Improvement Company have now 500 broodmares on the ranch near Silver city, Idaho.

Cold-Blooded Horses.

In tracing up the pedigrees of trotting stock, unless that of the horse or mare can be distinctly stated, it is usually stigmatized as "cold-blooded." I think, if the animal shows good breeding in its form and pace, with spirit and endurance, this stigma is unjust, and that, on the contrary, we ought to say it is well-bred, as in England, or at least partly so. To show how truly this may be, let us consider that the importation of thoroughbred horses into America commenced soon after the breed was well established in England—about the years from 1745 to 1750. It is pretty certain that the celebrated horse Spark, and the equally celebrated mare Selima, were brought over to the United States during, or a short time previous to, the latter date. Others have continued to follow these regularly in considerable numbers, down to the present day, except during the revolutionary war.

In addition to the English thoroughbred, there have been importations every now and then in smaller numbers, direct from Arabia and other Eastern countries, together with a spice of the Andalusian (descendants of the African Barb) from Cuba, and perhaps even from Spain. All these horses have been crossed to a greater or less extent on our native-bred mares, thus giving a considerable diffusion of their blood over the whole country. It is a misfortune that we have had so little record of this; and it is now beyond recall, leaving us in the greatest uncertainty as to pedigrees, and giving full sweep for every jockey to exercise his imagination in making them up of the most false and fanciful kind.

Outside of the "Racing Stud Book," the descendants of the famous English horse Messenger, imported in 1788, are the most easily traced. These can be pretty accurately followed, at least from the birth of Plato, in 1802. They soon spread from Pennsylvania, and perhaps the border of Maryland on the south, to Maine, and even into the border of Upper Canada on the north, and from Long Island, the eastern end of New York, to its remotest western counties. Can we not say now, with perfect truth, that there are few horses in the above wide region which are not tinctured with English, racing, Arabian, Barb or Turkish blood?

A number of years ago an aged friend of mine, a native of Massachusetts, but who was then breeding racehorses and Shorthorn cattle at Harlem, N. Y., informed me that he personally knew of upwards of twenty Arabian stallions that had been sent into New England for the purpose of breeding during the first quarter of the present century; and it was the produce of these, of which no record had been kept, which made up in part the fine, high-spirited and enduring horses occasionally turned out among the farmers there, who knew nothing of blood or cared for it. Among these there can be no doubt that the Morgan tribe partook of Eastern blood, and there are other good families tinctured in the same way, of mere local celebrity, bred, however, less distinctly and with less care.

Now, when a mare with good traits has been put to a trotting stallion, in giving the pedigree of the produce, her merits ought to be fully stated, together with age and name of her breeders, and then all who are disposed can look into the matter and attach their own value to her breeding, and judge for themselves whether she has choice blood in her veins and is worthy to be recorded in the Trotting Register as one of the dams of trotters.—*A. B. Allen, in Live Stock Journal.*

Games as Practical Fowls.

Game fowls are generally acknowledged to be superior layers, the most delicious of table birds, and the best of mothers. In spite, however, of these qualities of greatest utility, the majority of those who breed poultry for what they will produce for the market look with suspicion upon them as a mere fancy fowl. The pugnacity of the game has, without doubt, proved the great barrier to his general adoption. He is a brave, spirited bird that will submit to no invasion of right or domain, yet not a malicious brute that will pursue a beaten adversary from place to place, until, fixing him in some corner, he stands over him ready to give pick and blow at any and every opportunity. Granting his pugnacity, the ordinary care exerted by breeders to preserve the beauties of their Brahmas, Plymouth Rocks or Leghorns will avert the disastrous results of combat. While eggs are sold by number, quantity, not size, is the objective point. Here games may bear comparison with any variety not non-sitting.

In my own yards a lot of Red Pile games, bred side by side with Plymouth Rocks, excelled the latter in egg-production. The quality of the egg is richest beyond doubt, and its size but little below the average. The chief argument against them, then, is based upon their size.

The condition of a fat game, even very fat, is best described by the word "plump." That is just what is wanted, and what may be obtained in the larger breeds by an introduction of game blood. The most striking impression received from a study of the game's form is the lack of a single superfluous feature.

A correspondent of the *American Agriculturist* gives the following plan for preserving wagons: The experience of a California stage proprietor in oiling wagons led me to try his plan for prolonging the usefulness and strength of wagons. He soaked in oil all the wood-work of his vehicle before it was put together, and discovered that he had little need of repairs. The oil used is crude petroleum. I wash my wagons with it twice, even to the end of the pole. It is quick work with a good brush. An application once in six or eight weeks sufficed to save me from repairs, except of a slight character. I ascribe these results to the oil preventing the wood from shrinking or swelling. The cost of crude oil is but a trifle, and the application of it a very insignificant item compared with the cost of smith work and the increased durability of the wagon. Petroleum oil is better than other oils, because of its superior penetrating character.

The cholera, or "chicken cholera," is the deadly enemy that checks progress in poultry raising, and I know of no sure cure for it, though I have known it to yield when a spoonful of meal, saturated with coal-oil, was administered twice daily. Cholera never appears in cleanly-kept yards and houses, as it is born of filth. Lice will disappear from fowls by the use of the dust-bath, if the quarters are clean. Roup is caused by dampness and cold draughts of air on the fowls at night. Warmth, and a teaspoonful of a saturated solution of chlorate of potash, three times daily, is the best remedy for roup. Fowls that moult early begin to lay early, and fowls that have fluffy feathers under the wing are hardier than those that are naked in those parts.

At a meeting of the Contra Costa Agricultural Society held last Saturday, the following officers were elected for the ensuing year: President, William Caven; Vice Presidents, Samuel Gamble and G. W. T. Carter; Secretary, S. B. Snyder; Treasurer, B. J. Murphy; Directors, Fred Moses and J. H. Tennent; Visiting Committee, T. Z. Witten, Nathaniel Jones and I. J. Smith. It was decided to hold a fair this fall and the meeting adjourned to June 2.

TURF AND TRACK.

The Blue Ribbon of 1883.

As the great event of the English racing world is now fast approaching, we think it as well to give an epitome of the probable runners, and try as far as we are able to analyze their performances, so as to give our readers some sort of an idea as to what are the relative chances of those engaged. First and foremost we must place Galliard, the winner of the Two Thousand. The winners of this race have not been, as a rule, particularly successful over the Epsom course, only nine having carried off the double event, and of these, three also won the St. Leger, viz., West Australian, Gladiateur and Lord Lyon. The following horses won both at Newmarket and at Epsom: Cadland, Bay Middleton, Cotherstone, West Australian, Macaroni, Gladiateur, Lord Lyon, Pretender and Shotover. However, we sincerely trust that, for Lord Falmouth's sake, he will form another on the already illustrious scroll.

Galliard has been so recently described in this paper and his pedigree given at length that suffice it to say that he is a brown colt, by Galopin out of Mavis, and as good a looking horse as a man can clap his eyes on, and the man who has one to beat him is lucky indeed, and when seen stripped with "the Tinman" up he will doubtless start a very good favorite, and those who backed him prior to his Newmarket victory will stand on velvet.

Goldfield was bred by Mr. Crowther Harrison, a well-known and successful Yorkshire breeder. He is a brown horse, by Springfield out of Crucible, by Rosicrucian, her dam Apple Sauce, by Camerino (by West Australian) out of Pineapple, by Knight of Kars out of Evergreen Pine, by Orlando, etc. He did not appear in public until the Doncaster September meeting, when he won the Rous Plate, where he beat the favorite, Mespilus, Esa, etc. He was then beaten by Hauteur in the Clearwell, running, however, a good second. At the same meeting he was unplaced for the Middle Park Plate. His best performance, however, was at Sandown, where he won the Great Sapling Stakes, beating the Prince, Rookery, Adanapaar, Potosi, etc., and wound up the season by running second to Ladislas in the Dewhurst Plate, conceding four pounds to the winner, behind the pair being Energy, Acrostic, St. Blaise, etc. But useful horse that he is, we think him hardly good enough to carry Lord Cadogan's popular Etonblue to victory.

The Prince is a bay colt bred by his owner and trainer, Charles Blanton, and is by Balfe (by Plaudit) out of Lady Sophie (Exeter's dam), by King Tom, her dam Bridle, by The Saddler out of Monœda, by Tanrus out of Mona, by Partisan. The Prince ran five times as a two-year-old, and only gained one winning bracket. However, he was a backward horse, and one that evidently wanted time. The first time of asking he was beaten in the July Stakes, being unplaced to Macheath, Fulmen and Tyndrum. He then won the Rous Memorial Stakes at Goodwood, Bonny Jean being second, and the colt by Springfield out of Lent Lilly third. Behind these three were Britomartis, Lilac, etc. He was then unplaced in the Champagne at Doncaster, and in a similar position in the Rous Memorial Stakes at the Newmarket First October meeting, and then wound up his two-year-old career by failing to concede nine pounds to Goldfield for the Great Sapling Stakes at Sandown, beating, however, Rookery, Adanapaar, Pastry Cook, Potosi, etc. The Prince will, we think, be fitter to run at Epsom than when beaten in the Guineas. He is sure to run forward, and may get a place, but we hardly think he will be found good enough to carry the Newmarket trainer's colors successfully.

We now come to a prominent favorite in Beau Brummel. He is a bay horse, and was bred by Mr. McKenzie, and sold by him to Matthew Dawson, who in his turn sold him to Lord Hastings.

Beau Brummel is by George Frederick out of Ma Belle, by Lord Clifton, her dam Dulcibella, by Voltigeur out of Priestess, by the Doctor. His first appearance was in the Mostyn Two-Year-Old Plate at Chester, in which he was third to Camilla and Madrid. He was then stripped for the Woodcote Stakes at Epsom, which he won cleverly by three parts of a length, Hauteur being second and Tyndrum third, Symphony, Sigmophone, Lilac, Massasoit and Etarre following them home. At Stockbridge he ran second to Alec Taylor's Hetty colt for the Mottisfont Stakes, Wild Arab and Maharance being behind them. His next was, however, his best performance, as he beat Macheath at a difference of three pounds, Export, Bon Jour, Crown point and Wenonah bringing up the rear. His last performance was unsuccessful, as he failed to get nearer than third to Macheath and Adriana in the Rous Memorial at the Newmarket First October meeting.

Beau Brummel is undoubtedly a good horse, and, taking his running with Macheath, has a great chance; still, we fancy he will find the distance further than he cares about, and will fail to get home.

Highland Chief is a bay colt, bred by his owner Lord Ellesmere, by Hamptou, out of Corrie, by Stockwell, her dam Mayonaise, by Teddington out of Picnic, by Glaucus. In the Newmarket first spring meeting he was beaten by Songless for the Stud Produce Stakes, beating Kate Craig, Lady Brooke, Topping, Father Prout, etc. He then earned his first winning bracket in the Exeter Stakes at the July meeting, Britomartis being second, and Bon Jour third, Red Gold, Comanche, etc., finishing behind them. His next performance was when he failed to beat Rookery and Adriana in the thirty-fifth Triennial Produce Stakes, Duchess of Cornwall and Narcissa being beaten off. Macheath then gave him three pounds and a half-length beating in the Middle Park Plate. In the Houghton meeting he beat Prince Batthyany's Fulmen in the Homebred Sweepstakes, and then retired into winter quarters with a defeat, as he failed to beat Mr. Crawfurd's Keir in the Houghton Stakes.

Highland Chief ran a good horse, always being there or thereabout. However, if, as it is said, there is anything the matter with his pipes, good bye to all chance of his winning the Derby. However, we trust it is nothing but idle rumor, for his noble owner's sake. He is sure to win some nice stakes ere the season closes, even if he does not actually take one of the classic events.

Sigmophone is a bay colt, the property of Tom Cannon, by Young Trumpeter out of Eau de Cologne, by The Promised Land, her dam Smelling Bottle, by Sprig of Shillelagh out of Vinaigrette, by Bentley. He ran six times and won twice, viz., the Stockbridge Cup, beating Mowerina, Athola, Golden Eye, etc., and the Richmond Stakes at Goodwood, beating Britomartis, Lacoon, Kate Craig, Bon Jour, Adriana, Rookery, Light o' Love, and Tyndrum. Sigmophone was a very useful horse, and like training on. We think, however, that the Derby is too high game for him, but unless we are much mistaken, his name will be heard of in some important race before the season closes.

Lord Falmouth has two colts besides Galliard engaged in the Derby, viz.: Grandmaster, by Kingcraft out of Queen Bertha (Wheel of Fortune's dam), who we may dismiss at

once as not good enough, but Prince Maurice, an own brother to Dutch Oven, we are told, is an exceedingly nice colt, and a fine mover. He never ran as a two-year-old. However, Matthew Dawson should know what o'clock it is, with Beau Brummel, Galliard, and Prince Maurice.

Ladislas was a bay colt, and was bred by Lord Rosslyn, and sold by him to M. Lefevre. He is hy Hampton out of Lady Superior, by Caterer, her dam Penance, by The Flying Dutchman ont of Rosary, by Tonchstone, her dam Crncifix, hy Priam. It will be seen from this that Ladislas is of a fast and also of a staying family. The first time he appeared on a racecourse was at Four Oaks Park, were he could only get third to Rookery and John Jones for the Great Midland Foal Plate. He was next beaten in the Lavant Stakes at Goodwood, won by Export. At tbe first October meeting at Newmarket he ran a dead heat with Mr. Crawfurd's Lovely, Vanduara, Wenonah, and L'Fille du Regiment being behind the pair, Ladislas afterwards walking over. His next performance disappointed his friends sadly. It was in the Middle Park Plate, and the Saturday previous he had been galloped most satisfactorily with Hanteur, Archer and Fordham being up, to be certain tbat no mistake was made, and he was backed to win a large stake. He, however, never got within hail of the winner, and was beaten hy his stable companion, Hanteur, with Loates up. However he wound up the season by winning the Dewhnrst Plate, Goldfield second, and Acrostic third, whilst in the ruck were Energy, St. Blaise, Regain, and Ettarre. In this race he proved that the further he went the better he liked it, and as real stayers are scarce, when we find one like Ladislas we are bonnd to make him dangerous.

St. Blaise is a chestnut horse, by Hermit out of Fnsee, by Marsyas, her dam Vesuvienne, by Gladiator out of Venus, by Sir Hercules, and was bred by Lord Alington. His first appearance was at Stockbridge, where he won the twenty-fourth Biennial, beating The Dnke, Ducrow, etc., at the same meeting walking over for the Troy Stakes. His next win was at Goodwood, when he won the Molecomb Stakes, Elzevir, Montroyd and Bonny Jean heing behind him. He finished his two-year-old career hy winning the Troy Stakes at Newmarket, Pehhle being second and colt by Kisber out of Bellicent third. St. Blaise is now the property of Sir F. Johnstone, but we think the company at Epson will be too good for him. We are afraid it is nnnecessary to make mnch mention of the American horses engaged, as there is nothing, we fear, to follow in the steps of Iroquois.

The Duke of Westminster has one or two dark ones engaged, viz., Thorgrim, by Doncaster out of Freia, and Winchester, by Doncaster out of Windermere. The latter is said to he able to gallop above a bit.

Ryan also has two in Cornfield, by Springfield ont of Crocus, and Newfield, by Springfield out of Sunshine, both of which are well bred enough to satisfy anyone, which applies also to Hamako, by Hermit out of Hippia, and consequently an own brother to Nellie.

It is a thonsand pities that the deaths of Prince Batthyany and Mr. Crawfnrd shonld have cansed Fulmen, Macheath, Keir, etc., to be disqnalified. There are several dark horses engaged of which we know nothing, and the field may be swelled by such as Adanapaar, Auctioneer, Montroyd, Padlock, Export, Bon Jour, Madrid, Dick Swiveller, etc., which may be dismissed with scant notice, although we think the latter will trnn out a nsefnl horse, and in conclusion we think that Ladislas will win, whilst Matthew Dawson may not improbatly furnish the two placed horses with Galliard and Beau Brummel, and we like them the best in the order named. Tbe Prince is sure to run forward, but we are of opinion that the distance will be found too far for Highland Chief.

We had almost forgotten to mention Lord Bradford's Laocoon, hy Lacydes out of Adversity, by Adventurer, her dam Stockhausen, by Stockwell out of Citron, by Sweetmeat; her dam Echidna, by Economist. Now during the winter we heard a most favorahle account of this horse, and trust for his lordship's sake it was a correct one. He ran twice last year without earning a winning bracket, the first time in the Richmond Stakes at Goodwood, when he ran third to Sigmophone and Britomartis, and the next time he appeared was in the Middle Park Plate, where he was nnplaced.

Last May we were at Worsley, Lord Ellesmere's seat, in company with Good, Lord Falmouth's stnd groom, and in the conrse of conversation we asked him: "What are the hest two-year-olds at Newmarket?" "Ladislas and our horse Galliard," was the answer, and events have so far proved he was not far wrong.—*N. Y. Sportsman.*

Racing and Trotting at Chico.

CHICO, May 10, 1883.—Racing, mile neats, three in five, for purse and stake of $2:25.

Marion Biggs' b m Edna Conger	2	1	1
Jas T. McIntosh's h c Fred Ackerman	1	2	ds

Time—2:45, 2:53, 2:51.

Same day—Trotting, three in five, for purse and stake of $75.

J. T. McIntosh's b g Dutchman	1	1	1
Chas. Sherman's b g Roanoke	2	2	2

Time—2:45½, 2:39½, 2:44.

Thursday, May 11—Purse and stake $50; mile heats, three in five.

J. T. McIntosh's blk m Blue Bells, by Prompter	1	1	2	1
T. Barnard's b m Verona, by Alexander	2	2	1	2
Marion Biggs' br g Chico, by Lodi	dis for run'g			
Charles Sherman's wh g Modoc	dis for run'g			

Time—3:00, 3:06, 3:02, 3:04¾.

Pools before the start, Blue Bells and Verona selling even, Modoc third and Chico fourth; after first beat, Blue Bells 20 to 10 for Verona; after third heat, even in the hox but some outside bets $60 on Blue Bells to $40 for Verona.

Same day—Match; $50 a side; half forfeit; mile heats, two in three.

J. T. McIntosh's b g Dutchman (trotter)	received forfeit
Burnham's b m Edna Conger (pacer)	paid forfeit

This match proved no race. While warming up Edna, owing to the heavy condition of the track, cut her quarters fearfully, and paid forfeit. Pools and outside hets declared off.

Same day—Trot; heats of a mile, two in three.

Chas. Sherman's wh g Modoc	1	2	1
Marion Biggs' br g Chico, by Lodi	2	1	2

Time—3:11, 3:10, 3:11.

OCCASIONAL.

A Newmarket correspondent of *Bell's Life* speaks as followe on eome of Mr. Keene'e horses: "Marsh, as every one is well aware, has been compelled to stop Foxhall in his work. This, of course, ie a very nnfortunato affair for hoth trainer and owner, but it has'not eurprised me in the slightest, as in my notes eome time ago I hinted tbat I thonght there was eomething wrong with the son of King Alfonso and Jamaica. Golden Gate, in this stahle, has improved wonderfully in appearance since last eeason and goes remarkably well. Blue Grass, an animal the Yankees had a ratber high opinion of last year, bnt wbo certainly disgraced himself in public, has grown into rather a good-looking horse, and he is moving much hetter behind now than when I saw him rnn for the Cheveley Stakes, and we may yet see thie son of Pat Malloy and Amy Farley do something useful."

Entries at Salt Lake.

Tbe following is the list of entries to the stakes and purses of tbe Salt Lake Jockey Club:

No. 1, May 29—The inaugural rusb; purse, $300; for all ages; $50 to second; one mile.

Stemler & Ayers' b g Joe Howell, hy imported Bonnie Scotland—Eva Shephard.

J. T. Gilmer's b h Red Boy, by War Dance—Neilson hy imported Sovereign.

M. M. Allen's b h Jocko, by Cariboo—Reply hy Enquirer.

J. F. Wisdom's b m Ordnance, by War Dance—Bonnie Kate.

G. Covington's c h Euchre, by Leinster—Flush.

F. McCoy's c g Pike's Peak.

No. 2, May 29—Tbe Livery Stable Stake for three-year-olds; $50 entrance, $25 forfeit, $300 added, $100 to second, third to save entrance; 1¼ miles.

E. J. Baldwin's b c Gano, by Grinstead—Santa Anita.

George Howson's b m Augusta E, by Monday—by Norfolk.

M. M. Allen's blk f Thaby, by Tom Bowling—Colleen Bawn.

M. M. Allen's c f Gift, by Tom Sawyer—by Gilroy.

J. T. Gilmer's c c Lorillard, by imported Moccasin—Vixen hy imported Saxon.

W. H. Pierce's b g Beauregard.

No. 3, May 29—Trotting, 2:30 class; purse, $700, first $400, second $200, third $100.

C. F. Samson's w m Happy.

J. Mathewson's b g Frank L, formerly Orphan Boy.

J. T. Wisdom's b m Lady Faustina, by Vermont.

M. M. Allen's c m Ethel, by Messenger Duroc—Coquette.

No. 4, May 29—Club Purse; $150; all ages; $100 to first, $50 to second; one-half mile dash.

George Howson's b h Jim Douglas, hy Wildidle—hy Norfolk.

W. H. Pierce's c g Johnny.

G. Covington's c f Formosa, by Sun Dance—Norma.

No. 6, May30—The Clnh House stake for all ages; $25 each, play or pay, $300 added $100 to second; ¾ of a mile.

Geo. Howson's b h Jim Douglas, by Wildidle—by Norfolk.

Stemler & Ayers' b g Joe Howell, hy imported Bonnie Scotland—Eva Shephard.

Thos. McCoy's c g Pikes Peak.

J. P. Woolman's b m Bolus, by imported Buckden—Jennie C by Daniel Boone.

W. H. Pierce c g Johnny.

G. Covington's c f Formosa, hy San Dance—Norma.

No. 7, May 30—Trotting, 2.50 class; purse $300, first $175, second $75, third $50.

C. F. Samson's b g Laster, by Almont—Motber Hubbard.

D. Hutchinson's blk g Zip.

Jas. Mathewson's b m Millie D.

Alfred Thompson's hlk g Signal, by Black Bird—by Signal.

J. W. Montgomery's g g Grey George.

No. 8, May 30—Pacing 2.35 class; purse $250, first $150, second $75, third $25.

J. C. C. Glanfield's r g Blue Dick.

M. Heinau'e brs g Tommy H.

C. W. Carrington's bk g Missing.

E. Burke's b g Barney.

No. 9, May 31—The Salt Lake Derby, for three year-old colts and fillies; $50 entrance, $25 forfeit, $500 added; $100 of which to second, $50 to third; also plate valued at $100, presented by Joslin & Park; 1½ mile.

E. J. Baldwin's b c Lucky B, by Rutherford—Maggie Emerson.

George Howson's b m Augusta E, by Monday—by Norfolk.

M. M. Allen's bk f Thaby, by Tom Bowlin—Colleen Bawn.

M. M. Allen's c f Gilt, hy Tom Sawyer—by Gilroy.

J. T. Gilmer's c c Lorillard, hy Imported Moccasin—Vixen by imported Saxon.

W. H. Pierce's b c Beanregard.

Three events, the Merchants' Stakes for two-year-olds, five-eighths of a mile, the Trotting Purse for the 2:35 class, and the Flash Stakes for two-year-olds, tbree-qnarters of a mile, did not fill.

Flora Temple.

Flora Temple was bred by Samnel Welch of Oneida county, N. Y., foaled in 1845, sired by Washington Loomis' Sorrel Bogus, dam Madam Temple, hy a spotted Arabian horse. Flora Temple, tbe subject of this notice, was one of the most celebrated trotters that ever appeared on tbe American course. She left a monument to her memory by the unexampled nnmber of races won, and the indomitable energy and iron will with which she contested for tbe palm of victory in every heat and every race in her long and successful career, which leaves an honest record in her famous history tbat will live as long as the horse finds admirers.

The memorials of her gallant contests stand out in bold relief on the most brilliant pages of the trotting register, as beacon lights, to illuminate the path of her successors, and to show the world her memorable triumphs, on a hundred battle fields, nnprecedented in the annals of racing.

Flora Temple was small—so diminntive in size, and plain in appearance, that she sold for $13 when a colt, and afterwards would have exchanged for as many thousands, when in the palm of her greatness and glory. Flora was pnrchased, when four years old, for a livery stable, by Richardson & Kellogg of Eaton, Madison county, N. Y. One year finished her career in tbe livery stable. In the month of June, 1850, one of her owners started with Flora, in connection with a drove of cattle, for New York, and disposed of the future queen of the tnrf to Mr. Velie of Washington county, N. Y., for the sum of $175, who shortly afterwards sold her to Mr. George E. Perrin of the City of New York, for $350, who commenced training this wonderful mare for speed. Her first race was a match with Vanderburgh's grey stallion, for $500 a side, mile heats, the stallion to draw a 250-pound wagon, Flora to go to harness. The mare won her maiden race in gallant style. She was soon after started against some of the fastest trotters then on the conrse, and seldom fonnd her eqnal. As a campaigner, she bad no superior. She was constantly on the go, and slept in the cars with all the equanimity of the veteran tourist.

She was the first mare to heat 2:20, which crowned her qneen of trotters of her day. She lowered the record, at Kalamazoo, in 1859, down to 2:19¾, which remained on the sporting calendar unequaled for nine years. On August 16, 1859, she trotted a two-mile race with Princess over the Eclipse Course, L. I., which she won in 4:50½, which remained the fastest two-mile record for twenty-one years. Flora Temple started ninety-nine times, and made the ample retnrn to her owners of the enormons sum of over $100,000. She won more races with less defeats than any other horse that ever lived, at least preceding her glorious career. Sho performed herculean lahors, by traveling over nearly every state in the Union, to exhibit to admiring crowds her wonderful powers, that had vanquisbed so many distinguished horses, and scored the fastest time on record.

She stood without a peer, in all the majesty of a conqueror, the idol of the public, and the invincible heroine of her race. She must have bad an iron constitution to stand so much labor, and to crown her labors with so many signal triumphs over the best horses of her day and generation. She was on the conrse till over twenty years old, with the exception of a few years of vacation that she reposed upon her laurels, and died December 21, 1877.

Flora Temple left the course without a rival. She was retired to the breeding stahle, the property of Mr. A. Welch, of Chestnut Hill, Philadelphia, Penn., where she bred three colts from as many different sires, and died at thirty-two years old. Her produce was a bay filly, Kitty Temple, foaled 1868, by Rysdyk, son of Rysdyk's Hambletonian; bay colt, Prince Imperial, foaled 1869, by William Welch, son of Rysdyk's Hambletonian; bay filly, the Queen's Danghter, foaled 1871, by imported Leamington.

Money for the Trotters.

Tbe stewards of the Eastern Grand Trotting Circuit held a meeting at Rochester, N. Y., on the 8th inst., to arrange dates and programmes for the season. The Narragansett Association of Providence, R. I., was admitted as a member. The following dates were assigned to the several associations: Pittsburg, July 24 to 28, inclnsive; Cleveland, July 31 to August 3, inclnsive; Buffalo, August 7 to 10, inclnsive; Rochester, August 14 to 17, inclnsive; Utica, August 21 to 24, inclusive; Ponghkeepsie, August 28 to 31, inclusive; Hartford, September 4 to 7, inclusive; and Providence, September 11 to 14, inclnsive. The following programme for each place, except Hartford, was adopted: First day—Purse $1,500, for the 2:29 class; purse $1,500, for the 2:24 class. Second day—Purse, $2,000 for the 2:22 class; special purses tbat have closed. Third day—Purse $1,000, for the 2:20 pacing class; special purses of $4,000; purse $2,000, for the 2:20 trotting class. Fourth day—Purse $1,500, for the 2:26 class; purse $2,000, free for all pacers; purse $2,000, for the 2:16 class.

The special programme for Cbarter Oak Park, Hartford, is as follows: First day—Purse $2,000, for the 2:23 class; purse $2,000, free for all pacers. Second day—Purse $10,000, for the 2:19 class; purse $1,000, for the 2:29 class; purse $1,000, for the 2:37 class. Third day—Special purse, $4,000; purse $2,000, for the 2:25 class; purse $1,000, for the 2:45 class. Fourth day—Purse $2,000, for the 2:21 class; purse $1,000, for the 2:33 class; purse $1,000, for the 2:20 pacing class. It was decided that the entries throughout the circuit should close on the Monday night before the Cleveland meeting, July 30.

The contract to build the new pavilion of the Sonoma County Agricultural Park Association, to be ready for occupation early in the season, has been let. It will be a handsome, commodious, and substantial edifice, 60 feet front by 120 feet depth. The site for it is in the Park Grounds, at the racecourse, a mile from town.

The Tulare Valley Agricultural Association will hold their first annual races at Visalia on May 31, June 1 and 2. Among the features of the last day will he a stallion exhibition with cash premiums for tho best roadster, draft and thoroughbred stallions.

The Cayucos, San Luis Obispo county, Jockey Club has completed a half-mile racetrack on the lands of A. T[illegible]zinni, one and a half milee from that town.

THE SACRAMENTO RACES.

First Two Days of the Spring Meeting of the Capital Turf Club.

The Spring meeting of tbe Capital Turf Cluh opened Tuesday under very favorahle circumstances, the weather heing pleasant, the treck in snperh condition and the attendance fair, in fact good, for the first day, and those that were present were well rewarded for their attendance. Contrary to the expectations of Friscoites, the rain of Mondey night skipped ns almost entirely and the sun shoue nearly all day, making it fine racing weather. The runs made in the half-mile and three-quarter dash will hear me out in the assertion, and it is to be regretted that many who were present at the Oakland meeting were not fortunate enough to have heen present Tuesday. The spring meetings of this cluh sbould certainly draw a hetter attendance the people should recognize the impetus giveu by the few to racing thet is conducted honorably. The memhers of this cluh do not desire to make anything out of these meetings; on the contrary they are willing to give their time, money and experience in these matters for the purpose of making the hreeding of racers in this country a success. The entries made show that the owners are doing all in their power to furnish amusement for the people, which they should recognize.

The first race on the programme yesterday was a half-mile dash for two-year-olds. The entries were Pritchard's Bazaar—Dunhar filly that won the five-eighths at Oaklaud, Mackey's Mileta that made such a poor showing in the same race, Baldwin's Grinstead filly, Appleby's Neilsou, by Wildidle and Liehenthaler's Leinster colt, which did not start. In the pools Pritchard's filly owing to her well-earned run iu the five-eigbths, was prime favorite at $40, Baldwin at $25, Mackey at $20, Appleby $20. The hetting near the close, however, chopped so that Applehy and Pritcherd sold ahout eveu for choice at $25, with Mackey last at $6, in $50. The delay at the start was very tedious; this made the hackers of Pritchard feel sanguine, while those of Baldwin and Applehy felt opposite, knowing full well the disposition of the latter, as she was very nncontrollahle after the first hreakaway. On the sixth attempt the flag fell to a very fair start, Mileta prohahly getting a little the hest of it, but all running. She lead around the upper turn, making the first quarter in 24½, a driving clip. At the head of the stretch Howson on Pritcherd's filly made a run at her, hut she ehook him off quite handily; from the seven-eighths pole home whip and epur were applied with vim, hut the produce of Lever and Malta held tbe lead and won hy ahout girth in 0:50, Pritchard second, Baldwin third, Applehy fourth. Thue the Rancho del Paso redeemed itself and showed that the selection of Mr. Haggin's Eastern purchases was not bad in this case.

SUMMARY.

Agricultural Park Course, Sacramento, May 15.—Capital Turf Club—Running; one-balf-mile dasb for two-year-olds; $25 entrance, $10 forfeit, $100 added.

Time 0:50

The low pools having won in the first events caused quite a gatbering of hettors at the hox for the second race, as the American bettor generally plays for even—don't care to win much, and don't propose to lose if possihle. The second race called forth the unsettled question of superiority of the coutestants, which has not, as yet, heen decided, as the three starters have all won from each other a three-quarter dash. The money that each has won or lost for its hackers would satisfy a Bohemian in point of riches, and procure for him the elegant lunches often dreamed of, hut seldom had. The tap of the hell for saddling up caused the hlankets to he removed from the handsome forms of Jim Douglas, Joe Howell (old vet.) aud Premium. A murmur of satisfaction as to condition arose from the knowing ones, and as they cantered arouud to the starting post in charge of Mr. Isadore Townseud, the starter, many who had hacked one really did not have the stamina to stay, hut sauntered np to the pool hox and kind of covered on one of the others. Jim Douglas' weight beiug 127 pounds, heing peualized seven pounds as winuer of the Hearst Stake, made many of hia old-time hackers fearful lest the heavy weight would prove a serious hindrance, hut such proved not altogether well-founded. The average pools showed Howell favorite at $40, Douglas $24 and Premium $14. They got away the first time with au average etart, Douglas prohahly getting a length tbe worst of it, hut runuing; old Premium off first, as usual. Having the pole, ahe made the pace very rapid with hoth the horsea crowding her to the half in 0:25. Around the upper turn Douglae, who waa third, made a rnn at Howell, who eeemed to let out one of those reserved links of his, and he in turn made a run at the old mare, hut she had a little speed left and refused to yield the track to Joe, hut at the three-quarter pole old Joe made another ruu at her aud succeeded in getting on cven terms with her, with Douglas trailing them hoth. Here all three whips were pulled simultaneously, and from there home they were plied with a will. The excitement was great, aud I never eaw such a contest—not even the mile dash at Oakland excelled the riding of Duffy, Guerro and Howson; all rode for dear life. But as the old saying is, "Blood will tell; age ain't notbing." At the drawgate old Joe ehook himself aud drew away from them only just euough to say so, and heat Douglas and Premium, who ran dead heat for eecond place, only a girtb, in 1:15. Thia race has shown what a horse Douglas is—taking up ten pounde over Howell and twelve over the mare, run three-quartere iu 1:15½. There is some talk of making a race hetween these same three of five-eighthe of a mile with 110 pouuda on eaeh, for au inside stake of $1,500. Should this he consummated it will he a difficult prohlem to eolve as to which one will walk off with the stake. It will make a very interesting race.

SUMMARY.

Time—1:45½, 1:46½.

Second Day.

Wednesday hrought forth the dark, dismal and threatening clouds that overhung all day and hroke out in a torrent of rain ahout four o'clock in the afternoon. Notwithstanding the had weather, the attendance exceeded the first day, and those who were unfortunate enough to have heen present on the Friday of last fair week can imagine what the aspect was this day; the storm thongh not as hard came more regular, and the ducked drivers and ruhhers felt that even in their husiness they had to face the elements. This would have heen our gala day hut for the inclemency of the weather, as it was nearly a home occurrence, as the cluh had wisely provided for a race for named horses that are used generally on the road. Tbe time made in the mud shows them to he a trifle better than road horses. The contest was for superiority among a class of our citizens who delight to sit hehind a trotter aud jog down the road during the heautiful summer evenings for which Secramento is noted. The first on the programme to-day was a pacing race, mile heats, three in five, for a purse of $200. The entries were Schlutin's Prince, McDonald's Buzzy, McIntosh's Fred Ackerman and Greely's Grey Frank. Prince had the call in the pools at $25 to $21 on Frank and $7 for the field. They went off for the first heat at a good start, with Frank in the lead, which he maintaiued throughout the heat, although at times hardly passed hy Priuce. Frank won the heat in 2:31½. This caused a revolution iu the hetting, Frank selling for $20 against $7 for the field. Frank won the next two heats handily in 3:30½, 2:32½

Time—2:31½, 2:30½, 2:32½.

After this followed the race for gentlemen's roadsters, which proved very exciting, owing to local feeling evinced on the part of the friends of each. The entries were D. H. McKay's Golddust, John Batcher's Mayfly, J. W. Wilson's Dan and E. K. Alsip's Unknown. Mayfly was favorite at $30, Field $28, Dan $19. While scoring for the first heat the rain commenced. No postponement was asked, as all were anxious for the race. They received the word after several attempts, with Golddust in the lead, but he immediately left hie feet and Mayfly went to the front at a rapid gait, with Dan at her wheel, and she could not shake him off. They maintained this position nntil the finish, although Wilson's made a gallant effort to lift the hlack horse ahead at the finish, hut in so doing he lost his footing, went into the air and Mayfly landed winner of the heat in 2:44¾. Pools now sold, Dan $25, Mayfly $18, field $10, as many supposed that Dan could have won this heat had he kept his feet. They got away on the second heat with Mayfly at the pole. She led around the first time, with Dan second, Golddust third. The race down the hack stretch was exciting, Schlutin holding his mare steady, with Wilson on his wheel, shaking old Dan np. At the half Dan lost his feet, dropping hack a length or so. When Wilson got him down he struck a terrihle pace, and from the head of the stretch home it was as hard a race hetween him and Mayfly as one ever saw. Wilson shook the hit in Dan's mouth, worked at him in every way, and when within fifty yards the mare broke and Dan won hy ahout a length, time, 2:42½. The pools sold now at $20 on Dan and $7 for tbe field. The hackers of Mayfly thought that Schlutin was too weak to handle the mare on a slippery track so they prevailed npon Henry McConn to get in hehind her; the rain came now in torrents, track slippery, hoys shouting, and away they went amid mnch confusion and excitement; Mayfly and Dan trotted douhle to the half-mile pole, when the mare hroke and dropped a peg; when Henry got her straightened again, he went at Dan and drove him out in 2:42 with Mayfly on his shoulder, Unknown third, Golddust fourth. The hackers of Mayfly seemed hlue, and she did not find many who would stake $5 against $20 on Dan, it seemed such a sure thing for Dan to win it, although this heat in 0:42 with mud hoof-deep made him very weary. The next heat Schlutin again got np hehind her. Away they went with Mayfly aud Dan side hy side, throwing mud right and left. Every inch of ground was contested for hy the two favorites. Dan led all the way; when within 40 yards of the score he left his feet, owing to the tired condition of Wilson, to longer steady him, and Mayfly won in 2:46½ with Dan second, Unknown third and Golddust fourth. Pools now sold at $20 for Dan against $20 for the field. The last heat was started in a heavy shower with the track sloppy. Wilson relinquished his seat in this heat to Tim Kennedy who went off with Dan ahout two lengths in the lead around the first turn, makiug a hot pace; this he kept to the half with the mare trailing; when rounding the upper turn Dan left his feet and the mare passed him; he never overtook her from there home, she beating him out hy a length in 2:49, winning the race. The small pool-huyers now had the track, and amidst the rain aud mud, the loud hurrahs went np for the grey mare. This was an exceedingly exciting and interestiug race. Ahout $10,000 went into the hox on this race.

SUMMARY.

Time—2:44¾, 2:42½, 2:42, 2:46½, 2:49.

This ended the day's sport, as the 2:30 trotting race had to he poetponed. The prospects of the cluh np to date are very bright. To-day (Thursday) is sunshine, the clouds having disappeared, and it is possihle the track will he good enough for the remainder of the week. More anon.

Mile and a Quarter.

Sacramento, May 17, 1883.

The Three-Minute Race.

The trotting purse for the three-minute class, offered hy the State Agricultural Society, closed with following entries:

L. J. Rose, San Gahriel, h g La Grange.

Henry McConu, San Francisco, h h Arah, hy Electioneer, dam Lady Hamilton.

W. B. Todhnnter, Sacrameuto, h h General, hy Gen. Reno, dam Maryeville Queeu.

P. Farrell, San Francisco, h h Barney B, by Sargent's Patchen, dam uuknown.

C. F. Taylor, Marysville, h g Blockade, hy Rondo, dam hy Selim.

C. J. Ellis, Los Angelee, h h Boh Maaon, hy Echo, dam Belle Mason, hy Belmont.

J. B. McDonald, Maryeville, h f Hazel Kirk, hy Brigadier, dam Fannie, hy Jim Brown.

J. W. Donathan (P. Johnson's), Oakland, h g Scandinavian—pedigree unknown.

P. Rohson, San Francisco, h h Col. Gannon, hy Sam Purdy, dam Woodhurn & Bel'mar's mare.

Chas. David (S. S. Drake), Vallejo, h f Sister, hy Admiral, dam, Black Flora, hy Black Priuce.

Wm. Corhett, Sen Francisco, h g Joe Arthurton, hy Arthurton, dam Flora.

ATHLETICS.

The Firemen's Tourney.

The State Firemen's tournament took place at Gilroy last Tuesday and Wednesday and was not seriously interfered with hy the scowling weather. Light showers were frequent, sufficiently so to make the track a trifle heavy, hut not to make any postponements necessary. Ahout 4,000 people were in attendance. The exercises of Tuesday hegan with the Hook and Ladder races. The conditions were to run 300 yards, put np a thirty-foot ladder and send a man up, time to he taken when the ladder man's hand touched the topmost round. The contestants were the Eagles of San Juan, a team from Santa Clara, and the Eurekas of Gilroy.

The Santa Clara team ran first. They passed the line teu feet at the outcome and lost time. Their ladder work was also awkward. The watches stopped at 58¾ seconds.

The Eurekas of Gilroy then took the track and made a fine start, hut ran the first half too fast, causing some of the runners to lahor at the finish. and 60 seconds was the hest they could do.

The Eagles of San Juan came next and made a clean and sharp run, throwing up the ladder without a hitch and getting a record of 53½. This was the time reported hy the timing officials, although the non-official made it three seconds faster. The prizes were awarded as follows:

Eagles, first prize, $150 in coin. Santa Clara team second, $100 in coin. Eurekas third, Climax fire extinguisher. The Eurekas were also winners of the prize for slowest time, a hog.

The second event was the contest hetween juvenile hose teams, to run 300 yards, nnroll 300 feet of hose, hreak coupling and get on water. Teams from Gilroy and Hollister participated and the result was a dead heat in 1:04¾.

On Wednesday the hose races were decided. The conditions were to run 400 yards, nnreel 300 feet of hose and get on water. The teams ran as follows:

Californias of Watsonville, 1:15.
Vigilants of Gilroy, 1:15¾.
Tanners of Santa Cruz, 1:16¾.
Alerts of Santa Crnz, 1:12¾.
Pilots of Santa Cruz, 1:13½.
Pajaroe of Watsonville, 1:14¾.
Eurekas of Gilroy, 1:12.

The Hopes of Santa Clara started hut met with an accident and did not run through.

The Wide Awakes of Hollister ran hut were protested for changing men during the run and unreeliug hose hefore the line was reached. Prizes were awarded as follows:

First, $300 in coin, Eurekes of Gilroy.
Second, $175 in coin, Alerts of Santa Cruz.
Third, $100 in coin, Pilots of Santa Cruz.
Fourth, $25 in coin, Pajaros of Watsonville.
Hollister Wide Awakes took the hog.

The Watsonville diamond helt, competed for hy Hollister, Watsonville and Santa Cruz, was won hy the Santa Cruz Alerts.

The dead heat hetween the juveniles of Gilroy and Hollister was then run off and was won hy the Gilroy team. Time, Gilroy, 1:02¾; Hollister, 1:06½. Mr. Henry Miller presented the winners with a special prize of $50.

The wrestling exhihition hy Wm. Mnldoon and Donald Dinnie will not take place on Monday as announced, uuexpected difficulty in finding a suitahle hall having heen experienced. Of course it is not pretended that the primary ohject of the wrestlers in testing each other's merits is to capture as large as possihle an amonnt of gate money. It is said that there is $250 a side staked on the match, and the money is certainly "up," hut whether the winner will take the stake is altogether another matter. Professional athletes, as a rule, do not jump in with a week or ten days' preparation aud compete for $250 of their own money, as the alleged etake in the present match is said to he. Aside from all considerations of the stake money, however, the match will undouhtedly he worth seeing, as Dinnie is a champion at his style of wrestling and Muldoon a champion at his. The terms of the match are that the men shall wrestle half an hour Scotch style aud half an hour Græco-Roman style, and that Diunie shall throw Muldoon twice as often as Muldoon can throw him. Dinnie appears to have the hest of the match, as he claims that in wrestling Scotch style if any part of a competitor except his feet touch the ground he shall lose a fall. It ought to he much easier for the hrawny Scotchman to hring Muldoon to his knees or on one of them, than for the sturdy New Yorker to throw the "Heelan man" a square fall Græco-Roman style, Muldoon is, however, confident and evidently intends to wrestle to his full ahility. He is training at the Ocean House. The match will take place Wednesday night at the Mechanics' Pavilion.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

J. R. G., Los Augeles:

Wellswood, gr h, foaled 1857, hy imported Yorkshire.

First dam Grisette, hy imported Glencoe.

Second dam Fandango, hy imported Leviathan.

Third dam imported Gallopade, hy Catton.

Forth dam Camillina, hy Camillus.

Fifth dam hy Smolcusko. See Bruce's American Stud Book, Vol. 7, page 501.

Names Claimed.

By J. H. Tennent, Pinole, Cal.

Lorna Doone for hrown filly, large star in forehead, off hind leg white, foaled April 24, 1883; hy Steinway; first dam Lady Dudley, hy Tom Dudley; second dam hy Bertrand Jr.; third dam hy Pacolet; fourth dam hy Sir Solomon, son of Sir Archy.

Maria W for a hrown filly, large star in forehead, foaled April 28, 1883; hy Whipple's Hamhletonian; first dam Pinola, hy Pinole Patchen; second dam hy Owen Dale.

Striped hase have heen taken at the Crystal Springs reservoir recently which weighed eight pounds.

BASE BALL.

A Decidedly Poor Game and its Cause.

The attendance at tbe sixth championship game between the Haverlys and Niantics at the Recreation Grounds on Sunday last was hardly np to the numbers whicb witnessed the previons baseball contests. It is regretted that the actions of certain players have beeu such as to disgust the warmest supporters of the game and thus severely handicap any and all efforts to bring ahout a season characterized by good sport and good feeling. Some time before the opening of the season, the BREEDER AND SPORTSMAN anticipated similar action hy an elaborate review of the history of the game on the Pacific Coast, stating that its decline was solely attributable to the dishonorable practices of certain players who never allowed an opportunity to pass for an exhibition of conduct that would not be tolerated in a friendly game unattended by spectators, and mucb less during the progress of league games. The prospects for a successful and eventful season were never more promising than at the outset of the present games. Not alone were the clubs as a rule composed of hall players, but the management of the clubs was entrusted to gentlemen of undisputed ahility and standing in the community, and it was reasonably to be expected that uuder their eupervision the games would be condncted in an orderly and professional manner. If their efforts in tbis direction have been nullified and if the contests henceforward fail to attract even much smaller audiences than they do at present, the fault can be readily traced to the players themselves. It might be suggested that the member who so openly compromised the clubs last Sunday be expelled, and this done, an attempt should be made to have the present management continue. The hint is worthy of the earuest consideration of the league clubs, as the only practical way out of the difficulty. In view of the above facts it could hardly be expected that the game should result in anythiug but a one-sided affair, especially as regards the fielding. At the bat the Niantics were nnusnally weak, and during the entire game they scored a total of six hits as against seventeen for their opponeuts. Their fielding was execrable, with the solitary exception of Finn, who played brilliantly throughout. The Haverlys, on the contrary, were in excellent form and did heavy work in the field and at the bat. Morris was fortunate in making four hits, all of which were heavy grounders, on which he made three runs. F. Carroll behiud the bat for the Haverlye did the best playing seen this season and was frequently applanded during the game. There was a remarkable disparity of errors between the competing teams, the Niantics snmmiug up a total at fourteen and the Haverlys two. Making dne allowauce for the inability of the Niantics to control the eccentricities of their pitcher, their fielding is still a matter of surprise, as the easiest plays were fumbled and lost. Following is the score:

NIANTICS.	TB	R	BH	PO	A	E
J. Carroll, 2b & p	4	0	0	4	2	2
Donahue, s s	4	0	1	0	2	2
Sweeney, p & 2b &3b	3	1	1	1	0	0
Finn, 3b & p	4	0	2	0	2	0
Sullivan, r f	4	0	0	1	2	1
Egan, 1b	3	0	0	6	0	2
Lawton, c	3	1	2	5	1	3
Fogarty, l f	3	0	0	1	1	2
Lyman, c f	3	0	0	2	0	2
Totals	31	2	6	22	10	14

HAVERLYS.	TB	R	BH	PO	A	E
Barnes, 1b	5	4	2	4	0	0
Sohr, l f	6	2	3	3	0	0
Levy, c f	6	2	1	1	1	1
Morris, 3b	5	3	4	1	0	0
F. Carroll, c	5	2	2	16	0	0
Meegan, p	5	2	1	0	1	0
Gagus, 2b	5	3	3	0	0	0
Sheridan, s s	5	1	1	0	1	1
Johnson, r f	5	2	0	0	0	0
Totals	50	21	17	25	3	2

Innings	1	2	3	4	5	6	7	8	9	
Haverlys	1	1	8	0	1	2	0	8	*	—21
Niantics	0	0	1	1	0	0	0	0	0	— 2

*The Haverlys did not play their ninth inning.

Earned runs—Haverly 2, Niantic 0. Left on bases—Haverly 3, Niantic 2. Struck out—Haverly 1, Niantic 13. Wild pitch—Sweeney 1, Meegan 1. Base on balls—Haverly 1, Niantic 1. Two-base hits—Barnes, 1, Morris 1, Meegan 1, Carroll 3. Umpire—H. Videau, Scorers—Fisher and Egan.

League Games.

Games won and lost by clubs of the California Base Ball League from April 1 up to date:

	Niantic.	Haverly.	California.	Redington.	Total Games won.	Runs Made.	B. H. Made.
Niantic	......	......	1	1	2	15	29
Haverly	2	......	1	*	3	39	33
California	......	......	......	1	1	13	12
Redington	......	*	......	......	0	4	5
Total Games Lost	2	0	2	2	5	49	56

* Game postponed on account of rain.

Since the above review wae in type, it appeare that Sweeney, pitcher of the Niantics, has been expelled from the league and that John J. Mone, president of the California Base Ball League, has resigned. Tbis is to be regretted as no more enthusiastic patron of tbe game can be found on the coast. The causee which inspired the resignation will, no doubt, bring the game into its former disrepnte. That the club needs to be reorganized is quite apparent.

Announcement ie made that the Haverlys on tbe 20th inst. will play the Union Club of Sacramento for the championship of the State. As neither club hae yet any claim to be recognized as a champion pending the conclusion of the league games, tbe wiuning team will have a long road to travel before being entitled to championship honors.

Secretaries of interior clubs desirous of playing the Haverlye of this city are requested to addrese A. Platt, Manager, 627 Bueh street.

YACHTING.

Opening Day of the Pacific Yacht Club.

The opening day of the yachting eeason under the auspices of tbe Pacific Yacht Club, even after the postponement of tbe 5th inst., was not attended by the fine weather whicb has characterized aimilar events in the past. Tbe sky was overcast during the entire day, and beyoud the fact that the heavens refrained from ahedding what farmere are jnbilant in calling copions showers, the day was uot calculated to cause even the moet ardeut yachtsman to go into ecstasies. On the following day, however, beautiful weather prevailed and a most enjoyable sail was experienced. As the hour appointed for the yachts to get under way approached, the wharves were lined with people anxiona to witness the start, and promptly at 11 o'clock the eignal gun was fired by Commodore Philip Caduc, the fleet following the flag sbip Annie, and looking neat and trim. As they paseed the city front from Saucelito on their trip to Hunter'e Point, they looked beautiful as they sped before a fair wind. Rounding Hunter's Point, rate of sailing followed on the return to the clnb house, and resnlting in favor of the Halcyon. The following yachts participated: Ariel, echooner Nellie, Chispa, Rambler, Halcyon, Flenr de Lis, sloop Nellie, Con O'Connor, Lurline, Thetis, Whitewing, Lively and Frolic.

	Hunter's Point.	Mid-channel buoy	Home	Actual sailing time
	P. M.	P. M.	P. M.	H. M. S.
Halcyon	12:32:55	1:55:00	2:12:35	1:39:40
Lurline	12:35:30	2:05:00	2:15:35	1:41:05
Nellie	12:37:00	2:14:30	2:31:12	1:54:12
O'Connor	....	2:07:30	2:22:15	1:49:30
Fleur-de-Lis	12:32:45	2:07:00	2:27:20	1:54:35
Annie	12:32:25	....	2:37:55	2:05:30
Ariel	12:34:34	....	2:45:15	2:10:41
Frolic	....	....	....	....
Whitewing	....	....	....	....
Clara	....	....	....	....
Rambler	....	....	....	....
Chispa	....	....	....	....

The Aggie was recently on tbe Merchants' Dry Dock, and seemed the worse for new copper. A bad leak was found forward, but beyond giving her a coat of paint and tacking a few strips of copper nothing was done.

THE KENNEL.

The Poisoned Dogs.

Last Tueeday night some of the members of the Kennel Club met at the Occidental Hotel to take some action relative to the poisoning of Carroll'e and Orndorf's dogs during the late show. A short discussion revealed some facts decidedly uncomplimentary to the managers of the show. When it was first fonnd that the dogs had been poisoned, several persons offered large rewards for the discovery of the poisoner and it was generally nnderstood that the managers, who had more iuterest in the matter than any one person except the owner of the dogs, would take eteps to have the contents of the dogs' stomachs analyzed with a veiw to conducting a vigorous search for the offenders. Mr. Carroll left the hall with this understanding and being quite sick dnring the next two daye paid no attention to the matter. The carcasses of the dogs were left in the hall in possession of the managers, one of whom was present at the hall next day. Instead of preserving the dogs' stomachs, he allowed them to be thrown away and with them all proof of the poisoning was lost. Without them it is useless to attempt any search after the evil-doer, for while it ie generally known that the dogs were poieoned, no legal proof exists of that fact. The gentlemen who put their dogs on exhibition had a right to expect that the best of care would be taken of their pets and while there ia no reason to assnme that the poisoniug occurred through any specific neglect of the managemeut, no excuse can be offered in palliation of the failure to take proper and prompt steps to bring to justice the evil-doers. The gentlemen who allowed their names to be used as a guarantee that the show would be properly managed have no reason to congratulate themselves. Dissatisfaction at judging was to be expected, but they had a right to ask that the dogs be properly cared for and the show conducted in a proper manner. Mauy exhibitors complain tbat their doge came back poor and dirty, evidencing neglect in many waye. There was not enough help placed at the disposal of the superintendent and a niggardly plan of doiug things prevailed. Mauy of the prize-winners have not yet received their medals and have good cause for complaining on that acconnt. The blame should be placed where it rightly belongs. The few gentlemen who compose what is known as the Kenuel Club agreed with the public to be responsible for the fair judging of the dogs. Mr. Levy, the maneger of the show, and who alone had any interest in its pecuniary success, agreed on his part to care for the dogs, provide sufficient belp and give certain prizes. If he did uot do so, he alone is to blame. Unfortunately the gentlemen whose names were used had uo sort of power or control over Mr. Levy aud while some odium may attach to them for the shortcomings complained of, they were powerless to do more than request and advise. Had their advice been heard, Mr. Levy would have had to spend a few dollars, but in retnrn he would have saved a good deal of grumbling.

Corrected List of Prizes.

As stated last week, eeveral mistakes were made in all the published reports of the awards made in the setter classes at the late dog show. The corrected statement follows:

English Setter Dog—First, H. D. Bartlett's Rob Roy, Farmer's Queen—Miller's Jo; second, J. C. Nealon's Dick.

English Setter Bitch—First, E. H. Farmer's Queen, Belle-Belton; second, T. R. Jacobs' Fannie.

English Setter Pups—First, E. H. Farmer's Marks, Farmer's Queen—Miller'e Drake; eecond, John De Vaull's Royal Duke; V. H. C., H. D. Bartlett's California Rose; H. C., R. W. Martin'e Jim Budd; H. C., H. A. Mayhew's Mars, Belton II—Coin II.

Llewellin or Field Trial Dog—First, E. L. Mayhew's Dan.

Llewellin or Field Trial Bitch—First, Henry Payot's Cleopatra.

Llewellin or Field Trial Pupe—First, D. M. Pyle's Daisett; eecond, J. B. Martin's Chispa; V. H. C., E. L. Mayhew'e Topsy.

Many of these dogs were classed improperly, and bad to be reclassed by the judges in accordance with the rules. No prizee were given for Laverack setters, but eeveral dogs eutered as Laveracke got prizee as Llewellins.

Last Sunday and Monday the Schuetzen Verein beld their annual epring shooting tournament at Schnetzen Park, Alameda. The club were very liberal with their prizes, giving about fifty prizes, of different values. A large number, probaly twenty-five prizes, were donatcd by friends of Schnetzen. The clnb has at present about 150 members, most of which are excellent ahots with tbe rifle. The ehooting at the last tonrnament ebows aome fine scorea. This evening the seventy prizea will be diatributed at tbe new Turu Vereiu Hall on Turk sreet. We will give the list of wiuners in onr next.

Market Report.

FLOUR—We qnote: Best City Extra, $5 65@$6 05; medium grades, $4 50@$5 25; Shipping Superfine $4@$4 25.

WHEAT—The dullness of the Liverpool market is felt to some degree in our local market in this grain, especially in cargo prices. Millers are holding back, and but little business has been done lately. The present quotations are No. 1, $1 77½ @ $1 80. No. 2, $1 72½ @ 175

BARLEY—The lack of confidence among operators has affected a decline in the prices of this grain. Recent sales are No. 1 $1 14¾ @ $1 15 do June, $1 09½; do seller 1883 $1 05 ₱ ctl.

OATS—Fair Feed, $1 85@$1 05; Good, $2@$2 15; Choice, $2 30@$2 35 ₱ ctl.

RYE—Qnotable at $1 65@$1 85 for fair to good.

FEED—Ground Barley, $27 ₱ ton; Cracked Corn, $35 ₱ ton; Shorts, $15 50@$17 ₱ ton; Oilcake meal, the oilworks sell to the trade at $35 ₱ ton, less the nsual discount; Middlings, $20@$22 ₱ ton for lots at the mill.

HAY—Alfalfa, $10@$14; Wheat, $16@$18; Wild Oat, $16@$18; Mixed, $10@$13 ₱ ton.

STRAW—50c@80c per bale

PROVISIONS—Eastern Hams, 16½@16¾c; California, Hams, 15@15½c for plain, 15¾@16½c for sugar-cured canvased; Eastern Breakfast Bacon, 15@16½c; California Smoked Bacon 15@15½c for heavy and medium, and 16@16½c for light and extra light; Clear Sides, 15¼@15½c; Pork, $18 50@$19 for Extra Prime, $20@$20 50 for Prime Mess, $24 50@25 for Mess, $25 50@$26 for clear and 26 50@$27 for extra Clear; Pigs' Feet, $16@$18 ₱ bbl; Mess beef, $15 50 for bbls and $8 50 for hf bbls; Extra Mess Beef, $16 50 for bbls and $8 75 for hf bls; Family Beef, $16@18 50 ₱ bbl; California Smoked Beef, 13½c.

FRUIT—We quote: Apples, 40c@50c for common and $1@$1 50 ₱ box for good to choice; Lemons, $6@$6 50 per box for Sicily; California Lemons, 75c@$1 50 per box; Limes, $6@$7 per box for Mexican; Bananas, 1 50@$3 ₱ bunch; California Oranges, $1@$1 50 for common and $2@3 for good to choice ₱ box; Pineapples, $5@$6 ₱ doz. Western Cranberries are offering at $15@$17 ₱ bbl; Strawberries, $6@$10 ₱ chest according to variety. Raspberries, 50c per basket.

VEGETABLES—We quote: Summer Squash, 6@10c ₱ lb; Carrots, 37½c@50c; Turnips, 75c@$1; Cauliflower, $1@$1 25 ₱ dozen; Cabbage, $1@$1 50 ₱ ctl; Garlic, 3½c ₱ lb; Celery, 50c ₱ doz; Dried Okra, 20c@25c; Dry Peppers, 10c@12½c ₱ lb; Green Peas, 2½@3½c for common, and 4½@8c for sweet; Rhubarb, 6@8c per lb; Mushrooms, 75c @$1 ₱ box; Tomatoes, $2@$2 50 ₱ box, Cucumbers, 20c@$1 75 per doz.; Asparagus, $1 12½@$1 50 ₱ box; Sprouts, 3c ₱ lb.; Artichokes, 10c@15c ₱ doz.; String Beans, 10@12c ₱ lb.

POTATOES—River Red, 50@70c; Early Rose, 50@70c; Tomales and Petaluma, $1 05@1 12½ ₱ ctl; New, 1½c@2c per lb.

ONIONS—87½c@$1 for good to choice.

BEANS—Bayos, $5; Butter, $3 25@$3 50 for small and $3 50 @$4 for large; Lima, $3 80; Pea, $3 50; Pink, $4 75@$4 80; Red, $4 60@$4 70; small White, $3 50; large White, $3@3 25 ₱ ctl.

BUTTER—We qnote jobbing lots: Fancy, 25c; choice, 23@24c; fair to good, 17@22c; inferior lots from country stores, 15@17c; firkin, old, 20@22½c for choice; new, 22@25c; pickled roll, 20@26; Eastern 17@20c.

CHEESE—Firm. California, 14c for choice: 11@12½c for fair to good; do, factory, in boxes, 14@16c; Eastern, 16@17c.

EGGS—California, 23@25c ₱ doz; Eastern, 23@24 per doz.

POULTRY—Live Turkeys, gobblers, 22@23c; do, Hens, 22@23c; Roosters, $7@$7 50 for old and $10@$12½ for young; Hens $7 50@$9; Broilers, $4@$5, according to size; Ducks, $6@$8 50 ₱ dozen; Geese, $1 50@$1 75 ₱ pair; Goslings, $1 50@$2 25 per pair.

GAME—Snipe, $2 25@$2 50 for English and 75c@$1 for common; Hare, $1 25@$1 75; Rabbits, $1 25@$1 50.

WOOL—We qnote: Choice Northern Free, 22@24c; Choice Northern Burry, 17@19; Calavaras and middle counties, 20@23; San Joaquin and coast, choice, 16@18c; San Joaquin and coast, inferior, 13@15; San Joaquin and coast, year's clip, 14@18c.

HIDES AND SKINS—Dry hides, nsual selection, 16½@17c ₱ lb; culls one-third less, and Mexican Hides 2c ₱ lb less; Dry Kip, 17c; Dry Calf, 17c@22; Salted Steer, over 55 lbs, 11c ₱ lb; Steer and Cow, medium, 9½c@10c; light do, 8@8½c; Salted Kip, 15 to 30 lbs. 9½@10c; Salted Calf, 13@15c ₱ lb; Salted Veal, 12@13c; Sheep Skins, 25@30c for Shearlings, 30@50c for short, 50c@9.c for medium, and $1@$1 40 apeice for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—Quotable at 8@8½c ₱ lb for rendered and 11@12c for refined, both in shipping order.

MEATS—Following are rates for whole carcasses from slaughterers to dealers:

BEEF—Prime, 8½@9c; medium grade, 7½@8c; inferior, 6½@7c ₱ lb.

VEAL—Large Calves, 7@8c; small ones, 9@10c ₱ lb.

MUTTON—Wethers are qnotable at 4½@5c and Ewes at 4@4½c ₱ lb, according to qnality.

LAMB—Spring is quotable at 6@5½c ₱ lb.

PORK—Live Hogs, 8@8½c for hard and 7@7½c for soft; dressed do 10½@11c ₱ lb for hard grain hogs.

SPEED PROGRAMME

OF THE

Third Dist. Agricultural Ass'n

AT CHICO, CAL., COMMENCING TUESDAY, AUG. 28, '83.

DIRECTORS:

A. B. COLLINS, WM. HAWKINS, JAMES SHELTON, J. W. B. MONTGOMERY, L. H. MCINTOSH, H. C. WILSON, U. S. NYE, C. C. MASON.

OFFICERS:

C. C. MASON, President; J. H. KRAUSE, Secretary; CHAS. FAULKNER, Treasurer.

$3,000 IN STAKES AND PURSES.

$3,000 IN STACES AND PURSES.

FIRST DAY, TUESDAY, AUG. 28, 1883.

No. 1—Trotting race; 3-minute class; mile heats, best three in five, to harness and to rule, for a purse of $300; first horse to receive $180, second $90, third $30.

SECOND DAY, WEDNESDAY, AUG. 29.

No. 2—Dooley Stake; running race; three-quarter dash for all two-year-olds; entrance $25; p. p.; $100 added; second colt to save entrance.

No. 3—Union Hotel Stake; running race; free for all three-year-olds; entrance $25, p. p.; $150 added; second horse to save eutrance money; 1¼ miles.

No. 4—Reavis Stake; running race; three-fourths of a mile and repeat for a purse of $200; first horse to receive $150, second $50, entrance free.

THIRD DAY, THURSDAY, AUG. 30.

No. 5—Trotting race; 2:40 class; mile heats, best three in five, to harness and to rule, for a purse of $200, for all horses owned in the district; first horse to receive $120, second $60, third $20; Roanoke and Dutchman not barred.

No. 6—Pacing race; 2:30 class; mile heats, free for all, best three in five, to harness and to rule, for a purse of $300; first horse to receive $180, second $90, third $30.

FOURTH DAY, FRIDAY, AUG. 31.

No. 7—Trotting race; 2:22 class; mile heats, best three in five, to harness and to rule, free for all, for a purse of $800; first horse to receive $400, second $200, third $120, fourth $80.

No. 8—Trotting race; for a purse of $300; free for all four-year-olds owned in district; first horse to receive $180, second $90, third $30.

FIFTH DAY, SATURDAY, SEPT. 1.

No. 10—Burk & Mansfield Stake; running race; one-half mile and repeat; free for all; entrance $25, $100 added, second horse to save entrance money.

No. 10—Fashion Stable Stake; running race; dash of two and one-quarter miles; free for all; entrance $50, forfeit $25, $300 added, second horse to save entrance money.

No. 11—Consolation Purse; running race; single dash of one and one-eighth miles, for a purse of $250, for all beaten horses; entrance free; first horse to receive $150, second $75, third $25.

CONDITIONS AND REMARKS.

National Trotting Association Rules to govern all trotting and pacing races.

In all trotting and pacing races, five to enter, three to start. Entrance, ten per cent, to accompany all nominations.

The Pacific Coast Blood Horse Association Rules to govern all running races.

Non starters for running races will be held for entrance.

No money paid for a race without a contest.

Non-starters must be declared out the day previous to the race they are engaged in, before 8 o'clock p. m.

Horses distancing the entire field in one heat will be entitled to first and third money only.

Horses entered for purses can only be withdrawn by consent of the judges.

All entries for races to close with the Secretary at Chico, August 1, 1883, at 11 o'clock p. m.

The Board of Directors will have absolute charge of the track and grounds during the week of races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the races, will be strictly enforced in every respect, and all purses and stakes will be paid after the judges have rendered their decision, and before leaving the stand.

C. C. MASON, P[resident].

J. H. KRAUSE, Secretary.

HERD AND SWINE.

Summer Management of Pigs.

Every farmer should make the best use of his resources. Grass is a cheap food for pigs, and a most healthy and profitable diet. Much of the profit on pigs must come from a proper use of grass as summer food. Some have expressed very grave doubts whether pigs can be fed at a profit in pen all their lives, but we do not think there is any doubt about it. For, if the best feeding will not pay for the food given pigs, then they must be considered unprofitable animals—a position wholly untenable, as it has been abundantly proved that the pig is the best utilizer of food on the farm. We fully believe in the use of grass for pigs; and, if obliged to keep pigs constantly in pen, would carry the grass to them, purely as a matter of health, but better health will make better thrift. We know that pigs will pay a profit when every pound of food from the the first to the last day of their lives is charged at the market price. But this requires full feeding, with due regard to every precaution for health.

If these doubters mean that the pig cannot be fed at a profit, wholly upon concentrated food, we shall not dispute the conclusion. But it is not difficult to give pigs the benefit of grass or other green food in pen.

We fully believe in the economy of pasture for pigs in summer, and that every one who feeds a considerable number of pigs should always provide pasture for them. Pasture may furnish a large part of their food, and furnish it cheaply; but grass should not be the exclusive food, for, in that case, the growth will be slow, although a healthy growth. Much valuable time is lost by feeding pigs sparingly in summer, for this should be the most rapidly-growing season; and if they only half grow through this most favorable season, and the other half is put on in the cold season with grain, the profit is largely if not entirely lost. One-half or one-third of the grain fed to pigs upon pasture that is required to produce the winter growth would add quite as much.

It should be remembered that the grass will give the food of support, besides some food of production, and the grain added will go wholly to production or profit. Whereas, if this extra growth is delayed till winter, it will take as much extra food to keep up animal heat without growth as it would to have produced the extra growth in warm weather.

It is, therefore, quite evident that pigs should be pushed rapidly forward in summer, when everything is favorable for the most rapid and healthy growth. The case is somewhat different in regard to young breeding sows. These should be given a vigorous growth, but should not be pushed so perseveringly as fattening pigs. These young sows may be kept principally on grass, with a small feed of oats or wheat middlings to give them a strong, muscular growth.

These young breeders should have plenty of exercise, and therefore a good range of pasture. Very little, if any, corn should be allowed them, as it is too heating for the young blood. Food that will grow muscle and bone is most needed. Linseed meal, in small quantity, is a most excellent food for breeding sows. It keeps the stomach healthy and furnishes a large proportion of food for muscle and bone. The breeding sow needs a large, rangy frame, and this can be produced to a great extent by the food.

More care than is usual should be given to cleanliness and furnishing pure water. The pig cannot resist all possible malarial influences any more than other animals. Human cholera is supposed to be bred by uncleanliness and a malarial atmosphere. Why should the pig be expected to maintain health when its water is alive with the germs of disease, and it sleeps in a mud hole? The pig is, no doubt, our most abused animal, and yet his great importance in our home supply of food, and in swelling our foreign commerce more than one hundred millions a year, would seem to entitle him to better treatment.—*Live Stock Journal.*

Are Shorthorn Cattle Hardy?

Yes, we answer, unhesitatingly, as much so as any other breed of cattle in existence, when properly reared. They have only become delicate when foolishly stuffed from birth, with an excess of rich food, kept shut up from healthy outdoor exercise, and housed alike from summer heat and winter cold. There are thousands of thoroughbred and high grade Shorthorns in the Western States that have been reared without an hour's shelter of any kind, and had no other food since weaning, than grass, from spring to autumn, and the run of a cornfield in the winter; and these prove so superior when full grown, as to win the highest prizes often over all other cattle at the various stock exhibitions throughout the country. Shorthorn bulls when delicately bred, taken to the great western plains, and turned out there among a herd of half wild cattle to "shirk" for themselves, as a matter of course could not long endure such a life; but had they been reared and kept in a proper manner, as some few of the wiser ranchmen have latterly done, these bulls would have served well and lived to a fair old age.

The grade progeny of Shorthorn bulls out of Spanish or Texas cows, one of the largest of the ranchmen says, "unite the qualities of the former with the power and activity of the latter." And to this they undoubtedly add the further merit of maturity two years earlier than their female ancestors. They consume no greater quantity of grass, and turn out a quality of beef worth from 50 to 75 and perhaps 100 per cent more than the Spanish or Texas bullocks. The same story is told in Great Britain, where Shorthorns and their grades have spread rapidly during a century past, from their original home in Durham, to the severe winter climate of the north of Scotland and the very mild one of the south of England; and throughout the country they are now successfully competing in thrift (and at a greater profit in breeding and raising), with many of the various sorts of the natives.

The celebrated African traveler, Livingstone, wrote that in one large district of that excessively hot country he found a native breed of cattle as large as and closely resembling the English Shortborns in all their points. A similar native breed has existed from time immemorial, in the cold mountainous cantons of Switzerland.

Give the Shorthorns plenty of healthy food and pure water, and they will do as well as other beasts; but, we say, all ought to be well sheltered from winter storms, by day and night, and have shade to go into at will during the extreme hot summer. On thin pasture, and rough, hilly, mountainous land, smaller and more active breeds are more profitable, and those should be kept in such districts in preference to Shorthorns, Herefords, and other large animals.—*American Agriculturist.*

J. W. Laver of Mountain View, Santa Clara county, has a Holstein cow, six years old, which makes thirteen pounds of butter in a week. We have not Mr. Laver's personal assurance of this yield but understand the figures to come from him.

The Use of Scales in Stock Rearing.

It seems strange to Americans that British farmers should be content to buy and sell live stock without weighing; yet it is the exception, not the rule, that farm animals are weighed in Great Britain. Platform scales, or weigh-bridges, as they are called on the other side, are very rare on farms. They are common on the larger stock farms of America, and their frequent use is of great help to the stock-feeder. We have known many men who claimed to be able to judge with wonderful accuracy of the weight of animals, but we have found few who did not sometimes make wide misses. So, too, the scales are a better test than the eye of the comparative progress of an animal at different seasons. Continued practice of frequently weighing stock would cause many even old feeders to modify their opinions.

Yet the scales may lead one to form incorrect opinions. It is unsafe to weigh one or two animals and judge the flock or herd by these. It is unsafe to take the results in any one year, or with any one lot, as a fair average result. Great gains or small gains in particular cases may sometimes be explained by the condition of the animal at the time of weighings. A cow will drink enormously at times, and this may make a surprising apparent gain or a loss in two weighings near together. Weighing after fasting is the more accurate mode, but this is objectionable with cattle or hogs except when to be sold.

Frequent use of the scales will clearly teach the young stockman that there is much difference in the weight of cattle when on grass and after they have been put on dry feed in winter and have passed through a cold storm; also, what is not so likely to occur to him, that he can better afford to buy, at the same price per pound, a few days after cattle have been turned on grass in spring than while they are yet on dry feed; but that he cannot safely defer his purchase long after they are on the grass. Weighings when "full" and after "dry yarding" will show him that buyers sometimes insist on too great a deduction from full weights.

Polled Cattle as Milkers.

The question of the milking qualities of polled cattle being under discussion I want to call attention to the fact that almost invariably a Galloway calf is fat, though owing more to the quality than to the quantity of milk given. They give small quantities of exceedingly rich milk. This is one of the strong points in their favor for Western ranchmen. They want their calves well suckled, but want no caked udders caused by an over-production of milk. The Scotch cattle are notably a beef tribe, and that they take on fat the easiest and under the most unfavorable circumstances, and furnish a quality of beef from grass the nearest to stall fed of any of the different breeds, is a fact which is spreading over the West like a prairie fire and leading the polled cattle to the head of the column, where they deserve to stand. As cattle for the ranges, either in the Northwest or Southwest, the Scotch Galloways seem to be the best adapted.

In Montana and the North, when the thermometer registers 20 degrees below, the ranchmen all tell us that the Galloways are the first on the range in the morning, and the only cattle which will paw away enow to get grass. On the other hand, when the stinging flies of Texas are driving the thinner-skinned animals to desperation in their efforts to drive them off, the Galloway stands complacently and chews his cud, his long, thick hair and tough hide being impregnable. No doubt the black skins are average milkers, but the reasons above mentioned, with numerous others, are what is giving them such notoriety more than their dairy excellence. The beef of this country is produced in the West, and the cattle best adapted to stand the climate and usages customary are the ones which will take the lead.—*Breeder's Gazette.*

Keeping Old Cows.

It pays to run a machine as long as it can be made to return a fair profit on the cost of operating it. Using the old machine saves interest on a new investment, and the continued wear on it does not decrease its value, for the waste material in a condemned machine will be the same whether it is wholly or only half worn out.

The case is quite different with farm stock, which can be used as food when it begins to diminish in usefulness to its owner. The man who keeps an ox or a cow till it pines with old age is a double loser by so doing. It invariably costs more in food and care to maintain an old animal than a young one. As the vigor of life fails, digestion is less perfect and assimilation slower and more difficult, and the waste is greater. As the decline goes on more and more food is required to produce a given amount of labor, or milk, or meat. Old animals can seldom be fattened at a profit, even if their flesh was as valuable as that of younger ones, because it requires so much more time and feed to do it. But their flesh is not equal to that of animals in their prime, so there is a loss, both in the quality and in the cost of producing. Old cows that have been milked till their life force has been exhausted make very poor and low-priced, as well as expensive beef. When a cow has reached twelve or fourteen years of age, it hardly pays to fatten her, if she could be had for nothing. Some cows of extraordinary quality may be profitably kept as long as they can be, for the sake either of stock or milk, but average cows are better converted into beef before it would be appropriate to call them old.—*Live Stock Journal.*

The food of pregnant animals is an important consideration. Creatures in this condition should be well fed, and especially if they have to accomplish a certain amount of labor or yield milk. The appetite is generally increased, and there is a tendency to fatten. This tendency should be somewhat guarded against, as it may prove troublesome, particularly if it is allowed to proceed to an extreme degree, when it may retard the development of the fetus, induce abortion, cause difficult parturition, or give rise to serious after-consequences. This precaution is more to be observed in the second than the first half of pregnancy, when the food should be plentiful, but not in excess, and flesh more abundant in the animal than fat. The food should also be of good quality, very nutritive, easy of digestion, and not likely to induce constipation. Indigestion should be carefully guarded against, and unaccustomed, hard, damp, bulky, fermentable, mouldy or otherwise hurtfully altered food should be avoided, as it is likely to prove indigestible, occasion tympanitis and produce other injurious results.—*Fleming's Veterinary Obstetrics.*

To tell the age of Polled cattle, and keep a reliable record of their pedigrees, it is necessary to make some distinctive marks upon them. Tattooing the inside of the ears is found to be the best method. This has been practiced extensively on sheep in Great Britain for many years past, and now the application is made to Polled cattle. An instrument for this is made in Germany, which does the tattooing cheaply and rapidly.

Danes as Butter Makers.

The Danes have acquired a wide renown for making butter of fancy quality and for long keeping. The extraordinary duration of their butter has enabled them during the past few years to build up a considerable export trade in butter in distant parts of the world. They are reported to have a trade in butter in China, in the South American States—especially in Brazil—in the West Indies and in Spain.

Their management of milk is well calculated for producing a superior quality of butter. It is more favorable to quality than to yield. Cream is raised on the Swartz system, by deep setting and low refrigeration. The principal part of the cream—two-thirds to three-fourths—is quickly raised and removed for butter-making, leaving a very sweet skim-milk, holding one-quarter of the cream for making skim-cheese. Of the principal part of this milk a soft and fairly palatable and wholesome skim-cheese is made, which is economically used as one of the necessary means of sustaining life, and as a substitute for more costly animal food. It is doubtful whether the nitrogenous, or flesh-forming elements with which the milk they so use abounds, could be put to a better use. It is certainly more consistent than the practice which prevails extensively with us of feeding it to domestic animals to be converted into another form of animal food, at a loss of four-fifths of its nutritious value. It is better also than the course pursued to a considerable extent here, of taking all he cream out of milk and then making it into a poverty-stricken cheese, which the strongest stomachs must make a desperate struggle to digest, and which is neither palatable nor wholesome. Such cheese is neither profitable to the producer nor consumer, besides standing in the way of a more liberal consumption of better goods, and being a disgrace to our dairy interests. As the best of the cream rises first, it is the poorest part for butter which is left back to go into cheese, where quantity is of much more consequence than the kind of fat used. The very fresh and sweet condition of the skim-milk, with the amount of cream left in it, gives it a pretty liberal consumption in the families of the producers and in the villages and cities within transporting distance.

The practice of taking only the best of the cream for butter is very general in Denmark, and secures a uniform and high quality and a high national reputation for their butter, and creates a demand for it abroad. Their mode of manufacturing butter for export to hot countries is a little peculiar. Nothing but butter of the longest keeping quality would answer for this trade. The cream is all churned while sweet, and the butter rendered, to free it absolutely of all foreign matter, the presence of which is recognized as the cause of the very perishable nature of butter. As souring is the beginning of decay, it is not allowed to develop in the cream at all. It is said to render the butter unsafe for long voyages in hot climates. The pure and sweet butter fats are put up in tin packages lined with wood filled with salt by being treated with saturated brine, and then covers soldered on air-tight. This is done to exclude air and heat. Put up in this way, packages have been sent to China and returned to Copenhagen without any perceptible change, although no salt is used in the butter so put up.

Copenhagen also furnishes considerable first-class butter for London and Liverpool, where it has a high reputation. For these markets it is not rendered, but is made very much like our Western fancy creamery butter, except that all the cream which would rise is not used.—*Live Stock Journal.*

Puerperal of Milk Fever.

Puerperal fever, otherwise known as milk fever, or parturient apoplexy, is most common to cows who secret milk abundantly, and is induced by high feeding, neglect of proper care and insufficient exercise. At parturition the blood is directed to the udder to promote the secretion of milk, but if for any cause, as inflammation, the udder does not perform its functions, the blood may flow to other parts and serious results follow.

The symptoms of milk fever are unmistakable. The cow loses her appetite, her eyes become dull and heavy, the tongue is dry, the pulse beats rapidly, the bowels are costive, there is no milk secretion, her horns become cold and general weakness and debility follow. In advanced stages of the disease the body becomes swollen, and unless a remedy is then effected and the swelling reduced, the chances are that death will ensue. The stockman should study these symptoms, and the disease itself in various phases, so that he may know how to treat it, or, what is better, take the proper precautions to prevent its occurrence. The method of treatment depends upon the condition of the disorder. Bleeding may be resorted to in the early stages, if the animal is in great pain and very feverish, or ice may be applied and the legs rubbed. The blood should be diverted from the brain by every means available, since it is generally directed there, sometimes causing loss of the senses. Administer a purging drink as soon as possible; small doses of some stimulant, such as brandy or whisky, are advantageous. A good cathartic is a pound of Epsom salts dissolved in a pint of hot water, with a half ounce each of gentian and ginger, to be given in one dose. In four or five hours after, and until the action of the bowels is restored, give one-half the above dose. If necessary an injection may be given of a half pint of spirits of turpentine, a quarter of a pound of treacle, a half pound of salt, and two or three quarts of gruel, mixed. Should the animal refuse to eat, give her every two hours or so a drench of two quarts of milk, some linseed gruel, a teaspoonful of ginger, and a tablespoonful of molasses. Encourage the flow of milk by rubbing the udder, and if this should be inflamed rub it occasionally with soft soap and cold water. If at any time the bowels become costive again, resort at once to the use of the purgative above named, or to any other that will effect a similar result. Give the animal the best of care; let her have plenty of good bedding to rest upon. As the brain in this disease is frequently surcharged with blood, causing a partial loss of the senses, care must be taken that the animal does herself no injury.—*Am. Agriculturist.*

A word about mutton. Do farmers generally know this secret given me by an experienced butcher? To have the best quality of mutton, keep the sheep to be slaughtered from food for at least twenty-four hours and be careful to keep the woolly side of the skin from contact with the carcass. This is not an easy matter. But kill as I say and dress with utmost care, and even the merino will yield a really good mutton.

An importer of Galloway cattle tells me that Scotch breeders, on account of the increased demand for their cattle, are beginning to be tempted to keep too many of their male calves as bulls, many of which will not prove worthy of the breed. I presume the same trouble will be found with the Aberdeen-Angus

Restlessness at Milking.

Cows are often troublesome on being milked, and the kicks and knocks they receive for this restlessness only render them more fretful. If the evil cannot be overcome by kindness, thumps and loud language will never make them better. But the fact is, restless habits were, in nine cases out of ten, eugendered in them by the treatment they received when first milked, and when most probably they were dragooned into submission. Udders and teats are very tender immediately after calving, and especially after the first calving; and when unfeeling, horny hands tug the teats in stripping, as if they had been accustomed to the operation for years, no wonder that the young and inexperienced cow should wince under the infliction, and attempt to get rid of the tormentor by kicking. Could the "critter" be otherwise than uneasy? and how can she escape the pain but by kicking out a heel? Straps and strings are then placed on the on the hind legs to keep the heels down, and the same is perhaps done to her tail. Add to this the many threats and scolds uttered by the milkers, and a faint idea of how a young heifer is broke into milking may be conceived. Some cows are naturally unaccommodating and provoking; but nevertheless nothing but gentleness towards them will ever render them less so. Some cows are only troublesome to milk for a few times after calving, and soon become quiet; others kick pertinaciously at the first milking. In the last case, the surest plan is for the milker, while standing on his feet, to place his head against the flank of the cow, stretch his hands forward, get hold of the teat the best way he can, and let the milk fall to the ground; and in this position it is out of the power of the cow to hurt him. Such ebullition of feeling at the first milking after calving arises either from feeling pain in a tender state of the teat, often from an inflammatory state of the lining membrane of the milk chamber, or simply from titillation of the skin of the udder and teat, which becomes the more sensitive as the heat increases; or, the udder being hard, gives pain when first touched; and should it be difficult to soften, the calf should be allowed to suck at least three times a day, until the udder becomes soft. This will doubtless cure the udder, but may cause another species of restlessness in the cow when the calf is taken away from her; wherefore it is preferable to let the milker suffer some inconvenience than run the chance of the udder of the cow being injured from the want of milking. Be the cause of the irritation or of the restlessness what it may, one thing is certain, that gentle and persevering discipline will overcome the most turbulent temper in a cow. Milking affords different degrees of pleasure to different cows. One yields her milk with a copious flow, with the gentlest handling, another requires great exertions to draw in streams not larger than a thread. The udder of the gentle one has a soft skin, and short teats like velvet; while that of the hardened one has a thick skin, and teats long and tough like tanned leather—*Prairie Farmer*.

Pacific Coast Jersey Cattle Club.

The movement to organize a Jersey Cattle Club and establish a herd book for the territory west of the Rocky Mountains has met with a hearty affirmative response from breeders, over fifty of whom have already sent letters of assent and commendation to Major Beck. This organization is not intended as an "opposition" to any other similar association, neither does it propose to lower or change the standards already fixed for the Jerseys. The dissatisfaction with the management of the American Club of New York is widespread and from the intimations of reliable gentlemen East, West, North and South it would appear that there has been a departure from the mutual benefit idea upon which it was established and that it is in many case an obstruction instead of an advantage. But aside from all these questions the breeders of the Pacific Coast are numerous enough and the interest of a sufficient magnitude to justify a home herd book and association. The American Club is remote and inaccessible, and has no advantages not enjoyed by the breeders of this Coast for all the purposes it can possibly serve. Gentlemen interested risk nothing but consult their own convenience and security by enrolling themselves among the members of the Pacific Coast Club. The movement is crystallizing into practical shape and this week the following circular letter was sent to all the known Jersey breeders and owners within the territory designated:

DEAR SIR: The undersigned breeders and owners of thoroughbred Jersey cattle, believing it to be advisible, desirable and necessary that a Jersey herd book be established for this Coast, including all territory west of the Rocky Mountains, cordially invite you to attend a meeting to be held at Room No. 1, Stock Exchange building, San Francisco, June 16, 1883, at 1 o'clock p. m., when all matters pertaining to that great interest, and the formation of a Pacific Coast Jersey Cattle Club, will be fully discussed.

ROBERT BECK,	A. MAILLARD,
JAMES McM. SHAFTER,	P. J. SHAFTER,
J. M. REQUA,	J. D. FRY,
E. H. MILLER JR.,	P. A. FINNIGAN,
R. G. SNEATH,	ALBERT DIBBLEE,
WILLIAM D. BLISS,	WILLIAM T. COLEMAN,
JNO. W. COLEMAN.	

San Francisco, May 17, 1883.

Good Prices for Jerseys.

A few weeks ago the BREEDER AND SPORTSMAN printed a description of the Jersey stock and dairy farm of Theo. A. Havermeyer in New Jersey. On the 8th inst. a draft of cattle, principally young ones, from the Mountainside farm were sold in New York and the following good figures realized: Heifer Amy La Grise 2d, $380; the heifer Mouse, $375; the cow Elsprita, $850; the heifer Lady Arthur, $1,875; the heifer La Financiere 2d, $1,050; the heifer Carlos Primrose, $855; the heifer Carlos Maud, $575; the heifer Crecapola, $400; the bull Grilpolo, $710; the heifer Whipped Cream, $725; the heifer Bergerelia 2d, $925; the bull Royal Darling, $950; the bull Hanibal Duke, $900; the heifer Bonnie Grisette 2d, $1,600; the bull Daldimon, $1,000; the bull Bow Carlo, $775; the heifer Flora D 3d, $750; the heifer Favorite's May 2d, $925.

The quality of milk is impaired by allowing cows to drink foul water, and to eat improper food. All know the bad effect of turnips in winter, and of wild onions and other weeds, cropped while at pasture, in summer; but now comes up something which has not been thought of as injurious heretofore. This is from grass and hay grown on boned land, or such as is fertilized by sewage. Distillery slop, perhaps, is the worst of all foods for milk cows, and we do not like it any better for fattening pigs. Milk from the cow, when given improper feed or drink, affects cheese made from it, more seriously than it does butter; but in either cases it is bad enough, and sometimes, when drank, it is the origin of deadly fever and various other fatal diseases.

ROWING.

Let it Disband.

The Pacific Coast Rowing Association held a meeting on Wednesday evening and wrestled with the definition of the word amateur. As usual, the association got thrown very heavily, and after picking itself up in a very much demoralized condition, took itself off, metaphorically speaking, on its ear. We have before called attention to this so-called association and carefully refrained from saying a kind word of encouragement for it. Our reason is simply that the association does not understand its duties and has given a sufficient guarantee of its lack of honesty by hesitating to adopt the proper definition of the word amateur. There can be no such thing as a professional rowing association governing the aquatic contests of this or any other coast. No such association exists anywhere. No man who rows for his own or his friends' money will listen to the dictates of any association. The idea is ridiculous. A Pacific coast rowing association, to be recognized as an organization, must be strictly and purely amateur in its aspirations. It must be entirely free from the suspicion of harboring professionals under false colors. Such an association would be productive of an increase of interest among amateur oarsmen, who, at present, are exceedingly scarce in San Francisco. There is not a single sculler on the bay who can pull two miles inside of sixteen minutes who is an amateur under the most liberal definition of the word. Nearly all the men who row at the South End have competed time and again in professional races, and should under no circumstances be admitted to an amateur association. Some of these men are members of the new association and the fact is sufficient to show that it has mistaken its duties. At the meeting on Wednesday the chairman stated that the association was formed to promote the interests of rowing and was neither for amateurs nor for professionals exclusively. It is now in order for the association to quietly disband and let some people of more intelligence direct the destinies of amateur rowing on this coast. Professional rowing will regulate itself. What we want is an association of amateurs, pure and simple, that will draw the line carefully, and by excluding from competition men who are ready to row for money give those who row for pleasure only an opportunity to compete with some credit and a fair show of success.

Brightwell's Performance.

The fact of Charles Brightwell having beaten George Tarryer's fast time over the Thames championship course has been variously commented on by the sporting press. *Bell's Life* says of the event:

Certainly we never saw the tide running up much faster, while what wind there was was all in favor of the scullers; but few could have dreamt at the start that a couple of third-rate men would do better, at least as regards the time test, than such a phenomenal oarsman as the champion Hanlan. * * What Hanlan could give to either of last Monday's performers it is impossible to guess, but certainly no reasonable amount of start would bring them together, and yet we find that Brightwell covers the distance between Putney and Mortlake in no more than 3:54, faster time than is credited to the invincible Canadian.

Tarryer rowed the full course in 1877 in 22:55 and beat Con Brian of Shadwell. The time being by long odds the fastest on record made Tarryer's friends think he was a wonder, and when by a most extraordinary scratch he again beat the record on a trial his backers were willing to match him for the championship. Their confidence in his performances against the watch lost them a pot of money, for he never got beyond third-class and could never again get near the record on its shady side.

Waters & Co., the paper boat builders of Troy, N. Y., keep writing out here that no maker of wooden boats can hope to compete with them. Still, it is a noteworthy fact that every good sculler in the East this year has ordered a wooden shell for the season. Now, if paper boats are so much faster and stiffer why doesn't some scrub get one and polish off all the cracks in their shaky boats built by Ruddick, Blaikie and the other noted boat builders. Hanlan has just ordered two new wooden boats, Kennedy will row in a wooden boat, so will Ross, so will every Eastern amateur who can "pull a bit." If any one wants to see the difference between a wooden boat and a paper one he need only look at McInerney's old shell in the Golden Gate club house and then at the new paper boats. The old wooden boat is as straight as a die after several seasons while the paper boats on damp days double up like a jack-knife. On fine warm days when the air in the air-tight compartment is greatly expanded the paper boat is stiff and fast, but on cold, damp days when the air fails to keep the paper deck taunt she is weak as a cup of restaurant tea and as slow as organization of the new Pacific Amateur Rowing association.

Hanlan and Kennedy will row on May 30, at the Point of Pines, Mass. There is no question that the race will "be for blood." The Washington correspondent of the *Spirit of the Times*, who has been watching Hanlan and Kennedy at work says: "Hanlan left town on Friday evening, April 22, for New York, whence, after remaining a few days, he will go to Lowell, Mass., to finish his training. He has conducted himself while here in a most gentlemanly manner, and has made a host of friends. Despite the continual carping of a few newspapers, both Hanlan and Kennedy still live, and will both come to the post to row for blood. While my best wishes and prayers are for my fellow-townsman, my judgment is that Hanlan will win. Kennedy is out every afternoon, and takes a ten-mile pull up to Chain Bridge and return. Hanlan has presented to each of the boat clubs here a handsome souvenir, in the shape of a picture of himself and the trophies won by him in his races."

The Pioneer Rowing Club held a meeting last Sunday, T. Flynn presiding and Geo. Lloyd secretary. The retiring treasurer, Alf Tobin, turned over a cheerful balance, and the comparison of the receipts and expenditures of the club showed that the organization is in a very healthy condition. It was resolved to organize two crews at once with a view to selecting a picked crew and competing and challenging the winners of the BREEDER AND SPORTSMAN club to another race. Louis White selected as his crew John Sullivan, T. Flynn and P. Brannan stroke. Alf Tobin chose as his crew R. Lyne, R. Crowley and P. McDonnell. The crews will row in barges within two weeks.

It is said that the Australian scullers Trickett, Laycock and Pearce and the English champion, Jack Largan, will come to America this season. The question is what are they going to do. Trickett ought to have had enough of rowing in America.

McInerney is to raffle his shell in which he had such bad luck when competing with Peterson. President Growney of the Ariel club is investing heavily in tickets and if successful will issue a challenge to Leander Stevenson, to run a two-mile race in shells. Growney now claims the championship of the wherry rowers, Mike Price having returned with a broken leg and Tom Murphy with a severe attack of political dignity that indisposes him to row races.

The immense crowd which witnessed the McInerney-Peterson boat race showed a magnanimous spirit to the defeated oarsman. There were, however, a few loud-mouthed ruffians who hooted the stranger. Those fellows who stand on the wharf and hoot a beaten man are always the miserable curs who have not the courage to bet a dime on the race, and who would no more meet an opponent in a boat than face a runaway locomotive.

Wm. Elliott, the English professional sculler, now in active training at Flushing, L. I., will leave for Pullman, Ill., the first week in June. He has entered the three-mile open single scull race, to be held on Lake Calumet, June 22, and in which nearly all of the American professional scullers will compete.

The Hanlan-Ross race has been fixed for Wednesday, July 18, at Ogdensburg, N. Y. The distance is four miles, two miles and return, and the stakes $1,000 a side. The city of Ogdensburg will add $2,000 to the stakes.

A sculling race in watermen's boats, for $500 and the championship of Australia, was rowed on the Paramatta river, Feb. 17, between Clifford and Pearce. It was an exciting contest, Clifford winning by six lengths.

Muldoon, the champion Græco Roman wrestler, who is training at the Ocean House is a fine oarsman.

Northern Notes.

Dr. C. Munson, who has been engaged in the beet sugar manufacture in California, has arrived at New Tacoma and expects to establish a manufactory at that place.

Butchers from the Dalles are offering $60 per head for dry cows and two-year-olds, and $70 a head for big steers, in Haystack valley, but none are offered for sale.

A band of 7,000 wethers has been started from Heppner for Kansas, where they will be wintered and fatted for Chicago markets.

Mr. Shanks purchased in Jackson county, Oregon, 4,300 head of sheep for $5,000. He will drive them to Montana.

Pat O'Neil, who lives near Tacoma, killed a cougar with a club. It must have been a small cougar or a big club.

The increased acreage of hops in Yakima county will this year be double as much as the year past.

Cannery men are paying $1 apiece for salmon. One cannery near Skomockoway pays $1 10.

Fifty cents have been offered to one Washington Territory hop raiser for his crop already.

Thirty acres of hop roots have been set out in one neighborhood in Lane county, Oregon.

Wallowa valley is said to have 200,000 acres of land that is susceptible of cultivation.

Abe Hackleman of eastern Oregon sold 2,000 head of cattle for $110,000.

Over 18,000 buffalos have been killed in Montana this season.

Sales at Fairlawn.

Gen. W. T. Withers of Fairlawn, Lexington, Ky., has made the following sales of high-bred trotting stock:

Miss Hunt, bay mare, no white, foaled Sept. 15, 1876, by Almont; dam Lady Hunt, by Starlight, son of Blood's Black Hawk; second dam by Mambrino Chief. Price $450. Sold to A. G. Strawbridge of Sharon, Mercer county, Pa.

To Dr. John Fish of Bissell, Geauga Co., Ohio, the bay colt Dominion, no white; foaled May, 1881; by Hidalgo, son of Almont; dam Corinne. Price $400.

To Wilbur Sisson and George W. Sisson of Ironville, Essex county, N. Y., the brown stallion Montello, foaled June, 1879; by Almont; dam Dalmona, by Delmonico. Price $2,000. Montello is speedy and promises to make a very fast trotter.

To a Western party, one-half interest in brown mare Annahel, foaled 1875; by George Wilkes; dam Jessie Pepper, by Mambrino Chief. Price for half interest, $2,500.

To Henry Anthony of Portsmouth, Rhode Island, the bay colt Lightning, foaled May 11, 1882; by Almont Lightning, son of Almont; dam Miss Hunt, by Almont; second dam Lady Hunt, by Starlight. Price $600.

To Hampton Jackson of Gainesville, Texas, the bay filly Wilma, foaled April 16, 1880; by Almont Mambrino, son of Almont; dam by Bob Johnson, thoroughbred, son of Boston; second dam by Medoc, son of American Eclipse. Price $350.

To Drs. S. W. Frame and W. G. Terry of Jefferson county, N. Y., the bay stallion colt Almont Champion, foaled June 11, 1881; by Almont Lightning, son of Almont; dam Stella Champion, by Mambrino Champion, son of Mambrino Chief. Price $750.

To F. S. Foster of Mobile, Alabama, the brown stallion colt Browmont, by Almont; dam Madame Cogar. Price $1,000.

To J. H. Fallton of Nashville, Tenn., the bay colt Justinian, foaled April 7, 1882; by Solicitor, son of Belmont; dam Capitola, by Knickerbocker. Price $400.

Professor Law says that "the great majority of ringbone in young horses comes from the failure to shorten the toes." To this may be added that ringbone is apt to be formed if colts are allowed to stand on a plank floor, or anywhere else where the footing is hard, during the first eighteen months of their age. Whether in stable or yard during this period let them have earth for standing or walking, free from stone or gravel. If their summer pasture is a gravelly soil, or even somewhat stony, it is not objectionable, because the colt will always pick out springy turf enough to stand and walk on without injury to his feet, legs or joints.

Grease is akin to scratches on the heels, but is more injurious to the horse, and not so easily cured. Wheat bran is a good sedative for such affections, and should be fed at least half and half with Indian meal or whole corn, and one-fourth to one-third of oats, rye or barley. The horse should also be kept well salted. A teaspoonful, even full or heaping according to his size, and mixed up well in the bran at [illegible] a fair dose.

THE
Breeder and Sportsman.
PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE PACIFIC COAST.
OFFICE, 508 MONTGOMERY STREET
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion

San Francisco, Saturday, May 19, 1883.

PERSISTENT.

Although the *Turf, Field and Farm* is forced into acknowledging a misstatement, it is done so reluctantly that the merit of being candid is lost in the special pleading that follows. It certainly did not require any explanation from us, further than to call attention to the words used, to meet with a retraction, and inasmuch as these words could not possibly be twisted into a charge that Mr. Simpson had said, "Algath had broken down," a fair and plain acknowledgment should have been made. Pursuing the course followed all through this controversy, the last article of our contemporary is given entire, so that our readers can judge intelligently of both positions. It will be seen that the "qneer indorsement" of Mambrino is again brought into prominence, and just as carefully hidden that he agreed with us that the wearing of tips was beneficial to the feet and legs. We repeat that we do not consider that proof has been offered that will establish the fact that a majority of horses will trot faster with tips than when wearing full shoes, notwithstanding we are firm in the faith that such is the case. We are entirely ignorant of what others have done, and in the case of Algath the only information we possess is that she trotted her races in tips, and presumably that the fast half mile in 1:08 was also made with these pedal appendages.

There is another point in which we differ from the *Turf, Field and Farm*, and that is that we have a fair chance to live long enough to see and hear of tips being given a trial, and that is all that we desire, having full confidence that general use will follow. There has not been a dissenting voice among those who have examined our colts in agreeing that their feet and legs are in such admirable condition that some of the good must have resulted from the treatment they were subjected to, and as nothing has been done in the way of soaking, poulticing, stuffing, or even washing, whatever good there is arises from leaving nature to take care of them, excepting the removal of extraneous horn. There is not a splint on either of the five colts, not the least indication of abnormal horny growth, not a puff or windgall. The walls of the feet are not disfigured by wrinkles or grooves, the soles are all right and the frogs wide, long and elastic.

The residents of other countries are agitating the question of the necessity for a change in shoeing, and the advocates are nearly unanimous in recommending that tips be used. Those who do not fully indorse the partial covering of the foot look to the "Charlier" for a remedy. Already there are orders from all over this country for "Tips and Toe-weights," and from Australia, India and England we have received letters ordering the book to be sent as soon as published.

The trainers here are not nearly so obstinate in their determination not to be convinced, and quite a number of owners are already using them. Paul Friedhoffer, the blacksmith formerly referred to as a firm believer in the advantages which follow the use of tips, and who is as enthusiastic as we are regarding them, is making new converts every day. He says that whenever a man gives them a fair trial scepticism is replaced with faith, and a longer intimacy changes doubts into belief and opposition into advocacy. Jim Douglas wore tips in all of his races at the late meeting, and when he "romped home" the second and third heats of three-quarters of a mile, with the steadier of 120 pounds on his back, in 1:15 and 1:15¼, and closed such a tremendous gap as he did on the first day of the meeting on such horses as Joe Howell and Premium, it was evident that he, at least, could race with them on. Billy Appleby, the trainer and rider of May D, recounted a still more emphatic indorsement. May D wore tips when in training on the private course of the Messrs. Judson near Santa Clara. She was given a trial before leaving home which was good enough to cause them to think that she could run 2¼ miles on that day better than four minutes, and when beaten in the Cup race in 4:03¼ her owners and trainer were woefully disappointed. Appleby could only ascribe the result of the change that was made in replacing the tips with full shoes, that change coming from thinking that, the Oakland track being harder than the training ground at home, the "protection" was necessary. With the old-time prejudices still influencing it is not surprising that people are misled into an erroneous belief that "hard ground" entails the use of still harder metal between the foot and the impacted soil. A little reasoning will show how little there is to sustain the position. A narrow band of iron or steel, covering not more than one-quarter of the surface that has to strike first, raising the natural guard against concussion so that its provisions are rendered useless, in place of being a benefit is sure to do more or less injury, far worse on a hard track than when the ground is soft enough for the foot to be buried to a depth which will give the frog a chance to perform a part of its functions. That bruises, corns, contractions, quarter-cracks and diseases of the interior of the foot are the result of this false protection, and that there is an almost entire immunity from these troubles when the protection is ignored, is better proof than chapters of conjectural arguments. In all of the articles of the *Turf, Field and Farm*, reasoning has been tabooed. Not a paragraph which contained a reason why the use of tips should be abolished. Dictatorial assertions, quotations from obsolete veterinarians and wise saying of an old cynic, pompous and labored, without a particle of sense to sustain them, is not the way to convince people who think. It is on a par with the assertions of stable boys and old rubbers who think that the capacity to groom a horse gives an insight that is denied to those who take means to acquire information by diligent study and close observation.

Fifty-eight years do not leave much of a margin between that and the "threescore and ten" which even "good editors" may look forward to reach. The retrospect is of value and as the greater portion of the time passed has been occupied with "horse matters" there are the teachings of many failures to aid in making the comparatively short future of more use.

Not given to promulgating predictions, still we have not the least hesitation in offsetting the dictum of the *Turf, Field and Farm* with the prophesy that a short time hence it will be difficult to find an intelligent trainer who does not use tips, and that in a large majority of instances it will be found that even fast trotters are benefited by wearing them:

Mr. Simpson now denies that he said that tips broke Algath down. We certainly understood him to say so. Here are his own words: "It (Mambrino's letter) completely upsets the first position taken by the *Turf, Field and Farm*, that the wearing of tips on Algath should have broken her down."

With Mr. Simpson's explanation, we now see what he meant. He referred to a quotation from our paper wherein remarked it is a wonder that tips did not break Algath down. We cheerfully give him the benefit of his explanation.

But how Mambrino's letter "completely upsets" our position is a mystery to us. Mambrino did not advocate the use of tips at speed on Algath or any other trotting horse, so far as we can remember; on the contrary, he said: "There is no danger of its going into general use for fast road or track work, for not one horse in fifty but requires more weight to balance their action than can be put into a tip."

That is precisely what we think; and, therefore, without going into long and tedious discussion, we must agree to disagree with Mr. Simpson.

If he continues to "hand fast" to his position until he convinces all the trainers of the country that their horses can trot faster in tips than in ordinary shoes, we think he will live to reach—not merely the age of fifty-eight, as in a friendly note he tells us he has now reached, but the good, round old age of Methusaleh—an age, by the way, which all good editors aspire to reach!

ENTRIES AT SALT LAKE.

In this number will be found the entries for the purses at Salt Lake, and the number is a guarantee that the meeting is likely to be very interesting. Likely may be changed to certainly, as without general misfortune there cannot be a failure.

Pressed for room this week, and late now in receiving the information, precludes an extended notice which will have to be deferred to the next issue.

CHICO FAIR.

The programme of the Chico Fair was received too late for comments which will have to be delayed until the coming week. The advertisement appears, however, and from that it will be seen that a very liberal bill is presented.

BEATING THE RECORD.

There is a growing tendency to disparage every contest in which the time falls short of what has been accomplished at a prior period, and not a few of the spectators withhold their approval until the blackboard gives them the cue to applaud. The watch is their chief of the *claque* and the slender hand which marks the fractions on the dial is the monitor to regulate their enthusiasm. Associations are prone to encourage this feeling and by offering premiums to hippodroming stars are doing their part towards working serious injury to the sports of the turf and track.

The fastest time is always an exceptional occurrence. There has to be a combination of circumstances to render it probable and in ninety per cent of the trials failure follows. Failure engenders disgust. Eulogies on the flyer which has gained renown by a fortunate display of a quality that is far beneath what others have done mislead people who are not familiar with the subject, and tend to detract from the sterling performer, who has far greater claims to distinction. The time worshipper has no appreciation of other qualfications. The compassing so many yards in so many seconds and fractions of seconds is the standard with which he measures, and when, from causes beyond his comprehension, the point is not reached, he denounces vigorously where the judicious applaud. The great attraction in races is closeness of the struggle, and when horses are fighting desperately for every inch of ground there is a rushing of blood through the veins of the spectators and an exhilaration of spirits that finds vent in shouts and cheers. It is the fervid orator who sways the audience. The voluble parrot who gives utterance to the greatest number of words in a minute falls far short of a Demosthenes, and yet he should receive encomiums for the display of his speed, if horses are to be rated by the rule of the greatest celerity under the most favorable auspices.

Recognizing the fact that the time occupied in making a specific distance is a potent element in giving a place to horses, objections arise to making it paramount to everything else. As a portion of a bill to add to the attractions of a meeting, and thus induce the attendance of people who would not come under other circumstances it may be admissable. The Chicago plan of tacking a premium to the end of a purse, a sort of addenda, a kind of dessert to wind up the banquet, is the least objectionable form it can take, and the proffer of so much money if the best time in the classes be lowered, not so bad. The test purse, as it may be termed, of the Golden Gate Association also has redeeming features that absolve it partially from the censure which is applicable to a majority of cases, and the linking of two-year-old, three-year-old, and all ages gives it a flavor of novelty that is also a recommendation. These are not what we consider reprehensible pandering to the morbid taste that can only be gratified by sensational events, although they may aggravate the disease and increase the tendency to clamor for "fast time." Time has become so closely interwoven with trotting contests that the web cannot be unraveled without tearing the cloth to pieces. It is a part and parcel of the sport. It has been fixed upon as a means of classification that comes nearer to ensuring contests than any other method that has yet been adopted in full. The "signs of the times," however, indicate that there may be innovations that will be found beneficial and afford a remedy for one of the greatest drawbacks in trotting affairs. That is the determination to avoid "a record" until it subserves the interests of owner and driver to "go to the front," and this has led to rascality of the most figrant description. Still, after awarding the old fellow with hour-glass and scythe, long beard and haggard looks the championship, he proudly claims: "I cut down all." There is a nonsensical air in overrating his importance in every race. It is one of the queer phases that is continually cropping out, and when carried to the extent it now has reached, is detrimental to the welfare of the breeding interests. To see a horse going against something as intangible as the flight of seconds cannot for an instant be classed with a genuine contest in which there is a real battle. The best judge in the world cannot tell whether the gait is a 2:10 or 2:15 clip without something besides his eye to guide him, and to realize the efforts a watch has to be consulted at every quarter pole. Take away the amount at stake (or claimed to be at stake) and the interest to the public would soon cease. Man may be truly defined as an animal that gambles, and next to participating is the desire to see others play for large stakes. Let two men be engaged in a game for a couple of glasses of beer and there will be few spectators. Put a thousand dollars in sight which depends on the turning of a card, and there will be a throng of eager lookers-on. This desire or weakness of human nature, whichever it may be termed, has led managers of race and trotting meetings and the directors of fairs to cater to it for the sake of the added gate receipts.

For this the huge sensational purses have been given, for this is the "hippodrome" encouraged. In place of working for the future welfare of the breeder and turfman, the aim has been to give the star the whole of the inheritance and cut of those off inferior rank with a shilling, and a mutilated coin at that. It is true that the star has a market value which represents a stable of those which are somewhat below his standard, and were it not for road purposes the breeding of trotters would soon be abandoned, and the production of phenomenal excellence come to an end. With a more certain return in the shape of encouragement for all the grades, the breeder has an assurance that his venture will be fairly remunerative, increasing his efforts by putting the business on the basis of an investment that will be self-sustaining, and to further this should he the aim of those who can give effectual aid.

VIGILANCE.

In the last number there was a notice of a resolution adopted by the Board of Trustees of the Pacific Coast Blood Horse Association, empowering the president to appoint a committee whose duty it would be to give particular attention to promoting the interests of the turf. The object of passing this resolution was to make it the duty of the members of this committee to report whatever came under their observation which had a bearing on the interests at stake, fearlessly presenting objectionable actions of all descriptions, for reprehension and punishment, and to offer suggestions regarding the best course to pursue in order to further the welfare of breeding and racing on this coast. The old adage of "what is everyone's business is poorly done" is peculiarly applicable to racing affairs. There must be a definite task, a labor which is clearly outlined. Individually a member may hesitate to present a wrong for correction; as one of a committee which has a specified duty to perform he does not shirk the responsibility, and correction follows. The work of this committee is not confined to detective labor, although a close watch will be maintained and a certainty of discovery of any crookedness insured. There is no question that the people now engaged in racing here are of a class that will not countenance fraud, and though there may be a temptation for those in subordinate positions to err the terrors of certain punishment will deter them from engaging in any overt act. An honest man will not object to his actions being closely scrutinized. There is a stern necessity for taking steps to prevent rogues from accomplishing contemplated misdeeds. With this committee in existence there will be scarcely a chance to carry out nefarious plans. There will be constant supervision, an eye that never sleeps taking cognizance of all that is going on, and an acuteness that cannot he made subservient to the wiles of the keenest manipulator. The president of the association will be the only one who knows where the allotted duty falls, and until the report is made there will be a total ignorance of the personnel of the committee. This secrecy will make the labor more effective, and should there be anyone hatching schemes of roguery will insure the certainty of discovery. There are in a large majority of cases of rascality indications of the intention preliminary to the race being run. The judges are in a position that they cannot observe all of the maneuvers, and in such cases information that is thoroughly reliable will be of vast benefit in breaking up the scheme. There are people outside of those engaged about the horses who need looking after. Hangers-on of the track who make it a point to interview stable boys and jockeys, who are continually prying into affairs which they have no right to investigate, and very many of them who will not hesitate to corrupt by bribes those who can be led astray, and are the most dangerous of all the elements which are met, and to which the committee can give close attention. This class is usually composed of men who do not wager much money, but the little they risk is only posted on what they consider a "sure thing." Occasionally a "plunger" appears, one of the same stamp, but with more money and recklessness in proportion. It is evident that to successfully contend against those who perform their dirty work at times when the officers of the association are engaged, there must be watchers who are on guard every moment; be about the stables to see who may visit them in the absence of owner and trainer; during the morning gallops giving diligent attention, and awarding close observation to the pool sales and the purchasers. If even there is no necessity for such a close guard good will follow. We do not think that there has been a race at the last three meetings of the Pacific Coast Blood Horse Association that had the least tinge of fraud, and only one since the organization of the society which gave rise to just suspicion. But there will always be charges of wrongdoing, which it is quite important to be able to rebut with positive testimony. It is a protection which the honest can claim, and insist that the association does not permit them to be slandered with impunity. Then again this committee will relieve owners of the dread they have of the "touts," for just as surely as men are detected in seeking surreptitious information, just so surely they will be punished. Some may claim that there is no power to punish those who are not identified with horses, but when expulsion has been decreed and instructions given to gatekeepers to refuse admission to the guilty, there will be a weeding out which will soon relieve the sport of the obnoxious element. Although at first we had doubts of the proper working of the plan, the more thought that is given it the more it meets with favor.

SACRAMENTO MEETING.

Our Sacramento correspondent "Mile and a Quarter" sends a capital report of the races of Tuesday and Wednesday, of the Capital Turf Club.

When the rains of Monday morning came so heavily here there were serious apprehensions that the sport might be seriously interfered with, hut with the exception of the shower on the afternoon of Wednesday the weather has been favorable, and we are much gratified to learn that for many years there has not been so successful a meeting held in the spring as that which is still in progress as we write. There is good cause for jubilancy and while congratulating the members of the club for the success which their enterprise so richly deserves, the breeders and owners of horses reap the most benefit. Spring meetings have been wofully neglected by those who should give a hearty support, and the indications are now favorahle that the lethargy has been overcome, and that after this year there will be a change and that owners will aid in making them popular. Good racing and trotting is sure to "draw" at a season when there is a little respite from the cares of business, and the interval between seed-time and harvest will be utilized to further the interests of the breeder. There is nothing like actual contests in the education of horses, and the maxim of "Tom" Parr "sweat your horses in public" a good one to follow with racehorses, while everyone acknowledges that in the schooling of trotters one race is sometimes better than a month's training.

When the meeting is concluded we will review the whole proceedings, and again we are highly pleased that there is much to applaud.

LONG DISTANCE RIDING.

On the 4th of July next there will come off at San Jose one of the long distance races with which old Californians are familiar. It is a trial of riders as well as steeds, and tests the endurance of jockeys very severely. There is far more excitement than people suppose who have never seen one of them, and the varying features of the contest creates an absorbing interest. This is the case when the competitors are limited to two; when this is changed to a battle royal with the number which is likely to engage in the San Jose bout the interest is intensified. The liheral purse offered, $800, with medals added, gold to the first and silver to the second, with free entrance, must bring out the largest field ever engaged in a race of that kind. The money is divided into three premiums, $500 to first, $200 to second and $100 to third, which is a further inducement to enter. There is no limit to the number of horses, though changes are required to be made at the finish of each mile, and we hope to see some wiry race riders like Fred Ross, Billy Appleby or other knights of the saddle enter the lists against the trained vaqueros. As we suppose that assistance cannot be used in mounting, the shorter limbed jockey would be at a disadvantage, though this drawback might he overcome by superior jockeyship when fairly seated. With the number of entries which the liberal purse guarantees there will be an immense assemblage to witness the race. To make a full afternoon's sport there is supplemented a ring tournament to give caballeros the opportunity of showing their dexterity in handling a lance, and as the whole is given by the San Mateo and Santa Clara Agricultural Association the management will be of the right kind. The entries close on the 1st of June, and the particulars will be found in an advertisement in this paper.

GOLDEN GATE FAIR.

Elsewhere will be found the programme of speed department Golden Gate Fair, which is to commence Monday, September 3. As the entries do not close until August 1, there is plenty of time to enter into a full discussion before those who are interested make up their minds what they will do. The classification, however, can scarcely fail to meet the approval of those who expect to participate, and the money given is quite liberal. There are minor matters which present grounds for criticism, hut as these may be ohanged before the time for closing arrives, it is not necessary to dwell on them at present. The trotting is divided into three-minute class, purse $600; four-year-old, $800; 2:24, $1,000; 2:35, $750; three-year-old, $500; two-year-old, $400; and free-for-all, $1,200. At this gait there is also a purse of $200 offered for horses of 1,400 pounds weight or over, and this gives a fine opportunity for the owners of the big division to prove what many of them claim, that mammoth proportion is not incompatible with speed at the trot. There is a pacing purse of $500, limited to side-wheelers that have not beaten 2:20. The running is formulated thus: Purse $500, for two-year-olds, three-quarters of a mile; $500 for three-year-olds, one and a quarter miles; and $500 for all ages, heats of a mile. There are also what are termed "California Record Purses" of $1,000, and a Combination Purse of $500, that have such novel conditions that more than a notice en passant is required. We see grave objections to them, which are more palpahle after closer attention. In order not to put our readers to the trouble of referring to the advertisement the conditions are repeated:

All trotting and pacing races are best three in five, except the two-year-old trot, unless otherwise specified. Entrance fee, ten per cent on all purses, to accompany nomination.

In all, five to enter and three to start. National Trotting Association rules to govern trotting, hut the board reserves the right to trot heats with any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

Those who have entries in the running purses must name to the secretary, in writing, the horses they will start on Monday, on the Saturday previous; those on Friday, the Wednesday previous. No money will he paid for a walk-over.

Horses entered in purses can only be drawn by conseut of the judges.

Rules of the Pacific Coast Blood Horse Association to govern running racea, except as specially provided.

All entries to be made in writing, to give sex, color and marks of horse, also name and residence of owner, and, in running races, colors to he worn by rider.

Entries to all the ahove races to close with the secretary on Wednesday, August 1, 1883.

Write "Entries to Races" on the outside of the euvelope.

Now the California records are two-year-olds 1:44, three-year-olds 1:42½, free-for-all ages 1:42. Assuming that the record is beaten in all three of the classes, then each one would only win $200 more than the entrance, which would scarcely be sufficient recompense for so arduous a trial. Either of the records are so fast that it is douhtful if any one of them is beaten, though the two-year-old presents the best chance for success, and then comes the question of weight. Atalanta, who has the premier position, ran in a race with 97 pounds up, Mark L as the weights were for three-year-olds at that time, 1879, and Joe Howell "packed" 119 pounds. There is an amhiguity in what would be termed classes, and this might lead to disagreement. It is not likely that the intention is to start all which are entered in one class at the same time as in contests "against the watch." The presumption is that every contestant must be given the same opportunity to defeat the ticker. Then a three-year-old might be chosen to represent his class according to his age, and also run where there is no limit. His owner might claim that one run was sufficient to decide both, and if his time was the fastest this would entitle him to be crowned the victor in both. Thus we will suppose that in the three-year-old class he carried the same weights as Mark L, and ran in 1:42 half a second inside, and the "aged" one who runs in 1:41¾ having only dropped a quarter of a second has to be content with his entrance back. The complications thicken at every point of the question. When Joe Howell ran it was in the springtime, when the rules say that an aged horse is twenty pounds better in a mile race than the three-year-old. In September the difference is only rated at one-half, and ten pounds is deemed sufficient to bring them to an equality. These questions are intricate, and before the entries are made should be definitely settled. There are other stumbling hlocks in the way. The purse requires five entries to fill, and that more than a month before the race is to he run. That it will be tame in comparison to a race where there is a good field to contend is a foregone conclusiou. In racing time does not cut so prominent a figure as in trotting, and to see a horse galloping along with an antagonist as intangible as thin air would fail to elicit more than a spark of enthusiasm. But the worst feature of all is the tendency to lower legitimate racing to the level of the hippodrome. In lieu of the gallant thoroughbreds striving for mastery, a dozen, pernaps, in all the varying features of a race, the colors shifting like the images in a kaleidoscope, the favorite in the lead, dropping back, coming again, and then the exciting run home, there is one galloping at a regulated pace, at the best a "teaser" laying on his haunches, his place taken by another at specified distances, and men with watches at various points to give the jockey the cue.

The "Combination Purse" is, if anything, still moro reprehensible. If, in that, the five contestants are started, each claiming the privilege of going aloue, the whole afternoon would be occupied before the two dashes of a quarter and a half mile were got through with, the timers thoroughly exhausted, and the spectators demoralized before the winner was figured out. From all these considerations we hope to see the "novelties" withdrawn and the $1,500 applied for purses which will be for the encouragement of genuine racing. The officers of the Golden Gate Association are ready at any time to make chauges for the good of the owners of horses, and whenever convinced that a different course will be better to further the interests, are prompt in making the change.

There never has been so good an opportunity since the organization of the society to get the support of the owners of racehorses, and if that part of the programme is satisfactory, there will be large and good fields to start. The August meeting of the Blood-Horse Association insures this bringing the horses to this section before the opening of the fairs, and a large proportion of them will engage in the races of the Golden G[illegible]

CHICAGO TROTTING ENTRIES.

Two-nineteen class—Purse $2,500; with $500 to the winner of the fastest heat, if better than 2:16. Eleven entries:

Name.	Sire.	Dam.
J. B. Thomas, b g	Sterling	Lady Hooper.
Romero, gr b	A. W. Richmond	Gretchen.
William H, b g	Young Wilkes	by Daniel Webster.
Troubadour, blk g	Revenge	Illinois Maid.
Monroe Chief, b b	Jim Monroe	by Bay Chief.
Dr. Norman, br g	Colonel Moore	by Hiatoga.
Alexander, blk b	Ben Patchen	by Canada Jack.
Fanny Witherspoon, ch m	Almont	by Gougb's Wagner.
Minnie R, b m	J. C. Breckenridge	by Exchequer.
Tariff, b b	Clarion Chief	Lillian.
Adele Gould, ch m	Jay Gould	Emeline.

Two-forty class—Purse $2,500; with $500 to the winner of the fastest heat, if better than 2:25. Twenty-eight entries:

Silver Chief, g h	Mambrino Patchen	by Alexander's Edwin Forrest.
Ed Geers, b g	Enfield	
Castenara, b m	Burbrino	Salnda.
Mambrino Sparkle, b b	Fisk's Mambrino Chief	by Sparkle.
Brown Thrasher, br g	Grey Fearnaugbt	by Hero.
Urbana Belle, b m	General Washington	Belle.
Sorghum, b g	Blue Bull	May Fly.
Fulton Maid, b m	Clay Pilot	by Basbaw.
Reel, ch m	Blne Bull	Kate.
Alice Blackwood, b m	Blackwood	Emeline.
Mand H, ch m	Richmond Boy	
Little Moak, b b	Clark's Mohawk	Eliza Jane.
John F, gr g	Deucalion	
Ramie, ch h	Blne Bull	Lady Sbepard.
Adelaide, b m	Milwaukee	Minnie.
G. W. Howe, b g	Rowland's Manibrino	by Golddust.
Phallas, b b	Dictator	Betsy Trotwood.
Secret, b m	Stratbmore	Amanda.
Toronto Maid, blk m	Captain	Lady Mack.
Minnie Wilkes, b m	George Wilkes	Emma.
Reynard, b g	Louis Napoleon	
Jas. Halfpenny, b g	Blne Bull	by Sam Houston.
Rideman, br g	Rideman	by Patchen.
Black Prince, blk g	Jefferson Prince	
Daisy Blackwood, br m	Blue Bull	by Blackwood.
Eva, b m	George Wilkes	
Mambrino Sotham, blk g	Mambrino Gift	
Index, b g	J. R. Breeze	Rosa Belle.

Two-twenty-three class—Purse $2,500; with $500 to the winner of the fastest heat, if better than 2:19. Thirteen entries:

Tony Newell, b g	Clark Chief	
Director, blk b	Dictator	Dolly.
Alta, br m	Almont	by Bourbon Chief.
Jewett, blk g	Allie West	John Innes.
Lillian, ch m	Almont	Lillie Sbields.
Gladiator, b g	Blue Bnll	by Jim Monroe.
Neta Medium, b m	Happy Medium	by Yankee Tricks.
Harry Wilkes, b g	Geo. Wilkes	Mollie Walker.
Kate McCall, g m	Blne Bull	Nellie Grey.
Prospect Maid, br m	Geo. Wilkes	by Mambrino Pilot.
Independence, b b	Young Hindoo	by Tom Howard.
Lucrece, b m	Bob Whaley	by Rysdyk's Hembletonian.
Walnut, b g	Florida	by Relief.

Two-twenty-seven class—Purse $2,500; with $500 to the winner of the fastest heat, if better than 2:21. Twenty entries:

St. Remo, b g	Volunteer	by Harry Clay.
Grand Sentinel, b b	Sentinel	by Mambrino Pilot.
Billy Bashaw, gr g	Green's Bashaw	Lady McNair.
Sleepy Joe, b g		
King Wilkes, br b	George Wilkes	Missie.
Fearnaught, b b	Canada Black Hawk	Red Bird.
Lucy, b m	Felter's Hambletonian	Dolly.
Frank Landers, br g	Saddling Buck	Roanie.
Commander, b b	Blue Bull	Nellie Grey.
Reveille, br b	New York	Fleet.
Minnie Warren, ch m	Night Hawk	
Handicap, gr g	S. A. Donglas	
King Almont, b b	Almont	Jenny.
Ticonic, ch g	Milwaukee	
Dutch Girl, rn m	Goldsmith's Abdallah	
Russ Ellis, ch g	Bacon's Etban Allen	
Alcyone, br b	George Wilkes	by Mambrino Patchen.
Cyclone, br b	Caliban	by Hamlet.
Annie S, ch m	Almont	by American Star.
Catchfly, b m	Administrator	Cacbnca.

Two-twenty-one class—Purse $2,500; with $500 to the winner of the fastest heat, if better than 2:17½. Eleven entries:

Overman, ch g	Elmo	by Billy McCracken.
Clemmie G, br m	Magic	by Ned.
Fred Douglass, ch b	Green's Bashaw	by Gale's Morgan.
Mattie Graham, b m	Harold	by Mambrino Chief.
Buzz Medinm, b m	Happy Medium	by Nonpariel.
Captain Lewis, ch g	Spink	Lady Jones.
Harry Wilkes, b g	George Wilkes	Mollie Walker.
Mamie, b m	Blue Bull	Silverella.
Ewing, b g	Primus	Lady Washington.
Wilson, b g	George Wilkes	Miss Coons.
Tariff, b b	Clarion Chief	Lillian.

Two-thirty pacing class—Purse $2,500; with $500 to tbe winner of the fastest heat, if better than 2:20. Twenty entries:

Charlie M, b g	Green's Bashaw	by Ned Forrest.
Gray Nathan gr h	Bob Rea	by Copperbottom.
Jack Hart, ch g	American Boy	Sboo Fly.
Little Em, b m	Billy Green	by Rattler.
Black Cat, blk m	Red Bnck	by Tom Hal.
Stella F, blk m		
Billy S, b g	Blue Bull	by Mambrino Chief.
Fritz, gr g		
Laura J, blk m	Legal Tender Jr	
Gurgle, b m	Pocahontas Boy	by Blne Bull.
Ned Hunter, ch g	Prince Pulaski	
Jack Rapid, gr g	Jack Rapid	by Falcon.
Vasco, b g		
Eddie D, gr g		
Joe Braden, b g		
Mattie Bond, b m		
Daisy D, b m	Black Steer	
Honoluln, rn m	Clark's Mohawk Chief	Robinson's Bellfounder.
Etta C, b m		
Van Zandt, blk g		

Two-seventeen class—Purse $2,500; with $500 to the winner of the fastest heat, if better than 2:14. Five entries:

Charlie Ford, gr g	Grey Eagle	
Monroe Chief, b h	Jim Monroe	by Bay Chief.
Edwin Thorn, ch g	Thorndale	by Ashland Chief.
So So, b m	George Wilkes	Little Ida.
Von Arnim, b b	Sentinel	May Short.

Open to all pacers—Purse $2,500; with $1,000 to the winner of the fastest heat, if better than 2:11½. Twelve entries:

Lucy, gr m		
Richtall, b g	King Pharaoh	by Little Arthur.
Fuller, b g	Clear Grit	by Royal George.
Buffalo Girl, b m	Pocahontas Boy	by Tom Hal.
Flora Belle, br m	Stucker's Rainbow	by Tom Hal.
Sorrel Dan, ch g	Red Buck	Thoroughbred.
Mattie Hunter, ch m	Prince Pulaski	by Driver.
Sailor Boy, rn g	Smuggler Jr	
Sleepy Tom, ch g	Tom Rolf	by Sam Hazard.
Joe Bowers, b g	Joe Bowers	
Gem, b m	Tom Rolf	Lady Gem.
Little Brown Jug, br g	Tom Hal	

Two-thirty class—Purse $2,500 with $500 to the winner of the fastest heat, if better than 2:22. Twenty-four entries:

Tony Newell, b g	Clark Chief	
George V, ch g	Hambletonian Star	by Magna Charta.
Rigolette, b m	Exchequer	Belle Gentry.
Minnie Sprague, br m	Governor Sprague	
Lady Lucas, ch m	Tramp	by Green's Bashaw.
Billy Bashaw, gr g	Green's Bashaw	Lady McNair.
Dick Dewey, br b	Western Fearnaught	
Wade Hampton, ch g	Anfboy	
Mountain Girl, b m	Widgeon	
Brown Wilkes, br h	George Wilkes	Jennie Ervin.
Milo, b b	Milwaukee	Minnie.
Nellie Clay, b m	Kentucky Clay Jr	by Tuckahoe.
Mamie, ch h	General Sherman	
Willie Woods, b g	Rescue	
Rex Wind, gr m		
Arter, ch g	Black Diamond	

Name.	Sire.	Dam.
Smith O'Brien, b b		
Bob Davis, ro g	Bonesetter	by Daniel Webster.
Farce, b m	Princeps	by Golddust.
Mollie Middleton, b m	Bay Middleton	by Old Champion.
Western, ch g	Tramp Dexter	by Green's Basbaw.
Sandford Keitb, ch g	Cuyler	Lady Gregory.
Ray Gould, br m	Jay Gould	Emeline.

Two-thirty-five class—Purse $2,500; with $500 to the winner of tbe fastest heat, if better than 2:23. Nineteen entries:

Kit Sary, b m	Wood's Hambletonian	by Billy Denton.
Doctor Frank, rn g	Blne Bull	
Maud R, b m	Gooding's Champion	Lady Ross.
Prince, blk g	Royal Revenge	Lady Allen.
Josepbine, b m	Hambletonian Star	by Magna Cbarta.
Strader, br b	Strader's Clay	Iodine.
Tom Kirkwood, blk h	Green's Bashaw	
Duqnesne, ch b	Tipp's Bashaw	Wild Rose.
Freestone, b g	Repnblic	Fanny Dodge.
Dixie Sprague, b m	Governor Sprague	Dixie.
Sister Wilkes, rn m	George Wilkes	Cherokee Girl.
George W Jr, b g	Rock Island Basbaw	Mollie Doyle.
Burt Sbeldon, br g	Warwick	by Harry Clay.
Mollie Harris, blk m	Crouch's Bashaw	
Black Prince, blk g	Jefferson Prince	
Daisy Blackwood, br m	Blne Bnll	
Alcyone, br b	George Wilkes	by Mambrino Patchen.
Otto K, b h	Blne Bull	by Sir Henry.
Amazon, b m	Sentinel	by Mambrino Pilot.

Two-twenty-five class—Purse $2,500; witb $500 to tbe winner of the fastest heat, if better than 2:20. Twelve entries:

Lady Thorne, b m	Darlbay	Sallie Messenger.
Sleepy Joe, b g		
Loafer, rn g	Copperbottom Horse	
St. Louis, br g		
Alta, br m	Almont	by Bourbon Chief.
Hardwood, b b	Blackwood Jr	by Columbus.
Wilbur F, blk g	Hinsdale Horse	
Minnie Wilkes, b m	George Wilkes	Minnie.
Will Benbam, b g	Brit Clay	
Barrett, b b	Chester Chief	by son of Harry Clay.
Ina G, b m	Blne Bnll	Morgan mare.
Catchfly, b m	Administrator	Cacbnca.

Three-minnte class—Purse $2,500; with $500 to the winner of the fastest heat, if better than 2:27. Twenty-nine entries:

Durango, blk h	Strader's C. M. Clay	Mattie West.
Gus, b g	Messenger Chief	
Manning's Novelty, b h	Graphic	Maid of Monntain View.
Black Jug, blk g		
Majolica, b g	Startle	
Belle Ford, b m	Grey Fearnangbt	by Green Mountain Black Hawk.
Urbana Belle, b m	General Washington	Belle.
Zoe, b m	Blne Bull	dam of Milo C.
Paddy Byan, gr g	Green's Bashaw	Lady McNair.
Ike Sbeppard, b g	Mambrino Patcben	
William T, b g	Thatcher's Mambrino	by Willis' Champion.
Felix, b g	Nutwood	by Abdallah Chief.
Pballas, b b	Dictator	Betsy Trotwood.
Tom Rolf, b g	Tom Rolf	Charlotte.
P. J. Purcell, b b	Strader's Hambletonian	
Cascarilla, b m	Sbelby Chief	Missie.
Mambrunella, b m	Mambrino Gift	by Mambrino Chorister.
Toronto Maid, blk m	Captain	Lady Mack.
Henry Clay, br h	Potter's Henry Clay	
J. A. Daniels, ch g	Blue Bull	by Tom Hal.
George R, b g	Bacon's Etban Allen	
S Y, b g	George Wilkes	by Corbean.
Mattie H, gr m	Blne Bull	by Davy Crockett.
Eva, b m	George Wilkes	
Pilgrim, b b	Smuggler	May Morning.
Mambrino Sotham, b h	Mambrino Gift	
Little Miss, b m	Goldsmith's Abdallah	
Index, b g	J. R. Breeze	Rosa Bell.
Strathlan, br b	Strathmore	

Two-twenty pacing class—Purse $2,500; with $500 to the winner of the fastest heat, if better than 2:14. Thirteen entries:

Bessie M, blk m	Pocahontas Boy	
Richball, b g	King Pbaraoh	by Little Arthur.
Lone Jack, br g		
Chestnut Star, ch h	Red Buck	
Kismet, br g	Bull Pup	
Ned Forrester, ch g	Young Forrester	by Lexington.
Charles H, b g		
Princess, b m	Pocahontas Boy	by Blne Bull.
Jack Rapid, gr g	Jack Rapid	by Falcon.
Westmont, ch g	Almont	Anna.
Higb Jack, ch g	Higb Jack	
Warrior, b g	Warrior	
Mattie Bond, b m		
Billy Scott, ch g	Billy Green	Lady Jones.

Five-year-olds—Purse $3,000; open to all five-year-olds and under, witb $500 to the winner of the fastest heat, if better than 2:18. Seven entries:

Phil Thompson, gr g	Red Wilkes	by John Dillard.
Ed Geers, b g	Enfield	
Adelaide, b m	Milwaukee	Minnie.
Bonita, b m	Electioneer	Mayfly.
Wildflower, b m	Electioneer	Mayflower.
Bronze, b m	Morgan Messenger	Morgan mare.
Jay Eye See, blk g	Dictator	Midnigbt.

Turkeys.

Some few years since the writer, in connection with a friend, attended the State poultry show at Hartford, Connecticut. We had inspected the various departments, and at length came to the turkeys, the first coop containing a hnge Bronze gobbler of some forty ponnds weight. His merits were considered, and then we saw the coops of yellow, slate and brown. At length we passed on to where was a coop of white turkeys, and on examining the varions cards we saw the birds had been sold. While we were looking at a fine pair of birds, a sturdy granger came along and ventured to give his opinion of them. "Handsome birds," said he, "bnt mighty tender." The granger, while he thought he was imparting knowledge to ns, was only showing his ignorance. For there is a distinct breed of white turkeys known as the White Holland breed, and the specimens we had been inspecting were a remarkably fine coop of birds.

The White Holland turkey is not so large a breed as the Bronze, and is preferred by many on that account; but in every other point they compare favorably with them, or with the black, brown, yellow and slate-colored birds. They are quite as hardy, will withstand the effects of heat and cold as well as any breed. At the West they are very popnlar, and in every way one of the best breeds of turkeys we know of. Their flesh is, perbaps, the finest of all, a pnre white and very tender and delicate; it is not more dry than any turkey meat, but contains very little of the oil of the duck and goose, which gives that sort of poultry its high reputation among epicures. Yet if we were raising turkeys for the market we would prefer the White Holland because they are a smaller breed, fatten up sooner, and would be more nniform in size. As foragers they roam the fields with their broods seemingly with as much care of them as any breed. They fatten for market quickly, take on flesh readily from either hard or soft grain, and when dressed cannot be surpassed by anything in the market, providing they were in good condition to place on the hooks. I have never had mnch experience in fattening tnrkeys, bnt we have seen them on Block Island, R. I., and along the sonnd, from the month of the Connecticut river to Point Jndith—the extreme point of Rhode Island, the land runni[illegible] into the sonnd. The soil is very rocky and it is just the place for turkeys to roam. On Block Island, where more poultry is raised, according to the size of the island, than any spot in the world, they feed somewhat on fish and the small grains. Here turkeys, ducks, geese and our common land fowls may be seen by thousands, and we have known bnyers to go out, and, in a few hours, buy 500 geese.

Now I will give an old sailor and poultry raiser's ideas about fattening fowls for market, which will be worth a good deal: Fatten them up gradually, if yon have got to fatten yonr poultry. When stuffed for a few days they don't take on flesh, only bloat. "There ain't mnch depth to shallow water," so a poor fowl, nnless he can be fattened, might as well be killed. "Big fish don't come near the shore." The best fowls are always back somewhere, but the poor ones are always nnder yonr feet. You can't tell how fat a bird is by seeing him eat; he may tackle a black-fish, and eat him, bnt he may be as poor as a sea-gull. Lobster is good for ducks and geese, bnt their shells often make dead fowls of them. Feed early, night and morning. Feed more soft than hard food. Feed regularly and feed evenly.—*Prairie Farmer.*

Fancy bets are occasionally made on the large English races. One was offered recently on the City and Suburban Handicap, and, conditionally on the backer taking nine bets, the layer wagered 1,000 to 60 against Scobell, 1,000 to 60 against Lowland Chief, 1,000 to 50 against Hackness, 1,000 to 40 against Hygeia colt, 1,000 to 40 against Silver Bell, 1,000 to 40 against Nantilus, 1,000 to 40 against Goggles, 1,000 to 40 against Southampton and 1,000 to 40 against Battlefield. The betting was in sovereigns.

The Coach Horse.

Manifestly the great desideratum of the horse interests of this country is a distinct type of the coach horse. The landaus and coupes of wealthy families are now made upon such a magnificent scale, weighing from 1,400 to 1,800 ponnds, and the metal trappings of the harness are so massive, that the coach horse, to harmonize with this ontfit, must he ponderons, yet elegantly finished, with a high, proud step, yet stylish enough for a respectable appearance, even in light harness.

The model coach horse must be composite in character. Forehanded he must be snperbly finished. He must have a long, delicate neck, with a beautiful crest, in contradistinctiou to the many thick, short-necked horses used in that capacity, which briugs the head and shoulders too closely together when the collar and hames are in position to fill up too plainly the intervening space. The head should be well formed, and the ears both sprightly and shapely. Moreover, the head should be carried high, and the action in front should be that bold, lofty, proud movement that marks the well-bred park horse. When the coach horse is thus handsomely finished forehanded, he adds grace and dignity to the most elaborately decorated landau and harness. Indeed, he attracts attention on the promenades and gives an aristocratic completeness to the entire turn-out. No matter how lacking he may be in other portions of his contour, this forehanded formation and action are absolutely prereqnisites. Other desirable points may he wanting, yet these will enable him to pass the critical examination of dealers in this specialty. The shoulders should be deep and powerful, with a broad, generous breast, yet not bordering upon the massive shoulders aud the heavy, muscular breast of the draft-horse. The withers should not be too high or sharp, as they give an angular point to the neck and back, which shonld be a succession of graceful curves. Following the beautiful curve of the snperb crest should be a gentle curvilinear depression of the backbone, rising gradually to a broad and powerfnl coupling, aud finishing in the full, well-rounded, gently sloping hips, that should have a generous display of long, yet broad muscles, extending well down to the thighs. The back should not he too long. Unusual length of backbone is generally accompanied by a high, sharp coupling and ragged hips, both of which would seemingly indicate weakness where strength is very desirable, and homeliness where beauty of contonr is necessary to the completion of a handsome carcass. In this respect, the English conception of a magnificent coach horse is superior to that of the American. The English dealer insists upon a short back, and smooth, powerfnl coupling. Snch horses are more easily kept in condition; and when filled out, their amplitude of back and powerful saddle-place become the most elaborate harness. Moreover, there seems to be no limit to their endurance. They impress you with power, and nothing is more out of place than a coach horse with a long back, badly coupled, for, whether the horse is strong or not, these defects give him the appearance of weakness.

In the trotting horse the long back and high Bedford coupling that marked the grand racehorse Bedford may be associated with great speed and endurance, as in the noted instance of Rarus; but in the coach horse, who drags so much dead weight, and whose well-rounded outlines, indicating both strength and beauty of contour, are necessary to harmonize with the gold and silver-mounted trappings and the ponderous carriage, such defects are entirely inadmissable.

His carcass should be deep and well rouuded. At the girth his measurement should be great, while his flanks should drop down as low as the symmetry of a powerful body will permit. In comparison with the depth of carcass, the limbs should be rather short, bnt not so stocky as the primitive type of the Morgan, for that wonld give the coach horse a pony-like appearance, that would rob his outline of majesty. The limbs should be flat and broad, the joints quite prominent, though smoothly formed, for there is no necessity for the ontstanding muscle and tendon attachments at the joints, that accompany great speed.

Equally important are well-formed feet of the strongest possible texture. The coach horse is designed largely for use on hard pavements and macadamized roads. His weight, added to the enormous draft he is compelled to overcome, in conuection with the hard-paved boulevards over which he constantly travels, make the strain upon his limbs and the wear upon his feet almost incredible. It is almost impossible to find sonnd coach horses in the promenade avennes of Central Park. Very many of them reveal blemishes upon their limbs, either curbs behind, or splints in front, or wind galls both in front and behind, that show how telling upon legs and feet is the work to which they are snbjected. Shoeing smiths are nnanimous in their testimony, that second only to swift-trotting horses the coach horses are more universally lame, and more difficult to shoe, so as to prevent them from limping before a magnificcut coach, than any other class of harness horses. The legs, therefore, should be unusually broad aud flat, showing a strength and cleanness of tendons down to their insertion at the ankle, and the feet should be full and round, of firm, dark, steel-like texture, free from malformations, especially flat foot and chronic weakness, such as thin walls and narrow quarters. When the coach borse is thus blessed with broad, clean limbs, and perfectly healthy feet, it requires all tbe careful nursing of the groom and the skillful sboeing of the intelligent smith to keep him from blemishes and lameness. Weak limbs, defective joiuts, especially sprnng knees and cocked ankles, and curby hocks and defective feet, are not only hereditary, but are very apt to become chronic in large horses. Their height and weight and severe labors seem to induce these disorders. Predisposition to these weaknesses should effectually prevent snch specimens being used in the harem for breeding the model coach horse. He should always be of solid color—either bay, black, or chestnut. Nothing is more objectiouable than an off color, such as dun, or roan, or cream, or even grey color, unless it be the piebald, harlequin combiuation coat of the circns palfrey. Of all colors, the rich blood bay is the most desirable. It changes less with the seasons, and becomes every style of mountings and equipages with the least offense to exqnisite taste.—*Live Stock Journal.*

Tbe use of coal-tar as a preservative doea not appear to be so successful as was anticipated. While a post coated with this is protected from the effects of the moistnre in the gronnd, it does not prevent decay from taking placein the interior. Various solutions that will penetrate the wood have been proposed. One of the simplest of these is to soak the post in a saturated solution of sulphate of copper (blue vitrol), and when the liquid has penetrated the wood, let it dry, and then soak it for a few days in lime water. From what we have seen of this method, having used it for small garden atakes and labels, we should be disposed to try it upon posta if n preservative were required. It has the merit of being much cheaper than most of the other mixtures thnt are proposed.

THE GUN.

Shoot No. 3.

Last Sunday tbe California Wing Shooting Club held tbe tbird shoot of the season, for the three club medals, at San Bruno. The day was quite pleasant hut a stiff breeze blew across the grounds which carried many of the pigeons off to the right quarter. The birds were rather an uncertain lot, varying from hard blue rock tailers to squabs that seemed tired, judging from the tendency that many of them had to nlight as soon as thrown from the traps. The boys, too, who filled the traps handled the pigeons in a rather rough manner whieb would have n tendency to discourage the birds before they were thrown out.

The three medals were held last, first medal by Dr. Knowles, second by John Kerrigan and third by T. A. Pearson. The shooting was doue at twelve birds, twenty-one yards rise from four plunge traps. The attendance was very small and consequently there was very little betting though a great deal of interest was manifested by those present as some very pretty shooting was done. Thirteeu members entered. Ex-champion C. Robinson was the first to toe the stake and killed his first; he followed up his beginning by making a clean score of the twelve birds. Kerrigan on his fourth bird broke au otherwise pretty string by holding on a low-flying tailer too long. Knowles killed eleven; he broke by shooting under a left-quartering bird. He was using a small gun and light charges and though he hit his fifth pigeon very hard he had the mortification of seeing it drop, dead as a stone, just out of the eighty-yard bounds. Fay led off with two goose eggs, hnt this was more from carelessness than inahility. He finished the remainder more carefully and killed ten straight. Lachman, formerly a member of the Cosmopolitan Club, but recently initiated into this club, for a time bid fair to make a clean score, but on the sixth round he shot behind a right quartering bird and so made only eleven. The scores are as follows:

Robinson	1	1	1	1	1	1	1	1	1	1	1	1—12
Brand	0	0	1	1	1	1	0	1	1	1	1	1— 9
Roche	1	1	0	0	1	1	1	1	1	0	0	0— 7
Rice	0	1	0	1	0	0	w					— 2
Kerrigan	1	1	1	0	1	1	1	1	1	1	1	1—11
Jellett	0	0	1	1	1	1	1	1	0	1	1	1— 9
Knowles	1	1	1	1	1	1	1	0	1	1	1	1—11
Walsh	1	1	1	1	0	1	1	1	1	1	1	1—11
Pearson	0	0	1	1	0	0	0	1	1	1	0	0— 6
Bogart	1	1	0	0	1	0	0	1	1	1	0	0— 7
Fay	0	0	1	1	1	1	1	1	1	1	1	1—10
Hansen	0	1	1	1	1	0	1	1	0	1	1	0— 8
Lachman	1	1	1	1	1	0	1	1	1	1	1	1— 6

As above seen Mr. Robinson's straight kill gave him the first medal. Messrs. Kerrigan, Knowles, Walsh and Lachman tying on eleven, the tie was shot off at three pairs of pigeons, 18 yards rise. The birds killed by the gentlemen were:

Kerrigan	0	1	1	1—5	Walsh	1	1	0	1—5
Knowles	1	1	0	0—4	Lachman	1	0	0	1—2

Kerrigan and Walsh again tying, instead of again shooting, took the second and third medals which are nearly equal in value. Mr. Eyre acted as judge and Mr. Buckley as referee.

The next match arranged was a $5 sweepstakes at five pairs of birds, 18 yards rise. Twelve entries were made aud the purse divided into three prizes of 50, 35 and 15 per cent. In this match very pretty, clean shooting was done, there being five ties on nine out of the ten pigeons. The score stands:

Robinson	1	0	1	1	1	1	—9	Roche	0	1	1	1	0	0	1	1—5
Fay	1	1	1	1	1	0	1	—9	Walsh	1	1	1	1	1	1	1	1—10
Knowles	1	1	0	1	1	1	1	—9	Lachman	1	1	1	1	1	1	1	0—9
Jellett	1	0	0	w			—1	Bogart	1	1	1	1	0	0	1	1—7
Hanson	0	0	1	0	w		—1	Maynard	1	1	0	1	0	w		—4
Pearson	1	1	1	1	1	0	—8	Buckley	1	1	1	0	0	1	1	0—6

In shooting off the ties, among the five who made nine points, at three pairs, Robinson and Fay killed the six birds and divided the fifty and thirty-five per cent, and the other three contestants to save pigeons divided the third money.

The third match was a $5 sweepstakes at eight birds, 30 yards rise from ground traps, 80 yards bounds, the use of both barrels allowed. This was the liveliest match of the day and the shooting was more than ordinary. Robinson brought all his birds down, the last one excepted, with only one barrel; the last came near getting away from him. Tbe scores are:

Robinson	1	1	1	1	1	1	1	1*	—8
Pearson	0*	1*	1	1*	1	1*	1*	1	—7
Fay	1*	1	1	1*	1*	1	1*	1	—8
Roche	1	1	0	1	0*	1*	1	1*	—6
Knowles	1	1	1*	1	1	1	1	0*	—7
Walsh	0*	1	1	1*	0*	1	1*	1*	—6
Hanson	1*	0*	0*	1	0*	w			—2
Bogart	1*	0*	w						—1
Jellett	1	0	w						—1

* Both barrels used.

As the money was to be divided into two prnses, and as Mr. Robinson and Mr. Fay acored eight kills, they divided the money between them. The fourth and last match was shot nnder the same conditions as the one previous only that the best man was to take the whole purse. Seven persona entered and Mr. Hanson was tbe fortunate man, as seen below:

Robinson	1	1	1	1*	1	0*	—5
Fay	1*	1*	1*	0*	1	0	—4
Walsh	1*	1	1*	1	1	0	—5
Pearson	1	1	0*	w			—2
Knowles	1	1*	0*	w			—2
Hanson	1*	1*	1*	1	1	1	—6
Roche	1	1*	0*	1*	1	0	—4

* Both barrels used.

The shooting of the day passed off as pleasautly as an old-fashioned quilting bee and we are glad to note the strict enforcement of the no-outside-shooting rule. Excuse this little hint, gentlemen, bnt if the shooters knew how unpleasant it is to have n pigeon shot a few feet above the heads of the crowd they would no doubt let the bird go; heside, the crowd invariably drop prone on the ground when a gunner aims his piece at a pigeou just over their heads, and though this is the safest position nnder the circumstances it is, to say the least, a very ungraceful one, aside from the wear and tear on clothes and nerves.

To-morrow n lively match will take place at San Bruno among P. D. Linville, Ed Fay, T. A. Pearsou aud Swan. The conditiona of the shooting are $50 entrauce money, 25 pigeona each, and the rules of Hurlingham to govern. There will probably be pool shooting after the matcb.

There will be considerable pigeon pool shooting at the Oakland Trotting Park to-morrow. Many of the crack shots from this city will go over. A large lot of picked birds are ready for the occasion.

At Walla Walla, W. T., last Sunday week, D. K. Howe broke seventy-seven glass balls out of eighty.

The Trap Match at Chico.

Last week we made brief mention of a glass ball match at Chico betwent J. T. McIntosb and George Ditzler. We have since received the following detailed account from our correspondent: This has been a very lively week in Chico in the way of amusements. On Wednesday, May 9, there was a match at glass ball shooting for $100 a side betweeu George Ditzler of Biggs Station and Jas. T. McIntosh of Chico; conditious, Monarch trap, 18 yards rise. There was considerable bettiug as to the result, pools selling even up; some outside bets were made $60 on McIntosh to $40 on Ditzler. The following is the score:

Ditzler	1	1	0	1	1	1	1	1	0	1—	8
	1	1	0	1	1	1	1	1	0	1—	8
	1	1	1	0	1	1	0	1	1	1—	8
	1	1	1	1	1	1	1	1	1	1—10	
	1	1	1	1	1	1	0	1	1	1—	9
											43
McIntosh	1	1	0	1	1	1	1	1	1	1—	9
	1	1	1	1	1	1	1	1	1	1—	10
	0	1	1	1	1	1	1	1	1	1—	9
	1	1	1	1	1	1	1	1	1	1—10	
	1	1	1	1	1	1	1	1	1	0—	9
											47

Occasional.

At Yuba City.

The Yuba City gentlemen who lately took up tbe idea of forming a gun club are evidently in earnest, as they have inaugu rated a series of glass ball practice shoots to get themselves in condition. On Tuesday of last week they held a meeting and made the following showing at ten balls, twenty yards rise:

M. C. Barney	1 1 1 0 1 1 1 1 0 1—8	Chas. McQuaid	1 1 1 0 1 1 1 1 1 1—9
Shan Rex	1 1 0 1 0 0 1 0 0 0—4	Robt. McGrew	0 0 0 0 0 0 0 0 0 0—0
Chas. Alvor	0 0 1 0 0 0 0 0 0 0—1	W. P. Harkey	0 0 0 1 1 0 1 1 1 0—5
W. S. Harkey	0 0 0 0 0 1 1 1 0 0—3	W. M. Clark	1 1 1 1 1 1 1 1 1 1—10

Second match, same conditions:

J. L. Duncan	1 0 0 0 0 0 1 0 0 0—2	W. S. Harkey	1 0 1 0 1 0 1 0 1 0—5
N. E. Boyd	1 0 1 1 0 0 1 1 1 1—7	Shan Rex	1 1 1 0 1 1 0 0 1 0—6
A.B. Van Arsdale	1 0 0 1 0 0 0 0 1—4	Robt. McGrew	0 0 0 0 0 0 0 0 0 0—0

A third match was shot in which W. S. Harkey, G. W. Benson, W. Walton, Joe Slattery, F. Butler, Pendletou and Rex shot, and was declared a victory for Joe Slattery, who broke nine balls.

Buying Yearlings a Lottery.

Well, yes, perhaps to a certain extent it is. For many years I regularly attended nearly all the great public sales in England, and a great many in France and other countries, and during that period have made note of certain animals that took my fancy in the sale ring, following their future career on the turf with considerable interest (mainly with an eye to information), and have come to the conclusion that even the most astute judge of horseflesh may spend thousands of dollars in bnying a nseless heap of rubbish before he buys a racehorse; and again, tbe man who buys one for a few hundreds may get a nugget. It is perhaps the glorious uncertainty that makes the pursuit so fascinating, and the sportsman comes up smiling a second and third time, only to be again and again disappointed.

However, there is one thing my experience has taught me to a great extent, and that is that a certain class of animal, if bought for racing purposes, is to be carefully avoided, and that is one step in the right direction. At this season of the year, when yearlings are being got ready for the auctioneer's hammer by their respective breeders, information founded on years of practice may not be either inopportune or unacceptable to those who have not had the same opportunities of making observation as myself. To begin. I have never seen a set yearling turn out a third-rater. By set yearlings I mean one that looks already furnished beyond his age, and a racehorse, so to speak, in miniature. Secondly: Avoid yearlings that do not stand and move true on their limbs (go down when they are rnnning in the paddocks and see them move for yonrself before the sale to ascertain this). Thirdly: Avoid gummy legs and bad feet; this last particularly. Tbey are the greatest annoyance to the trainer, and the source of endless trouble. More than one yearling—indeed, I may say scores, have I seen knocked down to professedly good judges, and for large sums, that personally I would not have had at any price unless to sell again, on acconnt of this defect. True, one may carry this prejudice too far, but for all that it is an extremely good prejndice to have and will save you thousands of dollars in the end. One more hiut. Do not get married to one particular strain of blood because it has been successful on the turf without your intended purchase or purchases have the necessary racing points in their conformation. Horses run in all shapes and forms, is an old law, and like many an old law, simply bosh. A horse, however well or fashionably he is bred, cannot gallop unless he has the reqnisite leverage and elasticity, this last equally balanced both before and bebind, and to have these he must again be possessed of certain points. What these points are I will mention briefly to you. The are three—oblique shoulders, deep chest and length from hip to hock. These are the principal points. There are many others which go to make up a racehorse, but let your purchase or purchases have these nt all events if they are not perfect in other respects, because they are absolutely necessary and the stepping stone to success. How many of your friends have you seen purchase a yearling because his brother or sister was a tip-top performer the year before on the turf, on the recommendation of the breeder, without first satisfying themselves that they were both equally shapely and possessed of equally good action and racing points? This is one instance of what I call being married to one particular strain and explains the expression sufficiently. To conclude, purchasing yearlings is so amusing on account of the amount of luck attending it that as a country grows rich so will the purchasers become more numerous and the breeders consequently more happy. For all that, it partakes so much of a lottery there is no real harm in knowing all you can about it before you join the rank of sportsmen and turfites.—*Insignis in New York Sportsman.*

To-morrow there will be a reunion of riflemen at the Newark range. Representativea from the various rifle clubs and military clubs will go down from this city and meet the riflemen from San Jose, Petaluma and Oakland in a friendly competition. Sides will be chosen from among the many present, and shooting matches on the several ranges be held for dinners etc. A pleasant and sociable time is expected, as nearly all of the rifle sharps in this vicinity will be present. We hear that only military rifles will be used, which will give it a military appearance.

Brown's Bronchial Troches for Coughs and Colds: "I have used them for more than a dozen years, and I think them the best and most convenient relief extant.—*Rev. C. M. Humphrey, Gratz, Ky.*

Sheep men say the increase of flocks has been greater this year than ever before. Feed is good and the [illegible] strong and healthy.

Racing & Riding TOURNAMENT

RACES, RACES,

ON JULY 4, 1883.

THE FOLLOWING PROGRAMME WILL TAKE place at the

San Jose Racecourse,

nnder the auspices of the

San Mateo and Santa Clara County

Agricultural As'n

NO. 5:

Grand Fifty-Mile Race.

Horses to be changed every mile; entrance free; purse $500; first premium $500 and the association's gold medal; second premium, $200 and the association's silver medal; third premium, $100; at least two to start.

Same Day—Riding: Ring Tournament; (Ten Rings.)

Entrance free; first premium, gold medal and $30; second premium, silver medal and $25; third premium, $20; fourth premium, $15; fifth premium, $10; sixth premium, leather medal.

Entries will close with the secretary June 1. For any information call on or address the secretary, 296 First street, San Jose. A. KING, President.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TABles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY

Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, high-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23½; another with a record of 2:26, made in 1882; another with a record of 2:28¼, and a grandson with a three-year-old record of 2:23½, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20½ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23½ to 2:28¼, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¾, by Happy Medium Jr.; and Carrie B, 2:28¾, by Ethan G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return each mare in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given on any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

ASHLAND PARK TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

2-17y1 **B. J. TREACY,** Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TO

Sportsmen & Pleasure-Seekers.

TH

SOUTHERN PACIFIC R R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Front in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT OOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA TH

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggageman. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞ In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

JOSEPH CAIRN SIMPSON,
Oakland or 508 Montgomery street, San Francisco.

THOROUGHBRED STALLION

X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by Imported Bonnie Scotland, his dam, Columbia, also by Imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Rock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This leaves only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland, or 508 Montgomery street.

Mares intended for either of the above stallions, and sent by Donahue's Petaluma, Sacramento or Stockton boats consigned to J. W. Hall, City Front Stables, will be received, good care taken of them and forwarded to Oakland.

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Columhus. Woodford Mamhrino by Mamhrino Chief, his dam Woodhine hy Woodford, a thoroughhred son of Kosciusko.

Woodford Msmhrino is recognized to be the best son of Mamhrino Chief. His own record is 2:21¼, and there are a large number of his get in the 2:30 list. Among them: Ahbottsford, 2:21¼; Convoy, 2:22¼; Magenta, 2:24½; Lady McFatridge, 2:29; Dacia, 2:29¼; George A. Ayer, 2:30.

Besides those having puhlic records, he is the sire of the two celehrated mares owned hy Robert Bonner—Manetta and Mallce. Manetta, with a running mate, and hsruessed to s road wagon, trotted two miles in 4:27¼, and Malice trotted a trial, on the same track, a mile in 2:19¾. Woodford Mamhrino is also the sire of Princeps, the sire of Trinket; record, 2:14. Woodhine is also the dam of Wedgewood, record, 2:19. Yonng Columhus, the sire of the dam of Ahhottsford, has nine of his get in the 2:30 list, so thst on both sides of the house there are notahle performers. Ahhotsford is a rich rosewood hrown, 15¾ hands, and of very high form. His get are very promising, his daughter Jasmine having won the Emhryo Stake for yearlings in 1881, and every one which has been pnt in training has shown good speed.

TERMS.

Seventy-five dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season free of charge. Good pasturage at reasonahle rates, and extra pains taken, hut no lishility for accidents or escapes.

LOCATION.

Ahhotsford will make the ensuing season, 1883, on the ranch of S. B. Whipple, Esq., San Mateo, season commencing February 15th and ending Jnne 1st, 1883. For full history see the issue of BREEDER AND SPORTSMAN of August 5th, 1882.

GEORGE BAYLIS, Agent, San Maleo, Cal.

MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,260 ponnds) combining the Hamhletonisn and Mamhrino strains and slso several thoroughhred crosses. His colts demonstrate that he possesses in an eminent degree the ssme facnlty of transmitting the family qnalities to his offspring which pnt George Wilkes in the front rank as a sire of trotters.

☞ George Wilkes hss twenty representatives in the 2:30 list, of which 10 have recorda of 2:25 or hetter, 4 of 2:20 or better and 3 of 2:18 or hetter.

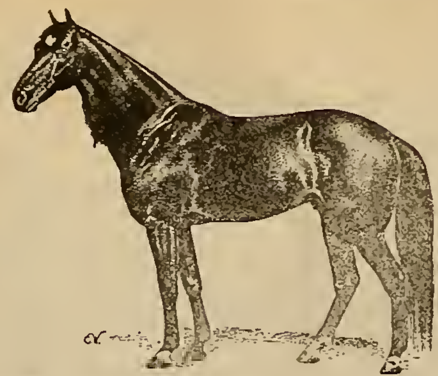
Will make the ensuing season, beginning February 1st, 1883, at STOCKTON.

In pntting the price hy the season at the low figure of $40 the owner does not acknowledge, therehy, any inferiority on the part of this horse to any other sire of Trotters.

IRVIN AYRES.

STALLIONS.

THE TROTTING STALLIONS



SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMING SEASON, FROM Mach 1st to July 15th, 1883, at tho farm of the owner, three miles north of Chico, Bntte Co., Cal.

PEDIGREE.

Singleton is hy Willie Schepper, a son of Rysdyk's Hamhletonian, his dam Lightfoot (the dam of Pride) hy Flaxtail, a son of Pruden's Blue Bull.

DESCRIPTION.

Singleton is a dark hrown horse, tan flanks and mnzzle, a little tonch of white on hind feet and one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was hred hy Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

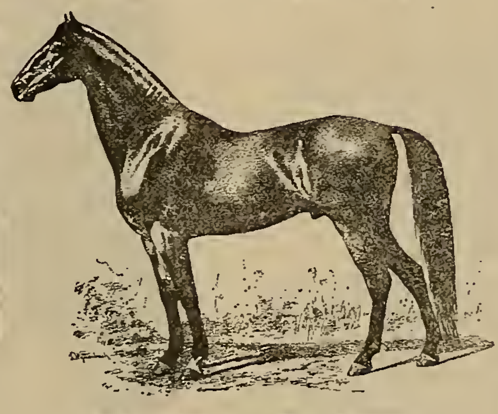
Fifty dollars the season. Mares not proving in foal will he hred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of train, snd taken to the ranch. Mares kept in any manner their owners desire, at reasonahle rates. There is every convenience on the place, boxes, paddocks and plenty of shade and water.

L A H A R P E

Will also make a short season at the above place on private terms. La Harpe is hy Fame, a son of Alexander's Belmont, his dam Prairie Bird by Flaxtail, the dam of Flight and Prompter. Address

J. T. McINTOSH, Chico, Cal.

The Fast Trotting Premium Stallion



ALEXANDER

WILL STAND THE PRESENT SEASON AS FOLLOWS: MONdays, Tuesdays and Wednesdays at Clark's stables, Santa Rosa. Balance of time at Fashion stahles, Pelalnma.

Alexander is hy Geo. M. Patchen Jr., the sire of Sam Purdy (2:20½) Starr King (2:22) and Vanderlynn (2:22). Dam Lady Creim, hy a son of Brown's Bellfonnder, by imported Bellfounder. For full description, see BREEDER AND SPORTSMAN of Sept. 9, 1882.

Of Alexander's get Tommy Dodd has a record of 2:24, Reliance 2:22¼, Nellie Patchen 2:27¼, Eudora 2:34¼, Inanguration three miles in 7:29—last mile in 2:26, Sonoma Boy 2:37. Alex. Button proved by his performance in 1880 to he one of the hest three-year-olds which have ever appeared in any country. He won the stake for three-year-olds st the State fair, heating Belle Echo, Annie Lsurie, Len Rose and others, winning the first, third and fifth heats snd making a dead heat with Annie Laurie in the fourth; time, 2:34½, 2:30, 2:29, 2:30¾, 2:35. At the fair of the Santa Clara Valley Association at San Jose he won, beating Belle Echo and Len Rose; time, 2:28¾, 2:30¼, 2:33¾, 2:31¾. Belle Echo won the first heat. He won at Stockton, heating Honesty, Len Rose and Upright in straight heats; time, 2:32, 2:33½, 2:32½. In 1881, as a four-year-old, Bntton mdaea record of 2:26¾ over the Santa Rosa track. Dot Craig, hy Alexander, has a private record of 2:29.

The Frasier team took first premium at the Sonoma and Marin Distric fair; also at Oakland for best carriage team.

Mar s lett at the City Front stahles, San Frencisco, will he forwarded. For further informatian apply to

T. T. UNKLESS, Petaluma.

S T E I N W A Y.

TWO-YEAR-OLD RECORD 2:31¾; 3-YEAR-OLD RECORD 2:25¾.

TERMS

WILL SERVE MARES THE PRESENT SEASON AND ENDING July 1, 1883, at the slock farm of the late Daniel Cook, Danville, Contra Costa connty, Cal., at $100 for the season, payahle before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage at $6 per monih, and extra pains taken with mares in attendance, bnt no liahility for accidents or escapes. Mares sent in care of of McCleverty & Nohlett, Fashion stahle, Oakland, S. J. Bennett, Martinez, or D. S. Smalley, Haywards, will be forwarded immediately to the farm.

DESCRIPTION.

He is a rich bay; 15¾ hands high; long, flowing mane and tail]; two white hind ankles; remarkahle style and lofty carriage; has a good, resolnte head, set on a slout neck; his shoulders are of the Hamhletonian form—do not mount very high st the withers; has great length and capacious middle piece; plenty of bone and substance, and his gait is hig and square.

PEDIGREE.

Sleinway was sired hy Strathmore.

First dam Abhess hy Alhion, the sire of Vanity Fair, with record of 2:24.

Second dam hy Marshal Ney, by imported Emancipation.

Third dam hy Bertrand, by Sir Archy.

Steinway's dam is the dam of Solo with five-year-old record 2:28¾, and also the dam of W. S. Buckner's colt Currency that trotted as a yearling last fall in 2:46. See N. Y. "Spirit of the Times of November 18, 1882. Strathmore is the sire of Santa Claus 2:17½; Chestnut Hill, 2:22½; Sleinway, 2:25¾; Alice Stoner, four years old, 2:24; Nannie Talbot, four years old, 2:29; Solo, five years old, 2:28¾; Monitor, five-year-old record 2:29; hy Rysdyk's Hambletonian, the sire of 36 in the 2:30 list. Address

CHOICE Brood Mares FOR SALE.

ON ACCOUNT OF THE OWNER'S ABSENCE abroad, which prevents his giving his personal attention to his stock, the undersigned has been requested to offer for sale the following choicely-bred broodmares. These animals are just as represented. In breeding, health, form, size, color and disposition—in everything that goes to make up desirable stock for breeding purposes—They present an exceptional opportunity. They are not discarded, broken-down trotters, but are in their prime, perfectly sound and in vigorous condition. Like their sires, they are themselves trotters and are all purely gaited. Their breeding qualities have been tested. The get of each is highly promising and not for sale. To save time and correspondence, full and correct pedigrees are given below and from the prices named there will be no deviation:

HECLA.

(Standard. See "Wallace's Trotting Register.)" Bay mare; sixteen hands high; foaled 1873; got by Almont (sire of 70 winners of contested races, 20 with public records below 2:30), son of Alexander's Abdallah; dam Haidee, by Mambrino Chief; second dam Zenith (3940); bred by D. Swigert, Esq., Kentucky. Hecla is pronounced by competent judges to be one of the finest broodmares in America. Has had three fine colts, one of which, a yearling by Orange Blossom, may be seen with her. Is again in foal to Orange Blossom. Colt due end of June next.
Price $1,200.

MINNIE H.

Brown mare; sixteen hands; three white feet and blaze in face; foaled 1875; got by General Knox (sire of Lady Maud, 2:18, Camors, 2:19¼, and about ten others in the 2:30 class); dam Sallie Groves, by Prince Moscow Jr.; second dam Tuck (a fast pacer), by blind Tuckaboe; Bred by Hon. H. B. Holton, Powhatan, Md. This mare trotted in 2:38 while in Mr. Holton's possession, previous to being put to breeding. Has fine yearling filly and has not yet been bred this spring.
Price $750.

VARILLA.

Bay mare; very nearly sixteen hands high; a trifle white on one hind foot; as near as could be ascertained by the owner the age of Varilla is twelve years; got by Middletown (sire of Music, 2:21, Nellie Irwin, 2:25, Orange Blossom, 2:26½ and others), by Rysdyk's Hambletonian; dam by Hector, by Latourette's Bellfounder; bred by D. B. Irwin, Esq., Middletown, Orange Co., New York. The present owner of this mare has three of her colts, all of fine size, weight and promise; one, a four-year-old, has been sent to Dr. Herr, Lexington, Kentucky, for training. Varilla has a filly, foaled April 14, 1883, by her side by Meadow Chief, he by Hamlet (sire of Leontine, 2:24½, Brookside Flora, 2:20), by Volunteer, and has not yet been bred this season.
Price $750, or $900 for mare and foal.

To one purchaser the three mares will be sold for $2,500 cash. The owner respectfully refers to the "Spirit of the Times," New York, and to Joseph Cairn Simpson, editor "Breeder and Sportsman," San Francisco, Cal. Address, or call on,

Trotting Action.

"Rolling motion" is a good name for the shoe which is known by that title, albeit that the term does not convey the properties as fully as it deserves. There is no question that it gives the foot a quicker roll, the reasons for which are apparent. The points of support being some distance from the toe, the foot leaves the ground sooner than if the turning was done at the extremity. In the fast-trotting step the heel strikes the grouud when tbe toe has quite an elevation, and as the body is carried over it the foot has an eqnal bearing to be followed by the raising of the heel and before the foot is raised again there is a pnsh with the toe. It is manifest that in the fast gallop there is a necessity for a "good hold" with the toe of the forefoot. With the galloper there is an absolute loss of power in ronnding the toe not alone resulting from shortening the lever, as it also entails a diminution of the stride.

There must result an injury to the speed of the racehorse, but it must be borne in mind that the greatest effort of the racer to hnrl the body through the air is made with the forefoot, while the trotter uses the hind foot for that purpose. In a square trotter the hind and fore feet strike the ground so nearly together that the ear fails to note the difference, and as has been heretofore shown the forefoot is picked np a little eooner than the hind foot. Therefore, it is longer in the air, for undonbtedly the elight variation in striking is in favor of the hind foot. It has also been shown that ecalping occurs at the oommencement of the airflight, striking the ehin in the the midst of it.

Aeeuming that the length of the shoe ie five inches, the setting the calkin back half an inch, or beveling the toe that much, must accelerate the motion. Thns the heel first comes in contact with the grouud, and as the body is carried over it there is a change. The shoe is level a short time before the leg is vertical, and a ehort time afterwards. Then the heel is raised and last of all the toe. When the animal finds that the foothold on the ground ie giving way the foot is picked up, and this occurs much quicker when the point of resietance ie back of the toe. It is on this principle the Chineee ehoe is conetructed, otherwise the uuyielding sole would require that the turn be made at the extreme point of the toe. With an ordinary leather sole the bending effects the same purpose and in either case the action is easier. When I lived in Iowa a Germau fabricated wooden shoes which were the favorite pattern of those who used them. He placed a bar across where the ball of the foot would come and thus gave the requisite roll. Wooden clogs are rounded, something the same as the ehoe of the Chinaman, and for the eame purpoee. An indication of the effect it has on the action of a horse is obtained from placing the shoe on a flat surface with the ground eide down. It is tilted up easily, a slight pressure on the toe being all that is necessary. Reversed, however, and no amonnt of preseure will raise the heel, and to accomplish that it will be necessery to lift the posterior part. While there ie a difference from this test when it is nailed on the foot of a horse, it is manifest that less strength is required, and that placing the fulcrum one-tenth of the whole length of the shoe back of the toe gives an entirely different motion to the foot. With aome horses the change is detrimental. The "rapid," ahort-striding horee has naually enough of this movement, and an increase retarda in place of adding to his speed. But if the short-gaited horee wounds the coronet or pastern, or bruises the hind foot with the toe of the forefoot, it may be that the bevel at the toe will overcome the habit, after which something can be done to lengthen the stride.

Aesuming that there is no nccessity for guarding againet anything bnt a tendency to acalp, it is a logical inference that the rolling motion will be favorable in the increase of quickness in getting the foot ont of the way. The bevel at the toe aids in the correction, as it is evident that in the upturning of the foot the toe will strike when the hind foot is carried under it, and tbat the outer edge of the shoe will do the injury when the gait is more open. I have found that a barefooted colt struck hard enough to mark the horn of the hind foot and cut the front part of the hind pastern. By shortening and ronnding the toe, and also roundiug the edge of the horn, this was in a measure obviated, and in some cases it proved to be a complete remedy. The driving of barefooted colts entails constant examination of the feet and frequeut trimming. While there is a tendency to wear the toe rouudiug, a short distance back of the toe the edge will be sharp. This is likely to do injury should it strike the opposite leg or the hind one in passing it; also probable that there will be a breaking away of the horn, and there may be a splitting of the horn for quite a distance. When rounded so that the force of the blow when striking the ground comes an eighth of an inch inside of the crust, it is rare, indeed, when there is a fracture or any rending of the fibers. One of the objections urged against the practice of driving colts barefooted is that boots cannot be worn on the feet. I shared in the opinion that scalpers required the beels of a shoe to keep them from slipping under the foot, or, at least, one heel, as in the three-quarter shoe which I used on Anteeo. My desire to keep the hind feet of Antevolo in a natural shape led to experiments, and the result was a complete snccess, thongh at first there were failures. The trouble was to prevent the heelstrap from slipping down and getting under the foot when there was no chauce to rest it on the end of tbe shoe. Bnt bringing the eides farther up and drawing them in helped to retain it in position, and by interlacing a thin strip of metal sufficient stiffness was given to do away with all the difficulty. For several years I have used a screw in place of a strap to keep the boot in place, and this is by far the better practice. A half-inch screw is sufficient, and the longest I have used is one of five-eighths, the size being No. 9, three-sixteenths of an inch at the thickest part in diameter. It is put into the horn so low down that if the wall is perforated it will be below the sensitive tissues, and a ehort distance back of the center of the toe on the outside of the foot. There is no tugging at straps. The heel strap ie buckled before the boot is pushed down to its place, and when the hole in the boot is opposite that in the horn a few turns of the screwdriver sends it home. When the fastening is done with a strap running through a slot between the foot and the shoe, the foot has to be held up while the strap is run through, and then there is the give of the buckle after the tongue of it ia in the hole. The buckle is an excrescence, and then there is the liability of the strap being cut, which, of course, loosens the boot. With the metal stiffening—the best heiug a thin stratum of steel—there is scarcely a necessity for bringing the sides over the quarters, though this ie a safeguard which had better be retained. In some cases horses will "brush" that part of the foot that is covered, especially the inner quarter, and this is guarded against as well as keeping the heel etrap in place. When using the three-quarter shoe on Anteeo, I discovered that there was a tendency for the foot to elide forward, at times the slip heing six inches. A heel calk was not permissible, inasmuch as that would give a wroug bearing, and the remedy must be found in some other contrivance. Give the frog a chance to exert its natural functions, and that aided by the natural heels, and when the foot strikes it will be retained in position. The alipping forward is evidently detrimental, and the sooner a secure hold ie obtained the better it will be. It is also evident that the grand propulsive effort in the fast trotter being made with the toe of the hind foot, that should be given a firm hold on the ground to obtain the full effect of the muscular power. Rounding of the toe of the hind foot interferes with a firm hold, although I have known one horse in which advantagea followed that more than compensated for the loss. The action of the hind legs is not so easily controlled as that of the fore, and what may appear paradoxical in a majority of instances, the desired change will come from the appendages or mauuer of treatiug the fore feet. That is, that apart from the causes already mentioned, there is a kind of sympathetic action, and that when there is a change made in the manner of handling the forelegs there is also a corresponding differeuce in the motion of the hind. This is exemplified by pnt-ting bandages on the forelegs of an animal which has not been accustomed to wearing them, aud the incnmbrance will cause the hind legs to be picked up something after the fashion of a horse with stringhalt.

The conclnsion forces itself upon the understanding that to improve the trotting action the fore feet and legs are the points to depend upon when the injnry can be remedied by a difference in the movements. At the same time there must be protection, especially in those which have to acquire the proper step in order to trot fast, and the protection must consist in usiug guards that render the collision, as nearly as can be, harmless. How to effect these purposes in the best manner is well worthy of the attention of everyone engaged in the business of breeding, training or owning trotters, and of sufficient moment to warrant the BREEDER AND SPORTSMAN in devoting full space to the elucidation.

ATHLETICS.

Olympic Club Spring Meeting.

Arrangements for the Spring meeting of the Olympic Club which takes place on the Oakland gronnds on Decoration Day are about completed. The nnmber of those enteriug is as yet small, bnt no significance is attached to this fact, as it invariably happens that members are slow iu entering, and leave that matter nutil the last moment. Those who have entered have been practicing for some time past so that there is every reasou to expect a successful meeting. The events are interesting aud the handicaps will, no doubt, be liberal enongh to make them still more so, without practically barring good sprinters. The postponement of the University games is also counted upon to increase the entries. The Golden Gate Athletic Club, the Merion Cricket Club, the California Athletic and Lacrosse Club are already represented, with a probabliity that interior athletes will put in an appearance. The bicycling clubs have taken a lively interest in the contests, and send a good delegation especially for the short races. The handicaps in these events, however, have uenally been such as to shut out good riders, who were beaten before they entered. The fact that a rider has won a majority of races should be no reason to handicap him to such an extent as to preclnde the possibility of his winniug future events. The idea of handicappiug is to place contestants upon their relative merits so as to insure close races aud to give less skillful riders or racers an opportunity of competing successfully, and not with an idea of giviug them the race at the start. This has always been a sore point with wheelmen and unless the crack riders were handicapped beyond any possible chance of winning the lesser lights refused to enter, even though the handicaps, as against the former, were heavy. Should the same spirit he manifested at this meeting it would save trouble if good riders were plainly told that they are not wanted. The matter might he avoided by limiting them to certain events.

The wrestliug match between the Scotch athletes, Donald Dinnie and Muldoon, creates nothiug more than passing interest in aporting circles. That a full house will greet their appearance is admitted, but that the public expect to see anything like an out-and-ont match is the subject of grave doubts. The procession of flaming annonncements is hardly calculated to convince the public of the genuineness of the affair, and the wretched cuts which disfigure barn doors and dilapidated fences are far more suggestive of angular haunches of beef than of wrestling champions. Judging from the mass of sinews which the cuts display about the arms and breasts, the champions will be profusely decorated with breast pads, to say nothing of innumerable warts and bunions on their biceps.

J. W. Johnson, of Truckee, challenges any resident of Nevada, Sierra or Placer counties to a fifteen-hour heel-and-toe walking match for $100.

Trotting Mares as Broodmares.

In the last number of the *Turf, Field and Farm*, a paper whose expressions of opinion are generally the result of careful thought and investigation, the following statement is made:

"Neither Pocahontas nor May Bird have ever been in foal, although several times mated. The mare which goes through the severe training ordeal is not easily made fertile. The drain upon her vitality seems to affect the reproductive organs, and in the majority of cases she remains barren."

The proposition contained in the above paragraph will hardly bear the light of even causual investigation, a mere glance at the facts of history bringing to light an overwhelming volume of evidence on the other side, and showing that "the mare which goes through the severe training ordeal," is almost certain to produce foals—and healthy ones, too—when put to breeding, instead of "in the majority of cases remaining barren."

Let us begin at the beginning. Flora Temple was the first very fast trotting mare in this country, and the first trotter of either sex to beat 2:20. She came out in 1851, being then five years old, and remained on the turf eleven years, in every one of which she was in active training for a far greater length of time than is now commonly the case with trotters, some of her races having been trotted after winter had begun and the snow was on the ground. She trotted mile heats, two-mile heats and three-mile heats, pulling a wagon in a large minority of her races. She was essentially a wear-and-tear animal, but in spite of this fact the drain upon her vitality must have been immense. In her old age she was put to breeding, but the many years of training did not seem to have in any degree impaired her productive powers, as after becoming the property of Mr. Welsh she produced Kitty Temple, by Rysdyk; Prince Imperial, by William Welch, and The Queen's Daughter, by imported Leamington. So much for the pioneer trotting mare of America, one that came and flourshed in the days when long-distance races were the rule, and when a trotter that could not pull a 250-pound wagon fast enough to win was not considered a first-class performer.

Another noted mare, and one that beat Flora Temple two-mile heats to wagon handily, was Princess, that Jim Eoff brought from California. She had plenty of training, and plenty of hard racing as well, ten miles not being beyond her capability. After a long turf career she was put to breeding, and her son, Happy Medium, has long since taken rank among the successful trotting sires of the country. Besides him she gave birth to several other foals. Evidently the hard campaigns through which she passed had not exhausted her vitality. Widow Machree; a daughter of American Star, was another of the old-timers. She was game and enduring, and at Boston, in 1859, won a race, literally on three legs. She was bred, and her foal was Aberdeen, the sire of Hattie Woodward, 2:15½. Lady Sutton and Moscow are two more trotters of the early days, that made good broodmares.

After the retirement of Flora Temple and Princess the next great performer among the mares was Goldsmith Maid, and contemporaneous with her were Lady Thorne, Lucy and American Girl. With the exception of the last named all of these mares entered the breeding ranks at the close of their turf career, and all except American Girl were owned by Mr. H. N. Smith, whose breeding establishment near Trenton, N. J., was started with the idea that in order to produce trotters, mares that had proven their merit on the turf should be selected as dams. It would be a waste of space to write at length upon the turf career of Goldsmith Maid, as her history is fresh in the minds of all who have even a superficial knowledge of turf matters. It is doubtful if her equal as a campaigner ever existed. No complete record of her performances has ever been made, but from the time she passed into Budd Doble's hands in 1867, until she retired in 1877, the gallant little bay trotted no less than 118 races, and yet she has given birth to three foals in her old age. Lady Thorne was another good campaigner. During her eight years on the turf she trotted fifty-eight races, and yet when called upon to perform the duties of a matron she responded nobly by giving to the world a colt and a filly before death claimed her. Lucy could go the route fast and keep at the work all season, but she had three foals after the harness was taken from her for good.

These notable instances would seem to pretty well dispose of the theory that training takes away the vitality of a mare and unfits her for breeding, but there are plenty more of the same sort. The famous old pacer Pocahontas, that was a celebrity of her day, and that pulled a wagon in 2:17½ over the old Union Course on Long Island, was also a good broodmare, and her memory is being kept green by her descendants, to whom her speed was imparted. Her foals include Tom Rolfe, that sired the trotter Lady Rolfe, record 2:22¼, and the pacer Sleepy Tom 2:12¼, and a sixth heat in 2:14; Pocohontas, 2:26¾, and that has shown much faster time since becoming the property of Mr. Bonner, and May Day, dam of Nancy, 2:23½—and all these were by different sires. Grand Duchess, 2:26½, produced Galatea, that made a record of 2:25½ at Hartford in 1877, being at that time but four years old; and yet Grand Duchess trotted a hard race when five months gone with foal. Training did not exhaust her vitality. On Mr. H. N. Smith's farm may be found Daisy Burns, 2:28; Belle Strickland, 2:26; Idol, 2:27; Rosalind, 2:21¾; Western Girl, 2:27; Big Mary, 2:28¼, and Lady Walkill, 2:29½. They were all campaigners, and all have had foals. Lady Hayee, a mare that beat American Star to wagon in 2:34, was on the farm also and had foals. So did Le Blonde, 2:34. Lulu, 2:15, had plenty of trotting, but she is proving herself a good broodmare, and her son, by Gov. Sprague, will be in Chicago next summer to take part in the colt race. Lucille Golddust and Fleety Golddust, illustrious members of the family whose name they bear, obtained records of 2:16¼ and 2:20, respectively, when on the turf with Charley Green behind them, but they turned out broodmares just the same. May Queen was another member of Green's stable. She has a record of 2:20 and also a youngster by Gov. Sprague. It would take a long time, and more space than we have to spare, to give even the names of well-known trotting mares with fast records that have not proven barren when put to breeding. A few of them are Clementine, 2:21; Gazelle, 2:21; Adelaide, 2:19¾; Flora Belle, 2:22¾; Lady Foxie, 2:25; Gumball, 2:31; Katie Middleton, 2:23; Lucille, 2:21; Beautiful Bells, 2:29; Belle Brasfield, 2:20; Lillie Shields, (dam of Lillian, 2:23½,); Lady Prewitt, 2:30; Lottie, 2:28; Mila C, 2:27; Lady Morrison, 2:27½; Sister, 2:30¼; Trio, 2:23¼, Lady Monroe, 2:26¼; Lady Turpin, 2:23; Nellie Walton, 2:26; Edna, 2:27; Jessie Wales, of the famous old-time pole team, 2:27¾; Alice West, 2:26; Magenta, 2:24¼; Queen of the West, and old Kate Hazzard, that trotted so many good races in Illinois with H. H. Yates behind her.—*Breeder's Gazette.*

The wool clip of Butte county is said by sheep owners, to be the best this season that has ever been had, as regards both quantity and quality. The early rains started the feed that sheep kept in condition, which insured a healthy growth of the fleece throughout the entire winter.

OUR NEW YORK LETTER.

Racing at Nashville—General Sporting News —The Bench Show, Etc.

Not until quite recently, within the last few days, has our unusually late season this year given any promise of real, genuine, simon-pure spring weather, and ulsters and furs were quite necessary within the past week, a snowstorm completing the novel experience which New Yorkers thought they had got through with two months ago. A glance at the vegetation in the parks, the northern limits of Manhattan, etc., shows the trees and shrubs still bare and leafless as if it were the "ides of March" with us instead of the merry month of May, although the sunny side of Battery Park, facing the bay, shows a slight improvement on the prevailing cheerless aspect of our metropolis. This is aggravating when incomers by train and steamer from the southern sections, and even a short fifty miles or so down in Jersey, report vegetation as forward and luxuriant as it should be at this time of year. Racing men, however, at the various training resorts in our neighborhood, have managed to get considerable work out of their equine charges thus far, and Sheepshead, Brighton, Monmouth, Fleetwood and Jerome have echoed to the flying feet of the runners and trotters on every day practicable.

In the Southwest the third meeting of the spring racing circuit of 1883 has been continued through a very successful week at the Rock City of Nashville, Tenn. Of course, the salient points of the sport have been already wired to your coast in all probability, but knowing by experience, when a resident with your citizens, how spare and incorrect (frequently) are racing dispatches that reach your paper, I judge that a *resume* of the prominent features of the meeting may not be without interest to your readers. New Yorkers took particular interest in what the week was expected to bring forth, on account of the East being right worthily represented by the Saratoga stable of Mr. Chas. Reed, and the desire felt in all quarters here to get some inkling as to the truth of the reported return to form of the great mare Thora, the best runner that Longfellow has yet sired. The first day of the meeting Mr. Reed's mare won a dash of nine furlongs in deep mud from a moderate field, and expectation was on tiptoe for Wednesday's race, at the same distance, for the River Stakes, worth $1,100. As here she would meet Pearl Jennings (the Utah filly), the old warhorse Checkmate, Saunterer, and the fast ones, the battle with these known good ones would show whether all was well with her or the contrary, and great was the disappointment when the pen was drawn through her name early Wednesday forenoon. However, as she was engaged with the same lot on Friday in the Rock City Stakes, a mile and a quarter, the sequel showed that it was simply from prudential motives, considering her many and valuable engagements the coming season, that Mr. Reed and "Jimmy" Lee withdrew her. The River Stakes produced a close race, the track still being slow, between the other "cracks," and at the finish the Western filly Pearl Jennings beat the old mouse-colored gelding (Check) three-quarters of a length and Saunterer was a half length behind him third. This showed that Pearl Jennings' victory at Memphis was not quite so much of a "fluke" as has since been imagined, that Checkmate needs more time, if his leg stands, and that sly old Saunterer, the fastest but biggest rogue of his day, has likely got into the sere and yellow leaf by this time, though at three quarters of a mile his speed is still great. Thursday evening last at Nashville showed heavy pooling at the Maxwell House on the result of the Rock City Stakes next day, and as the track had now dried up, though it is always rather deep and slow, the partisans of Thora, Checkmate and Pearl Jennings bought their favoritee heavily at nearly even rates, the Utah filly having to put up five pounds penalty for her win on Wednesday. This made the respective apportionments, Checkmate, aged, 118 pounds, Pearl Jennings, 4 years, 117 pounds and Thora, 5 years, 116 pounds. Cassidy's Blazes, 5 years, 121 pounds, was also in the field, after a fast race in which Mr. Reed's mare made all the running, the three-quarters in 1:17½ and the mile in 1:44¼, coming home under a pull. Thora won in a canter by six lengths from Checkmate second, who reversed Wednesday's running with Pearl Jennings by a neck. The time, 2:12, is very fast for the course, and the admirers of Susan Ann's daughter by Longfellow at once made up their minds barring accidents, she had regained again her great form of a year ago at Baltimore, where the show she made of Glenmore and Greenland stamped her the best animal, except Hindoo, in the county, over a Cup course, two miles and a quarter. It is hard work now to get even money against her for the Louisville Cup on the 25th, and most of the bookmakers have refused to bet any more money against her, for this race.

Four good two-year-olds showed up at Nashville, Martin's Granite, Cottrill's Buchanan and Mona, all three by the ill-fated Buckden, whose early death is greatly to be deplored, and Bryant's Gen. Harding by Great Tom, the latter colt out of the dam of the notorious Big Medicine (and named after the owner of Belle Meade, whose yearly sale was a great success, particularly as regards the equines sold), won a stake race at half a mile from Buchanan, Lloyd Daly, and a fair field in 53½ seconds, and Mona, out of the dam of Monogram, captured one at the same distance from a fair lot of fillies, most of them being debutantes. Granite met both of these winners on the fourth day, at five pounds in his favor, they each carrying a penalty for their wins, and the end of the five furlongs was Granite, 102 pounds, first, Mona, 105 pounds, second and Gen. Harding, 110 pounds, third, three lengths below first and second, Harding half a length behind Mona. time 1: ½. The last named colt got a bad start, or, with all his weight, he would have made it very warm for the winner.

The three-year-olds that ran during the week were a rather moderate lot, none of the "cracks" taking part, Joe S, by King Lear, Japonica (sister to Mahlstick), Standiford Kellar, by Great Tom, and Sovereign Pat, by Pat Malloy, being the best that ran. From Lexington, where eight days' racing commences to-day, and Louisville, come daily reports of the doings of the crack candidates for the Derby Cup, Merchants' Turf and other stakes.

At Louisville Drake Carter, Fellowplay and Morris' other horses are doing steady work. The Derby favorite, as Drake Carter is now decidedly, worked a quarter in 0:24¾ recently, a mile in 1:47½ with his shoes on. Cardinal McCloskey a mile in 1:46; Leonatus a mile in 1:46, mile and a half in 2:42. This is the best yet shown by any of the Louisville horses, and if this fast test has done the colt no harm, the one that beats him will about win the Derby. Ascender is doing good work, and so is Lord Raglan, while in the mile and a quarter race for the Distillers' Stakes, at Lexington, to-day, Bondholder, Pate's second string for the Derby, won in great style from Freeland, Lida Stanhope, Farragut, etc., in the very fast time of 2:08½, a great performance, and Drake Carter will have his work cut out to beat Bondholder in the Derby. Of the older horses, Apollo, Boatman, Lida Stanhope and John Davis, engaged in the Cup have greatly improved. The last-named aged son of Harry O'Fallon, worked a mile and three-quarters recently in 3:15. He is up to weight, at home in any kind of going, and promises to be Thora's chief antagonist in the Cup.

In this vicinity, most of the racers are moving well. Forester, the Withers and Belmont victor of 1882, is going like "great guns," and, if his legs stand, will be a dangerous horse for Thora and Eole in the Cup races. Circassian, by Alarm, twice a winner last fall, and greatly fancied by Littlefield and his party for the Withers and other spring stakes, has had to be let up in his training, and will be turned out probably until fall. Kinglike, the Nursery winner, in Mr. Withers' string at Brookdale, is a fine colt, but needs some months yet to fill out, and the fall will be his best time, likely. The Dwyers' horses are now at Jerome, and Geo. Renney finds many admirers, he and Mis. Woodford being intended for Jerome three-year-old events Barnes has been finally officially scratched at Louisville for the Derby by his owners, who should have done this long ago, and saved much wordy and pen-and-ink discussion thereby, and perhaps a few dollars to some unlucky mortals.

The "Plunger" (F. T. Walton), having stepped down and out from the hotel management in favor of popular "Billy" Connor, left this city on Saturday last for England, by the White Star steamer Brittanic. He takes with him our pet mare Girofle, who had a box specially prepared for her comfort on deck, $500 being the passage for the two horses, Marathon, five years, going with her as being an animal that the mare likes to trot with, and a fair performer himself, having been lately educated over hurdles with great success, it is said more. Girofle has the best wishes of all for her safe arrival in Albion, and if well, and not too heavily burdened, that she will show her heels to some of the foreign cracks is a certainty.

Yesterday's race at Newmarket for the Burwell Stakes shows that Mr. Keene has a fair three-year-old in Blue Grass, who beat five others a mile very handily. He is engaged in the Derby, as is also Bolero, Mr. Keen's brother to Glidelia, and if the Scotland colt is better than Blue Grass, Yankeeland may have a chance for the Epsom prize of '83 after all. At present, London betting shows Bean Brummel to be the Derby favorite, with the three placed horses in the Guineas, Galliard, Prince and Goldfield, at a trifle larger odds.

The Manchester Cup, run on the 14th, is also exciting great speculation in England, with Thebais, by Hermit, five years, as the favorite. Thebais belonged to the late Mr. Crawfurd, and in 1881 won the 1,000 guineas and the Oaks. And right here I will state for the information of any of your readers who may desire to invest on racing events either in England or this country, that the extremely unsportsmanlike precedent set by Louisville bookmakers of closing their betting books on certain horses in certain stakes such as the Derby Cup, Merchants', etc., is not followed by the pencilling gentry in New York, who are always ready and anxious to "lay against anything," at, of course, greater or less odds as the state of the market may warrant. So any "Friscans" who think they have "something good" in their minds for any future racing event can be accommodated to any amount by wiring or writing to W. Lovell, 39 West 28th street, Cridge & Co., or any of our responsible bookmakers, or the writer will cheerfully undertake any commissions himself.

Some large bets have been laid this week, $1,000 to $500 against Thora for Louisville Cup; $3,000 to $1,000, Drake Carter for the Derby; $1,000 to $200, Fellowplay for the Merchants'; $2,000 to $5 against the combination of Ascender for the Derby, John Davis for the Louisville Cup, and Fellowplay for the Merchants' Stake. $1,000 to $50 against Geo. Kenney's winning the Withers and Belmont at Jerome and the Coney Island Derby, he to win all three races to win the money; $500 to $50 against his winning the Withers and Belmont, etc.

The great entry of 246 nominations for the 17 events offered by the Chicago Driving Park is a great tribute to the association's liberality, and as Hicok and Goldsmith have entered Overman and Romero and others, your State will doubtless get a good slice of the $60,000 hung up.

The dates for the Grand Trotting Circuit appointed yesterday at Rochester will also meet with general approval among trotting men. Pittsburg lead off on July 24; then Cleveland, July 31; Buffalo, August 7; Rochester, August 14; Utica, August 21; Poughkeepsie, August 28, Hartford, September 4, and Providence, September 11.

Louisville's May trotting meeting began yesterday and the gray Joe Bunker beat J. B. Thomas, Dick Wright, France's Alexander and Troubadour in four heats. Fastest heat, 2:21¼.

There is talk of Col. Russell's famous stallion Smuggler, 2:15¼, leaving the old Bay State to make a season in California. If he should go west to the Pacific, he would be well patronized beyond question.

Old John Baker, known on your coast as Joe Howell, set the seal on his previous fame by his great race at Oakland. The Baldwin colt Gano, however, is entitled to nearly as much credit considering the character of the race, and if he came out of it all right, will be closely watched when he comes east.

All the theaters except Booth's, which is being dismantled, are doing well. Haverlys with the popular Gillette in the "Professor," is drawing large houses. Mrs. Langtry at Stetson's Fifth Avenue, "A Bunch of Keys" at the San Francisco Opera House, the McCaull opera troupe at the Casino, "A Russian Honeymoon" (a great success) at the Madison Square, "The Cape Mail" and the "Shaghrun" at Lester Wallack's two houses, and Neil Burgess' "Vim," a better piece than the "Widow Bedot," are having good patronage.

PACIFIC.

New York, May 9, 1883.

The pulse in horses at rest beats 40 times, in an ox from 50 to 55, and in sheep and pigs about 60 to 80 beats per minute. It may be felt wherever a large artery crosses a bone, for instance. It is generally examined in the horse on the cord which crosses over the bone of the lower jaw in front of its curved position, or on the bony ridge above the eye. And in cattle over the middle of the rib; and in sheep by placing the hand on the left side where the beating of the heart may be felt. Any material variation of the pulse from the figures given above may be considered a sign of disease. If rapid, hard and full it is an indication of high fever or inflammation; if rapid, small and weak, low fever, loss of blood or weakness. If slow the probabilities point to brain disease, and if irregular to heart troubles. This is one of the principal and sure tests of the health of an animal.

The Board of Directors of Plumas, Lassen, Sierra and Modoc County Agricultural Association, District No. 11, is now as follows: E. V. Spencer, Chas. H. Lawrence, John McBeth, W. D. Fletcher, A. J. Ford, John Hardgrave, D. R. Cate and D. D. Newman. Sierra and Lassen have one each, Plumas has six, and five of the six are residents of Indian Valley.

ROWING.

The Double-Scull Championship.

Hanlan states that he is in fine condition and very confident of winning' his match with Kennedy. He also states that Lee is getting into fine form and he and the champion row over sixteen miles every day. Ham and Conly of Halifax hsve shown an esrnest desire to row Hanlan and Lee a double scull race. In November last Mr. Duryea offered to match Edward Hanlan and George Lee rowing double agsinst sny other two men rowing double a race of three or five miles, for from $2,500 to $5,000 a side. Albert Ham and P. H. Conly responded at once with an offer to row Hanlsn snd Lee double five miles for $2,000 a side and the chsmpionship of America. After some negotiation Hsnlsn expressed a preference for a four-milersce and declined to row until the middle of August on account of the numerous engagements which he has ahead. Conly and Ham assented to the champion's terms and there is every prospect of the double race coming off on the 15th of Auguet. The *Turf, Field and Farm* referring to the match says: When Mr. Duryea put out his challenges in November there was not much hope of acceptance, because of the overshadowing reputation of Hanlan, but already two races have been made, and the third is in a fair way of being completed. The boating season will be very lively on this account, and it is to be regretted that Mr. Duryea's long and severe illness in England should have rendered it necessary for him to withdraw from all connection with the matches. The mail brought us a letter from him yesterday, dated Cambridge, April 27, in which he writes:

"I was eure some twelve days ago I could sail on the Alaska to-morrow, but I am sorry to say my doctor tells me it would not be safe. I regret it exceedingly, for were I well and in America I would bet all I could raise on Hanlan beating Kennedy. It is just four months since I was taken sick. I got feeling pretty well for two or three days, and then grew bad again. I have had four of the best doctore in England, hut still I am here and unable to leave. If I get back to New York, you can rest assured I will never cross the Atlantie again."

Mr. George F. Johnson, of New York, took all of the races off of Mr. Duryea's hands. The only challenge unaccepted ie that of Lee to Courtney.

The Champion Criticized.

We have become so accustomed to hearing nothing but praise of Hanlan's faultless style that it is almost startling to find a writer who sees defects in the champion's method of sculling. The intrepid writer who dares mention the great champion'e blemishes has expressed himself as follows in the Boston *Globe:*

"Kennedy, they say, is a perfectly finished man in his execution; delicately even and true all through, and although lighter than Hanlan, yet possessed, perhaps, of equal strength and speed.

"Hanlan, they say, has not a finished style, and an unprejudiced observer will see that he does not row evenly. He takes the water and leaves it one scull before the other; his boat does not travel on a fair keel; he has not availed himself of many changes of rig which are universally acknowledged as improvements, and he gets his speed from his great strength and practice in his present rig, rather than from correct rowing. Hanlan, although so uniformly a victor, has been beaten in every race in which he has been well headed, and Kennedy's friends have a theory that the champion might not row through if crowded a good part of the way. Kennedy's staying powers have not been tried in public, but his opportunities for testing himself with Davis and others have been such that he must have fully aseured those in his interest as to this requisite. He has been brought up in a highly scientific as well as practical school; he has seen Hanlan under all circumstances; he has had better means of measuring than of being measnred; he has had the blessing of a still tongue and the judgment and cool calculation of his phenomenal associate Davie to assist him in his estimates and reflections, and it is safe to say he has not undertaken the present task without his advice and co-operation. Many think Kennedy will be better boated and in some way assisted by mechanical appliances. At all events, he can use only what is decided fair by a just referee, and will probably have no other handicap than the skill of his opponent. Now, who will win? The only answer is the echo: Let all good sportsmen hope the best man."

Hanlan and Kennedy.

That the champion has'lost none of his great speed is demonstrated by his great spurt, after a hard hour's rowing, with Geo. W. Lee, who had only just embsrked. The following story is from the Boston *Globe:* Hanlan went out for a six-mile spin at speed Friday afternoon from the Vesper boathouse; Lee, who had been waiting for him, started up at a rattling pace, and with a lead of a couple of lengths in his favor, invited "Sir" Edward to a "battle with the. blades." "Come on, now!" was what Hanlan heard; and, although pretty well tired out, he accepted the invitation, and the two men engaged in a contest which was much enjoyed by a couple of newspaper men and a few friende from Boeton. Lee struggled hard to keep his lead, but the other was too much for him; and as the bow of Ned's boat poked out in front of the Jerseyman'e, almost oppoeite the boathouse, the Newark sculler had lost his power of speech, aud instead of the "Come on, now!" of Lee, the air was resonant with the merry laughter of the champion. George thinks he will wait nearer the boathouse next time.

On the 8th inst., the backers of Hanlan and Kennedy met at the office of the *Turf, Field and Farm* and put up the eecond inetallment of the etakes $1,000 each. Yesterday another deposit of $1,000 was made and the whole money, $5,000, wae up. The race will take place May 30 at Point of Pines, Revere Beach, Boston. The owner of the beach expecte, if the weather be fine, that the race will be witnessed by at least sixty thousand people.

The profeesional single scull race to be rowed June 22 on Lake Calumet will be a great affair, if the followiug scullers who are entered show up: Edward Hanlan, Toronto, Ont.; Wallace Ross, St. John, N. B.; George Hosmer, Boston; George W. Lee, Newark, N. J.; Charlee E. Courtney, Union Springs, N. Y.; Jamee Dempeey, Geneva, N. Y.; Frank Hill, Boston; R. J. Nagle, Boston; M. Kilo, Cincinnati; F. A. Plaisted, Chicago; William Elliott of England; G. W. Weisgerber, Wheeling, W. Va.; William Bricelaud, Wheeling; Ed Clator, Wheeling; J. A. Ten Eyck, Peekskill, N. Y.; John McKay, Halifax, N. S., and J. G. Gaudaur, St. Louis. The course is three miles with a turn. The winner of the race will receive $1,000, the secoud man $200 and the third $100. On the followiug day there will be a siugle scull race open to all but the winnere of the first day's competition.

There will be work for Jack Lsrgan as eoon as he gets home. George Bubear has aspirstions to the position of premier sculler of England and hss issued a challenge to any bona fide resident of England, Ireland or Scotland to scull him over the Thsmee championsbip course for $500 to $1,000 within ten weeks. Bubesr admits thst there are a score of men in Americs who can beat him easily over any course. This is a humiliating confession for the champion of Englsnd.

The new rowing mschine in use at Cornell College ie on the hydraulic principle, but hss but one cylinder for all four men instesd of one cylinder for each of four meu, as ie usual on hydraulic rowing machines. The two bow men pull ou one yoke, and the two stern men on another. Tbese yokes are pivoted ou a cross hesd to the piston. By this arrsngement the two bow men and the two stern men must pull exsctly alike. It can be seen whether tbey take the stroke at the same time and pull alike.

Louis White, of the Pioneer Rowing Club, went out for a row the other evening, and in going under Long Bridge fell out and had to lug himself ashore as best he could. He kept the matter very quiet until a boatman turned up at the Pioneer clubhouse with one of the great sculler's shoee which he had discovered sticking in the mud and at first mistook it for the lost anchor of one of the Pacific Mail Company's steamehipe.

Fred Smith has purchased the old paper shell which Louis White has been rowing for the past two years. The old boat is considered to be very fast aud the Long Bridge men are wondering what the new owner is going to do with her.

Shire Horses.

The Shire horse, it is claimed by some, can be traced back for many centuries; according to some authoritiee, ae far back as 1500; others put their origin at a later date. At all events, we have a clear record from 1700. From that date np to about fifty yeare since, we find the Shire horse was an animal of great size, with large and well-formed head and compact body; but the one peculiar charscteristic he possessed was the wonderful flow and bunch of long hair in front of his forelegs, commencing or shooting out from under the knee, and extending downwards in some cases quite to the ground; a large patch also protruded from nnder the hock, but this not so long as on the forelege. Tracee of thie we occasionally see np to the present day, and where found it is a favorable indication and is generally appreciated. In my last importation I had one, Barton by name, bought of the late Charles Mainprice of Ely, and bred by Cbarles Day of the same place. A nearer type of the old English Shire could hardly be found. He has a beautiful head, long neck, with splendid, well-arched crest—so high, in fact, as to make him look low in the back, with high rump, standing wide before and behind, and promising fine action. The hair from this horse's knee reaches the ground, but, as I say, it is very uncommon.

The Shire is a very docile animal, kind and of good disposition. It was common to see, before the era of compulsory education, little boys and girls, too, driving along from town or farm to farm; lads not much higher than the plow taking their pair of horsee to do their day's plowing, or one to haul manure on land, or any kind of farm work. I have seen these little fellows putting the collars and harnees on, while the horse held his head down to assist in the operation. The Shire horse has also a good constitution, and is easily and cheaply kept. Ordinarily they have short backs, with wide loins and shonlders, broad chest, muscular arms, and large second thigh, plenty of bone and good, sound, large feet. Much, I note, has been written about the clumsy, heavy horse. I want to say, as this is my first communication, that there ie no better styled horse for action and fine carriage than the Shire horse, and one of the highest steppers ever known was bred from an English draft mare by Mr. Skelton Smalley of Whittlesea, and fetched one of the highest prices ever paid for a harness or driving horse, namely, $5,000. I eimply mention this to correct a frequent misstatement of fact.

The home of the Shire and draft horse I might fairly and truthfully, so far as I know, say is the Isle of Ely, Cambridgeshire, and the fen or lowland which borders thereon, such as Lincolnshire, Huntingdonshire and Northamptonshire. The higher lands of these tbree last named places are not (as indeed are most of the other parts of England) so suitable for the growth of this breed. In fact they do not develop elsewhere so quickly nor as good. My experience has been that whenever I have gone beyond the borders of the fen lands with a view to purchase, I have not succeeded. The horses are either not sound, or do not show the arm and muscle to be found in the fen districts. I do not write this to disparage any particular locality, for in all things there are exceptions to the rule, but I simply give what has been my experience, the result of a thorough knowledge, I may say, of twenty years—epeaking from an observation extending from my eighteenth year. Therefore, I place the home of Shire horse in the fen districts. It is a fact, which cannot be disputed, and to confirm the statement I would point out that more royal winners, or if not royal, certainly first-prize winners, at the different town and county shows, are generally found to be bred on these fen lands. Cromwell, the royal winner at Reading last year, was bred in these parts of the fen. The Earl of Ellsmere also has been a large purchaser, and rumor had it when I was in England last summer tbat he intended buying a farm there, upon which to hreod his Shire horses. Peterboro, lying in this immediate "home," is acknowledged to be, both in numbers and quality of the animals, euperior to the royal for its show of Shire horses and maree.

One might write for a long time of the triumphs that have been won by horses bred in these parts. It is in theso lands that France, Germany, Belgium and Russia have bought for years the draft Shire, and it was from these parts, my own immediate neighborhood, that I concluded to purchaee for this country. America has a large field, and it was not until I had epent two years in America, viz.: 1879 and 1880, buying export cattle at your Union Stock Yards, that I first saw a stallion sold. I had often remarked that the Shire horse was one that I believed would ultimately take well in tbie country, and, accordingly, I improved tho first opportunity that presented itself to make an importation. I have faith in the future of the Shire breed in America, and when I have secured a suitable farm upon which to carry on the business, I hope to be able to demoustrate moro fully than has yet been done their superiority.—*J. H. Truman in Breeder's Gazette.*

It is estimated that 200,000 sheep will be driven to Utah and Colorado from northern California thie summer.

The bunch grass in eastern Oregon has never been better for twenty years than now.

BILLIARDS.

How Dion Beat Vignaux.

The opening game of the Collender cushion-carom tourney in New York was plsyed on Monday eveniug, the 14th inst., between Joe Dion and Maurice Vignaux. The gsme is thus deecribed by the *World:*

At 8:05 o'clock Scofield walked to tbe head of the table and said: "Ladies and gentlemen, the inaugural game of the Collender tournsment at cushion-csrom billiards will be between Maurice Vignaux and Joseph Dion. It will be of 500 pointe up, and the winner of the tournament will tako $1,200 and s handsome gold and silver billisrd table."

He then turned and beckoned to the players, who had been seated near him, and said: "Msurice Vignsux, Joseph Dion."

Both men were cheered, and acknowledged the salute by bowing.

Maurice Vignaux was attired in full evening dress and a Spinola collar. Joe Dion was also dreesed in evening costume and wore a turn-down collar. Both ehook bands and went to the table to string for the lead, which was won by Dion, who took the white ball and counted the opening shot, the essay being greeted with applause.

He miesed the second stroke. Vignaux went to the table and missed.

Nothing of importance occurred until the fiftb inning, when Dion made a difficnlt straight-acroee-the-table shot, which caused his friends to cheer him loudly.

In his eixth inning Viguaux made a kise ehot to the upper rail, its finish being greeted with applause that fairly shook the building. Then set in an era of prosperity for Vignaux which made him happy; his long force drivee, draws to two cnehions and follows on rails counted, and though his ruus were not large, his play was brilliant, and he smiled, a thing that with him is rare.

In the fifteenth inning Vignaux got the balls on the left rail in the upper corner and by delicate one-cnshion nursing and short draws made 40. The balls then lined on the rail and he missed on an easy masse. Thie failure to count was the signal for a boy in the gallery to whistle softly, a performance that caused loud laughter.

In the seventeenth inning Dion made a four-cnshion shot and Vignaux made an attack npon hie vial of cough medicine.

At the end of the twenty-first inning Budd Scofield called the score, "Vignaux 100, Dion 72," and an individual bet $100 to $25 that Vignaux would win.

The next inning saw Dion make a run of seventeen, one of which was a force drive to six cushions, and he had to wait for a full minute until the applause subsided before he conld go on with his play.

In the thirty-six inning the score was, Vignaux, 255; Dion, 202. So rapidly and brilliantly did they play that at the end of the forty-second inning the score was annouuced, Vignaux, 305; Dion, 211.

There were lond shouts of "Go in Joe!" "Down the Frenchmen!" oblivious of the fact that "Joe" is himself a Frenchman.

The forty-ninth inning saw Dion plsying very strongly and Vignaux nervous. This was shown in his manner of standing near the table and watching his opponent's strokes until he could stand it no longer and left the hall for fresh air. When he returned at the end of five minutes he found that Dion had added twenty to his score, and a consideration of it caused him to miss his next shot.

He then applied himself for the second time to his cough medicine, and his friend "Don" Strauss whispered to him words of comfort.

Dion, however, was taking another and more effective course to assuage his grief, and when at the end of the seventy-fifth inning he was but fifty-eight points fo the bad.

In his next inning he got them in the corner and rattled them for thirteen before they got beyond control, and wheu again he went to the table he played a series of shots which were of the brilliant exhibition order and, as a spectator expressed it, "broke the Frenchman up in business."

When Vignaux went to the table in the eightieth inning he was so nervous that he made a direct carom and retired to his seat with a look of conscious self-disgust upon his face that made the friends of Dion joyful, and they gave vent to their joy by long and continued applause.

Vignaux had been at one time 463 to Dion's 382, bnt the great playing of the latter in the last hnndred caused him to catch up with and pass Vignaux in the eighty-third inniug. Vignaux had wanted at the commencement of that inning but fifteen points to the victor, but a miss, followed by Dion's run of twenty-eight, "rattled him," and his next essay was also a failure.

When Dion started on his eighty-fourth inning he wanted but six to run out, but when he had made five the crowd arose and prepared to rush toward him, when he would have made the last shot. But tbeir action unnerved Dion for the instant and he missed, and the crowd sat down amid a chorus of "Obs!"

Vignaux then missed and Dion counted and won the game.

The ecene beggars description—everybody laughing, cheering, hooting. All were joyful because, as an Irishman said, "the foreigner was bate."

The score by innings for both men is as follows:

Viguaux—0 1 5 1 0 4 0 3 3 2 3 8 0 2 40 19 0 2 2 5 7 14 0 41 15 3 19 1 14 1 12 13 5 1 9 1 8 8 0 3 11 19 0 9 2 3 1 4 8 5 3 3 0 3 9 1 26 2 23 10 8 0 0 6 22¼ 2 1 0 0 0 1 4 1 8 3 3 0,3 0 0 0 1 0—485. Average, 5 65-84. High run, 41.

Dion—1 1 1 1 15 1 0 1 2 1 1 10 0 10 8 3 3 1 0 12 11 17 6 1 17 12 1 7 15 3 11 9 0 1 0 19 1 0 3 0 0 5 14 17 20 1 6 5 0 4 0 4 7 13 4 0 1 13 8 3 9 7 2 7 0 9 6 1 6 0 2 2 7 4 16 20 5 3 8 6 7 8 28 5 0—500. Average, 5¼. High run, 28.

Time of game—Three hours and forty-five minutes.

Tho newspapers of the State have been publishing an item to the effect that Mrs. J. C. Tolman, of Jacksou county, recently procured for her carp pond one of those excellent fish, which cost hor $32. Tbat is a pretty large sum for one little fish, but it is trifliug whon comparod with the experience of Mr. N. R. Barber, the popular postmaster of Corvallis. In order to relieve the monotony of official life, last summer, he procured a suitable fishiug outfit and went into the Coast mountains in quest of game. After an absence of three daye he returned to his familiar post, having caught one trout, which coet him $90.—*Corvallis (Or.) Gazette.*

At the "New York Farmers'" dinner, recently, Thomas Sturgis, a gentleman repreeuting 60,000 head of cattle, gave tho following regarding the Wyoming Stock-Growing Association: This body organized ten years ago with ten members, representiug 25,000 head of cattle, worth $500,000; today it has a membership of 100, representing 1,000,000 [illegible] caitle, worth $30,000,000, and last year sent to mark[illegible] head of cattle which netted their owners $10,000,00[illegible]

TURF AND TRACK.

THE CAPITAL TURF CLUB.

Closing Days of the Spring Meeting at Sacramento.

Third Day.

As was predicted, the rains of Wednesday failed to injure the track for Thursday's races. The sunshine of Thursday forenoon dried up the track and, after harrowing and scraping, it was by one o'clock in fine condition. The first race of the day was the postponed trot of the 2:30 class, in which was entered Young's Colonel, McConn's Sadie S and Lyndon's Buck. In the pools Colonel sold as favorite at $60, with $25 for Sadie and $9 for Buck. Sadie drew the pole with Colouel next and Buck on the outside. The latter acted badly and it was after several attempts that they got away, Colonel immediately going to the front and winning the heat essily in 2:38 , Sadie second, Buck third. Colonel now sold for $20 against $8 for the other two. The second heat was but a repetition of the first; the Colouel proved to he too good a horse for the others. He was never headed in the heat, which was trotted in 2:37¼, with Sadie second and Buck third. After this heat, Mr. Tom Scott, one of the owners of Sadie S, asked permission to change drivers on his mare, not hut what he thought McConn was trying to win, hut he thought Mr. Shear, whom he desired to substitute, could handle her better. His opinion, however, was not substantiated, as the mare nnder Mr. Shear's guidance got the flag. The Colonel went off for the third heat and won the same in 2:37, without a skip, with Buck second and Sadie S distanced.

SUMMARY.

AGRICULTURAL PARK COURSE, CAPITAL TURF CLUB, SACRAMENTO, CAL., May 17, 1883.—Trotting race, for 2:30 class; mile heats; three in five; purse $300.

J. D. Young's b g Colonel	1	1	1
Jas. Lyndon's d g Buck	3	3	2
H. McConn's b m Sadie S	2	2	dis

Time—2:38, 2:37½, 2:37.

The secoud race was for three-year-olds, 1¼ dash. The entries were Baldwin's Gano, Howson's Augusta E and Pritchard's Bazear-Minerva colt. It was well known that Gano would not start owing to his contemplated Eastern trip, which had been settled npon. The excuse given for not starting the Pritchard colt in the three-quarter dash a day or so hefore, was that he had heen ont of fix for some time and was not fit to rnn, but the incentive to start was so great in this race, especially as no added money would he given unless he did start, tbat they concluded to start him, believing the club was in such financial circumstances that they could give the added money without a contest. To this the club demnrred and notified those in charge that no added money would go, as they knew the Bazaar colt had not been galloped for a week, and further, that his owner never calcnlated to start him. Upon this decisiou all pool selling was stopped, as the presiding judge, Christopher Green, helieved it his duty to protect the public against any such little perversions as thie. He was heartily applanded upon the announcement that Augusta E and the Bazaar colt would merely gallop for the stakes. Augusta E won under a strong pull in 2:19.

SUMMARY.

AGRICULTURAL PARK COURSE, CAPITAL TURF CLUB, SACRAMENTO, CAL., May 17, 1883.—Running; mile and a quarter dash for three-year-olds; $25 entrance, $10 forfeit, $100 added.

Geo. Howson's Augusta E, 113	(Howsou) 1
W. L. Pritchard's Bazaar-Minerva colt, 118	(Fox) 2

Time—2:19.

The third race proved a more exciting contest than any one believed would be. It was 1½ miles and repeat. The only ones declared in were Fred Collier and May D. A five-eighthe rnn of Collier's a day or so before this race scared the other entries out, hut May D proved herself a "foe worthy of his steel." The first heat they got away very evenly, the mare lapping Collier all the way aronnd. When they reached the last eighth the mare moved up on Collier, and Duffy was compelled to draw his whip, as did Applehy on the mare, and the strife for position from there to the wire was one of whip and drive. When within a couple of lengths of the finish, Dnffy let go of Collier's head and lifted him over the score, winner by a short head in 1:57. Prior to this heat the pool selling was not very hriek, Collier heing hig favorite at $20 to $6 on the mare. After the first heat the backers of Collier began to think the matter over and concinded to save themselves a little, any way. In consequence thereof the mare sold for $20 against $75 for the horse. The second heat was, like the first, contested all tbe way. The mare jnmped into the lead this time and led the chestnut gelding the first five-eighths. when Dnffy commenced to make his run, which proved not too early, as the mare lapped him ont in 1:58½. This was a good game race and the owners of May D need feel no discouragement at this defeat, as she showed herself to be first-clase in first-class company.

SUMMARY.

AGRICULTURAL PARK COURSE, CAPITAL TURF CLUB, SACRAMENTO, CAL., May 17, 1883.—Running, 1½ miles and repeat; $50 entrance , $25 forfeit, $200 added.

Stemler & Ayers' ch g Fred Collier, 119	(Duffy) 1
Wm. L. Appleby's ch m May D, 117	(Appleby) 2

Time—1:57, 1:58½.

Five paid forfeit in thie race. The last event for the day was a three-quarter-mile heat race in which started the old vet, Joe Howell, Duke of Monday and Up and Up. In the pools Howell had the call at $60 against $35 for the other two and quite considerahle money went into the box at these rates, as many believed the Duke would make a better showing than he did. Tbis seemed to be one of his off days aud he acted very badly at the post, Hie sulkinees lasted ahont half an hour, when Mr. Townsend who had become jnetly disgneted at his actions in cansing tedione delay, dropped the flag when the Duke seemed willing to start and they broke away to a very fair beginning. Old Joe took tbe track and wou, bands down, in 1:17, Dnke second, Up and Up third. The betting now was $40 to $10 on Howell. At tbe start the Duke repeated his obstinate actions. Jim Brown, his trainer, heing compelled to get behind him with a six-foot buggy whip, which assisted him, after twenty minntee scoring, in getting away. Thie time he got the advantage of the start ahout a length, which was as evenly as Mr. Townseud could get them, owing to the Duke's fractiousness. But the old vet overtook and led him at the end of the first quarter, winning easily in 1:16¾, Duke eecond, Up and Up away off yonder.

SUMMARY.

AGRICULTURAL PARK COURSE, CAPITAL TURF CLUB, SACRAMENTO, CAL., May 17, 1883.—Running; three-quarter mile heats; free for all; purse $2[illegible], $25 to second horse.

Stemler & Ayers' b g Joe Howell, 117	(Duffy)	1	1
[illegible]n Mackey's b g Duke of Monday, 115	(Guerro)	2	2
[illegible]. Muse's b g Up and Up, 117	(Courtney)	3	3

Time—1:17, 1:16¼.

This ended the day's races, which gave satisfaction to all. The time made and interest taken was fully equal to the average racing meetings.

Fourth Day.

Up to this day nothing had happened to injure the standing of any one. The management had been first-class and the conduct of those taking part excellent. But an episode occurred that occasioned the expulsion of a driver who many believed did not make any attempt to win the race. The club was formed for the purpose of encouraging honest racing, and their action in this cese showed that they intend to have it conducted in no other way. Ex-Mayor Green, who is also one of the directors of the State Society, is President of the club, and he has shown himself to be an efficient officer, heing ready at all times to protect the public against any jobs that may be put up by unscrupulous persons who infest racetracks for no other purpose than to further their own ends in a financial point. This is the class that the public should be protected against, and President Green says they shall be as far as it lies in his power to do. This being a trotting day, the first race was for three-minute horses and the following were the starters: Valensin's Fawn, Cox's Mack, Murray's Danger, and Mackey's Zula. Fawn had the call in the pools at $20 against $10 on Zula and $5 for the field. After several attempts tbey got the word for the first heat with Fawn and Mack in the lead, the others acting badly, lunging and breaking. Mack took the track and led to the middle of the last quarter, when Fawn came up and passed him. Within ten lengths of the finish Valensin, the driver of Fawn, turned aronnd to see if all were in. He at that time was leading Mack ahout three lengths, Valensin's turning caused Fawn to leave her feet, and she swerved in front of Mack hut immediately caught and beat him ahout a length. Time, 2:37. Cox, the driver of Mack, claimed that the swerve of Fawn impeded his progress. The judges after deliberation concinded that Valensin's mare did swerve and did impede the progress of Mack, hut they were of the opinion that it was unintentional and under Rnle 29, Sections 9 and 11, they gave the heat to Mack and set Fawn fourth.

Pools now sold, $20 on Fawn to $8 on field. To a good send-off they went away for the second heat with Mack leading around the first turn, Zula and Denger hoth breaking badly, Fawn last. Valensin squared her on the back quarter, where she trotted very fast to the half-mile pole, overhauling Zula and Danger and making rapid strides for Mack when she made another bad break and dropped to third place. She recovered, however, hut not in time to heat Mack out, he winning the heat easily in 2:42, Fawn second, Danger third, Znla fourth. The pools now took quite a decided change. The Field brought $25 to $20 on Fawn. The backers of Fawn now protested loudly against the incompetency of Valensin to drive his mare. He refused to listen to their entreaties, ausweriug all that he wonld yet win the race. The jndges were next appealed to hnt without effect, they informing those appealing that it was not in the power of the judges to remove Mr. Valensin as long as he was doing all he could to win, there heing no rnle under which he could be removed for incompetency, as all were aware that he was going to drive the mare and bet their money accordingly. They all started for the third heat with Znla and Danger acting badly. Fawn took the lead aud was never headed, winning handily in 2:37 with Mack second, Danger third and Zula distaneed. The fourth heat was but a repetition of the third, Fawn winning in 2:39.

They went away for the fifth heat to a very good send-off, The mare led to the half-mile pole, where she hroke and was overhauled by Mack, who led around the upper turn, hut not having foot enough was beaten out hy the mare in 2:41.

SUMMARY.

AGRICULTURAL PARK COURSE, CAPITAL TURF CLUB, SACRAMENTO, May 18, 1883.—Trotting for three-minute class ; mile beats, three in five ; purse $200.

G. Valensin's s m Fawn	4	2	1	1
J. W. Cox's b b Mack	1	1	2	3
Wm. Murry's b g Danger	2	3	3	2
Jno. Mackey's blk h Zulu	3	4	dis	

Time—2:37, 2:42, 2:37, 2:39, 2:41.

The next race on the programme was for second-class named pacers for a purse of $150. W. B. Todhunter named Revenne, F. M Shepler Handy Andy and Chas. H. Shear Shaker. The horses in this race were very evenly matched as to speed. In the pools Shaker had the call at $30, on account of his having heen in the hands of Shear, whose reputation as an orderer is unquestioned, against $27 for Revenne and $27 for Handy Andy. After gettiug the word to a good start, Hand Andy took the pole, which he managed to keep to the quarter pole, when he was overhauled by Shaker, who took the lead and maintained it to the finish, winning the heat in 2:34, Revenue second and Handy Andy third. Pools now sold, $40 for Shaker, $22 for Revenne and $16 for the old horse Handy Andy. Tbe second heat they got away together, and around the first turn Shaker led, with the others well up. At the quarter pole Handy Andy made a brush and ohtained first place, which be held to the backstretch, where tbey hoth overtook and passed him. Shaker kept first place to the head of the stretch, where Revenue lapped bim ont and beat him hy a nose in 2:31, Handy Andy well up. Pools sold after this heat at $25 for Revenne, $12 for Shaker and $5 for Handy Andy.

The third heat Revenue led from the score to the finish, Shaker leaving his feet on the backstretch, where he and Handy Andy had it for second place, Shaker heating him out, Handy Andy third. Time, 2:35. The cat in the bag now had its head ont, and the backers were loud in their denunciations of Shear and Shepler. Demands were made for a change of drivers behiud Handy Andy. The judges ordered a change, putting Wilbnr Smith np behind Shaker aud Henry McConu behind Handy Andy, which action was greeted with applause by tbe crowd upon the quarter stretch. The fonrth heat was the most exciting and more interest was taken in it than in any other race during the week. The horses received the word to a good seud-off, Shaker aud Revenue going together around the first turn, with Handy Andy well np. Along the hackstretch Revenue led by a neck; as they turned into the head of the stretch Sbaker went up, but soon recovered and beat Revenue out amid mneh excitement in 2:35½, Handy Andy a length behind both. The pools now sold, Revenue $45, Sbaker $32 and Handy Andy $1.

At 7:30 p. m. they started for the fifth heat. Being quite dark, a patrol judge was sent to the half-mile pole to come home with them. At the word Handy Andy, with Shepler up (McConn asked to be relieved, as he was snre Handy Andy conld not win), and Shaker went off together at a rapid gait, which they kept up to the half-mile pole. It seemed to be a part of the programme to have Handy Andy carry Shaker there and Revenue take him and beat him home. The appearance of a patrol jndge at the half-mile pole thwarted any scheme tbat might have been planned. The little horse Shaker kept his feet, winuing tbe heat and race in 2.38, Revenne second, Handy Andy tbird. When they came to dismount cheer after cheer went up for Wilbnr Smith, the jndges and bonest racing. By the intervention of the judges the best horse was allowed to win and a dirty job frustrated.

SUMMARY.

AGRICULTURAL PARK COURSE, CAPITAL TURF CLUB, SACRAMENTO, May 18, 1883.—Pacing race for named horses ; mile heats, three in five ; purse $150.

Chas. Shear's b b Shaker	1	2	2	1	1
W. B. Todhunter's g h Revenue	2	1	1	2	2
F. M. Shepler's b g Handy Andy	3	3	3	3	3

Time—2:34, 2:31, 2:35, 2:35½, 2:38.

The club at its meeting in the evening expelled Chas. H. Shear for fraudnlent driving and Chas. Shear Jr. for attempting to make Shaker fly the track at the finish hy running out at him, and which act would have heen consummated bnt for the intervention of the marshal, E. Dale.

Thousands of dollars changed hands on this pacing race, as it seemed to have been managed solely for the benefit of a few to the detriment of many and nothing but the prompt action of the judges prevented the scheme from heing carried out. A few lessons like this, wherein the schemers are punished through their pockets, will have the effect of discouraging this kind of work.

Fifth Day.

The last day of the meeting resembled a nice hot day of fair week. Everybodyseemed to feel good. Tbe thermometer marked 90. The track was in fine condition and the attendance good. The action of the clnb in the strict enforcement of the rules of the preceding day was still the talk and loud were the commendations by those who admire racing, end desire to see it carried on in an honest manner. The first race on the programme was the runuing feature of the week, as it brought together colts that had proven themselves racers at Oaklaud, and many were anxious to see them pitted against each other. In this three-qnarter dasb for two-year-olds, the following of seven original entries faced the starter, Mackey's Hirondella, Baldwin's ch f by Grinstead out of a sister to Clara D, Pritchard's Bazaar–Dunhar filly, wiuner of five-eighths at Oaklend, and John A winner of two-year-old race et the same meeting. This was quite a hettiug race, Pritchard's filly baving the call at $20 against $19 for John A and $18 for the field.

The fractious nature of two-year-olds at the post made tbe start quite tedious, bnt after several attempts they fiually got away, with Hirondella slightly in the lead. They ran the first quarter in a hnnch, the black colt showiug first around the turn with Hirondella and Pritchard's filly on his hips. At the head of the stretch Hirondella let ont another link and went to the front in splendid style. From theqnarter-pole home, Baldwin's filly and she had a hard race, hut the Kentucky filly showed a little more speed and heat the Grinstead filly out about a length with Pritchard third and John A last. Time, 1:16½.

SUMMARY.

AGRICULTURAL PARK COURSE, CAPITAL TURF CLUB, May 19, 1883.—Three-quarter-mile dasb for two-year-olds; $100 entrance, $25 forfeit, $200 added. Winner of Gano stake to carry five pounds extra, second colt $150, third $100.

John Mackey's Hirondella, 107	(Guerro) 1
E. J. Baldwin's ch f by Grinstead—sister to Clara D, 107	(Garcia) 2
W. L. Pritchard's ch f Bazaar-Dunbar, 107	(Howson) 3
Wm. Appleby's blk colt, John A, 110	(Appleby) 4

Time—1:16½.

The next race on the programme was one mile and an eighth, free for all, with six entries; only three, however, came to the post. These were Joe Howell, May D and Augusta E. The pools sold $400 for Howell, $175 for May D, and $80 for Augusta E. The excellent showing of May D in her 1¼-mile race against Collier two days previous, together with the fact that she got seven pounds off as a non-winner at Oakland, made her friends think she was a good buy. Angusta E's backers claimed that she could carry her weight, 97 ponnds, and down the old veteran. Acting thnsly it turned out to he quite a betting race. They got away to a good send-off. Agusta E took the lead, closely followed by May D, with Joe Howell trailing behind. Around the upper turn Dnffy thonght he wonld make his run a little early, as he wanted to place himself in the stretch. This he succeeded in doing and the race down the finish was well contested, Agusta E fighting him all the way down, but the old son of Bonnie Scotland proved himself equal to the occasion and shook the filly off, winning by a girth, with May D lapped on the outside, in 1:55½, once more convincing the boys that his match had not come along yet. Many made it 1:55, a remarkahle rnn with 119 ponnds up. He is a great horse. The last of the meeting was a two-mile trot, mile heats; and one man, not profiting by the experience of others, and the action of the club for a similar attempt the day previons, made a martyr of himself for the chanced aggrandizement of others. The entries in this race were Young's Colonel, McConn's Sadie S and Coward's Long John. In the pools Colonel was favorite at $50, Sadie $16, and Long John $10. The start was good, Long John leading on the first turn, which place he finished the first mile in, with Colonel a couple of lengths behind him and Sadie a distance behind the Colonel. On the back stretch of the second mile the Colonel lapped John, who carried him such a gait to the half that he broke and fell back. At tbe head of the stretch Colonel passed John, who was coming at a rattling gait. Colonel broke again ahont midway and his driver did not seem to take hold of him and he made quite a run, enough to make up what he lost, when he caught him; from there home it was a hard race, when within four lengths of the finish the Colonel broke again and ran over the score ahont a half leugth ahead of John. Time, 5:10¼. Long John is one of these "skivers" aud appears to he runniug when he is not. The jndges took the matter iuto consideration and finally decided by giving the heat to Long John. This, of course, created considerahle dissatisfaction among the backers of Colonel, but as the judges were in a better positiou to see the actions of both horses it is to be presnmed that the decision was just.

The Colouel still sold favorite at $100 against $35 for John, and $4 for Sadie. They went off together for the second heat. John cut out the work and led all the way up the backstretch with Colonel several lengths behind him, and the mare a distance off. They trotted around to the half-mile pole of the second mile in this order, when Colonel made a brush at John, but did not succeed in passing him until the three-quarter pole was passed, when the Colonel broke aud John, who was coming at a terrible clip, seemed to have been pnlled up by Coward as if awaiting the settling of the Colonel. The Colonel rallied and heat him ont ahout a length in 5:15, Sadie just saving her distance. Parties made complaint to the judges that Coward was not trying to win, but no direct charges were made, and as the judges had utmost confidence in Coward, he having lived in Sacramento for years, and being one whom the members of the clnb desired to assist in getting up this meeting, no thought was given to the matter, but as a matter of precaution, he was called into the stand and severely cautioned. After this Long John jnmped favorite at $75 to $50 on the Colonel. The third heat was trotted about 6 o'clock, John and the Colonel trotting 1¾ miles side by side. On the last quarter Long John gave out entirely and walked the last forty yards.

Before tha drivers weighed in, P. T. McIntosh and Mr. Barnard of Chico and J. W. Wilson of Sacramento came into tha stand and stated that Charles Coward, the driver of Long John, had told tbem after tha second heat that it was all he could do "to give Colonal the second beat." Mr. Coward was tben called to tbe stand and admitted tbat the statement made was true, but he was acting undar instructions. Mr. Edson, the owner, was called np aud questioned. Ha denied giviug tbose instructions to anyoue; in fact, Mr. Coward had the horse for thia race, paying all expenses, etc.; that it was his desire that the horse should win. The judges, actiug nnder the admission of Coward as to his baving pulled the second heat, which, if he bad wou, as he said he could have done, would have decided the race, declared it no race, all pools off, and axpelled Coward for frandulent driving. Tbue the meeting cloeed, a snccess fiuancially and otberwise, managed admirably by tha cluh, tba officers doiug all iu their power to encourage thie honorable sport and have it conducted in such a manner as to reflect credit npon the organization and the city. Unprincipled jobs seldom get through on this track, as the vigilance of the officers is such as to thwart any schemes, aud it makee no difference how smart men are, they will always find some one wbo is eqnally as brigbt and quick enough in perception to cbeckmate all traits of this character. Tbe pool selling was conducted by Messrs. Killip & Co., wbo obtained the contract on the co-operative plan, each taking a pro rata of the profits. Under this management the club received three times tbe amount that was hid for this privilege. Tbis bnsiness is getting down to the legitimate basis, and is condncted upon a business principle. Tbis firm has so systematized its business as to baudle the money played on the first race as many times as there are races, as they pay off after each race. Tbe Freuch pools, as usnal, exceeded tbe auction poole in way of retnrns; tbat is, tha betting was better in the Frencb. Honest racing is advantageous to all, the breeders, the trainers, and even tbe pool box, and it may be state l bere that to the latter tbe credit may be given of epoiling the game of some in giving away one of tbe attempted jobs of the week.

Extra Day.

Robert Allen, the lessee of tbe park, having made arrauge-ments with tbe parties who made the match between Douglas and the Berryessa mare, concluded to give an extra day on Monday, and for tbat day gave a pnrse of $150 for tha pacere that went during the week, Grey Frank penalized to wagon. Tbere was also a sweepstakes trotting race for $100 a corner. Tbe crowd of non-residents tbat were present dnring last week stayed over to see the great 600-yard matcb, and, as will be seen, they did not stay in vain. Mr. Dinsdale, one of the owners of Douglas, resides in Woodland, where he has at times boasted, aud justly too, of the powers of Jim Douglas, nn one occasion, in tbe hearing of the Adams boys, wbo reside in Berryessa Valley, in Yolo couuty. They bantered Mr. Dinsdale for a race against Donglas, claiming that tbey had a 1,300-pound mare that could walk Douglas's chalk 600 yards. Tbe finale was a match for $1,000 a side,, made abont a montb ago. Shortly after they hrought the big mare over bera and commenced to train ber, and eo well did they manage matters tbat no one outside of their party had a chance to see the "big filly" in her work. Well, the day arrived. The feeling was intense, and all bets that were offered were readily taken. The betting in the pools was brisk, tbe mare bringing $45 to $20 on Douglas. The latter was the first to make his appearance, and as he moved np the track he did not seem to be at himself. Shortly after bia appearance the mare came on tha track closely covered iu white sheeting; on her hack sat Jimmy Welch, the veteran "short horse" rider. R. S. Carey was selected as starter. Upon their arrival at the 600-yard post much attention was given to the mare, many believing her immense siza wonld prove disadvantageons. The people present kept a constant watch of the horses, feariing probably that tbey wonld be treated somewhat similar to Col. Jack Gamble, who traveled many miles in Kentncky to see a quarter race. Tbey turned three days and on the morning of the fourth day the colonel, after watching them several hours, went into tbe house to get a drink and before he could get out the race was run. It was an apt illustration, judging from the performance of the mare in this race. The starter took the horses back from tbe score 100 feet. They got away the first time, and in the first 100 feet the mare heat Donglas 20. She ran the first 160 yards in the remarkable time of nine seconds, and the last 440 yards in 0:21½, total, 0:30½ for tha 600 yards, beating Douglas 60 yards. She conld have run it in 0:28, as tbe last 200 yards she was under a strong pull, and the rider rode the last 100 yards with one band, holding his cap with the other. Douglas bimself ran the last quarter in 0:23½, and he aeemad to be atanding still so fast did she leave him. She ia a remarkable animal. Her sire is Oregon Charlie, dam by Lnmmux, her dam the Warnock Bark mare, out of Oak Jennings, who was a full sister to Choctaw. She stands 16:1, weighed the day of the race 1,250 pounds. Just prior to starting several hanters were made to the Adams boys to match Preminm against her but Mr. Adams told them that he conld attend to but one race at a time. He looked for some of the hettors who declared their intention to back Preminm after this race was run, but conld not find a man who had even hinted any such proposition.

The day's sport wound np with a pacing race, in which Princa was victorions. The trot was a walk-over for Roanoke.

MILE AND A QUARTER.

Fifty Miles Out.

Charles Anderson of Loa Angeles and Cardinal Pugh of San Bernardino rode a fifty-mile race on the Los Angelee track on the 15th, which resulted in a victory for Pugh. The affair attracted an immense crowd aud tbe enthueiaem was great. Pugh was a new-comer in the lists, bnt was eqnal to the occasion in all that is demanded of a rider, while his atock, as tbe time showe, was much hetter than ia usnally seen in affairs of tbis kind. He finished iu 1:50:30, just ten minutes faster than the best record, wbich was 2:01:30, made by Jose Perez in 1876. Tha followiug is the time by miles:

1 P	2:07	11 P	2:11	21 P	1:57	31 P	2:17¼	41 P	2:01½
2 P	2:04	12 P	2:03½	22 P	2:15½	32 P	2:16	42 P	2:07
3 P	2:02	13 P	2:06	23 P	2:07½	33 P	2:00½	43 P	2:03

* Game postponed on account of rain.

Progress of the Championship Struggle.

Tbe seventh championship game of the eeason, which took place at tha Recreation Grounds on Sunday, between tha Redington and California Clubs, resulted in favor of tbe former after an interestiug game. An improvement in tbe number of spectators was noticeable over that of the previous game, a fact perhaps due to the satisfaction with wbicb the stern measures taken against certain disreputahle players was viewed. Both teams appeared in good form and throughout the game the playing was sharp aud exciting. The Redingtons were nuusually strong at the bat, and experienced little trouble in making their base hits score to good advantage. As the annexed score will ehow, of a total of tbirteen hits, they managed to score eight runs. Thie was principally tha result of excellent base running, aided somewhat by the erratic fielding of the California third baseman; in fact, he eeemed demoralized and fnmbled close plays in a manner to convince the average looker-on tbat he had too much regard for his fingers. Tbe fielding of the victors was eqnally as brilliant as tbeir batting, and at times was such as might be expected only from veterans of the diamond. Tbe out field was particularly etroug, where fine catches and good etops prevailed. Tbe game played by the Californias showed a marked improvement in both fielding and batting and bears out the remarks mada in tbis colnmn at the commencement of tbe season to tbe effect that with the practice which the games themselves wonld afford the team would in a comparatively short time be ahle to copa successfully with the other clubs. Their batting is still hardly up to the standard and is attended by an uncertainty which eeverely handicaps them. Their total of twelve etruck out, as against oue for tbe Redingtons, proves their excellent fielding in overcoming their weakness. In the field, where tbey bad considerably more to do than their opponents, they, however, made a more pretentious ebowing, and finished with a smaller number of errors. The Californias did tbeir heavy work in the second inning, Emerson leading off witb a corker to third just inside tbe line and firing up on the third bag after an admirable run which was heartily applauded. A passed ball gave him tbe plate and Angus, following with a good stroke to the ont field, reacbed second, stole third, and also completed his run on a passed hall. Singular as it may appear even allowing for poor play behind the bat, French successfully rounded the bases in precisely the same manner as his predecessors. Tbe Redingtons by dint of close play dnring the remaining portiou of the game kept the Californias well in hand and finally won by the following score:

REDINGTONS.

Double plays—Pope, McElroy, Fitzgerald and French, Hack, Riordan. Balls called—Redingtons, 1; Californias, 3. Wild pitches—McElroy, 2. Passed halls—McDonald, 6; Creegan, 5. Bases on errors—Redingtons, 4; Californias, 6. Time of game—Two hours and fifteen minutes. Umpire—Eugene Van Court.

A meeting of the California League was held on Wednesday for the purpose of considering the withdrawal of the Niantic Club, and for the purpose of taking action on matters growing out of a recent game in which cartain membera were cbarged with improper conduct. Since the president of the league, John J. Mona, gave notice that his resignation wonld be handed in, considerable comment has been causad, and doubts of the succeae of the season were entertained because of the had feeling which was lately manifested. Mr. Mone was finally prevailed upon to reconsider this action, and will continne to taka an active part in the gamas. Cbarles Sweeney was expelled. The vacancy created by the withdrawal of the Niantic Club was filled by the admission of the Wooneocket Club, nnder condition of accepting the score of gamee won and lost by the Niantics. Their first game will be played to-morrow with the Redingtons. The club is composed of the following playera: Lawton, Fiun, Eagan, Douahue, Mnllan, Fogarty, Wiseman and Leary.

Foals.

Property of C. Halverson, Routier Station, Sacramento county, Cal.:

April 23, Maggie S, by Bayonet, dam by Joe Stoner, a bay filly, right hind leg whita balf way to hock, little white on left fore leg, white face, by Joe Hooker. Mare hred to Leinster.

At Palo Alto stock farm, San Mateo county:

January 12, Robin Girl, by Enquirer, a chestnnt filly hy Flood.

January 21, Hattie Hawthorne, by Enquirer, a dark bay filly by Flood.

January 27, Sallia Gardner, hy Vandal, a sorrel colt by Flood.

Febrnary 8, Planetia, by Planet, a eorrel colt hy Flood.

Febrnary 16, Twilight, by Norfolk, a hay filly by Thad Stevens.

February 18, Glandow, by importod Glangary, a bay filly by Flood.

February 22, Rigliu, by imported Glengary, a bay colt by Shannon.

February 27, Lizzia Whipe, by Enquirer, a bay colt by Flood.

March 1, Marshra, by Planet, a chestnnt colt by Sbannon.

March 6, Katharion, by Harry of the West, a bay filly by Flood.

March 6, Mozelle, hy ——, a bay colt by Flood.

March 8, Lady Amauda, by imported Hnrrab, a bay filly by Flood.

March 27, Bettie Bisbop, by imported Buckden, a bay filly by Flood.

March 30, Frou Frou, by Asteroid, a sorrel colt hy Shannou.

March 31, Florenca Anderson, by Enqnirer, a dark bay filly by Sbanuon.

April 4, Boydana, by imported Knigbt of St. George, a bay colt by Flood.

April 4, Nova Zembla, by imported Gleugary, a light bay filly by Shannon.

Trotting foale at Palo Alto:

January 30, Fannia Lewie, by imported Buckden, a bay colt by Electionecr.

February 7, Dame Winnie, by Planet, a bay filly by Electioneer.

May 2, Idabelle, by Rysdyk'e Hambletonian, a light bay filly by Piedmont.

May 7, Fatiua, by Berlin, a dark bay colt by Genaral Benton.

May 7, Florida, by Robert E. Lee, a bay colt by General Benton.

May 10, Susie, by Geo. M. Patchen Jr., a bay filly by Electioneer.

May 10, Mamie, by Hambletonian Jr., a chestnnt filly by Piedmont.

May 12, Faithful, by Harry Clay, a bay colt by Geneal Benton.

May 16, Sprite, by Alexander's Belmont, a light bay colt by Electioneer.

May 20, Cnba, by ——, a bay colt by Electioneer.

May 21, Dixie, by Billy Townes, a bay filly by Bentonian.

Messrs. T. D. Mott and C. A. Dnrfee of Los Angeles have sold tbe bay gelding Billy R, by A.W. Richmond, dam Panline by California Hnnter, to Dr. K. D. Wise of tbe same place for $750. Billy R ie fonr years old, and has been bandled a little for speed. He is able to show a 40 gait. Dr. Wise is also tbe owner of a black gelding, by A.W. Richmond, dam Barbara by Bald Chief (a full brotber to Len Roee), and tbe pair are now in Mr. Durfee's bands to be worked togetber. After a few weeks' pole edncation, Dr. Wise will drive them on tbe road. They will be a epanking pair of Richmonds.

A. H. Gillespie, who has charge of a band of sheep for Hall, abont three miles west of town, says that 1,300 ewes prodnced 1,600 lambs dnring the past mouth. Many more were born, bnt were cbilled to deatb dnring the recent bad weather. Twins, triplets and quartets were not infrequent. *Reno Gazette.*

Market Report.

FLOUR—We quote: Best City Extra, $5 65@$6 05; medium gradee, $4 50@$5 25; Shipping Superfine $4@$4 25.

WHEAT—The situation ie daily getting less encouraging for the holding interest, so far as immediate business is concerned. Shippers quote the market at $1 70@$1 72½ for No. 1 grade, while on call buyer the season contracts were offered at $1 62½ without even bringing out a bid. The speculative feeling is quite active, and prices on future account are fairly maintained.

BARLEY—Prices continue to go downwrad. We quote: No. 1 feed, $1 07½; good Brewing, $1 12½.

OATS—Fair Feed, $1 85@$1 95; Oood, $2@$2 15; Choice, $2 30@$2 35 ₱ ctl.

RYE—Quotable at $1 62½@$1 80 for fair to good.

FEED—Ground Barley, $26 ₱ ton; Cracked Corn, $36 ₱ ton; Shorts, $15@$17 ₱ ton; Oilcake meal, the oilworks eell to the trade at $35 ₱ ton, less the usual discount; Middlings, $20@$22 ₱ ton for lots at the mill.

HAY—Alfalfa, $10@$14; Wheat, $16@$18; Barley, $14@$15; Wild Oat, $15@$17 50; Mixed, $10@$13 ₱ ton.

STRAW—50c@75c per hale

PROVISIONS—Eastern Hams, 15½@16½c; California, Hams, 16@15½c for plain, 15½@16½c for sugar-cured canvased; Eastern Breakfast Bacon, 16@16½c; California Smoked Bacon 15@15½c for heavy and medium, and 16@15½c for light and extra light; Clear Sides, 15½@15½c; Pork, $18 50@$19 for Extra Prime, $20@$20 50 for Prime Mess, $24 50@25 for Mess, $25 50@$26 for clear and 26 50@$27 for extra Clear; Pigs' Feet, $16@$18 ₱ bbl; Mess beef, $15 50 for hhls and $8 5 0 for hf hhls; Extra Mess Beef, $16 50 for hhls and $8 75 for hf hls; Family Beef, $18@18 50 ₱ hhl; California Smoked Beef, 13½c.

FRUIT—We quote: Lemons, $6@$6 50 per box for Sicily; California Lemons, $1 25c@$2 per box; Limes, $5@$6 per box for Mexican; Bananas, 1 50@$3 ₱ bunch; California Oranges, $1@$1 60 for common and $2@3 for good to choice ₱ box; Pineapples, $5@$6 ₱ doz. Western Cranberries are offering at $15@$17 ₱ bbl; Strawberries, $6@$12 ₱ chest; Apricots, 4@5c; Currants, 15@20c ₱ lb; Raspberries, 25@35c ₱ bskt; Cherries, 5@7c ₱ lb for poor and 10@12½ ₱ lb for good to choice; Oooseberries, 4@6c.

VEGETABLES—We quote: Summer Squash, 8@10c ₱ lb; Carrots, 37½@50c; Turnips, 75c@$1; Cauliflower, $1@$1 25 ₱ dozen; Cabbage, $1@$1 50 ₱ ctl; Garlic, 3½ ₱ lb; Celery, 50c ₱ doz; Dried Okra, 20c@25c; Dry Peppers, 10c@12½c ₱ lb; Green Peas, 2@3c; Rhubarb, 1@3c per lb; Mushrooms, 75c@$1 ₱ box; Tomatoes, $2@$2 50 ₱ box; Cucumbers, 12c@50c per doz.; Asparagus, 75c@$1 25 ₱ box; Sprouts, 3c ₱ lb.; Artichokes, 10c@15c ₱ doz.; String Beans, 10@12c ₱ lb.

POTATOES—River Red, 60@70c; Early Rose, 50@70c; Tomales and Petaluma, $1 05@1 12½ ₱ ctl; New, 1½@2c per lb.

ONIONS—$1 25@$1 37½ for good to choice.

BEANS—Bayos, $5; Butter, $3 25@$3 50 for small and $3 50 @$4 for large; Lima, $3 80; Pea, $3 50; Pink, $4 75@$4 80; Red, $4 60@$4 70; small White, $3 50; large White, $3@3 25 ₱ ctl.

BUTTER—We quote jobbing lots: Fancy, 23½@24c; choice, 22@23c; fair to good, 17@22c; inferior lots from country stores, 15@17c; firkin old, 20@22½c for choice; new, 22@25c; pickled roll, 24@26; Eastern 17@20c.

CHEESE—Firm. California, 14c for choice; 11@12½c for fair to good; do, factory, in boxes, 14@16c; Eastern, 16@17c.

EGGS—California, 25@26c ₱ doz; Eastern, 23@24 per doz.

POULTRY—Live Turkeys, gobblers, 17@18c; do, Hens, 15@16c; Roosters, $6@7 for old and $9@$11 for young; Hens $6 50@$7 50 Broilers, $3 50@$4, according to size; Ducks, $6@$8 50 ₱ dozeu; Geese, $1 50@$1 75 ₱ pair; Goslings, $1 50@$2 25 per pair.

GAME—Snipe, $2 25@$2 60 for English and 75c@$1 for common; Hare, $1 25@$1 75; Rabbits, $1 25@$1 50.

WOOL—We quote: Choice Northern Free, 22@24c; Choice Northern Burry, 17@19; Calavaras and middle counties, 20@23; San Joaquin and coast, choice, 16@18c; San Joaquin and coast, inferior, 13@15; San Joaquin and coast, year's clip, 14@18c.

HIDES AND SKINS—Dry hides, usual selection, 16½@17c ₱ lb; culls one-third less, and Mexican Hides 2c ₱ lb less; Dry Kip, 17c; Dry Calf, 17c@22; Salted Steer, over 55 lbs, 11c ₱ lb; Steer and Cow, medium, 9½@10c; light do, 8@8½c; Salted Kip, 15 to 30 lbs, 9½@10c; Salted Calf, 13@15c ₱ lb; Salted Veal, 12@13c; Sheep Skins, 25@30c for Shearlings, 30@60c for short, 50c@90c for medium, and $1@$1 40 apeice for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—Quotable at 8@8½c ₱ lb for rendered and 11@12c for refined, both in shipping order.

MEATS—Following are rates for wholo carcasses from slaughterers to dealers:

BEEF—Prime, 8½@9c; medium grade, 7½@8c; inferior, 6½@7c ₱ lb.

VEAL—Large Calves, 7@8c; small ones, 9@10c ₱ lb.

MUTTON—Wethers are quotable at 4½@5c and Ewes at 4@4½c ₱ lb, according to quality.

LAMB—Spring is quotable at 6@6½c ₱ lb.

PORK—Live Hogs, 8@8½c for hard and 7@7½c for soft; do 10½@11c ₱ lb for hard grain hogs.

HERD AND SWINE.

Cheshires.

English writers on agricultural topics of thirty or forty years ago mentioned Cheshire swine as gigantic, long-legged and long-eared, and unprofitable giants, all but extinct. I have been unable to secure any reliable evidence of the bringing to this country of any of the swine of that breed or name, but there is a legend that between 1850 and 1855 one or more of the old-time Cheshires were imported to the vicinity of Albany, N. Y., and a sow, at least, taken to Jefferson county in that State, where crosses were made to some extent, not only with the stock common with the region, but with valuable dogs obtained from Canada, and also largely with the Yorkshires. At all events, between 1860 and 1870, in Jefferson and some other counties, the favorite swine were of a large, white sort, known as the Jefferson county, or Cheshire breed; or sometimes "imported Cheshire," and less frequently "Cheshire and Yorkshire;" and again in some instances as "improved Yorkshires." Harris, writing in 1870, says: "For a dozen years or more they have been exhibited at the fairs of the New York State Agricultural Society, and for the last six or seven years have carried off nearly all the prizes offered for pigs of the large breed." At that time the leading breeders admitted very freely that they were of mixed origin, but claimed that they had been kept pure sufficiently long to thoroughly establish them as a breed. In 1876 Col. Frank D. Curtis of Saratoga county, who is well informed in such matters, wrote me that "there never was a connected effort to make them uniform, and it was quite common to call any cross of Yorkshire or Suffolks by the name of Cheshire." His description of them, adopted by the Indianapolis convention, was as follows: "They are pure white, with very thin skin of pink color, with little hair; are not uniform in this respect, as pigs in the same litter differ widely in the amount of hair; the snout is often long, but very slender and fine; the jowls are plump and the ears erect, fine and thin; the shoulders are wide and the hams full; their flesh is fine-grained and they are commended on account of the extra amount of mess pork in proportion to the offal. Mr. J. H. Sanders, editor of the *Breeder's Gazette*, who sucessfully and extensively bred "Cheshires" in Iowa prior to 1875, in reply to some inquiries of mine, wrote: "In my opinion the Cheshire is simply a derivative of the Yorkshire, as were also the Suffolk, Lancashire Short-Face, Middle York, York-Cumberland and all other English breeds of white hogs. I bred the so-called Cheshires for six or seven years, and took a deep interest in noticing the variations and changes that were produced in that time by selection, inbreeding and crossing. Within the space of seven years, without introducing any blood but what was supposed to be pure, I produced all the different types of the Yorkshire from the large York down to the Lancashire Short-Face. The white color was firmly fixed, and I never knew one of my Cheshire boars to get a pig that had a black hair on it, although they were bred to sows of all breeds, including the purest Essex. Another peculiarity that I watched with interest was the frequent appearance of blue spots in the skin of the purest and best-bred specimens. This peculiarity would sometimes disappear for one or two generations, and would again crop out stronger than ever. The types which I finally succeeded in fixing upon the Cheshires as bred by me were almost identical in size, form and quality with the most improved modern Berkshire. Indeed, so marked was this resemblance in everything but color that they were often facetiously called 'white Berkshires.' As bred by me I regarded them as among the very best of white hogs. They were well-haired, had a very delicate pink skin, and their meat was most excellent, tender and juicy." At various recent New York fairs, including those at Rochester, Syracuse and the State fair at Albany, where large premiums are given on swine, the Cheshires have taken the precedence over any other white swine, and have also been, to some extent, successful at the Northern Ohio fair. They have attracted no very general attention from, and are comparatively unknown, both by name and by sight, to the great body of those who are largely engaged in swine husbandry. That I attribute to various reasons, one of which is that the popular fancy of late years has not been at all favorable to white hogs of any breed; another is that it has not by any means been demonstrated to the public in the twenty or thirty years that the hogs by this name have been before it that they possessed any special combinations of excellent qualities not found in some other breed; and, furthermore, that rarely two breeders of Cheshires had hogs of the same characteristics, or gave the same account of what they were, or when, where or how originated, which was scarcely calculated to inspire seekers after knowledge with an exalted opinion of their value as breeding stock, however well they may appear individually. For breeders who desire white hogs, and to whom the Suffolks appear too small and the Chesters too large, I know of nothing better than the best of some of these Cheshires, as they present, in some respects, a sort of compromise or happy medium between the two. The strong admixture of Yorkshire in their make-up would be more than likely to assert itself in their progeny, either when bred together or on any other swine not thoroughly established in character.

The Best Dairy Cows.

In a long article in the *Farmer*, a leading authority upon dairying, after discussing at length the various merits of different classes of animals, concludes by drawing the following picture, a somewhat fanciful one, perhaps, be admits, of a good dairy cow. Agreeing with an American writer that the animal should be "wedge" shape, he continues: Her head should be rather long and narrow, with wide nostrils, and a large, clear, bright, mild eye. It should be essentially feminine, a steer-headed cow never being a good milker, and if horned, the horns should be moderately long, small and curved, as far from the male character as possible. Her neck should be moderately long, thin and flexible; this form, besides being of the feminine type, has a distinct value in enabling her to gather her food with ease and comfort. Her skin should be soft and pliable, but not too thin, and possessing that indescribable quality known as "handling," which indicates aptitude to fatten, and which also indicates the power of producing butter when the energies are so directed. Where butter is the product in view, a skin of which the white parts show an underglow—if I may so term it—of yellow, especially in the region of the udder, is desirable. This indicates milk of good quality, on which the cream rises rapidly, and rich, fine-colored butter. Other indications are afforded by the size and form of the so-called milk veins which supply the udder with blood, and even the tail—which should be long and finely tapering—merits a share of atten-

Alfalfa hay is selling at San Bernardino, fresh from the fields, at $8 per ton, and barley at $10.

Good Cows and Bad.

The arguments used and the facts and figures given in the following from the *Practical Farmer* are based entirely upon cows kept by those who have to keep their cows up and purchase the feed; but both the argument and the facts are equally applicable to cows kept on one's own pasture and feed. The argument is logical and the facts conclusive. The poor cows must go if we would make money:

"Better pay for a good cow than accept a poor one for a gift," Uncle Robert has said many times. Is argument needed? Not with experienced dairymen. A good cow is one that will make twelve pounds of butter a week for ten months in the year. A poor cow, such as is kept by the average farmer in nameless sections of the country, to our knowledge will make from two to four pounds—average three—eight months in the year.

Kept up on purchased food the good cow will consume 400 bundles of corn fodder or its equivalent, when kept up, worth say five cents a bundle or $20, and 100 bushels of meal worth 50 cents a bushel—$50.

The poor cow will require the same amount of food if kept up, and the food purchased.

The good cow will average ten pounds of butter a week for 40 weeks, or 400 pounds of butter, at present prices in the country worth 30 cents, and in market 40, making the value of butter—400 at 30 cents—$120; profits, including labor, $50 in one year.

The poor cow will make in 32 weeks an average of three pounds or 96 pounds of butter; allowing the same price 96 pounds at 30 cents—$28 80, making a loss on the keeping of $41 20. How long will it take a man to make $1,000 at that rate?

Thousands of farmers are thus getting rich, as the boys say, over the left, without even thinking what they are doing. Only saying, I bought that cow cheap. She was dear as a gift, if the good cow cost $100. We have had both kinds, and those halfway between these extremes. The presentation of these extremes presents the folly of many farmers in the true light.

But take medium cows, the one makes seven pounds of butter weekly for 40 weeks, the other six pounds for 34 weeks. Seven pounds for 40 weeks is 280 pounds at 30 cents per pound—$84, or a profit of $14 above the cost of purchased food. The cow that makes six pounds for 34 weeks, makes 204 pounds a year which at 30 cents amounts to 61 20. She is kept at a loss of $9 80 each year, and in ten years at a loss over the seven-pound cow of $98, making the seven-pound-a-week cow cheaper at $75 than the six-pound cow as a gift, risk excepted. No man can afford to keep a poor cow for making butter. The best that can be done where one is saddled with cows that make only four or five pounds of butter a week, is to raise stock and feed it for the shambles. For this purpose Shorthorn bulls should be used. But the butter-making qualities may be greatly improved by crossing with Jersey, Guernsey or Ayrshire bulls, and carefully noting the escutcheons and saving for cows only those marked with the best points.

Principles of Modern Dairy Farming.

Modern dairy farming, says the Hon. Hiram Smith, of Wisconsin, starts out with keeping one cow on four acres, and this should be the pass-word to every dairy lodge—"one cow to four acres;" and this should be rapidly reduced until the undoubted possibility is reached of keeping one to every acre.

One of the principles of modern dairy farming is to have our cows give the most milk when dairy goods are at the highest price, which is invariably in winter. It has been repeatedly demonstrated that a good herd of cows coming into milk in September, October and November will, in the average, give from 4,500 to 6,000 pounds of milk annually. This milk is worth, to sell at a factory, or to manufacture into butter or cheese, $1 30 per hundred pounds, or $58 50 as the average for each cow. In other words, dairy farming with one cow to eight acres on 160 acres produces $1,160; modern dairy farming with one cow to four acres, produces $2,660, an increase of $1,500, by an outlay for feed and help—a net profit of $640, a sum sufficient to raise the price of land from $50 per acre to $100 per acre.

A fundamental condition of successful farming is large crops of corn, not less than two acres of fodder and four acres of field corn for every ten cows, or a total of twenty-four acres for forty cows. All the manure of the farm should be evenly placed on these twenty-four acres during the winter, and the land plowed previous to the 10th of May and thoroughly harrowed, the corn planted immediately thereafter with a horse drill, the rows three and one-half feet apart, and the kernels from seven to nine inches apart, and cultivated well before the corn comes up with a fine-tooth harrow. Frequently thereafter cultivate until the 10th of July, at which time, if the work has been honestly done, it will be free from weeds with never a hoe in the field, and it is almost certain to produce fifty bushels per acre of shelled corn and thirty tons of fodder. It takes less labor to raise twenty-four acres of corn as described above, than to raise half that amount planted in hills and the cultivation deferred until you can see the rows.

An illustration of how the Oregon cattle men have killed the goose that laid the golden egg is afforded by the present aspect of the beef market. Good beef steers are scarce here, and in Portland they readily command $100 per head, and the demand is greater than the supply. This scarcity arises from the fact that two years ago the beef-growers could not resist the high prices then offered, and they sold off all their two and three-year-olds, leaving on hand only the old steers and young calves. Last year the country was again ransacked by beef-buyers from the East and from California, and all good stock was eagerly taken up. The temptation to realize on the present high prices is almost irresistible and there are some instances where dairymen have abandoned their business so lucrative as cattle-raising, and there is no country so well adapted as Oregon to its successful prosecution. The land is cheap, water is abundant and railway and other transportation facilities are, or soon will be convenient to almost every locality. There is now an opportunity for men of capital to invest, and they cannot find a better field of usefulness and profit.—*Baker (Or.) Democrat.*

The California dairy interest possesses a capital of $15,000,000, and produces annually a revenue to the State $9,000,000. This industry employs 6,000 laborers.

Butter-Making for the Common Farmer.

Dairying is firmly established as a leading and profitable branch of our American agriculture. But outside the number of the special dairymen there are thousands of farmers to whom their dairying is one of the most annoying and least profitable parts of their farm work. The average general farmer makes little money from his manufacture and sale of dairy products. Usually he makes his choice between butter-making and allowing the calves to suckle their dams. The latter is often chosen, but we more and more clearly see that this can not be the most profitable practice in the larger part of the country. The farmer must needs keep a few cows to supply his own family with milk and butter, and to rear a few calves. The usual practice in the West is to have the cows calve in spring, oftentimes in the late spring. The great mass of the butter made on farms is made between the middle of May and the first of November. This is during the time of greatest pressure of farm work. During much of it, the weather is uncomfortably warm, flies are troublesome, the pastures may be cut short by drouth, the milk is cared for with greater difficulty; an unsatisfactory grade of butter is made, and sold at the lowest prices current during the year. It is no wonder that the farmer decides that he sees little profit or pleasure in dairying. Is there not a better way? We believe there is.

As a first step in the way of improvement, we suggest winter dairying. There are many "theoretical" arguments in favor of this, but more convincing than these is the testimony of many who have thoroughly tested the system. It seems to us decidedly better, in very many cases, to have the cows calve in the early fall—say September. The weather is cooler. For two months or more the pastures may be good. If well cared for and well fed in winter the cows will do better in milk giving than in heat of midsummer. In the spring, when turned on grass, they will do well through May and June, and then can be dried off for the hottest and least desirable part of the year for milk making. During autumn and winter there is less pressure of farm work; the milk and butter can be handled better, with easily-arranged facilities, than they can in midsummer; and, finally, there are almost invariably good prices for butter during all the winter. In many Western towns, in rich farming regions, where butter is sold at ten or fifteen cents in the summer, it is scarce in winter at thirty or thirty-five cents. There is some extra cost in keeping a milk-giving cow in winter over the cost in summer. But the cow must be kept in winter in any event, and the increase in cost is less than is often supposed, provided there be comfortable shelter.

As a second step in making dairying on the average farm more profitable, we suggest giving more attention to it; increasing the number of cows. "All the motions have to be gone through with," whether there be three or a dozen cows. Oftentimes it is really less inconvenience to handle the larger than it is the smaller quantity, as the amount of butter made will permit of the purchase of suitable apparatus. It is often easier to sell the larger than the smaller quantity at good prices. In many of the smaller towns of the West, and in all the larger ones, there are at least a few families or hotels to which butter can be sold at a fair price, if there be reasonable security of a steady supply of good quality.

As we have frequently stated, it is quite possible to rear calves well on skimmed milk, with the addition of oil or cotton-seed meal and grains, and there are some advantages for thus rearing them in the winter. (The writer recently, May 1, weighed three grade Shorthorn heifer calves just six months old, and reared on skimmed milk, which averaged 390 pounds. This does not seem a large weight, but he has reason to know that some calves near a year old would not weigh 100 pounds more.) Increased attention to butter-making need not mean less, but more attention to cattle rearing.

Without attempting, at this time, anything like full instructions for the care of the milk, let us emphasize the fact that there need be no costly nor complicated arrangements. In a large majority of cases, deep setting will be much better than the old system of using shallow pans. Any one of a half dozen patent "creameries" will do good service. In default of any of these, a plain wooden tank, set conveniently near the well, in which to place ordinary tin cans, six inches in diameter and twenty inches deep, will give all the apparatus absolutely required for successful cream raising. Skimming at twelve or twenty-four hours, the milk will be sweet and in good condition for feeding when warmed. Any one of a dozen patent churns will do good work—if care be taken to avoid all for which it is claimed that three to five minutes is all the time needed for churning. In default of any of these, a plain box or barrel churn will do admirably. There is difficulty in making good butter, but there is no "mystery" or secret about it. There is no reason why butter every way satisfactory may not be made in farmers' homes. Such butter is made in many such homes, and may be in many more.

Of course, there are many farmers who will find it practicable to furnish milk to a cheese or butter factory. Others can sell milk to advantage. We have written for the many who are so situated that they cannot conveniently practice either of these modes of disposing of their milk, and who wish to rear calves as well as to make butter.—*Breeder's Gazette.*

Polled Cattle.

As these animals are becoming general in this country, a desire will be manifested for information respecting them, that buyers may know why from $500 to $1,000 are being paid for them, while the better known and more cosmopolitan Shorthorns bring barely half those figures. A correspondent of the *North-British Agriculturist*, criticizing another writer, has, among other things, this to say:

As regards hardiness, I believe Mr. Gillespie is entitled to claim superiority for the Galloways, although it is doubtful if, in this point, his favorites excel the Texans of the American plains, whose improvement it is the mission of the Polled cattle to effect. Before Hugh Watson and Wm. McCombie began to develop the early maturing properties of the Aberdeen or Angus, that breed was also hardy to a degree, but house-feeding and generous treatment have necessarily somewhat impaired this quality. The same result will happen when the Galloways are subjected to those influences that are absolutely essential to their attaining the general character of an early maturing breed, and clearing themselves of the stigma of being unable to take the "last dip" in feeding. When one comes, however, to consider whether the Aberdeen or Angus, or the Galloways are more suited to the American climate, I should be inclined to think that the balance of probabilities is decidedly in favor of the Aberdeen or Angus. The Galloways have been accustomed to the mild, damp and equable temperature of the southwest of Scotland, the Aberdeen or Angus to the bitter, piercing climate of the northeast, with its strong variations of cold and heat. The climate they will have to endure in America certainly resembles more closely that of the northeast than that of the southwest—in short, the American climatic conditions are

hut an intensification of tbe extremes of those of northeastern Scotland. Donbtless the Galloways, with their thick covering of hair and hide, will more easily withstand tbe American winters, but wbat ahont the American summers? The Galloways will then be very anxions to take off their coats, and the hoasted profnsion of hair will prove, to say the least, slightly inconvenient.

A well-known extensive breeder of Shorthorn cattle expressed to the writer, a few days since, the opinion that, sooner or later, the fashion of color in cattle would he revolutionized and that it would be done hy some one making a corner on white cattle and bolding a great show and a grand sale, and whilst we think tbe scheme improbable it is yet feasible. The fashion of reds and all reds is a ruinous and vicious one, having foundation in nothing but fancy. Says the Fort Dodge *Messenger*, on this snhject: It is a notorions fact that two of the most noted hulls in England that left the best stock were Royal Windsor (2,989) and Lord Irwin (29,123), both milkwhite. These hulls were kept going the ronnds of the great fairs and show rings and did active service till fourteen and fifteen years old. There is no getting ronnd the fact that, as a rule, we get our best individual Shortborns from the whites and roans, and yet snch is this tyranny of fashion for red that a white or roan of equal merit in every other respect will not sell for one-half and sometimes one-fourth the price of reds.

Inbreeding.

In Col. S. D. Bruce's recent work, "The Horse-Breeder's Guide and Hand Book," the author in discussing the subject of inbreeding remarks:

According to the maxim that "like produces like," we ought to follow form, blood, speed and other good qnalities, and if these good qualities can he maintained and improved hy inbreeding, then it must be desirable to a certain extent. Some of the best English and American horses were very mnch inbred, and the consanguinity of blood did not work deterioration. I am not an advocate of incestuous breeding, either in the human race or the bruta creation, but thera is no donbt tbat manly heauty, graceful form and intellectual vigor have resulted from preservation of those high qualities in the human race where not carried too far, and we can see no reason why the inbreeding of the truest, best hred and best shaped racers can work an injury to the equina race. Still we think an ont cross of pure blood with the essential qnalities of a good race-horse and then back to the snperior blood and conformation likely to produce the best results. We will giva a few examples of inhred modern horses, in England and the same in America, and in doing so will select those of high character which distinguished themselves on tha turf, and in the stud, for instanca. The Baron, not only a good racehorse, but sira of Stockwell and Rataplan, was by Birdcatcher, hy Sir Hercules, hy Whalebone, hy Waxy, hy Pot-S-os, by Eclipse. The Baron's dam, Ecbidna, by Economist, hy Whisker, own brother toWhalehone, hy Waxy, hy Pot-S-os, hy Eclipse; Echidna's dam, Miss Pratt, hy Blacklock, hy Whitelock, hy Hamhletonian, by King Fergus, hy Eclipse. Touchstone, a fine racehorse, and one of the best stallions that ever lived, was hy Camel, hy Whalebone, hy Waxy, by Pot-S-os, by Eclipse, his dam Banter hy Master Henry, hy Orville, hy Beninghrongh, hy Kiug Fergus, hy Eclipse; 2d dam, Boadicea, hy Alexander, by Eclipse. The great Stockwell was much inbred on his dam's side, Pocahontas by Glencoe, dam Marpessa, by Mnley, hy Orville, hy Beninghrongh, hy King Fergus, hy Eclipse. Mnley's dam, Eleanor, hy Whiskey, by Saltram hy Eclipse. Pocahontas' grandam was Clare, hy Marmion, hy Whiskey, by Saltram, hy Eclipse. Clare's dam, Harpalice, by Gohanna, hy Mercury, by Eclipse. Queen Mary, the dam of Blink Bonny, Bonnie Scotland, etc., was much inbred. Gladiator, her sire, was hy Partisan, hy Walton, hy Sir Peter, hy Highflyer, hy Herod; her dam by Plenipotentiary, by Emilius, by Orville, by Beninghrongh, hy King Fergus, by Eclipse; her grandam, Myrrha by Whalebone, hy Waxy, by Pot-S-os, by Eclipse; her great grandam, Gift, hy Y. Gohanna, by Gohanna, by Mercury, hy Eclipse, ont of a daughter of Sir Peter, hy Highflyer, hy Herod. Partisan was out of Parasol, hy Pot-S-os, hy Eclipse. Pocahontas' best son, Stockwell, was by an inbred horse, and Blink Bonny, Queen Mary's best daughter, was by a horse Melhourne inbred to Herod and Eclipse, so if the preservation of good hlood through inbreeding in these striking cases has been a success, is it not reasonable to suppose the same results must follow inbreeding to good hlood and trua sbape with other desirable qualities in this country? Boston was inbred to Diomed, as also his best son, Lexington. Wanderer and Uncas are both much inbred on the dam's side, heing out of a granddaughter of Glencoe, and tracing to an own sister of the Old Hero. Glenmore, one of tha best racahorses recently on the turf, and whosa performances ara of the best at all distances, is very much inbred; his dam, Lotta, is hy Hunter's Glencoe, son of imported Glencoe and the blue filly Fiatt hy imported Hedgeford, she out of Lady Thompkius by American Eclipse. Glenmore's grandam, Sally Lewis, is by imported Glencoe, her dam, Motto, hy imported Barefoot out of Lady Thompkins hy American Eclipse. Barefoot was hy Tramp and Glencoe's dam by Tramp, so that he is, strictly speaking, incestuously bred; yet he was a first-class racahorse. Norfolk, a superior racahorse, is inhred to Sir Archy and Diomed. Falsetto is inbred to Lexington; tbe dam of his sire is by Lexington, and his grandam hy Lexington, and he has nine crosses of Diomed. Imported Eclipse was much inbred; his dam Gaze was hy Bay Middleton son of Sultan and Cohweh hy Phantom son of Walton; Flycatcher, his grandam, was by Godolphin son of Partisan hy Walton, and his great grandam was an own sister to Cohweb hy Phantom. Then if the Lexiugton, Leamington and Glencoa hlood is to be preserved to tha country it can only be done hy a judicious course of inbreeding, and so uniting tha choice of hoth as to combine and reuder permanent tha qualities possessed hy each. Some regard inbreeding as an activa cause of degenerating, as unnatural and calculated to davelop hereditary diseases. These avils can only epring from abnse of the system. If proper care is taken to excluda tha weak and those having hereditary tendencies to disease from participation in reproduction it may ha the means of preserving those estimable qualities so much desired in tbe equine race, and transmitting them nnimpaired to eucceeding generations. The greatest success has heen achieved by breeding from the nearest affinities of blood, and one ehould not hesitate to hreed a half-brother and sister together where they possess many points of superiority.

Another pigeon match has been arranged aud will be ehot off to-morrow at San Bruno. Tha match is for $100 a eida between Mr. Merryweather and Mr. Wilson; Wilsou will have the advantaga of two dead out of ten pigeons allowed him. Tha shooting will he from two plunge traps at twenty-one yards rise, the use of both barrels allowed. Tbe money is up and fun is expected.

BICYCLING.

The League Meeting.

Tbe arrangements for the League meet are being rapidly pnsbed forward. The committee of arrangements, consisting of tbe cbairmen of the snh-committees, meet every Monday evening at the Citizens' rooms and report. The route for the parade bas not yet heen definitely settled, bnt will he shortly announced.

The snhject of transportation of machines bas been met and conquered. Two large covered harges will be moored at the Erie and Pennsylvania depots, in Jersey City, and will receive and check machines np to 11 a. m. on Monday. Tugs will then tow them np the Hndson to Fifty-seventh street, within a short distance of the appointed place for tbe parade, and within easy riding distance. Tbose who arrive hy the sound boats have merely to roll their wheels ahoard the Erie ferry-hoat, which will take them to where the barges are stationed.

The Eastern men, who come hy train, will he met at Harlem, and escorted down to the storage tent, over the boulevards.

The dinner is a fixture, and will he undonhtedly a great success. It will he held at the Metropolitan Hotel, which has one of the finest dining-rooms in the country, the decorations of which alone cost over $75,000. Invitations will be extended to the governor, mayor and city officials, and it is proposed to make this one of the most attractive features of the meet. Tbe price of tickets will be $2 50 per plate, and the committee would feel obliged if those wbo intend to participate will send their names to the cbairman as soon as possihle.

The qnestion of hotel accommodations is being looked np, and although tbe report is not complete, already a number of hotels have siguified their willinguess to accommodate guests at raduced rates. These are the Grand Central (Enropean plan), rooms $1 to $1 50 per day; Grand Union (European), rooms $1 per day; and the Cosmopolitan (Enropean), rooms 75 cents per day; Metropolitan (American), $3 50 per day. A numher of others will be selected and duly puhlished.

The correspondence committee are ready and willing to answer any communications from out-of-town league men, or clubs, npon any points not already axplained. Tha New York men are making every effort in their power to make the meet a success, and trust tbat all wheelmen will co-operate with them in their righteous endeavor.

Wheels will he stored probahly in a large tent erected for tha purpose, and capahle of holding over 1,000 machines. The committee expect to leasa a larga plot of ground at the antrance of Central Park, aud every arrangement will be made to carefully guard and protect the same from injury. There will also ba competent machinists to attend to any repairs that may ba needed.—*Wheelmen's Gazette.*

Sunday Riding.

The nse of tbe bicycle on Snndays is a question to which ridars mnst soon devote their serions thought and attention. Wheelmen in Connecticut have already taken the matter well in hand. Massachnsetts men are heginning to stir on the subject, and soon the qnestion will he one of vital importance to the fraternity all over the conntry.

Two phases, tha right and wrong, and the policy of the subject nnder discussion, we desire to present to onr readers, not so much for the saka of inviting controversy as that onr inflnenca may he on tha right sida. Whether Sunday riding is morally right or not is a qnestion every man must answer for himself. Snnday, to the hard-working mechanic or day lahorer as a class, means more than to the man of ease and comfort who lacks for naught at present and worries not for the future. To the ona it means a day of rest from toil, a day of recreation; to the other all days are so nearly alike as far as lahor, or rather the lack of lahor goes, that he does not have the excuse for ntilizing the Sahbath as a holiday, which the working-man may well and so often does plead. It is the motive which prompts that makes the deed a right or wrong one.

We can see no harm in the fact that a young man who works hard from early morn till lata at night is in tha habit of taking a quiet drive on his wheel Sunday afternoons (especially if he has recognized the day hy having attended one religious service), so long as ha goes ahout tha thing in a proper manmer. Does he not feel thankfnl as he spins aloug enjoying the heauties of nature—the scenery, the lull and quietude which shroud the country, so noticeahla and so pleasing to those of us who live amid the noise and husy stir of tha city? Does not every tread of the pedal send a thrill of gratitude, a consciousness of health, and strength, and vigor ovar the whole natnre akin to that of worship? Does he hreak the law morally more than the prosperous man of bnsiness, who holds his head high, has a smiling how and a pleasant word for all as he passes from his pew in church, but who may ba found regularly driving for pleasure in the afternoon or evening? "No sir! my hoy shan't ride on Sunday," said a fond father, a regular attendant at one of tha chnrches—thongh speeding his horses on the road was evidently a differut matter in his eyce. Tbat was propar, hecause he did it then and doas it now. Each man shonld settle tha mattar in his own mind and be guided by hie own conscience. If you can find time enough for ridiug six days of the week, let tbe wheel rest the seventh. If you cannot, and ride you mnst, and can conscientionsly, do so in as quiet and unostentatious a manner as possihle. Every man must decide the two phases of the question for himself —whether he has tha moral rigbt, and what his policy may he.

The Springfield, Mass., Club is now making preparations for a three-days' race meeting, to ha held next September, in Hampden Park. Ten first prizes, worth $150 each; one first prize worth $1,000; one first prize worth $500; $1,500 for professional races. What a feast for racers! Four thousand five hundred dollars in prizes, tbrea hands of music, $2,000 worth of fireworks, grand camp illumination witb electric lights and thousande of Japanesa lanterns.

The one-mile "sensation" raca practiced in England is after this style: The competitors run ronnd the course once, carry their machines round once, wheel tbeir hicycles round hackwards once, and ride the three remaining laps. In tbe "dismounting" race tha riders have to dismount every time they pass the judges' stand, nnd lift their machines over a post placed across tbe track.

The market for arnica and court plaster is booming, with prices firm. Tbe hicycle season has fairly begun and fair to middling bruises are qnoted livaly for epot.

> Young wheelman, don't be discouraged
> When first you mount your saddle,
> Because the first day you straddle your tire
> You are likely to tire your straddle.

Why the Dude Can't Ride a Wheel.

The dude is a beautifully calm heing, peacefully destitute of life and strength. His legs are a very important part of his constitution, but they could not he called his visible means of support. His cane is what braces him up on most occasions. His legs are simply ornamental appendages hanging down from his hody, and chiefly nseful in displaying a limited amount of woolen goods cut in cylindrical form. He dislikes to propel his legs with much animation, because a rapid step might cause a slight wrinkle in his trousers. If a dude's pants should happen to "knee out," tbat would be tha end of him. It is tbe dude's difficnlty with his legs which prevents bis riding a hicycle. A dude once learned to ride, hnt the fact that he had to make his legs go proved so deuced vulgah, ya know, that he nor any of his kind ever tried it again. A reporter of the Boston *Globe* was sent out the other day to find out what dudes were for, anyway, and this was the result of his investigations:

"I heg your pardon, gentlemen," said the reporter awkwardly; "I understand you are exponents of the dude idea, and I would like to get your opinions on the subject. In other words, are you dudes, and if so, why not?"

"Yahs," answered one of them mildly, "we ah Dyudes; if we were not we would resent the imputation, doncherknow? And, ya know, ya cahn't expect a dynde to have any opinions; the only real philosophy there is in onr existence is that we represent in our composure and dress the perfect repose of nature and heauty. I don't mind saying that I find it very hard myself to be a dude; I am naturally very smart, ya know; hut most of the smart fellows ab so deucedly vulgah, ya know; so proud of what they call tbeir independence, tbat I cahn't hear their society. I considah the dynde to he the most refined type of a gentleman that America has yet prodnced. That's why I am a dynde. Geahge, here, is a dynde too."

"Geahga" was asked why he was a dnde.

"I? I'm a dynde because Chahles is, ya know."

"Do you hold his opinions on tha philosophy of the species?"

"Well, ya know, I haven't any opinions, but if Chahles has any, I guess I cahn trust myself to him."

"Why do you wear that houquet in your buttonhole?"

"Because Chahles wears one, ya know."

And then tbey relapsed into silence, and, withdrawing into their shirt collars, gazed absently ahead.—*Ex.*

Last summer, as ha lay in the hammock, dreamily gazing at the smooth, flower-sprinkled lawn, his darling approachad and said: "Thera is a difference hetween yon, dear, and tha grass plat." "Communicate tbe variation." "This is a daisy level, while yon ara a lazy ——." I couldn't hear tha rest of it.

The unicycle is no novelty. A great deal of hard work has been dona with it for many years. It bas been used frequently in races, hnt nnless some great improvements are made, the finest athlete will never he able to propel it with himself ahoard. The wheelbarrow is the nnicycle we refer to.

The annnal trip of the Oakland Bicycle Club to San Jose and vicinity was set for Saturday, May 19, hut in order to accommodate a greater nnmber of riders and to insnre tbe hest roads, it has been decided to postpone it to the following to-day. A fine tima may he axpected.

A New York doctor says the best cnre he knows for a cold is tha old-fashioned sweat. "Take ten grains of quinine, a hot mustard foot bath and n stiff glass of toddy." Everybody helieves in this remedy, but nine out of ten will forget the qninine and tha foot hath.

The recent rains bave interferad somewhat with training, hut qnite a nnmher of entries are expected for the Decoration Day races at the grounds of the Olympic Athletic Club in Oakland. The track is heing put into good condition and n fine time may be expected.

Bicyclers will find a very handy thing to carry in their tool bag some fine hinding copper wire. Witb it you can splice a handla bar should it get hroken, tie on your rubher, and there are a dozen other uses that it can be put to.

What is the differenca hetween a crank and having your hoots hlacked? One is eccentric and tha other is a ten-cent trick.

A Joke on a Joker.

A certain San Francisco policeman has established a reputation as a practical joker on the strength of his ability to counterfeit the convulsions of a man in an epileptic fit. He can foam at the month, gnash his teeth and growl in the most approved epileptic manner, and carries out the imitation so well that even experienced medical men have been decieved. Whenaver a new officer gets appointed on the force tbe joker gives bim a scare to test his courage. Tbe usual way the trick is worked is for sevaral policemen to hold tha joker whila in pretended convulsions and just when the greenhorn is ushered in to let go tbeir grip aud enjoy the fun of seeing the new man run. The trick was worked most successfully last week on a new officer, wbo ran most incontinently at the sight of the joker's horrible contortions. But he determined to get even for the laugh raised agaiust bim, and after setting up the drinks, laid a deep plan for revenge. Accosting the joker last Wadnesday, he remarked: "Tbat was an awful scare you gave me the other day can you do tha thing whenever you pleasa?" On heing answered tbat nothing was easier, he asked the joker if he would kiudly play the joke on a lot of coons who had a sort of a club room on his heat.

"Certainly," said tha joker, and the pair walked off to the Fourth ward. Tbe sufferer piloted his man into tbe back room of a grocery where sat half a dozen coons playing cards.

One of them was June Dennis, the colored boxer, aud another William Wilson, wbo aspires to ha a figbter. Both had been posted about the joker's trick and expected bis coming. For a minute tbe two officers lounged nround and tbeu the old hand had a fit. Seeing the coons did not scare for a cent, he made at them with open mouth as though about to enjoy a cannibalistic meal. After Dennis and Wilson got through toying with him, and he was rescued by his late victim, he found tho use of leeches valuahla aud came to tbe conclusion that sometimes jokes don't pay.

On tbe 10th of April, at Birkenhead, England, Geo. Seward, the great short distanca runner, breathed his last. He was born iu New Haven, Conn., on the 16th of October, 1817. Seward's hest record was 100 yards in 0:9½; 120 yards in 0:11½; 200 yards in 0:19½. In a quarter of a mile run with Harry Reed he was beaten iu 0:48½.

Tbe stakes of tha National Association of Trotting Breeders, which closed May 1, filled well.

Breeder and Sportsman.
PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE PACIFIC COAST.
OFFICE, 508 MONTGOMERY STREET
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion

San Francisco, Saturday, May 26, 1883.

Outward Bound.

On Monday last, hy the Atlantic Express, there started from the overland depot on the Oakland wharf eight trotting colts from Palo Alto. It was a notahle departure in many respects. It is heyond dispute that there is not another breeding farm than can show eight of the same class, and not altogether improhahle that if the whole country was ransacked that their equal could not be found. Had it not been for the disease which held such fearful sway at Palo Alto from Decemher until March there would he odds that these eight would stand a good chance against the same numher and of the same ages selected from the whole country east of the mountains and iu the contests win oftener than they would lose. Thc oldest in the string are Wildflower and Bonita, now four years old, and which stand first and second in the list of two-year-old performers. When the figures are consulted and 2:21 and 2:24½ are hrought to recollection, it will not he considered an over-sanguine estimate which places the "sisters in hlood" that high. There are four three-year-olds, Hinda Rose, Flower Girl, Helen and Chiquita, Hinda heing the only one which has come hefore the puhlic. To mark 2:36½ as a yearling, and defeat the pick of Kentucky on their home ground when a two-year-old, are credentials which will place her in the same category as her half sisters, and there are the five dark ones to furnish the auxiliaries for the combat. Flower Girl is a sister to Wildflower, and Helen is one of those which report gives a good account of. She is hy General Benton from Alameda Maid, hy Whipple's Hamhletonian, and Chiquita is hy Electioneer from Pearl, her grandam Melinche, which gives her three-quarters the same hlood as Wildflower. A big, slashing two-year-old is Alhan, hy General Benton from Lady Morgan, and as she is by Rysdyk's Hamhletonian from a mare of high hreeding, Alhan has a right to he what it is claimed he is, one of the best ever hred at Palo Alto. Gypsum is hy Electioneer from Gypsy, by Ahdallah and to the sire of Gypsy we have to give the prefix of California in order that he he not confounded with his grandsire, the famous rattailed son of Mamhrino, or his half hrother on the paternal side, Ahdallah of Kentucky, the sire of Goldsmith Maid. California Ahdallah was the first son of Rysdyk's Hamhletonian to inhalo the fresh air of the Pacific, and one of the first of his aire's get to leave Old Orange. He was a grand horse according to all the descriptions, oral or printed, that we have heard or seen, and had his residence on this coast heen delayed until his family acquired the supremacy which after years conferred, there would have heen a keener appreciation of his hreeding. With the exception of Wildflower all were looking well. She is scarred from nose to tail as though she had been in the center of a dozen hursting bombs, or had gone through a hundred hattles with a wound for each. Part of the left ear is gone; there is a hole in the membrane that separates the nostrils, and at every expiration there is a whistling like escaping steam. For all that she has the "right look in the eye," and as the orifice mentioned does not effect her hreathing apparatus, it is probahle that no bad result will follow. We have fears, however, that the virulent distemper, that left so many marks of its ravages may have entailed a weakening of the strong constitution which enahled her to pull through after the attending veterinarian said it would be an act of mercy to kill her as she would surely die in a few days, and this can only be known after she has heen subjected to a more trying ordeal than could be given hefore leaving home. Should she he defeated in the eastern engagement, this will he the cause, for we are firm in the belief that if she had heen fortunate enough to escape the pinkeye of last season and the aggravated strangles of this, she would have inscribed hetter than 2:15 on the four-year-old record.

We rode in the car with the colts from the depot to Sixteenth street, and were well pleased that our old favorite still retained the vivacity of the days of her colthood. Had it not heen for the thick padding, she would have drummed merry music from the partition of her stall, and there was a sparkle in her eye, although there was a spice of ill-nature in her glance. The quarters could not he more comfortable, as the experience gained in the last campaign enabled Marvin to make improvements that have resulted very nearly in perfection.

The stalls are of the right width so that there can he no tossing from side to side, and the cushioning makes bruises impossihle and at the same time gives support.

There is a provision for exercise should the car he stopped at a place where there is no platform. This is effected hy leaving a space hetween the middle stalls which is carpeted with ruhher of an unequal surface, and with room sufficient at each end to turn around. The first point where there will he a stoppage of more than a day or two is at Lincoln, Illinois, where the exercise will he given until a few days hefore the Chicago meeting. Lincoln is in the central part of the State, twelve miles from Springfield, and with every facility in the way of track and stahling to give suitahle work. By locating there during the month of June in preference to Chicago, the danger of sudden changes in the weather is avoided, and the journey from there to the "city hy the lake" is short. The first engagements are at Chicago, and great interest will he taken throughout the Coast in their performances. That the campaign may prove a glorious one for California is our heartfelt wish, and in this every resident will heartily join.

Criticisms and Reminiscences.

The accompanying letter was not intended for publication, hut inasmuch as there is plenty of good, sound sense in the suggestions, and a very interesting addition to the article referred to, we take the liherty of printing it. The writer is an old-time New Yorker and had an intimate knowledge of the old-time horses. There is not a race of any note from 1830 to 1850 which was decided on any of the courses in the vicinity of New York that he did not witness, and now that we have "shanghaed" a friendly letter and pressed it into a service it was not designed for, we trust that he will furnish the *Breeder and Sportsman* with recollections that cannot fail to he of exceeding interest to our readers. In the days which he refers to trotting was just heginning to be considered a track sport, though the roads before that were the scenes of many hotly fought hattles. There were many grand horses in those days full of hlood of the right sort, and if the art of training them had heen as well understood there would have been only a small part of the chance for the improvement that has followed. Not merely the conditioning and driving of the present day, hut also the improved vehicles, the hetter kept tracks and the paraphernalia of the fast trotter must he taken into consideration when instituting a comparison. In all of our acquaintances we do not know of anyone who is more capahle of giving a correct account of the old methods and the horses that flourished on the roads and tracks half a century ago than B. C. W. Those were the days of Whalehone, Jerry, Topgallant, Sweethriar, Paul Pry, Columhus, etc., all of which our old friend has seen perform:

My Dear Friend: It is still raining—cloudy and rainy every day this mouth. It gives an assurance of good crops in this section. Your article on trotting action in the issue of May 12 is the hest I have ever seen in print or heard spoken. All weight attached to the natural foot must be very damaging to the feet and legs, and I hold that a horse that cannot he trained to trot fast without weights is not the proper horse to hreed to to insure trotters, because a horse with all of these appliances attached might he taught to trot fast without the gift to impart the quality of speed to his progeny. The quotations from the Duke of Newcastle are most happy. In speaking of the poise or halancing how often we have talked of the seat of the jockeys when exercising and in the race, and how you thought of making a saddle with a long tree, that would of necessity set the jockey well back, etc. Now I hold that the jockey should sit in the saddle, at the same time hearing so much weight in the stirrups as to steady him in his seat. But, in either case, whether the jockey sits in the saddle or stands in the stirrups, the seat of the saddle should be at least four inches farther back than is usual, and the stirrups set back accordingly. In this saddle, if the jockey stands in the stirrups, the weight on the horse (and also the horse) will he more evenly balanced than in the present form. I do not think standing in the stirrups is the best way to ride a horse in a race to get him to the end of the race first with the least possible fatigue, as the weight of the rider goes a long way towards overbalancing the horse. The extra weight on the shoulders has a tendency to drive him in the ground, causing a much greater exertion on the part of the horse to get along, as also a tendency to injure his feet and legs.

Now, if the rider sits square in the saddle with the stirrups of a proper length hearing sufficient weight in them to steady him in his seat and give him that firm and light hand the Duke prizes so much to properly balance the horse with this manner of riding, I believe the horses will make a quicker and easier race, with less tendency to injury than in the present mode. A first-class sailor or yachtsman will so trim his vessel as to have her truly and evenly balanced for an easy and quick trip.

Well, my friend, I will not hother you any more with my crude notions about the horse, and so on.

"Farewell to Felters" reminds me of long days ago, when, in 1826, my father and family lived on the corner of Broadway and Grand streets, the old circus between Grand and Howard streets, subsequently Tattersall's. Alongside of our yard fence was a pile of old boards, and many a pocketbook have I taken from among them that some unfortunate had parted with at the circus the night before. On the opposite corner from our house—northwest corner—was an embankment at least ten feet high, with a little old house perched on it. John Jacob Astor, in the year '30 or '31, as near as I can remember, built on the west side of Broadway, between Prince and Houston streets, the house that he lived and died in. I think he must have been too old at that time to have been one of Harry Felter's first customers, as Mr. Dayton says. I knew them all at that time. Old J. J. A. was about five feet eight inches, his son W. B. full six feet, light complexion. The building that Astor's office is in was built in 1834 or 1835. Of course, all the old-time public places I was well acquainted with their location. Niblo's and the Olympic were, I think, where the Christys made their debut. In 1827 we moved to the corner of Art street, now Eighth and the Bowery, about 100 yards from old Vauxhall Garden, then on Broadway, Twelfth and Thirteenth streets. Then in the spring of 1828 we migrated to Murray Hill, near W. B. Astor's and Isaac Lawrence's property, between Thirty-third and Thirty-sixth streets, twenty acres of which was offered to father in 1835 for $42,000, all lying on west side of Middle road, now Fifth avenue, and just north of Peter Cooper's glue factory. Hunters used to come on our place and hunt and kill quail, English snipe, and occasionally a woodcock; and I used to feel provoked about it, as I wanted the birds for my own sport.

A few more words about Harry Felter: Harry kept the United States Hotel, Newburgh, somewhere between Forty-fourth and Forty-eighth, then moved to Rockland county, New Jersey, near a lake and not far from Orange county, N. Y. I have had many a good, solid drive on the Big and Little ponds, while frozen over, with Harry Felter, Ben Johnson, Jim Hasbrouck, Cad Colden, Pete Sears, Jim Jacks, Tommy Ring, cashier of the Powell Bank, Newburgh, and a host of other genial, whole-souled men that Newburgh and Orange county was famous for. Harry was well liked by all and took the lead in all sporting at that time and place. There was not a racetrack in Orange county up to 1849. Very soon thereafter one was built a little way from Newburgh. I left there the winter of 1849. Since then the Hambletonians have sprung into existence and gained great celebrity. At that time the Abdallahs and Bellfounders were thought very highly of. I remember one Sunday of meeting, on a drive between Newburgh and Coldenham, Esquire Patton, with a very fine young Abdallah stallion. The day was warm, and he had fed his horse grain just before starting. The horse got pretty warm, fermentation set in, and he died in a short time.

B. C. W.

Ranch, May 16, 1883.

The Sacramento Imbroglio.

In order to obtain the fullest information regarding the expulsions and reinstatements at Sacramento we have determined to forego exteuded remarks until next week. It is a peculiarly unfortunate affair from every point of view. Lamentable that drivers have given cause for punishment, and still worse to have what seems a righteous verdict upset in so short a period. From all the information that we have received the judges had the strongest reasons for inflicting the extreme penalty, and it is heyond our comprehension why the club went outside of its authority, under the rules, to take the action it did and condone the offenses. The bearing such cases have on the welfare of track sports warrants the fullest investigation and thorough criticism. In order that there may he the least possible chance for us to misunderstand the situation and handle the question satisfactorily, another week will he given to securing the points.

Since writing the above we have received from Sacramento a full history of the proceedings. It comes too late, however, to do the subject the justice the magnitude of interests at stake demands, and therefore we will still have to delay the consideration until next week.

There was one phase which was entirely overlooked in the meeting of the Capital Turf Club which was held last Wednesday, that being that it had no power to "reconsider" a sentence of expulsion. As the rules strictly prohibit a reinstatement hy "a member," the parties expelled are still under the han, which can only be removed hy following the right course.

Ho! for Salt Lake.

Several have already started and others are making preparations for the journey to attend the meeting of the Salt Lake Jockey Club. From the list of entries published last week it is evident that there is a capital chance for first-class sport, and that those who engage in the trip will he well repaid for the trouble. The meeting commences on Tuesday next, so that there is plenty of time to reach there hy taking the overland of this afternoon.

The Chico Fair.

The speed programme of Third District Agricultural Association, which was first published last week, came to hand too late for comments. The advertisement is so full that there is no necessity for repeating the classification. From past experience the managers learned that many horses from a distance could not be induced to participate, and hence the purses are not so large as they would be if the State could be depended upon to make entries. Then there is almost a certainty that there will be another fair held the same week, and which will be handier for the horses in this section to reach. There are so many horses now in training in California that a division of the forces is not so much to be feared as in former years, and though it precludes some who would like to "follow the circuit" all around from gratifying their desires, there is no way to escape the difficulty, and there must be a clashing of dates when so many exhibitions have to be crowded into a couple of months.

The number of horses in training at Chico and in places not far from there insures a good number of starters. That there will be a large attendance is guaranteed, as never before in the history of that fertile region has there been a better outlook for a grand crop. There will be many visitors from the up-country and not a few from the bay. When there are two fairs in juxtaposition it does not follow that one will be the whole attraction. There will be consultations about where horses are likely to be engaged, and a division of forces so as to avoid the "hard places."

"Krik's Guide."

Part second of "Krik's Guide" has been received, and, as we anticipated, it is as complete as can be. When a man reaches a "higher notch" than has previously been marked there is always a fear that he cannot retain the place, and that the last "great effort" must be succeeded by something lower. This is not the case with "Krik." He improves on his former record, every volume shows an increase of pace, and his endurance is still more remarkable than the speed he shows. We have no hesitation in giving this last volume the pride of place. It is complete, as near as completeness can be reached under the lax manner racing is conducted outside of the regular clubs. Nominations for stakes 1883, 1884 and 1885; list of owners, trainers, jockeys and colors; a terse description of the prominent courses; winners of prominent events for a series of years; yearlings of 1883, and the best performances at various distances. Altogether it is an indispensable necessity for every one engaged in racing, and those who have only a slight interest in turf sports will be amply repaid for the small investment required to purchase it. Address H. G. Crickmore, New York *World*, 31 and 32, Park Row, New York.

Sheep Circular.

Besides other valuable information the circular of Messrs. Tarpey & Kirkpatrick contains the following paragraph:

The advantage in using a thoroughbred ram rather than a graded one is obvious, from the fact that by using the thoroughbred we breed to a fixed type, which, by the intensity of its blood, so impresses its own qualities upon the progeny, that in some cases a half-blood cannot be told from a pure blood, even by experts. The saying that "like begets like" is only true, however, when the sire is an animal of the same type to which his ancestry belong, and this can never be true of a grade. By using a thoroughbred we know within a reasonable limit what we can expect of the offspring, while the progeny of the grade is never what we desire, seldom satisfactory, and unprofitable in comparison with the produce of the thoroughbred.

This is an indorsement of the views we have advanced for a long time, and in articles recommending legislative aid gave it due consideration. It would appear as though it were unnecessary to add other arguments than what are embodied in the short extract, and yet it cannot be presented too often. It is one of the main points in successful breeding, and the only foundation to depend upon for the deserved improvement.

The Kentucky Derby.

By all odds the race which has awakened the most interest in the Eastern turf circles is the Kentucky Derby. That is, of any of the events that have been decided, and even the best of those to come will scarcely elicit so much attention. The Eastern press has teemed with accounts of those engaged, and speculations as to the colt which was likely to win have been freely tendered. Run on the same day as its English namesake, and on a slow track, yet the time was five seconds and over faster, though this will hardly be accepted as evidence by turfmen that Leonatus is that much better than St. Blaize. The son of Longfellow and Semper Felix is undoubtedly a grand colt, and the colt which ran second to him, Drake Carter, is by Ten Broeck, so that the Nantura stock farm has made a good showing among the noted studs of Kentucky. The mile and a half was run in 2:43, which is nine seconds slower than the "best on record" and six seconds slower than Lord Murphy ran on the same course in 1879.

Capital Turf Club Meeting.

It is scarcely necessary to add anything to the admirable report of our Sacramento correspondent as regards the racing and trotting, and as will be seen by reference to another article, the consideration of the main feature is deferred to next week. That the meeting was more successful than any heretofore held in the spring is conceded, and had it not been for the unfortunate circumstances which arose, it would have insured a hereafter of still better prospects. As we have persistently claimed, the great thing lacking in California was that owners failed to second the efforts of associations in making spring meetings attractive to the public. The people of Sacramento have always been ready to do their part, and after repeated attempts, have not lost heart, but with commendable perseverance, struggled on and on. It cannot be possible that the hard work of so many years is to be destroyed by adhering to a course that is sure to bring ruin.

The extra day brought what must be acknowledged a phenomenon. The big mare from Berryessa must take the foremost place among the "short horses" of any era, at least, since the timing-watch gave a measure for comparison. The whole distance was run at the rate of 22.1 seconds to a quarter, and then she "only galloped" after leaving Douglas so fast that it appeared as though that famous horse could not run a bit. She is a "clinker" sure, and another illustration of the tremendous speed which the descendants of Lummux have inherited.

From Australia.

Messrs. Parker and Whiting, who took Honesty to Australia, returned on the last steamer and from a short conversation we obtained a good deal of information regarding trotting in the colonies. It will be some time before the sport is properly appreciated, partly owing to the actions of some of those who have been connected with the horses sent from here, measurably owing to it being a new thing. Racing is the great out-door pastime in Australia and after the large fields of first-class racehorses which start in the main races, the meager showing of trotters is not satisfactory. An exception must be made to the race that Honesty won. That was altogether the best display of trotting speed that has been witnessed on the Elsternwick track, and came nearer the standard of trotting here. The Australians are slow to acquire the art of training trotters, and look on some of the appendages as of no account. Boots are ignored and the consequence is that the native trotters are mixed in their gait. Time will correct these false notions, and it will not be long until a better system prevails.

J. J. Miller was the purchaser of Honesty and it is mainly to his spirit and enterprise that trotting has any standing in the antipodes. Mr. Roberts is also a staunch patron, and we earnestly hope that their efforts will end in success commensurate with their endeavors.

Mr. Corbin on Tips.

The letter from Mr. Corbin on the use of tips will be found in another column, and we are much pleased to add the indorsment of a man who is so capable. The objection he makes to using tips on the ice is sustained by logical reasoning, as the cutting of the calkin into the hard substance is necessary to break the jar, and, without a trial of other guards, presents an obstacle that may be difficult to overcome. If this is found to be the case the summer without shoes would be some relief, and in these countries where ice-driving prevails the spring seasons could be utilized by bringing the foot into a shape when tips could be used. The other objection of Mr. Corbin is also sound, and the feet of a horse which has worn shoes must be allowed to make sufficient growth of horn at the heel in order to set them properly.

"The Darby."

Once more the blue ribbon of the English turf graces a grandson of Newminster, and the blood of Touchstone and "Tauld mare" is proved potent. St. Blaize, the winner, is by Hermit, his dam by Sir Hercules. Popular as Hermit has been for several years, this victory will add to his renown, and likewise to that of the Newminster strain. The second in the race, Highland Chief, is by Hampton, from Carrie, by Stockwell, and the favorite before the start, Galliard, had to take the third place. In the paper of next week we will be able to give a fuller account of the race than can be gleaned from the telegrams.

Editorial Notes.

The distribution of prizes of the Schuetzen Verein's last tournament took place last Saturday evening at New Turn Verein Hall on Turk street. Following are some of the prize winners: Public target, possible 100 points, first prize Jas. Stanton, 93 points, $20; second, A. Strecker, 90, $14; third, Ehrenfort, 90, $12; fourth, H. C. Smith, 90, $10; fifth, C. Rapp, 88, $9; sixth, C. C Rohlffs, 88, $8; seventh, F. Boeckman, 88, $7; eighth, H. Carr, 87, $8; ninth, K. Wertheimer, 86, $5; tenth, J. Utschig, 86, $5. Twenty-five prizes were given in all on the public target; the remainder range from $5 to $2. Prizes were given for the first and last bulleyes made in the fore and afternoon: First bullseye, Wm. Ehrenfort; second, Jno. Horstmann, in the forenoon. In the afternoon, first, F. Boeckmann; second, H. Plagemann. On the company target the first six winners of prizes are: J. H. Winter, Wm. Ehrenfort, C. Rapp, Henry Plagemann, Jno. Horstmann, Jno. Plath. On this target seventy-five prizes were given, all of which are appropriate and valuable. On the King target, after considerable competition, the first prize of $100 and medal was won by John Plath. Mr. Plath was serenaded last night as a congratulation for his good marksmanship.

A Good Cross.—During the past week William Hearst's imported Irish setter bitch Kate II, by Sandy, out of Kate I, was stinted to A. P. Truman's Irish setter dog Bob, brother to Dr. Toland's Whiskey, and by A. C. Titcomb's Sam, out of Nellie Belmont, imported. Mr. Hearst is to be congratulated on his selection of a dog for his beautiful bitch. Kate II was a prize winner of note in English shows, but for some reason or other she only achieved H. C. at the late San Francisco dog show. She is a model of symmetrical beauty, albeit a trifle fine and rather inclined to length of body, indicative of lack of stamina in the field. This fault will be amply corrected in her pups by the cross with Bob. Bob is a short-coupled, high stationed, strong, well-set dog, with massive limits and no fault except that his appearance of strength detracts a trifle from his symmetry of form. This cross shows the true art of breeding. Of the points that the bitch lacks, the dog has an excess; the one fault corrects the other fault. His coarseness, if the expression may be pardoned when used towards so handsome a dog, offsets her superior fineness. The exact nick is found, and fortunate indeed will be the sportsman who manages to secure one of the offspring.

Chicago Dog Show.—Chicago is to have a dog show commencing June 12. Charles Lincoln, whose knowledge of dog shows is supposed to include all there is worth knowing, will be the superintendent. Valuable prizes are offered for greyhounds, and it would be a good idea for some California breeders to place on exhibition a few specimens of the fleet coursers of the plains. There are greyhound men here with means and spirit enough to undertake the trouble and expense of sending a dog or two on. It would not be out of place for the coursing clubs each to select a dog owned by their members, and let the club pay the expense of forwarding. Both the California and Pacific Coast Clubs have ample means at their command and could not put money to a better use.

The Kickers.—The unfortunates who acted as judges at the San Francisco dog show may take heart of grace from the consoling reflection that, sadly as they were abused, they fared far better than the judges of the New York bench show. The Eastern press teems with critical letters and adverse comment anent those gentlemen. Judges do sometimes make mistakes but they are more often right than prejudiced exhibitors; but right or wrong, the fact is, that dog shows will have to cease if when decisions are given they are not accepted with courtesy.

To-day the Alameda County Sportsman's Club will hold its monthly shoot at clay pigeons at the Oakland Trotting Park. The shooting will be for club medals followed by sweepstakes matches. A good attendance is expected.

FISH.

Salt-Water Fishing.

During the last week, though the fishing has been very good, there have not been very many people out and, consequently, not a large number of the finny tribe taken by other than those who make a living by fishing. Perch and smelt were taken at the old railroad wharf at Oakland. Several persons who tried this place were well rewarded for their pains. These fish are also taken in large numbers at the drawbridge at Saucelito. On the muddy bottoms near Angel Island the tomcod catches have been very good for some time past. East of Goat Island the tomcod fishing still continues to hold out inducements to lovers of this kind of sport.

Last Saturday L. H. Van Schaick and companion fishing in Raccoon straits caught 89 pounds of fish, most of which were rock-cod, some of which weighed three pounds.

The steamer Edith will make another trip to the Farallone Islands this evening and give the passengers a chance to fish —and get sea sick if they feel so disposed. If the weather is too rough the steamer will put in at Point Reyes, where fishing can be had in calmer water. The Edith did not make the trip to the islands last week as was expected on account of the propeller getting disabled while the boat lay at the wharf.

Bay fishing is at its height and the crowds that are content to stand around the water front waiting for a bite invariably come away with a good string of fish. At Alcatraz the soldiers have been successful with smelt and tomcods, occasionally hooking large rock-cods.

THE GUN.

Sweepstakes.

Last Sunday quite a number of sportsmen assembled at the Oakland Trotting Park where it was understood that several sweepstake pigeon matches would taka place. The day was as warm as though it had been imported from Arizona for the occasion. The excessive heat had as much effect on the birds as on the shooters and when the birds were thrown out they slowly towered over the traps as if looking for a cool placa whera they might alight, and the most of them found a still hotter reception of shot from the shooters who stood at the stake in shirt-sleeves. The first match was a five-dollar sweepstakes. Six entries were made, and some excellent shooting was done, as four of the contestants tied on a clean score. The conditions were six birds, at 21 yards rise; the purse was divided in two prizes of $20 and $10. Following are the scores:

Robinson	1 1 1 1 1 1—6	Fay	1 1 1 1 1 1—6
Lambert	1 1 1 1 1 1—6	Slade	1 1 1 1 0 w—4
Hansen	1 1 1 1 1 1—6	Hoefling	1 0 1 1 0 1—4

As the first four tied on a clean score, they shot off at three pairs of birds. In this Robinson killed his six straight and so won the first money as seen below:

Robinson	11 11 11—6	Hansen	11 10 11—5
Lambert	11 11 10—5	Fay	01 10 01—3

Lambert and Hansen again shot off their tie and Lambert won the second purse.

The second match was shot under the rules of Hurlingham at ten birds, the use of both barrels allowed. The entrance money was $5 and the purse was divided in two prizes of $22 50 for the first and $12 50 for the second best. At tha end of the fifth round the contest lay among Robinson, Fay and Lambert, the rest having withdrawn to save pigeons. Again Robinson and Lambert tied on clean scores as this shows:

Robinson	1 1 1† 1 1† 1 1 1 1 1—10
Fay	1 1 1† 1 1 1† 0† 1 1†— 9
Pearson	1 1 1 0† w — 3
Slade	1† 1† 1 1 1† 0† w — 5
Schnabel	1† 1 1 0† w — 3
Lambert	1 1 1 1† 1 1 1 1 1—10
Hansen	1† 1 0† w — 2

† Both barrels nsed.

Robinson and Lambert shot twice at fiva birds each to decide the tie, hnt made clean scores. They then divided tha prizes:

Bobinson	1 1 1 1 1—5 1 1 1 1 1—5
Lambert	1 1 1 1 1—5 1 1 1 1 1—5

After this came a twelve-bird match under the same conditions as the one before, only that the purse was divided into three prizes of $22 50, $12 50 and $5, for the first, second and third shots. Robinson, Fay and Lambert took tha purse. Robinson made a clean kill of his birds and took tha first money. Fay and Lambert divided second and third moneys. Robinson so far had not missed a single one, out of 44 birds. This tells the tale.

Pearson	1 0† 1† 1† 0† 0† 1 1† 0† 1† 0†— 7
Linville	1 1† 0† 1 0† 1† 1 1 1 1 0† 1†— 9
Fay	1† 0† 1 1† 1 1 1† 1 0† 1 1† 1 —10
Robinson	1 1 1 1† 1 1† 1 1 1 1 1 1 —12
Lambert	1 1 1† 1 0† 0† 1 1† 1 1 1 1 —10
Hansen	1 1 1 1 0† 1 1 1 1 0† 1 0†— 9
Slade	0† 1† 0† w — 1
Merryweather	0† 0† 0† 1† 0† 1 0† 1† 1 0† 0† 1†— 5

† Both barrels nsed.

Next came a handicap match between Pearson and Merryweather for $50 a side, by which Pearson gave Merryweathar the advantage of four dead birds to start with; the shooting to be at twelve birds under Hurlingham rules. Mr. Merryweather killed nine birds, counting in the four given, inclosed by brackets, while Pearson only missed one ont of eleven birds, so he won on the eleventh bird, as seen by this:

Pearson	1† 1 1† 1 1 0† 1 1 1† 1† 1 —10
Merryweather	[1 1 1 1] 1 1 0† 1† 1 1† 0† 0†— 9

† Both barrels nsed.

The last was at six pairs of birds, eighteen yards rise, 100 yard bonnds, the purse to be divided into prizes of $25 and $15. At the last of this match, the supply of pigeons ran short so the last men to shoot finishad their scores on clay pigeons. Slade was the fortunate man in this as he took tha first money and rather than to shoot at clay birds Robinson and Hansen divided the $15, second money. The scores stand.

Fay	00 00 10 01 10 w—3
Robinson	11 10 10 10 11 10—8
Pearson	10 01 10 11 01 00—6
Merryweather	00 00 11 00 10 10—4
Lambert	11 10 00 10 01 —5
Slade	00 01 11 11 11 11—9
Hansen	11 10 01 01 10 11—8
Linville	10 11 10 10 10 10—7

Mr. John Kerrigan acted as judge in the several matches to the satisfaction of all. When the atmosphere began to get cooler the outsiders made things interesting in the betting line. One bet of $40 to $20 was made on the result of one shot. Though tha hetting was lively and the boys all feeling well the day passed away very pleasantly.

Sonoma's Bear Hunter.

In the mountain regions north of Healdsburg is the large stock farm and comfortable home of Sylvester Scott, who has lived there for more than twenty years. He is a Kentuckian, and a noble example of that famous race of stalwart forms, hardy nature, magnificent manhood. and noble character, which has gained for the land of Boone and other heroic spirits a world-wide reputation—whose types may be traced far back in tha sturdy Highlanders, in the thorough Irish gentleman, the great-hearted English Esquires, and the intrepid warriors and gallant heroes of the Tyrol of past days. Mr. Scott is yet in the vigor of full prime. He is known as the "Great Bear Hunter," and he has duly won the distinction. During his residence in his mountain home he has killed between four hundred and five hundred bears, of all species known to this region, many of them grizzlies; and without number have been the trophies of his unerring rifla in the toil and adventurous sport of extirpating such "varmints," of the Davy Crockett order, as California lions, wild cats and wolves, which prey upon stock of all kinds. He is tha father of eighteem children, sixteen of whom ara living, and the youngest is a babe in arms. Sons and daughters of a worthy sire and a devoted mother of equal mold and natnre, they are "thoroughbreds" every one. But "mountain man" and "bear hunter" as he is, Mr. Scott is not of the order commonly so characterized. He possesses tha better and more cultivated traits and attributes of the higher class of Kentuckians—the fondness for a comfortable and well furnished, amply provided home, with all that adds to the contentment of life therein, and makes it the homestead prized alike for its comforts and its tasteful ornamentation. It is the only house of capacious rooms and plastered walls in that mountain region; and his barns and onthouses are similarly well built and commodious. His farm is 3,000 acres in area, and is used mostly for his fine stock, horses, cattle and sheep, all thoroughbred and of choice breeds. In this he takes great pride. He has no mind for stock below his fancied lines of blood and pedigree. But ha nevertheless devotes due attention to farming and fruit and wine growing. In round measure he is a farmer and thoroughbred stockbreeder, and he is one of a race and class who are becoming lamentably reduced in nnmber in this great conntry of ours. Ha is one of Sonoma's most marked characters in that happiest place of honor, the honored private station.—*Santa Rosa Republican.*

Forester Gun Club.

The following report of the latest medal shoot of the Forester Gun Club at Sacramento is from the *Bee:*

On the 13th the regular contests for the two gold badges of the Forester Gun Club, of this city, were held at Agricultural Park. The birds had been kept on hand for a coupla of weeks, and some of them did not fly readily, but the very nncertainty of their actions was most annoying to the shooters. As it was, some excellent scores were made. The winner of the medal, Dase, is a late acqnisition to the membership of the club, and he starts in well. He shot in the 21-yard class, composed of non-winners. W. E. Gerher, who won second, had not faced the trap for many months, bnt his score showed him to be still a reliable shot. The gronnd being covered with a crop of grain, there was no boundary, shooters being allowed three minutes for gathering their birds, which were retrieved by dogs. Following are the scores:

Dase, 21 yds	1 1 1 1 1 1 1 1 1 1 1 1—12
Gerber, W. E., 26 yds	1 1 1 1 1 1 0 1 1 1 1—11
Shepler, 26 yds	1 1 1 1 1 1 1 1 0 1 1 1—11
Gerber, J., 26 yds	1 1 1 1 0 1 1 1 1 1 1 1—11
Zuver, 21 yds	0 1 1 1 1 1 1 1 1 0 1 1—10
Odell, 21 yds	1 0 1 1 1 1 1 1 1 0 1 1—10
Hotz, 26 yds	1 1 1 0 1 1 1 1 1 1 1 0—10
Young, 26 yds	1 0 1 1 1 1 1 1 1 0 0 1— 9
Todd, 26 yds	1 1 1 1 0 1 1 1 1 0 0 1— 9
Miller, 26 yds	0 0 1 1 1 0 1 1 1 1 1 1— 9
Ruhstaller, 26 yds	1 1 1 1 1 1 1 0 1 0 0 1— 9
Gerber, H., 21 yds	1 0 1 1 1 1 0 1 1 0 0 1— 8
Stevens, 26 yds	1 1 1 1 0 0 0 0 1 1 0 1— 7
Nobel, 21 yds	1 1 0 0 1 0 1 1 1 0 0 1— 7
Biedeman, 26 yds	0 1 1 1 1 1 0 1 0 0 1 0— 7
Schroth, 21 yds	0 0 1 1 1 1 0 0 0 0 1 1— 6

Dase took first medal, and W. E. Gerber, in tha 11 class, won second. The next was a freeze-out at 21 yards, in which there were thirteen contestants. Sheplar held out longest, killing eight birds, Saterfield and Todd staying with him to this point.

The next freeze-out was won by Watson and H. Gerber, who divided the pool on their sixth birds.

Several other matches were shot, mostly freeze-outs, W. E. Gerher winning one, H. Gerber another, and the rest being divided among several others.

The Scott Trophy.

Last Saturday the shooting match for tha Scott trophy came off at Adams Point near Oakland. The shooting was governed by the State Sportsmen's Association rules, at clay pigeons. Edward Spaulding was tha winner, breaking fourteen out of fifteen clays. Following ara the scores:

Spaulding	1 1 1 1 1 1 0 1 1 1 1 1 1—14
Ellis	0 1 0 0 0 1 0 1 1 1 1 0 1 0 0— 7
Berton	1 0 1 1 0 0 1 1 0 withdrawn— 5
Golcher	1 0 1 1 1 1 1 1 0 1 1 0 1 0 1—11
Rector	1 0 1 0 1 0 0 1 1 0 1 1 1 1 0— 9
Scott	0 1 1 1 1 0 0 0 0 0 1 1 0 0— 7
Havens	1 0 1 1 1 1 0 1 1 1 1 1 1 1 0—12
Tuttle	1 1 1 0 1 1 1 1 0 1 0 1 1 1 0—11
Henshaw	0 0 withdrawn
Williams	1 1 1 1 1 1 1 1 1 0 0 0 0 1 1—11
Bennett	0 1 1 1 1 1 1 0 1 0 1 0 0 1 0— 9

To-morrow the Pacific Gun Club will hold its second shoot of the season at Birds Point, Alameda, for the club's first and second medals. The conditions of the shooting will be a twelve-bird handicap, after which several pool matches will probably come off.

A return pigeon shooting match between Geo. Dietzler of Biggs and J. T. McIntosh of Chico, for $100 a side, will be shot at Biggs, June 2.

Martinez has a new gun club.

The Countenance as Indicative of a Horse's Temper.

Thera is a notion abroad that a horse who "shows the white of tha eye" is inclined to be vicious; and, like many other notions of the sort, this appears to have some truth for its foundation, though tha truth has been somewhat distorted in the dednctions. Animals in general show only the transparent part of tha eye; man and the hog are among those in whom the white of tha eya is prominent. Some—very few—horses show tha white of the eya naturally; many do so by a habit of turning their eyes npon any person approaching them, and this particnlarly when they are in their stalls, and which glance ascant necessarily discloses more or less of tha white of the eya. Now, this oblique or retrospective cast of the eye may certainly be—and mostly is, perhaps—accompanied with some thought or inclination of biting or kicking; but, on the other hand, it may be tha effect of habit, of a playful disposition even, and so may not portend any evil. We have met with many cases of both descriptions where vica was, and whera vica was not present, but we can not add that we have encountered such a majority of the former description as to pronounce "showing the white of tha eye" and infallibla indication of a vicious disposition.

While we speak on the snbject of tha eye, we may add that there is a very great variety in eyes, and in the expression given by them; hence ona reason for tha interminable differences in the conntenances of animals as well as of man. An over-full, or exceedingly prominent eye has a sort of unnatural expression about it which often turns out to amount to "foolishness," and sometimes such horses appear to be near-sighted. Opposed to this, we meet with tha small, sunkan, dark-looking eye, which creates a suspicion about temper, and particularly when an expression of what is called "sourness" is to be observed in it. We have seen several instances of viciousness in horses with such eyes, and therefore are biased against them; at the same time we have known horses with such sonr, ill-tempered looking eyes, after having been cured of their vica, turn out to be the very best of their kind.—*Prairie Farmer.*

THE RIFLE.

Shooting at Newark Park.

A pleasant little matinee of militiamen was held at Capt. Wildermuth's Newark Park last Saturday. There were present Col. Ranlett of the Fifth Infantry, Lieutenant Fredericks of F of the First Regiment, Lieutenant Klein of C of the First Regiment, and Messrs. Logan, Crawford, McKibben, Anderson and Daniels, Company A, Fifth Infantry; Loryea, Coykeudall, Company B, Fifth, and McDonald, Kellogg, Oakland Light Cavalry. After inspecting the beautiful grounds of this popular park a team match was shot with the following resnlt:

Ranlett	4 4 4 4 4 4 3 4 3 3—37	
McDonald	6 4 5 5 4 3 4 4 4 4—42	320
Daniels	0 4 4 4 4 4 5 4 4 2—35	
McKibben	3 4 4 3 4 4 3 4 4 4—37	
Anderson	3 3 4 4 3 5 6 3 4 3—37	
Kellogg	4 4 4 6 4 4 4 6 4 4—42	
Klein	4 4 6 4 4 4 4 5 5 4—43	
Logan	3 4 4 4 4 4 4 4 4 4—39	
Crawford	4 4 5 4 4 4 4 6 3 4—41	219
Fredericks	4 0 4 5 4 6 2 4 4 4—36	
Loryea	4 4 3 6 4 4 4 3 4 4—36	
Coykendall	0 4 4 0 3 2 0 0 4 3—20	

An adjournment was then had for lnnch, after which sides were again chosen, the losers to pay the day's expenses. Scores as follows:

McDonald	4 4 3 4 4 4 4 3 5 4 4 4 4 5 5—61	
Kellogg	4 5 5 4 4 4 4 4 5 4 5 5 5 6 5 5—68	
Fredericks	3 6 3 4 5 3 3 5 4 4 4 4 5 5 4—61	376
Ranlett	4 4 3 4 4 4 4 4 4 3 5 5 5 4 3—60	*8
McKibben	6 4 3 5 4 4 3 5 5 4 4 5 4 6 5—65	—
Anderson	4 5 4 4 4 3 4 4 5 4 4 4 4 4 4—61	368

* Eight points allowed as agreed upon.

Klein	4 4 5 4 4 4 5 4 4 4 5 4 5 4 4—64	
Crawford	3 4 4 4 4 4 5 4 4 5 5 5 4 5 4—64	
Loryea	4 4 3 4 4 4 4 4 4 4 5 4 3 4 5—60	360
Daniels	5 4 3 4 4 4 4 4 3 5 2 4 5 5 4—60	
Logan	4 5 3 4 4 4 4 4 4 4 3 4 5 4 3—60	—
Coykendall	3 3 4 3 4 3 3 3 4 4 4 3 4 4—52	8

It was agreed by those present that a monthly reunion of military riflemen be held at the same place—all comers invited—and teams to be chosen from those present to shoot for the expenses and dinner. We are glad to notice the presance of Messrs. Loyrea and Coykendall of San Jose. The fact of their leaving their business and coming such a long distanca shows their enthnsiasm in target practice. More of the San Jose riflemen were expected np and had they known of the fun they would have had they would not missed tha affair for considerable.

A Day at Camp Taylor.

The old veteran company "City Guard" Company B, 1st Regiment Infantry, 2nd Brigade N. G. C., Capt. S. J. Taylor, went up to Camp Taylor, Marin Co., on tha 19th with a few invited guests; the day was very pleasantly spent and every one came back delighted. Rifle shooting at 200 yards was the feature of the day. The winners and scores follow:

Officer Field	4 4 4 5 6 4 5 4 4 5—44	
J. I. Taylor	4 4 4 4 6 4 4 5 5 4—43	
L. R. Townsend	4 4 4 4 4 3 4 5 5 4—41	
Geo. Evans	5 4 3 6 3 5 4 3 6 3—40	
L. Knowlton	2 6 5 3 5 4 5 3 4 4—40	
Mr. Manson	5 2 3 4 5—19	
E. Taylor	5 3 3 3 4—19	
Geo. Bardech	3 5 3 3 3—17	
S. J. Taylor	3 2 3 3 4—15	
W. Beahr	2 4 0 4 4—14	

The National Rifle Association of Great Britain has cabled to the American National Rifle Association that the screw wind-guage will be allowed in the International match at Wimbledon, and that the foresight must be "barleycorn." Thus the reported hitch in the British-American rifle contest, 1883, is settled to the satisfaction of all concerned. America has thus far conceded every point to the British riflemen, and, in order that there should be no question as to tha nse of a wind-gange, Sir Henry Halford and the Committee of the British Rifle Association were formally warned at Creedmoor last year that our team would use them during tha match of 1883. In addition, the Secretary of the British National Rifle Association was officially notified in January last that our team wonld use the American wind-guage, so that they, the British, had plenty of time to procura them if they so desired. They adopted a wind-guage, bnt fell back to the old plan of tha slide, and endeavored to restrict our rifleman to its use. This was most strennously objected to, and it finally became "the screw wind-guaga or nothing." The frea expressions given by our directors and riflemen on this snbject have shown our consins that America was not willing to concede another point, so feeling that nothing further was to be gained, and being satisfied that they have a snre victory in either event, they make a virtne of necessity, and, per cable, allow the screw wind-gange.—*New York Spirit.*

The National Rifle Association of Great Britain has, in compliment to the American National Guard team, which will visit England in July next, included two special competitions in the Wimbledon programme, at 200 and 500 yards. One of these has been named after Colonel John Bodine, Captain of the American team of 1882, and will have thirty-two prizes, ranging from $50 to $5. Rifles and men, instead of team practice and discipline, will be the test of thesa matches.

If, asks the *Poultry and Farm Journal*, tha value of tha poultry products of the United States foots up the anormons sum of six hundred millions of dollars annually, which is probably not estimating it too high, can any thoughtful man regard it is a small or insignficant industry? We are glad to see that farmers who should, of all classes of producers, be interested in this matter ara waking up to the importanca of poultry breeding as a business.

Tha Wyoming Stock Growers' Association, which recently had its meeting at Cheyenne, is composed of 200 members, representing 800,000 head of cattle and 100,000,000 in capital. Tha section of Wyoming and western Nebraska thus occupied comprises 125,000 acres, nearly all excellent grazing land. Two hundred and sixty thousand head of cattle were shipped from this section.

Tha four-handed match for the $200 purse among Pearson, Fay, Swan and Linvilla comes off to-morrow. Tha conditions, as hefora stated, are twenty-five birds each, to be shot under the rules of Hurlingham, the best man to taka the purse.

A band of from 10,000 to 12,000 sheep will be driven from Douglas county, Oregon, to the California markets this spring.

Treatment of Windgalls.

The utility or otberwise of treating windgalls mainly depends on the cause from which tbe tnmors thus named arise in any particnlar case. Windgalls are due to a variety of canses. Tbose whicb are due to tbe effect of work, concussion, and such like causes, though they may be temporarily got rid of by such means as we shall name below, will generally reappear as soon as the horse is again subjected to tbe causes which originally induced tbem. Tbose, however, which have arisen from the effect of accidental sprains of ligaments, of joints, or of tendons, are not equally likely to reappear, if tbey can once he reduced, because the causes are not equally likely to recur. Rest in citber case is the primary requisite. Rest will allay tbe irritation in the part affected, and with the cessation of the inflammatory action which produced it, the increased secretion will soon cease. Friction and pressure, by ronsing tbe action of the blood vessels and absorbents of the parts, will also assist nature to take np the extra secretion. A sweating bandage, that is, a wet bandage covered witb oiled skin, and this again covered with an ordinary flannel bandage, has often a great effect in reducing windgalls. In the hock, and in some other parts, which cannot be conveniently bandaged, pressure may sometimes be successfully applied by means of a carefully adjusted elastic steel truss, snch as are made for the purpose. This will often answer well for what is known as thoronghpin. In case, however, of bogspavin, an india-rubber bandage, with a hole in it, through whicb the point of the hock may pass or project will he most convenient. If tbese measures fail, a blister, or a succession of blisters, may be tried; but as a general rule, no permanent benefit results from treatment.

If the windgalls are of recent origin, the milder measures, commended above, will remove, temporarily at least, the enlargements; whilst if they are chronic, even severe measures will fail to affect them. In good truth, in chronic cases, the greater part of the enlargements of the kind under consideration will generally be found to consist of thickening of the integuments and of organized deposits which cannot he moved. As a general rule, it is best not to apply treatment to these enlargements. They seldom produce lameness; and when they do, or at least are supposed to do so, the cause of the lameness will generally be fonnd to be sprain of the ligaments or tendons, and of their sheaths, and of which the enlargement—so-called windgall—is only a result. In some cases, however, the enlargement becomes of so great size as to be a serious eye-sore, or even to incapacitate the horse for fast work. Windgalls have a marked tendency in many cases to decrease as the age of the animal advances, and it is not uncommon to find the legs of an old horse quite, or almost quite free from them although in his younger days he may have been much disfigured by them. The same is the case with splents. The cause of their disappearance is no donbt the generally decreasing energy of the reproductive syetemin old age. Knaves and dealera in horses, with whom it is, of course, a great object to make a horse appear to the best advantage, are great adepts in getting rid, temporarily, of windgalls. The means they usually adopt are those recommended above, namely: Freedom from work, pressure, friction, sweating, bandages, slight doses of physic, and laxative diet. The purchaser, however, when he pnts such a horse to work, will generally he surprised at the rapidity with which these "lumps" develop.

Rifleman.

The last of the Glencoes died at Red Bluff, Cal., on Monday night of thie week, being no less than the famons Oregon stallion Rifleman, brought to this city in 1858 by John P. Welsh, brother of Jerry Welsh, who is now route agent on the Northern Pacific cars hetween here Puget Sonnd. Rifleman was 28 years old and not 29 at the time of his death, as reported in the telegrams to the daily press. We saw him in the fall of 1857 at Lexington, in the stahle with his own brother, Marksman. He had gone lame at exercise and had a bandage on his off fore leg. The following winter he was sold to John P. Welsh, who had charge of the imported horse Consternation and several others belonging to General Burnett of Syracnse, N. Y. Mr. Welsh also bought of A. McFadden, ahout the same time, the chestnut mare Mary Chilton, also by Glencoe, afterwards famous as the dam of Thad Stevens and grandam of Forest King, recently hrought here from California. The horses were brought across the isthmns and arrived here in Febrnary or March, 1858. The colt was very speedy, hut Mr. Welsh knew nothing about training, and the consequnce was that Rifleman was several times heaten hy very inferior horses for want of condition. He stood at Howell's Prairie, Marion conuty, in 1860, and the following year tnrned np at Red Bluff, Cal., where he heat Volscian, Pluck and Black Maria a mile and repeat in 1:46, 1:46; and on the next day beat Dashaway mile heats, three in five, in 1:48, 1:47½, 1:45, and went into the ad. The track was thirty-two yards short of a mile, but so much under foot that we would rather rnn a horse a full mile on the Oakland track than on the Red Bluff track as it then was. In the fall he started against Volscian at San Jose at a mile and repeat, and was beaten in 1:54, 1:55. This ended his turf career. From 1864 to 1866 he was made the enbject of much costly litigation hetween John G. Doll of Red Bluff and John H. Anderson of Jacksonville in this State. On the death of the latter gentleman, he was sold to J. C. Tyler of Tehama, Cal., for $1,800 and ended his days on that gentleman's farm. Rifleman was brother in blood to Novice, the dam of Norfolk, and great things were expected of him in the stnd. He only got one really good racer, Nell Flaherty, who won a third heat in 1:44½. He also was the sire of Derringer, Target, Al Bascomh, Nettie Brown, Turf Gallery, Ben Franklin, and several other useful but not valuable horses. All his winners, with the exception of Nettie Brown, were from daughters of old Belmont, tbe Godolphin of the Wilderness. —*T. B. Merry in Oregonian.*

Castration is not generally performed nntil the colt is from one to two years old. The best criterion as to when the animal ought to be castrated is to observe his exterual form. If there is a want of chest, or if the shoulders are thin, and his form is meager, it will he best to defer it for a while. On the contrary, if there is a disposition in the colt to become heavy or gross, the operation shonld not be delayed. Tbe month of May is well suited for the performance of the operation; so is September, if the colt has to be operated on before winter. The weather and temperature of these months are most congenial for tbe operation. Very few premonitory steps need to be taken before the colt be castrated, keeping it without food over night being all that is required. Should the weather happen to be cold, the animal ought to be honsed for a few days.

To-day the American trotting horse, among the various breeds of horses, stands ont as the best horse for all purposes combined on the face of the globe.

George Wilkes.

George Wilkes, founder of the Wilkes trotting family, was a hrown horse, foaled in 1856, bred by Col. Felter, Greenwood Lake, Orange County, N. Y., and got by Rysdyk's Hamhletonian. Tbe dam of George Wilkes, Dolly Spanker, was a celebrated road mare, whose speed was never developed upon the turf. Sbe was an animal of wonderful courage and great endurance, and possessed natural trotting speed sufficient to pull a road wagon a 3:30 gait. Her dam and grandam were both celebrated roadsters of unknown breeding, wbose speed was never developed. Dolly Spanker was foaled in 1848, ber sire being old Henry Clay, son of Audrew Jackson. His sire, Young Bashaw, was a son of the imported Barb Grand Basbaw, out of Pearl by Bond's First Consul, the dam of Pearl being a daughter of imported Messenger. The dam of Andrew Jackson was a black mare, of nnknown blood, which hotb paced and trotted. The dam of Henry Clay was a trotting mare of some celerity, whose breeding is unknown. She was called tbe Surry mare, and is supposed to bave been a Canadian, altbougb tbere are tbose who believe tbat she originated in the vicinity of Surry, N. H., and was of Morgan stock. Dolly Spanker died in giving birth to Wilkes, wbich was her first foal, and tbe colt was raised by hand upon cow's milk. He grew to be a finely-shaped, compact, hardy animal, about fifteen hands in beight at the withers, and somewbat higher bebind, with a mnscular development of loin, qnarters and gaskins that conld not be surpassed, giving him a propelling power that enabled him to successfully compete with the very best trotters of his day. Horsemen who knew bim well admit tbat in his prime be was as near a perfect model of a horse as they ever saw, and as pure gaited a trotter as ever set foot upon the turf. The development of his speed began at quite an early age. He won his first race at Fashion, Long Island, August 1, 1861, where he trotted under the name of Robert Fillingham, by which he was known during several years of his turf career. Septemher 10, 1862, he beat the renowned Ethan Allen over the above course in straight heats, time, 2:24¾, 2:25¾, 2:31, winning a purse of $10,000. June 2, 1863, he beat Rockingham to harness over the Fashion Course, and a week later heat the same horse to saddle, best time, 2:24. At Philadelphia, Octoher 19, 1863, he beat Lancet, known also as Know Nothing, a son of Vermont Black Hawk, to harness, distancing him in the second heat, which was trotted in 2:24. This was the last race that he won nnder the name of Robert Fillingham. Over the Union course, L. I., Octoher 26, 1865, he heat Commodore Vanderhilt to harness, and Novemher 6 of the same year heat him again in a race to wagons. June 8, 1866, he beat the famons trotting mare Lady Thorne over the above track in straight heats, hest time 2:25, and six days later beat her to wagons at the same place in straight heats, time 2:27, 2:25, 2:25¾. During his trotting career he also beat the noted trotters Rhode Island (2:23½), Lucy (2:18), and American Girl (2:16½). His record, 2:22, was made in a race trotted at Narragansett Park, R. I., October 13, 1868, against Rhode Island and Draco Prince. The first heat was taken hy the latter in 2:25, the next three and race were won by Wilkes in 2:22, 2:24½, 2:25, Draco Prince heing distanced in the last heat. His record was hy no means the limit of his speed. Those who have seen him trot are confident that he could have lowered it four or five seconds, had he heen sent for all he was worth. During his trotting career he won twenty-seven races, getting $50,150 in pnrses. He won in all fifty-six heats in 2:30 or better. He imparted the natural trotting instinct and his own resolnte will to his offspring to an extent seldom if ever equaled by any other sire. Twenty of his get are already in the 2:30 list, eight of which were added last season. Three of the above have records helow 2:20, showing that his get have quality and endurance capable of training on and improving from year to year. During the past season twelve of his sons and daughters won 125 heats in 2:30 or hetter, which is believed to he more than the get of any other sire ever accomplished in a single season. His rich trotting inheritance enahled him to get first-class trotters with a uniformity seldom equaled. His son, Yonng Wilkes, ie sire of William H, with a record of 2:18½ and sixty-one heats to his credit in 2:30 or hetter. Another son, Red Wilkes, got the wonderful trotting colt Phil Thompson, whose three-year-old record, 2:21, has never been heaten hy a trotter of that age. Another son, Alcantara, owned hy Elizur Smith of Lee, Mass., is the sire of several colts owned in Kentucky and prononnced hy good jndges to be among the most promising young trotters in that State, many of tbem being entered in the colt stakes of the present season. Another son, Geo. Wilkes Jr., owned by S. S. Honghton, is sire of some of the most promising young trotters and best roadsters to he found in New England. Early maturity is a marked characteristic of the Wilkes family, while excellent road qualities is another, and in these respects they are not excelled hy any other hranch of the Hambletonian family.

Training on the Ice—The Question of Tips.

EDITOR BREEDER AND SPORTSMAN: I have read with more than passing interest your able article on the advantage of ice in the development of the speed of young trotters; also your intelligent discussion of the subject of tips. Having had some experience in schooling bahy trottera in northern New York, where we are obliged to utilize the smooth surface of our rivera or remain passively idle six months of the year, I am prepared to concur fnlly with the views you advance.

Such famons trotters as Moose (2:19½), Deck Wright (2:19), Adelaide (2:19½), Hiram Woodruff (2:24), Orient (2:24), Chestnut Hill (2:22), Valley Chief (2:24), and a score of others I might mention were each and all trained on the St. Lawrence before they ever participated in races on the turf.

I am fnlly satisfied that for road or turf work tips, intelligently applied to a colt's foot from tbe time any protection or balancing weight is required, will not only serve every essential purpose heretofore snpplied hy ehoes, hnt will result in maintaining the soundness and perfection of the foot.

It is qnestionahle, however, if tips can be used while training trottere on ice, as calks at both the toe and heel are essential, not only to prevent slipping, but to obviate the concussion.

Tbere is, in my opinion, a danger also in tbeir abuse when applied and used on horses long accustomed to carrying shoes, which have of necessity weakened their feet. Radically transferring the weight from the rim to the frog without gradually accustoming the foot to the cbange hy a rnu to grass or by careful driving, would be liahle to produce lameneee, and tbereby cause tbe tip to he condemned. That quarter cracks, corns and contracted heels will never trouhle feet which have never worn other protection than tips is indicated by the experience of the cowboye on the plains, who are in tbe saddle from morning till night, on pomes which have never worn a ehoe. Yon are right in your theory, and I expect to see your views recognized and appreciated. Yours truly,

A. CORBIN JR.

Palace Hotel, San Francisco, May 20, 1883.

THE KENNEL.

Staunchness in Greyhounds.

Breeders of greyhounds bave plenty of opportunities in tbese days to study all the successful strains of blood, as the seasons, if no longer than of yore, are much more fully occupied by an increasing list of coursing fixtures, and it has become a necessary evil to see many important meetings clasbing. In consequence of this state of affairs winners of stakes have cropped up all over tbe country in far greater numbers than has been the case in any precedinq season, and tbere have been also two kinds of winners, namely, tbose tbat bave performed in the open country meetings, and those that have distinguished themselves spccially within the inclosed ground meetings. Tbere may be some difference in the two kinds of performances, as all the old requisites of a greyhound are not absolutely necessary under the new order of tbings. For instance, stoutness was a quality tbat no courser could well dispense witb. However fast a greybound was he could never be wortb backing for £50 unless he could stay, when tbe odds would be tbat to get tbrongb five courses at Ashdown, Newmarket or Altcar, he would have one regular grueller, if not more, tbat would test every bit of steel in him. Fencing again was an absolute requirement for most countries, as tbere was no knowing wbat jumping he would get. And tbere would be otber qualities as well, the possession of which would be mucb minimized by circumscribed courses of seven furlongs. It is an open question wbetber some improvement may not be brought about at the inclosed meetings by baving two kinds of coursing fields, and the idea bas been mooted for High Gosforth Park to have a fence or two in one of tbe fields. Tbis might be improved upon perhaps, hy having the length of the running ground increased hy two or three furlongs, as the fence would neutralize tbat disadvantage to the hare by her getting away again at each fence. Again, it is more than probable that the experience learned already in the management of hares will provide for their being a great deal stouter than hitherto, the improvement seen in the hares at Kempton after being artificially fed supplying a strong indication that this will be the case, and it may therefore become qnite as necessary to have as stont greyhonnds for inclosed courses as hitherto it has been deemed expedient for the open country. There are other reasons also, besides even the wish on the part of all sportsmen tbat the greyhound should not deteteriorate, which he would do if hred for sprinting, for, supposing even the speedy one ie the genuine article to get nowadays, it must he remembered that a very capital market for greyhounds for many years to come muet he Australia, and in that conntry it is said they must have stont ones, while their buyera, too, have shown a strong *penchant* for our stoutest blood. Again, it is said consring is to be largely introduced into America, though it is now principally confined to Colorado, where the hares are of quite a different type from ours, being nearly as hig again, and they will live etraight away hefore a brace of greyhonnds for three miles. "Send me two or three big powerful dogs that are very fast, and that can stay forever, as they are the only ones that can tackle what we call our jackrabbit," was the message I saw to a friend from a Colorado farmer, and an American told me that as soon as they get an inclosed ground near New York the next step will be the introduction of a big consignment of Colorado hares. It would seem, then, to be very advisable for greyhonnd breeders to stick to the old ideas of breeding—namely, that white feathers are certain to increase by being perpetnated, and that the aim of every one should be to hreed high for all qualities, but that stoutness, above everything, is the greyhound's highest attribute.—*Barumite in Bell's Life.*

Barumite has fallen into a mistake in the above article and we are glad to see that in the last number of the *Chicago Field* to hand attention is called to the error. Coursing in America is not principally confined to Colorado. It is principally confined to California. In Colorado there is not, so far as we can learn, a single coursing club, and tbe few scattered greyhounds there are from California stock. In California there are many coursing clubs. The California, Dixon, Red Bluff, Livermore, Modesto and Galt clubs are all California clubs. Now if the Colorado or New York people are importing greyhounds and tbe Colorado jacks are the game they are to course we advise them to get a few dogs from this State. We will guarantee that in San Francisco can be procnred a brace of dogs for the moderate price of $200 that will "turn" the biggest, fastest and staunchest Colorado jackrabbit before he has run 500 yards. There are hares in California as hig and stout as tbe Colorado game, and in eight years' experience, during which time the writer has eeen over 800 hares run and has either slipped or judged at least 500 courses, he never yet saw a hare lead the dogs half a mile without a "turu." He has seen often enough in the fall of the year and towards the end of a match when the dogs were well run down, a hare lead a pair a merry cbase of two or three miles and then get clear away hy flinking the dogs. But a good pair of California dogs ench as Meare's Monarch, Minnehaha, Chief of the Canyon, Paul Joues, Ruler, and dozens of otber wiuners, never allow a hare to escape in a hole nor to turn many times before a kill is made. It is a noticeable fact tbat the dogs imported from Englnnd lack bottom and staunchness. In two or three generations, and when crossed with the acclimated stock, they gain in that quality. The last pair of imported dogs the writer calls to mind hoth quit on the first hare they ran in public tbough they ehowed a fine hurst of speed at the start. Tbe proof of bottom iu California doge is sbown hy the numher that have heeu run until tbey dropped dead alongside of their dead game.

The Colusa Agricultural Society now owes only $1,800, and has money enough on hand to pay its expenses until its rent comes in. It has property worth, for farming purposes, $5,000 or $6,000. It may be said to be fluancially iu a good condition. The society would have undertaken a fair tbis fall had it not heen for the short crops all arouud.—*Chico Enterprise.*

Ajax, the American trotter that took part in tho recent Australian trotting race, is twenty years old.

The *Pajoronian* says that a horse market is one [illegible] needs of Watsonville.

RACES.

GOLDEN GATE

Agricultural & Mechanical

Fair Association.

DISTRICT NO. 1—OAKLAND, ALAMEDA COUNTY.

Races. Races.

SPEED PROGRAMME.

MONDAY, SEPT. 3, 1883.

No. 1—Running; Golden Gate Purse, $500, for all two-year-olds; three-quarter-mile dash; $300 to first horse, $150 to second and $50 to third.
No. 2—Same day; running; Alameda purse, $500, for all three-year-olds; one-and-one-quarter-mile dash; $300 to first horse, $150 to second, $50 to third.
No. 3—Same day; running; Purdee Purse, $500; free for all; one mile and repeat; $300 to first horse, $150 to second, $50 to third.
No. 4—Same day; trotting; free for all horses that have never beaten three minutes; purse $600; $360 to first, $180 to second and $60 to third.

TUESDAY, SEPT. 4.

No. 5—Trotting; purse $800; free for all four-year-olds; $480 to first horse, $240 to second and $80 to third.
No. 6—Same day; pacing; purse $400; free for all pacers that have never beaten 2:20; $240 to first horse, $120 to second, $40 to third.
No. 7—Same day; trotting; purse $200; free for all big horses that weigh 1,400 pounds or over; $120 to first horse, $60 to second, $20 to third.

WEDNESDAY, SEPT 5.

No. 8—Running; California Record purse; one-mile dash; purse $1,000, $600 to first horse, second to save entrance; for two-year-olds, three-year-olds, and horses of any age; to be run in classes, the two-year-olds in one class, the three-year-olds in one class and the horses of all ages in one class, under the following conditions: The horse beating the record in California in his special class to take the first money; the horse making the next best time, all the classes being considered, to save his entrance; should the record be beaten in more than one class, then the first money to be divided equally among the winners, but should the record not be beaten in any of the classes, then the horse or horses coming nearest to it shall be entitled to first money.
No. 9—Trotting; same day; purse $1,000; free for all horses that have never beaten 2:24; $600 to first horse, $300 to second, $100 to third.

THURSDAY, SEPT. 6.

No. 10—Trotting; Purse $750; free for all horses that have never beaten 2:35; $450 to first horse, $225 to second and $75 to third.
No. 11—Same day; trotting; purse $500; free for all three-year-olds; $300 to first horse, $150 to second and $50 to third.

FRIDAY, SEPT. 7.

No. 12—Running; Combination Purse; purse $500; free for all; one-quarter-mile dash, to be followed by one-half-mile dash by the same horses, with fifteen minutes between heats, the horse making the best average time in the two heats to take first money; second horse to save entrance.
No. 13—Same day; trotting; purse $800; free for all horses that have never beaten 2:28; $480 to first horse, $240 to second and $80 to third.

SATURDAY, SEPT. 8.

No. 14—Same day; competitive military and cadet drills; purse and conditions will be named through the press after conference with the various military companies.
No. 15—Trotting; purse $400; free for all two-year-olds; $240 to first horse, $120 to second and $40 to third; heats of a mile.
No. 16—Same day; trotting; purse $1,200; free for all horses that have never beaten 2:20; $720 to first horse, $360 to second and $120 to third.
No. 17—Same day; bicycle race; dash of one mile; free for all; purse $50, $35 to first and $15 to second; entrance free; the nominations to be made, at the latest, on the first day of the fair, at 3 p m., with the secretary, at the track.
No. 18—Same day; ladies' riding tournament; prizes and conditions to be named hereafter.

CONDITIONS.

All trotting and pacing races are best three in five, except the two-year-old trot, unless otherwise specified. Entrance fee, ten per cent on all purses, to accompany nomination.
In all, five to enter and three to start. National Trotting Association rules to govern trotting, but the board reserves the right to trot heats with any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
Those who have entries in the running purses must name to the secretary, in writing, the horses they will start on Monday, on the Saturday previous; those on Friday, the Wednesday previous. No money will be paid for a walk-over.
Horses entered in purses can only be drawn by consent of the judges.
Rules of the Pacific Coast Blood Horse Association to govern running races, except as specially provided.
All entries to be made in writing, to give sex, color and marks of horse, also name and residence of owner, and, in running races, colors to be worn by rider.
Entries to all the above races to close with the secretary on Wednesday, August 1, 1883.
Write "Entries to Races" on outside of envelope.

SPEED PROGRAMME
OF THE

Third District

Agricultural Ass'n

AT

Chico Chico

COMMENCING TUESDAY, AUG. 28, 1883.

DIRECTORS:

A. B. COLLINS, WM. HAWKINS, JAMES SHELTON, J. W. E. MONTGOMERY, L. H. MCINTOSH, H. C. WILSON, U. S. NYE, U. C. MASON.

OFFICERS:

C. C. MASON, President; J. H. KRAUSE, Secretary; CHAS. FAULKNER, Treasurer.

$3,000 IN Stakes & Purses. $3,000

FIRST DAY, TUESDAY, AUG. 28, 1883.

No. 1—Trotting race; 3-minute class; mile heats, best three in five, to harness and to rule; for a purse of $800; first horse to receive $480, second $240, third $80.

SECOND DAY, WEDNESDAY, AUG. 29.

No. 2—Dooley Stake; running race; three-quarter dash for all two-year-olds; entrance $25; p. p.; $100 added; second colt to save entrance.
No. 3—Union Hotel Stake; running race; free for all three-year-olds; entrance $25, p. p.; $150 added; second horse to save entrance money; 1½ miles.
No. 4—Reavis Stake; running race; three-fourths of a mile and repeat for a purse of $200; first horse to receive $150, second $50, entrance free.

THIRD DAY, THURSDAY, AUG. 30.

No. 5—Trotting race; 2:40 class; mile heats, best three in five, to harness and to rule, for a purse of $200, for all horses owned in the district; first horse to receive $120, second $60, third $20; Roanoke and Dutchman not barred.
No. 6—Pacing race; 2:30 class; mile heats, free for all, best three in five, to harness and to rule, for a purse of $300; first horse to receive $180, second $90, third $30.

FOURTH DAY, FRIDAY, AUG. 31.

No. 7—Trotting race; 2:22 class; mile heats, best three in five, to harness and to rule, free for all, for a purse of $800; first horse to receive $400, second $200, third $120, fourth $80.
No. 8—Trotting race; for a purse of $300; free for all four-year-olds owned in district; first horse to receive $180, second $90, third $30.

FIFTH DAY, SATURDAY, SEPT. 1.

No. 10—Burk & Mansfield Stake; running race; one-half mile and repeat; freefor all; entrance $25, $100 added, second horse to save entrance money.
No. 10—Fashion Stable Stake; running race; dash of two and one qnarter miles; free for all; entrance $50, forfeit $25, $300 added, second horse to save entrance money.
No. 11—Consolation Purse; running race; single dash of one and one-eighth miles, for a purse of $250, for all beaten horses; entrance free; first horse to receive $150, second $75, third $25.

CONDITIONS AND REMARKS.

National Trotting Association rules to govern all trotting and pacing races.
In all trotting and pacing races, five to enter, three to start. Entrance, ten per cent, to accompany all nominations.
The Pacific Coast Blood Horse Association rules to govern all running races.
Non starters for running races will be held for entrance.
No money paid for a race without a contest.
Non-starters must be declared out the day previous to the race they are engaged in, before 8 o'clock p. m.
Horses distancing the entire field in one heat will be entitled to first and third money only.
Horses entered for purses can only be withdrawn by consent of the judges.
All entries for races to close with the Secretary at Chico, August 1, 1883, at 11 o'clock p. m.
The Board of Directors will have absolnte charge of the track and grounds during the week of races, and guarantee that they will be kept in first-class condition.
The above rules in regard to entries and conducting the races will be strictly enforced in every respect, and all purses and stakes will be paid after the judges have rendered their decision, and before leaving the stand.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TABles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY

Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:21½; another with a record of 2:26, made in 1882; another with a record of 2:28½, and a grandson with a three-year-old record of 2:23½, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20¾ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15½ to 2:27½. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockbolm's American Star; third dam by Rob Roy, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23½ to 2:28¾, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have added to the list eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T., 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¾, by Happy Medium Jr., and Carrie B, 2:28¾, by Enfield G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege of return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDER WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address

WILLIAM T. WITHERS,

2-13y1 Lock box 392, Lexington, Ky.

ASHLAND PARK

TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Honest. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

2-17y1 **R. J. TREACY,** Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TO

Sportsmen & Pleasure-Seekers,

TH

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT OOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA THE

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggagemen. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt Agt.

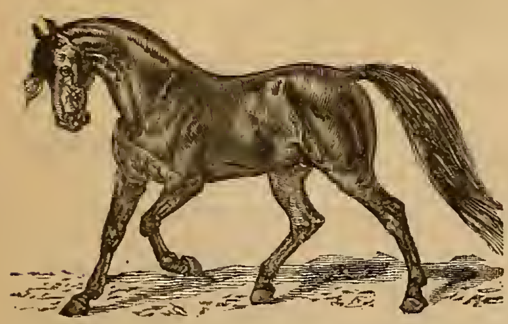
STALLIONS.

UNDERMAN.



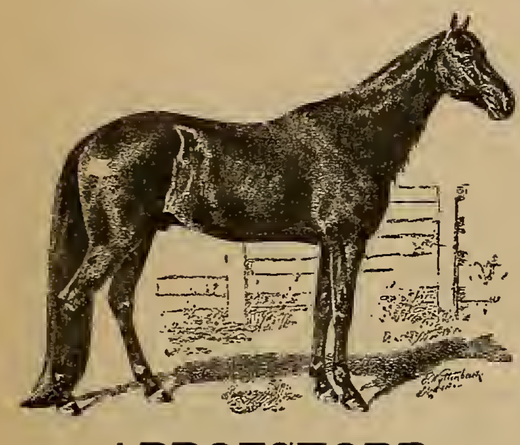
SIRED BY ELMO, DAM BY TOM HYAR SON OF OLD Belmont, will make the season of 1883 from March 1st to July 1st at the Bay District Track, San Francisco.

Underman is a dark chestnut, with blaze face and left hind foot white. Coming six years old, 15¾ hands high and weighs about 1,100 pounds.

Terms, $20 for the season. Mares not proving w th foal can be returned next year free of charge. No responsibilities assumed for accidents. Apply to

FRED BENNETT,
Bay District Track, San Francisco.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2:21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Columbus. Woodford Mambrino hy Mambrino Chief, his dam Woodbine by Woodford, a thoroughbred son of Kosciusko.

Woodford Mambrino is recognized to be tbe best son of Mambrino Chief. His own record is 2:21¼, and there are a large number of his get in the 2:30 list. Among tbem: Abbottsford, 2:21¼; Convoy, 2:22¼; Magenta, 2:24¼; Lady McFatridge, 2:29; Dacia, 2:29¼; George A. Ayer, 2:30.

Besides those having public records, he is the sire of the two celebrated mares owned by Robert Bonner—Manetta and Malice. Manetta, with a running mate, and harnessed to a road wagon, trotted two miles in 4:27¼, and Malice trotted a trial, on the same track, a mile in 2:19¾. Woodford Mambrino is also the sire of Princeps, the sire of Trinket; record, 2:14. Woodbine is also the dam of Wedgewood, record, 2:19. Young Columbus, tbe sire of tbe dam of Abbottsford, has nine of his get in the 2:30 list, so that on both sides of the house there are notable performere. Abbotsford is a rich rosewood brown, 15¾ hands, and of very high form. His get are very promising, hie daughter Jasmine having won the Embryo Stake for yearlings in 1881, and every one which has been put in training has shown good speed.

TERMS.

Seventy-five dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season free of charge. Good pastnrage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

LOCATION.

Abbotsford will make the ensuing season, 1883, on the ranch of S. B. Whipple, Esq., San Mateo, season commencing Febrnary 15th and ending June 1st, 1883. For full hietory see the issue of BREEDER AND SPOBTSMAN of August 5th, 1882.

GEORGE BAYLIS, Agent, San Mateo, Cal.

MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,200 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

☞ George Wilkes has twenty representatives in the 2:30 list, of which 10 have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.

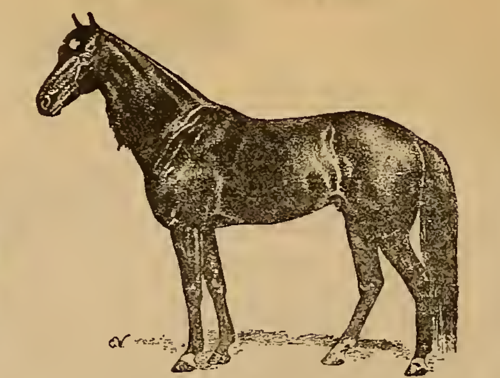
Will make the ensuing season, beginning February 1st, 1883, at STOCKTON.

In putting the price by the season at the low figure of $40 the owner does not acknowledge, thereby, any inferiority on the part of this horse to any other sire of Trotters.

IRVIN AYRES.

STALLIONS.

THE TROTTING STALLIONS



SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMING SEASON, FROM Mach 1st to July 15th, 1883, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

PEDIGREE.

Singleton is by Willie Schepper, a son of Rysdyk's Hambletonian, his dam Lightfoot (the dam of Pride) hy Flaxtail, a son of Pruden's Blne Bull.

DESCRIPTION.

Singleton is a dark hrown horse, tan flanks and mnzzle, a little tonch of white on hind feet aud one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was bred hy Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

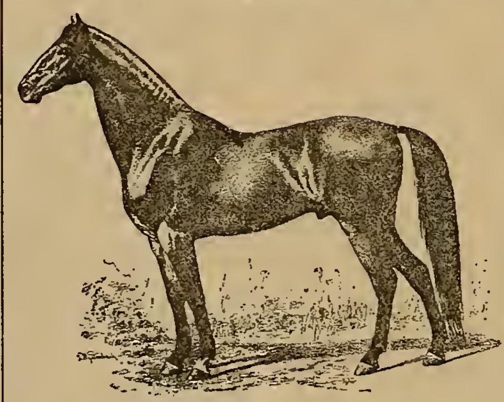
Fifty dollars the season. Mares not proving in foal will be hred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of train, aud taken to the ranch. Mares kept in any manner their owners desire, at reasonable rates. There is every convenience ou the place, boxes, paddocks and plenty of shade and water.

L A H A R P E

Will also make a short season at the above place on private terms. La Harpe is by Fame, a son of Alexander'e Belmont, his dam Prairie Bird by Flaxtail, the dam of Flight and Prompter. Address

J. T. McINTOSH, Chico, Cal.

The Fast Trotting Premium Stallion



ALEXANDER

WILL STAND THE PRESENT SEASON AS FOLLOWS: MONdays, Tuesdays and Wednesdays at Clark's stables, Santa Rosa. Balance of time at Fashion stables, Pelaluma.

Alexander is by Geo. M. Patchen Jr., the sire of Sam Purdy (2:20¼) Starr King (2:22) and Vanderlynn (2:22). Dam Lady Creim, by a son of Brown's Bellfounder, by imported Bellfounder. For full description, see BREEDER AND SPORTSMAN of Sept. 9, 1882.

Of Alexander'e get Tommy Dodd has a record of 2:24, Reliance 2:22¼, Nellie Patchen 2:27¼, Eudora 2:34¼, Inauguration three miles in 7:29—last mile in 2:26, Sonoma Boy 2:37. Alex. Button proved by his performance in 1880 to be oue of the best three-year-olds which have ever appeared in any country. He won the stake for three-year-olds at the State fair, beating Belle Echo, Annie Laurie, Len Rose and othere, winning tbe first, third and fifth heats and making a dead heat with Annie Laurie in the fourth; time, 2:34¼, 2:30, 2:29, 2:30¾, 2:35. At the fair of the Santa Clara Valley Association at San Jose he won, heating Belle Echo aud Len Rose; time, 2:28¾, 2:30¼, 2:33¾, 2:31¾. Belle Echo won the first heat. He won at Stockton, beating Honesty, Len Rose and Upright in straight heats; time, 2:32, 2:33¼, 2:32¼. In 1881, as a fonr-year-old, Button mdaea record of 2:26¾ over the Santa Rosa track. Dot Craig, by Alexander, has a private record of 2:29.

The Frasier team took first premium at the Sonoma and Marin District fair; also at Oakland for best carriage team.

Mares left at the City Front stables, San Frencisco, will he forwarded. For further informatian apply to

T. T. UNKLESS, Petaluma.

S T E I N W A Y.

TWO-YEAR-OLD RECORD 2:31¾; 3-YEAR-OLD RECORD 2:25¾.

TERMS

WILL SERVE MARES THE PRESENT SEASON AND ENDING July 1, 1883, at the stock farm of the late Daniel Cook, Danville, Contra Costa county, Cal., at $100 for the season, payable before the animal is removed. Mares not proving with foal can he returned free tho next season. Pasturage at $6 per month, and extra pains taken with mares in attendance, hut no liability for accidents or escapes. Mares sent in care of of McCleverty & Noblett, Fashion etable, Oakland, S. J. Bennett, Martinez, or D. S. Smalley, Haywards, will he forwarded immediately to the farm.

DESCRIPTION.

He is a rich bay; 15¾ hands high; long, flowing mane and tail'; two white hind ankles; remarkahle slyle and lofty carriage; has a good, resolute head, set on a stout neck; his shouldere are of the Hambletonian form—do not mount very high at the withers; has great length and capacions middle piece; plenty of bone and suhstance, and his gait is big and square.

PEDIGREE.

Steinway was sired by Strathmore.

First dam Abbess by Albion, the sire of Vanity Fair, with record of 2:24.

Second dam by Marsbal Ney, by imporied Emancipation.

Third dam by Bertrand, hy Sir Archy.

Steinway's dam is the dam of Solo with five-year-old record 2:28¾, and also the dam of W. S. Buckner's colt Currency that trotted as a yearling last fall in 2:46. See N. Y. "Spirit of the Times of November 18, 1882. Stratbmore is the sire of Santa Claus 2:17½; Chestnut Hill, 2:22½; Steinway, 2:25¾; Alice Stoner, four years old, 2:24; Nannie Talbot, four years old, 2:29; Solo, five years old, 2:28¾; Monitor, five-year-old record 2:29; hy Rysdyk's Hambletonian, the sire of 35 in the 2:30 list. Address

SAMUEL GAMBLE,
Danvills, Contra Costa Co., Cal.

Oakland or 508 Montgomery street, San Francisco.

THOROUGHBRED STALLION

X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam, Columbia, also by imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wanunita, Ronnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland,
or 508 Montgomery street.

Mares intended for either of the above stallions, and sent by Donahue, Petaluma, Sacramento or Stockton boats consigned to J. W. Morshead, City Front Stables, will be received, good care taken of them and forwarded to Oakland.

TROTTING STALLION

CHOICE
Brood Mares
FOR SALE.

ON ACCOUNT OF THE OWNER'S ABSENCE abroad, which prevents his giving his personal attention to his stock, the undersigned has been requested to offer for sale the following choicely-bred broodmares. These animals are just as represented. In breeding, health, form, size, color and disposition—in everything that goes to make up desirable stock for breeding purposes—They present an exceptional opportunity. They are not discarded, broken-down trotters, but are in their prime, perfectly sound and in vigorous condition. Like their sires, they are themselves trotters and are all purely gaited. Their breeding qualities have been tested. The get of each is highly promising and not for sale. To save time and correspondence, full and correct pedigrees are given below and from the prices named there will be no deviation:

HECLA.

(Standard. See "Wallace's Trotting Register.)" Bay mare; sixteen hands high; foaled 1872; got by Almont (sire of 70 winners of contested races, 20 with public records below 2:30), son of Alexander's Abdallah; dam Haidee, by Mambrino Chief; second dam Zenith (5940); bred by D. Swigert, Esq., Kentucky. Hecla is pronounced by competent judges to be one of the finest broodmares in America. Has had three fine colts, one of which, a yearling by Orange Blossom, may be seen with her. Is again in foal to Orange Blossom. Colt due end of June next.
Price $1,200.

MINNIE H.

Brown mare; sixteen hands; three white feet and blaze in face; foaled 1875; got by General Knox (sire of Lady Maid, 2:18, Camors, 2:19½, and about ten others in the 2:30 class); dam Sallie Groves, by Prince Moscow Jr.; second dam Tuck (a fast pacer), by blind Tuckahoe; Bred by Hon. H. B. Holton, Powhatan, Md. This mare trotted in 2:36 while in Mr. Holton's possession, previous to being put to breeding. Has fine yearling filly and has not yet been bred this spring.
Price $750.

VARILLA.

Bay mare; very nearly sixteen hands high; a trifle white on one hind foot; as near as could be ascertained by the owner the age of Varilla is twelve years; got by Middletown (sire of Music, 2:21, Nellie Irwin, 2:25, Orange Blossom, 2:26¼ and others), by Rysdyk's Hambletonian; dam by Hector, by Latourette's Bellfounder; bred by D. B. Irwin, Esq., Middletown, Orange Co., New York. The present owner of this mare has three of her colts, all of fine size, weight and promise; one, a four-year-old, has been sent to Dr. Herr, Lexington, Kentucky, for training. Varilla has a filly, foaled April 14, 1883, by her side by Meadow Chief, he by Hamlet (sire of Leonine, 2:21½, Brookside Flora, 2:29), by Volunteer, and has not yet been bred this season.
Price $750, or $900 for mare and foal.

To one purchaser the three mares will be sold for $2,500 cash. The owner respectfully refers to the "Spirit of the Times," New York, and to Joseph Cairn Simpson, editor "Breeder and Sportsman," San Francisco, Cal. Address, or call on,

In heavy Silver Hunting Cases..... 30

[From the Jewelers' Circular.]

"The Centennial chronograph (fly-back) or horse-timer, recently introduced by Messrs. Cross & Beguelin, is, regardless of price, one of the most substantial and accurate pieces of timing mechanism we have seen. This timer is constructed on scientific mechanical principles that must excite the admiration of every intelligent watchmaker, and it will doubtless become universally popular." THE STABLE.

Trotting Action.

EDITOR BREEDER AND SPORTSMAN, *Dear Sir:* I take the BREEDER AND SPORTSMAN, and have been much interested in the articles "Trotting Action." I am a breeder of trotting horses—on a small scale—and I would like to have you answer a few questions, as I desire, if possible, to obtain the information from reliable authority. First, I own a trotting horse with a record of 2:28, although he can not go now under 2:40. He was weighted too heavily in a race three years ago, and was "fired" to strengthen his forelegs, consequently the skin is tender. He sometimes "strikes" his right foreleg just above the ankle joint. He never strikes his left leg. I have to work boots on him always for fear he will cut himself. Once in a long time he interferes behind. I keep his feet as small as possible (to not be injurious), and yet he sometimes strikes. Now, the point is this, how can he be shod to the best advantage? I nsually have him shod heavy in front and light behind, as most trotting horses are shod. I believe that he could be shod so that he would not interfere behind at all. It is very disagreeable to drive a nice horse and every little while have him strike himself behind. He trots close anyway, but if I knew how, I could corret his striking and cutting himself behind. Of course I could work boots—ankle boots—on him behind and stop it, but if it can be corrected in the shoeing I would rather do it.

Second, do you know any certain rule for measuring a colt, say four week old, and arriving at any definite conclusion regarding his size when grown?

Third, do you know anything regarding the feeding of "black antimony," given as condition powders, aud especially to make a horse's coat shine? How much do you feed at once, and what do you mix it with, etc?

In your issue of May 12, when you were discussing interfering and running behind, hitching and striking the hind foot at the edge of its hair on the shoe of the forward foot (I having a horse that interfered and another that strikes the coronet of the hind foot on the front one), I hoped you would give a remedy, but you did not. I remain, sir, yours respectfully, H. W. P.

HEALDSBURG, May 19.

The answers to the above qneries being more than of individual interest I give the reply to the first as coming appropriately under the head of trotting action. There is ecarcely a doubt that very many horaea have been injured by heavy toe-weighte and ponderous shoes, and that the success which has followed loading the feet in some cases, led to an extreme use to the detriment of the animal in othera. When wearing heavy ahoea there is another danger besides strain on the tendons, that being an increased tendency to strike the opposite leg, though there are cases when horses have bean cnred of interfering by being shod with heavier shoea. When the hind ankles are wounded by the opposite foot the general custom of thesmitha ia to raise the inaide of the ahoe, the object being to throw the ankle further out eo that the foot can pass clear. This at times is effectual, though it is evident that an undue strain ia thrown on all the joiuts from the foot to the hock, and rather than to take the chances of serioua injury resulting I would much rather use boots. But boots on a road horse are unsightly appendagea, and if by other methods they can be dispensed with there will be a gain which all will appreciate. For ordinary road-driving I am aatisfied that shoes on the hiud feet can be dispensed with, which will lessen the liability of interfering, though there are many horses that will "brush" hard enough with the bare foot to knock the skin off. People, however, are eo wedded to the idea that ahoes "all around" are a necessity that cannot be got along without, that there is little chance for them adopting different views. In that case aome plan whereby ehoea can be worn must be devised and also that the eucumbrance of ankle boots can be thrown aside. The ahoe described in former articles, which have been incorporated in "Tips and Toe-weights," is the moet likely pattern I know of to obviate the difficulty. This has a wide web on the inside ao as to give it double the weight of the outer half, the thickness being uniform. The edgea ahould be rounded and a place cut to imbed the clinches. The cutting away of the horu to receive the clinch should be done with a small gouge, as the edge of the rasp leaves a crease hetween the nails, which weakens the horn. The gouge being only a trifle wider than the nail, the enamel is only cut away to the least possible degree and the clinch is buried below the surrounding surface. The heel of the shoe should not project beyond the horn, as thie may be the portion which strikes the ankle. Setting the shoe inside the wall and cutting the horn away is a favorite practice with some shoeiug smiths, but this brings the bearing too much on the sole, and oftentimes has no effect as a remedy.

Interfering, as it is called in America, viz., the woundiug the inside of the ankle with the opposite foot, nsually occurs when the horse is trotting slow. It ie often so severe that the animal will hohble along on three legs, and there appears to he a greater tendency to strike after there is a sore place. The presumption is, however, thät the blow is not more frequent, hut that the greater pain canses more notice to be taken of it. The blow may not be given with the shoe, the side of the foot being the part which strikes. A raised clinch is almost sure to cut the ankle of a horse which carries the feet close together, the shoe coming in the hollow between the ankle and foot. If horses interfered altogether when shod, all that would be required would be to hring the fitting of the shoes and the nailing within the protection of the horn. As it frequently occurs when barefooted, there must be some other remedy discovered, or, perforce, boots worn. The experiments with shoee wider and heavier on the inside were not instituted to guard against cuttiug, the object being to test the effect on the action at so fast a pace that this trouble would not be met. Inasmuch as in every case the feet were carried farther apart than when the weight was equally distributed, it may be that it will prove an effectual cure. I have known horses that did not interfere when the check-rein was moderately taut who would do so when given their head, and othere the reverse. It may appear paradoxical to state that the action at a fast gait ie more susceptible of change than when the motions are slow. Nevertheless, it ie eo, and there are good reasons for it. There is more energy in speed, and a change in shoeing which would canse great variations in the former be of no effect in modulating the latter. I reiterate that throwing the ground surface of the foot from a level bearing is inadmissable, as the risks will be greater of more serious injury followiug, and rather than advising the adoption of that plan would recommend wearing boots. Blackamiths are not careful enough in the preparation of the foot to receive the shoe, and in a great majority of casea the horse will be seut from the ahop with the feet twiated. They place too much dependence on casting the eye over the bottom of the foot when it is held on or between the kneea. The floor of the ahop should be perfectly level and emooth, and, previous to the shoe being nailed on, the horse should be made to stand squarely on his feet, aud the closest scrutiny observed to see that the beariug ie as trno as possible. Wheu that ia right the ahoe must be made so as to preserve it, and after these precautione have been duly followed, the same care be taken in driving the nails and making the clinches smooth.

Tho inquirer will understand that it ie a difficult thing to answer the qucstion, simple though it appear, and to return "reliable information" regarding the correction of the evil he complains of. His letter leads to the assnmption that tho interfering does not come from weakness, or after the horse has been driven far enough to wcary him. It ie ovidently a case of faulty actiou at a slow pace, and the remedy must be based on this diagnoais. Perhaps the mauner of driving may aggravate the tendency. By keeping the horse well up to the bit, arousiug him from a lethargic habit of "pokiug along" by elight touches of the whip, teaching him to go with more promptness, this treatmeut, after a change in shoeing, may prove a correction which any particular form of shoes might not effect. There are apparently trivial things in connection with "stable management" that are extremely troublesome to overcome, and though the result of one or more experiments may lead to the belief that a remedy has been discovered, the next instance dissolves the belief and the potent specific fails. Fortunately, when there is a failure in the case under consideration, there is a recourse to boots, and these useful appendages to the fast trotter can be utilized to guard against the injuries of a slower pace. There has been one drawback to the use of boots on the road which can be obviated. Those made of leather, kersey or felt ara spoiled by being used in the mud, and when saturated with muddy water are likely to injure the part. I have used boots constructed of rubber, or rather a material composed of rubber and canvas, and found them satisfactory in every respect. The mud and water does not adhere to them as it does to the ordinary kind, and what little there is can be rinsed off in a few moments.

This is rather a long reply to the query of our correspondent, and without definite information to guide him. He may be able, however, to make good use of the hints, and, after all, suggestione are ahout all that can he offered. Were the case mine I should try what the effect would be in going without shoes on the hind feet, and if that was not satisfactory follow with such a shoe as is described. In the articles that have been printed since May 12, there has been a continuation of the consideration of the ecalping questiou. To find a positive remedy that is a more puzzling question than to cure interfering, and I am now engaged in trials that, as yet, have not been carried far enough to determine the value of the tests. The other inquiries are easily answered. There is no mauner of telling what size a colt will reach nntil maturity presents the answer. From the point of the elbow to midway of the aukle joint is claimed hy some to be "the measure" of the animal when grown, that is, that eventually the height will reach what ie shown hy reversing the line, measuring from the elbow up. If horses were uniform iu proportiou there might be an approximative estimate, but it is evident that in the great diversity it is impossible to make a trne forecast. Another plan is to measnre from the center of the knee to the center of the ankle of the colt and call each inch a hand. This is likely to he etill further from the truth as a horse of sixteen hands may have ahorter canuons than one which is six inches lower in stature. The use of black autimony is injuriona, and though it may add a luster to the coat, continued nse will end in disordering the atomach.

It is announced iu St. Louia that arrangemonts have been perfected for the purchaae of 124 acres of land, on which will be built a running-track with all the necessary stands, stables, betting inclosures and other buildiugs for the St. Louis Fair Association Jockey Cluh. The president of the association aays that the rack will ho made superior to any in the Western States, and that the club will offer aunually moro mouey in the shape of pursea and added money thau is now offered either by the Coney Island Jockey Cluh or tho Saratoga Association. Thc inaugural meeting will take placo in tho spriug of 1884.

The Island of Jersey, having a surface of seven miles each way, keeps 12,000 cows. The breeding of cows has made the Island very fertile and, as the animals are kept in stables all the year round, every particle of the mauure is aaved. Cows kept in close yards, witb little exercise, are geuerally better milkers than those allowed to run at large, and it is this in part which has developed the dairy value of the Jersey breed. In winter the cows are largely fed on parsnips, which has probably holped develop the hutter superiority of this breed of cattlo.

American Jersey cattle breeders complain, and with reaeon, that only cattle that have been registered in Jersey or their podigree descendants are eligible in the American Jersey Club book. This gives foreign breeders the dictation aa to what cattle ahall be registered here, aud the standards of the two countries are quite different. Jersey breeders make more of fancy colors than is practiced here, aud under the aystem the tendency ia to a depreciatiou in the milk and butter standard.—*American Cultivator.*

BLUE GRASS YEARLINGS.

Annual Sales at Runnymede, Elmendorf and Woodburn—Active Competition and High Prices.

The annual sales of thoronghbred yearlings in Kentucky were great successes this year and the prices realized are a matter of congratnlatiou on the part of breeders and indicative of a live interest all round. The sale at Geo. W. Bowen & Co.'s Runuymede Farm occurred in the 18th inst., at D. Swigert's Elmendorf on the 19th and at old Woodburn on the 21st. Tbe followiug report of tbe sales is compiled from tbe telegrams to the New York *World:*

At Runnymede

there was an excellent attendauce, iucluding nearly all the visitors from the East who bave been attending the races. Nineteen lots were sold, of which tbe brown filly, by Billet, out of Belle Palmer, by Bonnie Scotland, was sold for $1,500 to tbe Dwyer Brothers, and was the highest-priced lot of the sale. She is not only well bred but is a large and grand-looking youngster. Tbe highest-priced colt was bought by Col. Bruce of New York, who paid $1,000 for the brown colt out of Broeck by Brown Dick. He is a large, stout, high-boned fellow. The Dwyer Brothers also bought a colt out of Lucille Western, and Appleby & Johnson of New York bought the colt out of Lottie, by King Tom, who is rather small but promising, as is also the colt out of Good Bye, bought by Mr. E. Berry Wall of New York. The full catalogue is as follows:

By imported Billet, he by Voltigeur:

1. Brown colt (Febrnary 28), dam Broeck, by Brown Dick, graudam Manahatta, by imported Leamington; S. D. Bruce, New York, $1,000.

2. Bay colt (March 7), dam Lucille Western, by Lexington, grandam Kate, by Count Zaldivar; Dwyer Brothers, New York, $500.

3. Bay colt (April 20), dam Eppie L, by Surprise (by Bonnie Scotland), graudam Carrie Cage, hy imported Sovereign; Milton Young, $600.

4. Bay colt (April 23), dam Good Bye, by King Lear, grandam Katinka, hy imported Australian; E. Berry Wall, New York, $300.

5. Bay colt (May 8), dam Lottie, by King Tom, grandam Leon, by Lexington; Appleby & Johnson, New York, $525.

6. Bay colt (May 9), dam Bettie Lewis, by Uncle Vic, grandam Maya, by imported Knight of St. George; J. E. Pepper, Kentncky, $250.

7. Bay colt (April 8), dam imported Calphurnia, by Julins, grandam The Test, by Saccharometer; A. J. Cassatt, Pennsylvania, $510.

8. Bay colt (April 30), dam Cammie F, by imported Glenelg, grandam Cordelia, by Lexington; Milton Young, Kentucky, $695.

9. Bay colt (May 18), dam Mirah, hy imported Phaeton, graudam Nettie Viley, hy Boh Johnson; L. Hart, Missouri, $700.

13. Bay filly (April 12), dam Glena, by imported Glengarry, grandam Neutrality, hy Revenue; J. E. Pepper, Kentucky, $875.

14. Bay filly (April 18) dam Weiland, by Wanderer, grandam Iodine, hy Lexington; L. P. Tarlton, Kentucky, $375.

15. Bay filly (April 21), dam Calomel, by imported Camwell, grandam Dora, hy imported Australian; John Jackson, $360.

16. Bay filly (May 4), dam Leon, hy Lexington, grandam Liz Mardis, hy imported Glencoe; J. E. Pepper, Kentncky, $450.

18. Brown filly (May 16), dam Belle Palmer, hy imported Bonnie Scotland, grandam Fanny Cheatham, by Lexington; Dwyer Bros., New York, $1,500.

19. Bay filly (May 19), dam Easter Monday, by Uncle Vic, grandam Laura Bruce, by Star Davis; J. L. Holt, $180.

By Reform, he hy imported Leamiugton:

10. Bay filly (Jannary 6), dam Emily Fuller, hy imported Eclipse, grandam Oleata, by Lexington; L. A. Ehlers, New York, $380.

By Alarm, he by imported Eclipse:

11. Chestnut filly (March 19), dam Delight, by Jack Maloue, grandam Vesper L ght, hy Childe Harold; J. E. Pepper, Kentucky, $400.

12. Chestnnt filly (April 1), dam Jaconet, by Leamington; graudam Maggie B B, by Australian; J. S. Clark, $620.

By Springhok, he hy imported Australian:

17. Chestnut filly (May 8), dam Vida, by Virgil, grandam Manahatta, by Leamington; Richard Lowell, $230.

The above is the second annual sale of the Rnnnymede yearlings. Last year 12 head were sold for a total of $8,975, an average of $747 91, of which 7 colts averaged $964 28 and five fillies averaged $445 each. The sale above is not quite as good. The 19 lots sold realized a total of $10,450, an average of $550 each, while the Billets alone averaged $588. A nnmber of other horses were sold, including a lot belonging to Preston & Wall, hut they were in such poor condition that the prices obtained were small.

At Elmendorf

the sale was in every respect remarkable. The attendance was large, visitors from all parts of the country being present, while so sharp was the competition between some of the Eastern buyers tbat the prices ran np in the thousands before tbe auctioneer could say "All done."

The highest price paid was $5,100 for tbe colt by Virgil ont of La Polka, the dam of Post Guard. He is certainly a promising looking colt, and it is to be hoped that the Dwyer Brothers, tbe purchasers, will find him remunerative, if not as a two-year-old, certainly as a three-year-old in 1883. They also paid $2,000 for tbe Alert and $1,100 for the Tincture colts, both by Virgil.

Mr. Kelly of New York was also a large buyer. He paid $2,550 for a colt out of Paris Belle, by Virgil; $2,500 for the filly out of Anna Bush, by Glenelg, and $1,850 for the brother of Start and Bertha. Another high-priced colt for New York was tbe Glenelg-Alala colt, for which Colonel Bruce paid $3,000.

The highest-priced Glenelg was, however, bought by Mr. Cassatt of Philadelphia, who paid $3,700 for the colt out of Salina, and as that was the first lot sold, tbe sale may be said to have started with considerablo enthusiasm. Mr. Cassatt was also the buyer of tbo highost-priced Monarchist colt, the brotber of Monarch falling to his bid of $2,500, while the Dwyers got tbe brother of Little Ruffin for $2,000.

With such prices paid for the choice lots, tho average of the sale is equal, if not superior, to that of any previous sale of thoronghbred yearlings in this country, capecially as many of the other lots, not as well bred, perbaps, also brought good prices.

At the end of the sale Mr. Swigert was warmly congratulated, not only by visitors from tbe East, hut also by his neighboring competitors, wbo were proud to see how highly the blue-grass youngsters are appreciated by the most prominent racing owners of the country.

The full catalogue sold, with prices and buyers, is as follows:

By imported Glenelg, he by Citadel:

1. Bay colt (April 19), dam Salina, by Lexington, grandam Lightsome, by imported Glencoe; A. J. Cassatt, Pennsylvania, $3,700.

2. Bay colt (April 20), dam Alala, by War Dance, grandam Vinnie Ream, by imported Knight of St. George; Colonel S. D. Brnce, New York, $3,000.

6. Bay colt (April 5), dam Stamps, by Lexington, grandam Mildred, hy imported Glencoe; J. E. Kelly, New York, $1,850.

12. Bay colt (March 31, dam Cordelia, by Lexington, grandam Kitturale, by Brawner's Eclipse; J. S. Book, $775.

13. Cbestnut colt (April 7), dam Schott, grandam Schottische, by imported Albion; J. G. Nelson, New York, $1,150.

14. Chestnut colt (May 10), dam Heliotrope, by imported Knight of St. George, grandam Evergreen, by imported Glencoe; J. E. Kelly, New York, $1,800.

17. Bay colt (April 16), dam The Nun, by Lexington, grandam Novice, by imported Glencoe; W. E. Applegate, Kentucky, $350.

20. Cbestnut colt (May 6), dam Jentling, hy Planet, grandam Jennie H, by imported Knight of St. George; J. E. Pepper, Kentucky, $1,000.

22. Bay colt (March 26), dam Virtue, by Virgil, grandam Notice, hy Lexingtou; T. Swigert, Kentucky, $150.

26. Bay filly (April 9), dam Blunder, by Lexington, grandam Blonde, by imported Gleucoe; Appleby & Johnson, New York, $820.

27. Bay filly (May 7), dam Anna Bush, by Lexington, grandam Banner, by imported Albion, J. E. Kelly, New York, $2,500.

35. Bay filly) March 31), dam Retort, by Lever, grandam Return, by Commodore; L. P. Tarlton Jr, Kentucky, $500.

38. Bay filly (April 28), dam Fair, by imported Gleu Athol, grandam Fairy, by imported Knight of St. George; J. Swigert, Kentucky, $230.

43. Bay filly (April 18), dam Malaga, by imported Australian, grandam Miranda, by Lexington; not offered.

Total of thirteen head—nine colts and four fillies—$17,325, the colts averaging $1,475, and the fillies $1,012 50. Last year eight colts sold for $6,760, an average of $845 each, and nine fillies for $5,685, an average of $631 74 each.

By Virgil, he hy Vandal:

3. Bay colt (April 12), dam La Polka, hy Lexington, grandam Dance, hy imported Glencoe; Dwyer Brothers, New York, $5,100.

7. Bay colt (April 10), dam Alert, by Lexiugton, grandam Falcon, by Woodpecker, Dwyer Brothers, New York, $2,000.

8. Bay colt (April 3), dam Paris Belle, by Lexington, grandam Ella D, by Vauxhall; J. E. Kelly, New York, $2,550.

10. Bay colt (May 1), dam Mary Martin, by Lexington, grandam Alice Jones, by imported Glencoe; J. S. Book, $1,550.

15. Black colt (April 3), dam Tincture, by Baywood, grandam imported Elixir, hy King John; Dwyer Brothers, New York, $1,100.

24. Brown filly (April 10), dam Regan, by Lexington, grandam Lorette, hy imported Sovereign; A. J. Cassatt, Pennsylvania, $2,200.

25. Bay filly (January 27), dam Lark, by Lexington, grandam Laura White, by imported Glencoe; J. S. Book, $575.

28. Bay filly (April 17), dam Laxity, hy King Lear, grandam Lazy, hy imported Scythian; S. D. Bruce, New York, $1,150.

33. Bay filly (May 10), dam Queen of Scotts, hy imported Bonnie Scotland, grandam Geneva, hy Lexington; J. Swigert, Kentucky, $500.

36. Bay or brown filly (May 21), dam Susie Linwood, hy Judge Leonard, grandam Miss Doyle, by Lexington; L. A. Ehlers, New York, $575.

37. Bay filly (May 14), dam Lady Way, hy imported Eclipse, grandam Sprightly, hy Lexington; J. Swigert, Kentucky, $425.

41. Bay filly (April 13), dam La Belle Helene, hy imported Glenelg, grandam Grecian Bend, by Lexington; L. Kearns, $210.

44. Brown filly (May 7), dam Aconstic, by imported Australian, grandam Nemesis, hy imported Eclipse; L. A. Ehlers, New York, $420.

45. Bay filly (May 31), dam La Favorita, hy Planet, grandam Lnileme, hy Lexington; L. Kerns, $310.

Total for fourteen head—five colts and nine fillies—$18,655, of which the colts averaged $2,460 and the fillies $707 22. Last year five colts sold for $5,500, an average of $1,100 each, and four fillies for $1,830, an average of $457 50 each.

By Monarchist, he by Lexington:

4. Chestnut colt (March 30), dam Kittie, hy imported Australian, grandam Kitty Clark, hy imported Glencoe; A. J. Cassatt, Pennsylvania, $2,500.

11. Brown colt (May 5), dam imported Bon-Bon, hy Maccaroni, grandam Blondella, hy Flying Dutchman; Dwyer Bros., New York, $2,000.

16. Brown hay colt (June 5), dam Tuscola, hy Enquirer, grandam Bourbou Belle, by Bonnie Scotland; J. S. Book, $900.

29. Bay filly (March 22), dam imported Lady Molesworth, hy Monlsey, grandam Delilah, hy Thormanby; L. A. Ehlers, New York, $875.

30. Chestnut filly (May 25), dam Lava, hy imported Australian, grandam Lavender, by Wagner; P. H. Ryan, New Jersey, $725.

31. Chestnut filly (May 3), dam Return, hy Commodore, grandam Reunion, by Union; J. S. Clark, $580.

32. Bay filly (June 10), dam M A B, by Asteroid, grandam Bay Leaf, by imported Yorkshire; Dr. B. W. Dudley, $325.

Total for seven head—three colts and four fillies—$7,905, of which the colts averaged $1,800 and the fillies $626 25. Last year three colts sold for $5,400, an average of $1,800 each, and three fillies for $1,370, an average of $456 06. The excellent avearge obtained by tbe young Monarchists in 1882 was due to the colt ont of Return, which realized $2,550; the colt out of Tuscola, $1,150, and the colt out of Notable, by Planet, $1,700.

By Harry O'Fallon, hc by imported Australian:

18. Chestnnt colt (May 5), dam Spray, by Bulletin, grandam Sea Breeze, hy imported Albion; J. Churchill, Kentucky, $425.

23. Chestnut colt (May 6), dam Ems, by Lisbon, grandam Emeti, by Asteroid; Milton Young, Kentucky, $220.

39. Black filly (February 4), dam Locket hy Blacklocke, grandam Alboni, hy Albion; Ephriam Young, Kentucky, $190.

40. Chestnut filly (April 1), dam Evangeline, by imported Eclipse, grandam Prunella, by imported Glencoe; Samuel Smith, Kentucky, $195.

None of the progeny of Harry O'Fallon was sold at the Swigert sale in 1882. Total for four head, $1,030. The colts averaged $322 50 and the filliea $192 50.

By King Alfonso, he by imported Phaeton:

5. Bay colt (April 16), dam Ann Fiefby, by Alarm, grandam Kate Walker, by Embry's Lexington; Milton Young, $450.

9. Chestnnt colt (February 21), dam Sister of Joe Daniels, hy imported Australian, grandam Dolly Carter, by imported Gleucoe; Milton Young, Kentncky, $850.

Only two fillies hy King Alfonso were sold at Mr. Swigert's sale in 1882, and tbey realized an average of $562 50 each. The colts above averaged $650.

By Falsetto, he by Enquirer:

19. Bay colt (May 17), dam Marguerite, by imported Eclipse, grandam imported Merry Wife, by Beadsman; J. G. Nelson, New York, $550.

There were none of tbe get of Falsetto sold last year.

By Lever, be by Lexington:

34. Bay filly (April 9), dam Peru, by imported Glengarry, grandam Optima, by imported Knight of St. George; W. P. Applegate, Kentucky, $725.

Three fillies by Lever were sold in 1882 at an average of $340 each.

By Lisbon, he by imported Phaeton:

42. Bay filly (May 25), dam Alex, by imported Australian, grandam Molly Rogers, hy imported Sovereign; Warren Day, Kentucky, $230.

Nothing by Lisbon was sold at the Swigert sale last year, but the colts sold at the Alexander sale realized an average of $1,350, and the filly $700.

By Virgil, he hy Virgil:

21. Bay colt (April 16), dam Hayti, by imported Australian, grandam Dolly Morgan, hy Revenue; W. E. Applegate, Kentucky, $240.

The above is the ninth sale of yearlings hred on the farm now owned hy Mr. Swigert. Previous to the sale in 1882 Milton Sanford owned the establishment, bnt as he sold it in the autumn of 1881 to Mr. Swigert, the sale last year was of yearlings bred by Mr. Sanford, and which had previonsly been bought in a lump by Mr. Swigert. Consequently the sale to-day is the first of Mr. Swigert's breeding at this farm. There were 44 head sold for a total of $47,970, of which 23 colts averaged $1,465 65 and 21 fillies $679 04 each. The average for the 17 colts in 1882 was $980 57, and for 21 fillies $525 04. That of the present year is the best ever obtained for the colts, the best previons averages heing $947 25 obtained in 1881 and $917 89 in 1876.

At Woodburn.

Unfortunately, the weatber was very bad, and not only affected the attendance bnt materially redneed the prices, and cut the averages down below those of any year since 1879. As was the case at the Swigert sale on Saturday, New Yorkers carried off the best lots, Mr. Kelly paying the highest price of the sale, viz., $1,380 for the Lerna colt, by King Alfonso. The Dwyers paid the second largest sum, $1,300 for the Spinola colt, by Lisbon, while Mr. George Lorillard was third with $1,100 for the Crucifix colt, hy King Alfonso. These were the only lots sold for more than $1,000. The Dwyer Brothers also bought the brother of Glenmore and the sister of Ripple, paying $725 for the former and $600 for the latter. The brother of Frank Short was nnfortunately lame and was taken hy Mr. Joseph Swigert for $100, so that the colt will only have to be transferred to an adjoining farm, where time and patience may prove a cure. The full catalogue, with prices obtained, is as follows:

By Lisbon, by imported Phaetou:

5. Bay colt (March 11), dam Spinola, by imported Australian, grandam Spiletto, by Stockwell; Dwyer Brothers, New York, $1,300.

8. Bay colt (June 2), dam Glenlume, by imported Glenelg, grandam Late, hy Lexiugton; T. Swigert, Kentucky, $400.

12. Bay colt (May 10), dam Marguerite, hy Lexington, grandam My Lady, by imported Glencoe; Applehy & Johnson, New York, $375.

16. Bay or brown colt (March 26), dam Fleurilla, by Dick Cheatham, grandam by imported Glencoe; W. L. Tell, $130.

21. Chestnnt filly (April 9), dam Maggie Hunter, by imported Australian, grandam Heads-I-Say, hy imported Glencoe; Dwyer Brothers, New York, $600.

27. Chestnnt filly (April 28), dam Blandina, by Lexington, grandam My Lady, by imported Glencoe; Dwyer Brothers, New York, $575.

29. Chestnut filly (March 28), dam Asteria, hy Planet, grandam Austria, by imported Australian; J. M. Van Meter, $205.

30. Bay filly (April 1), dam Heiress, by imported Scythian, grandam Heads-I-Say, hy imported Glencoe; J. L. Harris, $180.

Total for the eight head, $3,765, of which the four colts averaged $551 25 and the fillies $390. Last year five of the get of Lisbon were sold for a total of $4,650, of which four colts averaged $987 50 each, the single filly selling for $700.

By Pat Malloy, he by Lexington:

13. Bay colt (April 19), dam Favorite, by imported King Ernest, grandam Jersey Belle, hy imported Australian; G. D. Wilson, Kentucky, $470.

14. Chestnnt colt (April 15), dam Ethel, by imported Leamington, grandam imported L'Anglaise, hy Hobbie Noble; Ed Corrigan, $360.

15. Chestnnt colt (May 8), dam Schottische, by imported Albion, grandam Dance, by imported Glencoe; G. L. Lorillard, New York, $300.

28. Bay filly (May 6), dam Dolly Morgan, hy Revenue, grandam Sally Morgan, by imported Emancipation; D. D. Withers, New Jersey, $800.

31. Bay filly (May 14), dam Jennie H, by imported Knight of St. George, grandam by Gray Eagle; T. L. Harris, $180.

33. Chestnut filly (May 8), dam imported Queencraft, by Kingcraft, grandam Iveruess, hy Saunterer; T. B. Prather, $250.

Total for the six, $2,360, of whicb the three colts averaged $376 66 and the three fillies $410. Last year nine head were sold for a total of $4,240, of which three colts obtained an aveaage of $766 66 each and six fillies $322 33 each.

By imported Glen Athol, he by Blair Athol:

4. Chestnnt colt (April 13), dam Lotta, by Hunter's Glencoe, grandam Sally Lewis, hy imported Glencoe; Dwyer Brothers, New York, $725.

6. Bay colt (March 23), dam Orelia, hy Waverly, grandam Maggie Morgan, by Hunter's Lexington; J. L. Harris, $210.

18. Cbestnut colt (April 17), dam Belle Brandon, by Hugh L. French, grandam Belle, hy Frank (colt very lame); J. Swigert, Kentucky, $100.

32. Bay or brown filly (April 28), dam Semper Vine, hy Waverly, grandam Semper Felix, by imported Phaeton, B. G. Thomas, Kentucky, $400.

Total for the four, $1,435, of which the colts averaged $345 each. Last year there was only one colt by Glen Athol sold, he bringing $2,700, and two fillies, which averaged $367 50 each.

By Baden Baden, he by imported Australian:

17. Chestnut colt (May 15), dam Atalanta, by Asteroid,

grandam imported Target, by Rifleman; L. Currens, $340.
By King Alfonso, he by imported Phaeton:
1. Chestnnt colt (March 11), dam Lerna, by Asteroid, grandam Laura, by imported Leviathan; J. E. Kelly, New York, $1,380.
2. Bay colt (April 15), dam Crncifix, by Lexington, grandam Lightsome, by imported Glencoe; G. L. Lorillard, New York, $1,100.
3. Bay colt (April 24), dam Miranda, by Lexington, grandam Miriam, by imported Glencoe; J. G. Nelson, New York, $610.
7. Chestnnt colt (April 4), dam Britomarte, by Asteroid, grandam imported Target, by Rifleman; J. T. Williams, Kentucky, $800.
9. Chestnnt colt (May 1), dam imported Inverness, by Maccaroni, grandam Elfrida, by Fangh-a-Ballagh; J. G. Williams, Kentucky, $805.
10. Bay colt (March 29), dam Simplicity, by imported Eclpse, grandam Vanity, by Revenue; L. A. Ehlers, New York, $420.
11. Bay colt (April 10), dam Astelle, by Asteroid or Lexington, grandam Mary Churchill, by Alex Chnrchill; J. S. Book, $600.
19. Chestnut filly (February 8), dam Lily Dnke, by Lexington, grandam Lilla, by imported Yorkshire; E. Corrigan, Colorado, $425.
20. Chestnnt filly (Febrnary 10), dam Zephyr, by Lexington, grandam imported Zone, by The Cure; J. E. Kelly, New York, $500.
22. Bay filly (April 7), dam Austria, by imported Australian, grandam Lindora, by Lexington; E. Corrigan, Colorado, $700.
23. Chestnut filly (April 19), dam Jersey Lass, by imported King Ernest, grandam Jersey Belle, by imported Australian; J. G. Nelson, New York, $730.
24. Bay filly (April 20), dam Ultima, by Lexington, grandam Utilla, by imported Margrave; Leslie Collins, $440.
25. Chestnnt filly (April 12), dam Fanchon, by imported Australian, grandam Idlewild, by Lexington; J. S. Book, $475.
26. Bay filly (April 9), dam Desolation, by Devastation, grandam Helpmate, by imported Warminster; G. W. S. Dey, $200.
Total for fourteen head—seven colts and seven fillies—$9,185, of which the colts averaged $815 and the fillies $495 71½. Last year nineteen head were sold, of which eight colts obtained an averaue of $1, 715 62½ each, and eleven fillies $1,009 54½ each.
The above is the fifteenth annual sale at Woodbnrn, the first regular sale having taken place in 1869, when 19 colts bronght an average of $578 42 each, and 26 fillies an average of $345 96 each. The total for the sale to-day is $170-85, 18 colts selling for $10,425 and 15 fillies for $6,660, an average of $579 16⅔ for the colts and of $444 for the fillies, which is a very great reduction from averages obtained in 1881 and 1882. In 1881 the average for 19 colts was $1,364 47 and for seventeen fillies, $605 58, while in 1882, 19 colts averaged $1,351 47 and 23 fillies, $670 86.

Death of S. R. Throckmorton.

Last Monday at 10 a. m., Samuel Reading Throckmorton, a pioneer of the original State Fish Commissioners, died from pneumonia. Dnring the early past of his connection with the fish commission Mr. Throckmorton was most active in the pisicultnral interests of the State, but latterly his health failed and he was unable to attend mnch to the dnties of the office. About two months ago he placed his resignation in the hands of General Stoneman and requested the appointment of Jos. Redding Jr. in his place. At this snggestion and in view of the services rendered by the senior Redding the appoiutment was made. Apart from his relations with the public service, Mr. Throckmorton was well known as one of the largest land owners in the State, the ranch popularly bearing his name embracing a large portion of Marin connty. Deceased was a native of New Jersey, and reached the age of seventy-four years. He was a pnblic-spirited and pleasant gentleman, and his venerable appearance made him one of those striking characters which every one was sure to notice on the street. He had been an invalid for nearly two years, bnt contracted his fatal illness from exposure, caused by visiting the new City Hall on the 16th instant—a rainy day.
Deceased came to California in the latter part of 1849. He was a widower, Mrs. Throckmorton having died about four years ago, and he is survived by one daughter.

The Swimming Season.

The approach of the warm weather has reminded the owners of bathing suits and shapely figures that the swimming season has commenced and soon will be heard the news of swimming matches and aqnatic tournaments. All the batbing places have made preparations for the summer season. Swimming is one of the few sports in which San Francisco amateurs stand pre-eminent and far in advance of their Eastern brethren. The reason for this is not easy to understand, for tbe low temperature on this Coast repels all except the most hardy bathers. Those who do bathe, however, swim well. Tbe Neptune club of North Beach, thongh hardly a success as a boating clnb, has produced a rare lot of good swimmers. F. and B. Searight, Sol Williams, E. B. Deane, Kenneth Melrose, J. Shotwell, Kent Calton and dozens of other first-class swimmers all graduated there. In his late trip to the East, F. Searight was forced into a race with the Harvard champion swimmer and tbe way in which he awam away from the cbampion made the Harvard men's faces flush till they assumed the regular hue of Harvard's colors—a deep crimson. The Triton club, the Dolphin club, and other North Beach clubs have also produced several good swimmers.

The grey stallion Tom Atchison died at Marysville on the 20tb ult. of hemorrhage of the lungs. He was bred by Tom Atchison and figured quite prominently in the running turf in this State in his younger days, when he disputed the palm of superiority with Nell Flaherty. Tom Atchison was foaled 1867, sired by Norfolk, dam Mary G, by Ashland. In Bruce's Stud Book Mary G is put down as being by Billy Cheatham, but Mr. Theodore Wintera avers that it is an error and that she was a daughter of Ashland by imported Glencoe.

The San Louis Obispo papers report that numbers of dairymen are losing cows in the northern part of that county. Tbe animal becomes atupid and listless and dies in two or three days. Antopsy reveals a great quantity of coagulated blood around the stomach. There is no known canse or cure for the disease. It does not seem to be contagious.

Springville, Ventura county, has a fine racetrack lately finished by Hill & Griea.

Colonial Notes.

From bis recent trip to the Australian colonies Mr. L. R. Martin, the well-known horseman, brings back to his San Francisco home a host of pleasant recollections and a most profound respect for the qnality and quantity of the Australasian turf and tbe gentlemen who manage its affairs. "To begin with," says Mr. Martin, "I had no sooner reached Sydney than I was taken in hand by Mr. F. W. Hill, one of the stewards of the jockey club. He placed me under many obligations for the tronble he took to make my visit pleasant. Every day his horse and buggy were at my service and, more than that, he spent his own valnable time in driving me out to stnd farms and introducing me to trainers, breeders and gentlemen connected with the turf. To Mr. Higgins, who aided my sheep business; to Mr. Andrew Town, of the great Richmond Stud Farm; to Major Walmsley, of the New Zealand Stud Company, and to many other gentlemen I am also greatly indebted. What struck me most in the colonies was the great extent of the tnrf interest and the liberal enterprise of breeders. They think no sum too large to pay for fine mares, and as to horses, they already have a surplus. San Francisco breeders desirons of importing fine thoronghbreds will in my opinion do bétter to send to the colonies than to England. A stranger is mnch surprised to hear of the enormous sums of money paid for yearlings there. A yearling colt by Maribyrnong of the Richmond Stud brought 2,000 guineas (more than $10,000) at pnblic anction and a yearling filly bred the same way bronght, the year before, 1,950 guineas. Maribyrnong is from Rose de Florence, by the celebrated horse Fisherman. Rose de Florence from Boarding School Miss, by Flying Dutchman. Boarding School Miss from Marpessa, by Plenipotentiary. Maribyrnoug is a brown horse about 16:3 and the sire of many noted winners, among them being Richmond, winner of the A. J. C. Produce Stakes, J. C. Plate, Canterbury Plate, Champion Race, Victorian St. Leger, V. R. C. Town Plate and the Australian Cup (2¼ miles) in 4:02½. Also Bosworth, winner of the Victorian St. Leger, 1879 (1¾ miles), in 3:19½, best on record.
"The Richmond stnd also includes:
"Malta, with four crosses of the great Waxy in his veins, whose list of ancestors includes Sir Peter, Pot-8-os, Royal and Sorcerer, Sir Hercnles, Tonchstone, Economist, Plenipotentiary, Gladiator, Partisan and Camel.
"Tim Whiffler, winner of the A. J. C. Metropolitan, Melbourne Cup, and many other races. He is by New Warrior (imported), by Phyrrhus I out of Colocynth, by Physician out of Cameline, sister to Camel, by Whalebone, by Waxy.
"Tarragon, by New Warrior from Lndia, by Waverley out of Peri, by Gratis (imported) from a mare by Satellite (imported Arab).
"Among the mares are:
"Amethyst (imported), by Ambrose (by Touchstone) from Heroine of Lucknow, by Nutwith ont of Pocahontas (dam of Stockwell, King Tom, Rataplan, etc.), by Glencoe.
"Alexandra, by The Marquis (imported), by Stockwell out of Cinizelli, by Touchstone, by Boiardo, by Orlando out of Rose of Denmark, by Stockwell from Marchioness, by Melbourne, Stockwell by the Baron ont of Pocahontas, by Glencoe.
"Auk, by The Marquis from Seagull, by Fisherman.
"Ave Maria, by Lord of the Hills, by Touchstoue.
"Astarte, by Maribyrnong from The Fawn (dam of Richmond and Bosworth).
"Belle of Cobham, by Restitution (by King Tom) from May Queen, by Trumpeter.
"Besides all these fine mares," continned Mr. Martin, "there are forty-two others on the Richmond place whose breeding is of the very finest. The most fashionable and valuable strains of English blood are represented there. Thoroughbred racing is the universal and almost the only sport in the colonies. There is little or no game there to hunt except kangaroos, and so all the men go to races and the youngsters play cricket. It is common enough for 80,000 people to turn out to see the Melbourne Cup run, and the entry lists for all popular events are enormous. For the Victoria Racing Clnb's spring meeting, 1884, the Mares' Produce Stakes of 100 sovereigns, 1 sovereign forfeit, for three-year-olds, 542 nominations were made. The Victoria Derby for 1883 has 134 nominations, the Oaks 90, the Produce Stakes 190, the St. Leger Stakes 130, the Sires' Produce Stakes 110, the Australian Derby 95, A. J. C. Mares' Produce Stakes 132, the Champagne Stakes 145, Australian St. Leger 95, First Foal Stakes 175, A. J. C. Sires' Produce Stakes 160. These are but a fair sample of the way nominations are sent in to colonial race secretaries.
"The colonial racing sensation during my stay was Mr. A. F. Smart's br c Archie, a two-year-old. He made a marvelous performance at the A. J. C. autumn meeting, winning the Sapling Stakes, five-eighths of a mile dash, with 131 pounds up, in 1:03¾. He was never pushed, and, as soon as let out, left the field and won with ease. There were nine starters. He also won the Flying Handicap, three-quarter-mile dash, the same day in 1:16, with 129 ponnds up, and beating a field of fully thirty-two horses.
"Navigator, three years old, the winner of the Australian St. Leger Stakes (1¾ miles) in 3:12, with 122 ponnds up, is a fine colt, and I should much like to see him purchased for California. This is what the Sydney *Mail* of April 7 said about him: 'He has been a brilliant little fellow, and among his best deeds are winning the V. R. C. Flying Stakes, the Normandy Stakes, the Geelong Sires' Produce Stakes, the Ascot Vale Stakes, the A. J. C. Cbampagne Stakes, the A. J. C. Sires' Produce Stakes, the A. J. C. Derby, the A. J. C. Mares' Produce Stakes, the V. R. C. Derby, the V. R. C. St. Leger, the Australian Cup and the A. J. C. St. Leger. He is by Robinson Crusoe (by Angler from Chrysolite) from Cocoanut (imported), by Nutbourne from Miss Vivian, by Rattle from Snbterfnge, by Sir Hercules, and so is as clearly bred as anything in the land, and his stud career should be a success. It is said that he will be retired from the turf this season.'
"The New Zealand Stud Company at Sylvia Park, is a fine institution, managed by Major Walmaley and witb Musket at the head of the harem. Musket's best English performance was third in a Derby. His get ran one, two and three in a big race this season and he is one of the most popular sirca in the colonies. A celebrated mare in the place is Sylvia, whose produce fetch large prices.
"I almost forgot to speak of the fine trotting stock on the Richmond Place. First comes Clara, bred in California, 1878, by Elmo (2:27) from Bessie, by Keokuk. Also Violetta bred in California, 1877, by Echo from Nita. There is also the great stallion, Childe Harold (2:25) imported from A. J. Alexander's Woodburn Stud Farm and by Harold, from Young Portia. Harold by Rysdyk's Hambletonian.
"I think," said Mr. Martin in conclusion, "that the horse intercourse between California and the colonies is only as yet in its infancy and the same may be said of the the sheep and cattle business, but we mnst take as well as sell."

BICYCLING.

The annnal run of the Oakland Bicycle clnb to San Jose took place Saturday and was a most enjoyable affair. The roads were in good condition generally. Unlike formerrnns, tbe start was made in squads. The cavalcade arrived in San Jose in the evening. On the following day a visit was made to Alum Rock road, and also to the Alameda. A number of pictures were taken by the amateur photographers who accompanied the excursionists. There is some talk of another run in the near fnture.

Moonlight rides to the park are rapidly coming into favor and it is no uncommon sight to witness the glistening steed on the South Drive. In fact the members of the San Francisco Bicycle clnb have devoted themselves to practice for some time past for the meeting in Oakland. A trip will be made from this side to San Jose in a few days and it is not at all improbable that some of the wheelmen may extend the run to Gilroy and and even frnther south.

Verinder evidently prefers riding on cobbles to walking on the sidewalks. Last week he came dowu Market street mounted on his wheel, and crossed Kearney and Montgomery streets at a rattling gait on his way to the Oakland ferry.

Martin, who was popnlarly termed the Adonis of local wheelmen, has given up the sport and generally walks to the base ball grounds.

Unicicles are coming in nse here. It fact an article of home mannfacture recently made its appearance in Oakland.

Finkler has ordered a new machine with which he proposes to snrprise the natives.

Cables is considering an extended visit to the country. Butler may accompany him.

ATHLETICS.

Caledonian Prize Winners.

At the seventeenth annnal picnic games of the Caledonia Clnb, held at Shell Mound last Saturday, the prizes for the athletic members of the lengthy and interesting programme were awarded as follows:
Qnoits—First prize, set carvers, Alex. Sharp; second, order for $5 hat, T. Cnnningham; third, box of tea, J. McCnllom.
Rnnning jump—First prize, silver butter dish, D. A. Foreman, 16 feet 11¾ inches; second, order for $5 hat, Thomas Scott, 16 feet 11 inches; third, picture and frame, A. Copeland, 16 feet 1¾ incbes.
Handicap race for men over forty-five years—First prize, 140 pounds celebrated Caledonian Mills oatmeal, A. Foreman; second, order for pair $7 boots, D. A. Macdonald; third, copy of Scott's poems, Don. McLea.
Standing jnmp—First prize, pair $10 pants, W. Wood, 9 feet; second, order for $5 hat, D. A. McMillan, 8 feet 9 inches; third, silver goblet, Thomas Scott, 8 feet 8½ inches.
Hitch and kick—First prize, $8, D. A. McMillan, 8 feet 1 inch; second, $6, D. A. Foreman, 8 feet; third, framed Address to the Marquis of Lorne, Alexander Copeland, 7 feet 9 inches.
Standing high leap—First prize, heautiful silver caster, complete, D. A. Foreman, 4 feet 5 inches; second, order for $5 hat, A. Copeland, 4 feet, 4 inches; third, silver medal, D. A. McMillan, 4 feet 3 inches.
Hop, step and jnmp—First prize, order for pair of boots, D. A. Foreman, 36 feet 5 inches; second, order for $5 hat, Alexander Copeland, 35 feet 8 inches; third, two fine white shirts, D. A. McMillan, 35 feet 6 inches.
Race for members (once round the track)—First prize, pair fine Mission woolen blankets, P. McIntyre; second, three fine wbite shirts, D. A. Foreman; third, five-pound box of tea, W. Wood.
Putting heavy ball—Special prize for Donald Dinnie, $20, 32 feet 3 inches; first prize, $10, D. A. McMillan, 33 feet 2 inches; second, $7, J. A. Carmichael, 29 feet 4 inches; third, $5, Thomas Scott, 28 feet 5 inches.
Vaulting with pole—First prize, elegant silver pitcher (value $20), A. Copeland; aecond, picture and frame, Tbomas Scott; third, copy of Burns' poems, Alex. Sharp.
Throwing heavy hammer—Special prize for Donald Dinnie, $20, 92 feet 2 inches; first prize, $10, A. Copeland, 79 feet 6 inches; second, D. A. McMillan, 78 feet 10 inches; third, $5; Thomas Scott, 73 feet.
Running high leap—First prize, gold and silver medal, D. A. Foreman, 6 feet; second, order for $5 hat, A. Copeland, 4 feet 11½ inches; third, silver badge; W. Wood, 4 feet 6 inches.
Putting light ball—Special prize for Donald Dinnie, $20, 45 feet 5 inches; first prize, $10, D. A. McMillan, 44 feet 5 inches; second, $7, Thos. Scott, 36 feet 2 inchea; third, $5, J. A. Carmichael, 35 feet 5 inches.
Long race for men (three times around the track)—First prize, champion gold medal, valne $100 (to be won three times in succession by the same competitor), and order for $5 hat, P. McIntyre; second, $10, W. Wood; third, $5, A. D. Foreman.
Tossing the caber—Special prize for Donald Dinnie, $20, 35 feet 11¾ inches; first prize, $10, D. A. McMillan, 32 feet 11 inches; second prize, $7, A. Copeland, 32 feet 8½ inches; third prize, $5, J. A. Carmichael, 32 feet 6 inches.
Throwing light hammer—Special prize for Donald Dinnie, $20, 112 feet 8 inches; first prize, $7 50, A. Copeland, 98 feet 3 inches; second prize, $5, D. A. McMillan, 93 feet 3 inches; third prize, $3, Thomas Scott, 87 feet 7 inches.
Tug of war (one pall)—Prize, champion trophy. Captain of married men, Daniel McLeod; captain of single men, I. G. Burnett. The champion trophy was won hy the single men.
Throwing light hammer, for members' sons, under sixteen years—First prize, silver medal, Charles Reid, 50 feet 4 inches; second, silver badge, A. McJames, 30 feet 4 inches; third, silver thistle, Robbie Telfor, 29 feet 2 inches.
Race for men (four time round the track); entrance money $1—First prize, $10, P. McIntyre; second, $7, W. J. Harris; third, $5, W. Wood.
The apecial performance with dumb bells by Donald Dinnie was omitted, na through an oversight on the part of the committee no bells were on the ground.
The race for the champion gold medal won by Mr. McIntyre was the third win scored hy him in that event and entitled wnership of the trophy.

William Farrell, who has the title of champion collar and elbow wrestler of the State, wants to try his skill on William Muldoon, the Greco Roman wrestler. Last Monday [illegible] some of Farrell's friends called on Muldoon and offered to make a match, collar and elbow atyle. Muldoon replied that he claimed no eminence in that branch of athletic

could not accept the proposition. Farrell's friends are willing to match him for $500 to $1,000 to wrestle any new man in this State. Farrell has a good record and is much respected by those who know him. Around his home at Petaluma he is much thought of and there can be backed for a considerable amount.

Olympic Club Meeting.

Once more the Olympic Athletic Club has demonstrated its ability to get up and manage an athletic meeting in first-class style, and an upward push has been given to the practice and standing of athletics in San Francisco. The bright, cosy grounds of the club at Oakland were well sprinkled with spectators last Wednesday, many ladies being present and a more respectable, orderly gathering never graced an out-door meeting. There were no police to keep order, nor no be-badged officials to deprive the small boy of the joy of rushing into forbidden places, but none were needed and it seemed, as one veteran race-goer remarked, "the mere presence of police always seemed to create a special demand for their services." In fact, if the gathering had a fault it was primness, and if anything was lacking it was boisterous jollity, about the correctness of which at athletic meetings different people hold different opinions. The races were all good, and, except the mile, hotly contested, but nothing of a sensational character took place, no extra fast time was made and no wonderfully fast dark ones brought out. A good deal of sympathy was expressed on the grounds for the urbane athletic editor of a society paper, the same gentleman who once captained twenty-one San Francisco cricketers against the All England Eleven. This gentleman, who is said to be a most expert lawn tennis player, had through the columns of his paper announced in advance all the winners of the main events, but by some perverse conjunction of the planets his selections were generally easily beaten. Every one on the grounds knew that the men selected ought to win and it was generally considered to be most unfair towards the great cricketer that men whose names had never even been mentioned by him as formidable competitors should insist upon rushing to the front in race after race.

It is customary to praise the officers of a meeting and often such praise means but little, but in this case too much credit cannot be awarded to the gentlemen who managed the details. Here are the names:

Starter, W. C. Brown; referee, R. P. Doolan; judges, T. J. Petitt, G. M. Robinson, H. B. Cook; timers, C. H. Slater, W. M. Sime; clerk of the course, R. T. Stombs.

The record of the day's racing is given below:

One hundred yards maiden race, for members of the O. C. who have never run a race—A. R. Verrinder, O. A. C., 1; C. J. Bosworth, O. A. C., 2; O. A. Tolle, O. A. C., 3; C. S. Ruggles Jr. and G. M. Agnew unplaced. Time, 0:10$\frac{3}{5}$. This was a good performance for youngsters who had never before run a race. Verrinder jumped to the lead from the start and was never headed, winning by eighteen inches. Two feet between second and third.

Half-mile handicap bicycle race (open)—W. H. Day, 35 yards, 1; H. Tenney, scratch, 2; R. F. Verrinder, 15 yards, F. W. Gibson, 15 yards, and R. Rideout, 20 yards, unplaced. Time, 1:35$\frac{1}{4}$. H. Tenney made a hard race but he was unable to concede W. H. Day so long a start as 35 yards, the latter winning with yards to spare.

One hundred yards handicap race (open), first and second in each heat to compete in second trial heats. First trial heat—J. Masterson, scratch, 1; A. W. Brown, 10 yards, 2. Time, 0:10$\frac{1}{2}$. Masterson won easily.

Second trial heat—B. Benjamin, 10 yards, 1; A. L. Harris, 8 yards, 2. Time, 0:11. Harris only tried for second place.

Third trial heat—W. R. Stewart, O. A. C., 8 yards, 1; C. J. Bosworth, O. A. C., 11 yards, 2; V. C. Driffield, O. A. C., 12 yards, unplaced. Time, 0:10$\frac{1}{4}$. Bosworth gave Stewart a hard run for first place, and Driffield was beaten handily.

Fourth trial heat—O. J. Kron, O. A. C., 14 yards, 1; E. S. Emmons, O. A. C., 9 yards, 2; O. A. Tolle, 14 yards, and A. Struntz, G. G. A. C., 9 yards, unplaced. Time, 0:10. This was a close heat, Kron winning by a short stride and Emmons "all out" at the finish.

Second trial heats. First heat—A. L. Harris, 3 yards, 1 by six inches; B. Benjamen, 10 yards, 2. Time, 0:10$\frac{2}{5}$.

Second heat, second trial—A. J. Kron, 14 yards, 1; W. R. Stewart, 8 yards, 2. Time, 0:10. Kron finished strong and was a warm favorite for the final.

Trial heat—W. R. Stewart, 8 yards, 1; B. Benjamin, 10 yards, 2; A. L. Harris, 8 yards, 3; A. J. Kron, 14 yards, 4. Time, 0:09$\frac{3}{5}$. This was a grand race and its closeness made up for the shutting out of the scratch man, who was a bit over-handicapped. Stewart, Benjamin and Harris were dead even five yards from home and Stewart only won by a few inches with the same distance between 2 and 3. The time was too fast for any scratch man in America.

Professional one-mile handicap race (open) $15 to first, $10 to second—P. McIntyre (scratch), 1; W. H. Wood, 90 yards, 2; Guerrero, 60 yards and C. Lonergan, 90 yards, did not finish. Time, 4:50$\frac{1}{2}$. The race was tame. McIntyre drew up on his men gradually and on the middle of the fourth lap took the lead, winning from there as he liked. Guerrero pushed Woods for second place until the last turn when he followed Lonergan's example and stopped.

One mile bicycle race, open handicap—E. Mohrig, 40 yards, 1; J. C. Quinn, scratch, 2; H. C. Finkler, scratch, 3; W. F. Fisher, 30 yards, 4. Time, 3:13$\frac{1}{2}$. This race must have been a sad blow to the handicapper's good opinion of himself. Mohrig not only won the race but he won it by full 50 yards, increasing his handicap allowance 10 yards. Quinn and Finkler had a good race for second place and Fisher was nowhere.

The base running around the diamond by members of the Olympic club, foot-racers all barred, was very good. C. J. Bosworth won easily, making the trip in 0:16$\frac{1}{2}$ and repeating in 0:16$\frac{1}{4}$. T. H. Buckingham ran in 0:17$\frac{1}{4}$, and M. Strauss and C. S. Ruggles Jr. both in 0:18.

Two hundred and twenty yards scratch race, open to all amateurs—First trial heat—W. R. Stewart, O. A. C., 1; E. S. Emmons, G. G. A. C., 2; J. F. Seik unplaced. Time, 0:29$\frac{1}{4}$.

Second trial heat—A. L. Harris, O. A. C., 1; W. Lubbock, O. A. C., 2; A. Strunz, G. G. A. C., unplaced. Time, 0:25$\frac{3}{5}$. This heat was well contested from end to end, and but a foot divided first and second.

Final heat—W. Lubbock, 1; W. R. Stewart, 2; R. I. Emmons, 3. Time, 0:24$\frac{3}{5}$. In the final heat all the men, except Emmons, went off their marks and were set back a yard. Lubbock, who is a protege of Robert Haley, ran with good judgment and won by a foot in the last ten yards.

Five mile scratch bicycle race—H. C. Finkler, 1; J. C. Quinn, 2; G. Day, 3. Time, 18:05$\frac{1}{2}$. Although this was on the card as a scratch race, Day was given twenty yards. The race was most exciting throughout. Quinn took the lead and Day trailed Finkler. On the sixth lap Finkler made a spurt for the lead and raced even for some distance with Quinn, but fell back again to second place. This performance was repeated on the eighth, ninth, tenth, fifteenth, seventeenth and twenty-first laps, each time Finkler seeming unable to stay the pace. On the twenty-third lap Day brushed for the lead and got second place for an instant. Then Finkler let out, and passing both men after a long brush with Quinn, got in front and won by fifty yards, Day one yard behind Quinn.

Half mile handicap—T. McGovern, G. G. A. C., 1; J. T. Gorevan, G. G. A. C., 2; R. Gibson, 3; V. C. Driffield, O. A. C., and C. D. Long unplaced. Time, 2:19.

The fancy bicycle riding by Leonard was omitted.

Another Match.

William Muldoon will wrestle a match Græco Roman style, best two in three falls, on Monday night with Jules Rigal, who claims the following record: Born in Paris in 1849, first wrestled in the Arena Athletic, Paris, 1868, with all celebrated wrestlers. In 1873 he was the star of Salomonskie's great circus, and wrestled in all the principal cities of Germany and Austria. In the spring of 1875 he came to America. First wrestled with Louis Cartern in Chicago, winning the match, which lasted two hours. Two weeks later he wrestled with Andre Christol in Chicago. After a struggle of three and a quarter hours he had his arm broken and the match was declared a draw, neither having obtained a fall. In December, 1876, at St. Louis, he wrestled a match with Professor Emil Renier and Louis Carteron and won both matches. In 1877 he wrestled two matches in New Orleans, one with Mr. Mass and one with Lucien Marc. He won both matches, breaking Lucien's collar bone in the match with him. After giving exhibitions in all the principal cities of the United States he arrived here, where he has since resided. Although he has not wrestled a match for four years he has taken some practice, has been in good health and feels confident that he will give Mr. Muldoon more falls than the latter bargains for. Rigal is only five feet four inches in height, but built squarely from the ground up. He has been training very strictly and will wrestle at 175 pounds.

Donald McMillan of Bodie, who recently defeated Homer Lane in San Francisco, is anxious to make a match with W. Muldoon. He offers to wrestle in three styles—collar and elbow, Græco Roman and Cornish style in jackets, winner of two styles to take the match.

YACHTING.

The new periagua-rigged yacht being built at Mission rock warehouse is nearly complete. She will be quite a novelty. Her dimensions are as follows: Length over all, 36 feet; length on water-line, 32:4; beam 12; draft forward, 2; draft aft, 3; overhang aft, 3; freeboard to top of rail, 2:3; length of house, 20:4; height of house above deck, 2; length of cockpit, 7; headroom in cabin, 6; 4 bunks, 6x2; width of waterways, 2; length of centerboard case, 10; length of centerboard, 9; foremast, keel to truck, 39; foremast, deck to hounds, 26:8; mainmast keel to truck 40; mainmast, deck to hounds, 26:8; foreboom, 16; foregaff, 16; hoist of foresail, 24; mainsail, Bermudan; mainsail on boom, 21; hoist of mainsail, 30.

Last Sunday, for a wonder, there was not much outside swell, though the breeze was fresh enough, and so Mr. Tevis' yacht Halcyon, Mr. M. Donahue's Nellie, the Con O'Connor and Fleur De Lis siezed the opportunity to take a sail outside the heads. The Halcyon looked staunch enough to go anywhere and the other boats, which are centerboards, stood up well. After the trip outside, the yachts went up to Sancelito, where quite a number of vessels were gathered. In coming home from Sancelito to the city front the Nellie and Halcyon had a brush before the wind to the north shore.

New York yachtmen want to know why the owner of the Scotch cutter Madge has not found it convenient to race his boat since 1881, when he won the Seawanhaka Y. C. Cup, beating the Wave and Schenrer.

The Lurline is to have a new bowsprit with jibboom all in one piece. Her extra suit of large sails with gaff mainsail will soon be ready. She will also have a new main boom.

Dr. S. Merritt's Casco will probably take a run up to Puget Sound this summer.

The Mollie and Nellie, sloops, were on the ways and were cleaned last week.

The Susan Nipper of Alameda has been changed from a sloop to a yawl.

A Good Work.

The owners of the salmon fishing-boats between San Quentin and Rio Vista have been for a long time violating the law which forbids the catching of salmon from dawn of each Saturday until the following Sunday noon. The arrest of these violators has long been delayed. The fishermen at the first opportunity would scuttle the boat which any owner might dare allow the Constable or Fish Commissioners to use. They had also arranged a danger signal, which when sounded on a horn would set the whole fleet bounding away. Last Saturday a yacht was secured here and sent to Martinez, and by its aid eight boats and their contents were taken. Six of the owners paid $100 fine, and two are in jail. The Fish Commissioners intend securing a steam launch to enforce the law.

San Jose has at last got a first-class bathing place. San Jose people no longer have to make a trip to Santa Cruz to enjoy the luxury of a swim. The baths were opened for a few days late last season and are now in first-class running order. William Daily, the life-saving hero, has abandoned Santa Cruz beach to take charge of the San Jose baths and is in constant attendance to give lessons in swimming. His presence there is of no small benefit to the city. He is as popular a teacher as he is clever and it will be their own fault if after this any man, woman or child in San Jose gets drowned because they never learned to swim.

At the meeting at Chester Park, Cincinnati, on the 24th ult., the first trot, for the 2:40 class, was won by Mambrino Sotham in three straight heats; time, 2:35$\frac{1}{4}$, 2:36, 2:32$\frac{1}{4}$. Maud R was second, Minnie Wilkes third and Emma Strathmore last. The second trot, for the 2:19 class, was won by Deck Wright, who took the second, third and fourth heats; each heat, 2:25. Romero was second, Francis Alexander third and Troubadour fourth.

Starting Horses—A Troublous and Thankless Office.

An old schoolboy motto says, "Begin at the beginning"—and it would be rather difficult for even a bull-making Paddy to commence anywhere else; so the matter of the Randwick starting shall be the first subject of the present notice. And it must be at once boldly asserted that the system of dispatching horses adopted in New South Wales is not only an absurdity in practice, but also absolutely opposed to the distinct "lettering of the law" laid down by the Newmarket Jockey Club in its printed instructions to the official who wields the flag. The wording of the authoritative English regulation is to the following effect:

"The starter shall marshal his horses about 100 yards behind the post, and then walk them up, dispatching them so soon as they are in a line, providing it be on the right side of the said post."

The use of an assistant starter is explained in the same instructions, and the position, at home, of this indispensable aid is utterly different from that taken up by our colonial cousins. At Randwick and Hawkesbury, for instance, the white flag is held up at the inner side barely twenty paces in front of a whitewashed line now drawn across the course (which line is a new-fangled Yankee notion), and is dropped at the same time as the red flag, the signal being, in fact, of no use at all except to the timekeepers. The proper plan, however, is to station the assistant prominently on the course at least fifty yards in advance of the starting post, so that every jockey can have him fully in his eye. The actual "office" to jump away has therefore to be received from the white flag, the riders' eyes being properly fixed forwards instead of sideways as at present practiced. The result of this sensible system, if carried out in the integrity of its intention, must inevitably be that every muscle being in motion the horses are prepared to bound off instantly on getting permission so to do, which permission their jockeys are well enabled to simultaneously instil into the animals they bestride, owing to each looking alike between his horse's ears at the signal object ahead and the clear track to be traversed. But how do these jockeys now behave themselves at the post? The response may be summed up, and supported by thousands of annoyed witnesses, in the one word, disgracefully. The fixed point of departure being at the absolute commencement of the distance of the coming race, and the horses allowed to come up thereto in a canter from a few strides in the rear, every possible scheme is tried by the lads in order to get an advantage by being in the fullest swing at the moment when the starter may chance to let his red flag fall. Instead of their attention being solely directed to the white token in front, which by racing ethics is the real signal for getting away, the jocks invariably have their optics eagerly directed to the left of the course so as to catch the slightest sign of the starter's arm moving, and the consequence is that through compressed knees, and spurs already tickling their sides, the fractions-rendered field comes sidling up in most disorderly array, and the unfortunate official possibly becomes so disgusted at the delay caused by such willful misconduct that he finally drops the bit of bunting at the worst possible moment. Fining those who are disobedient or misbehave, although a just punishment, is at the same time almost useless under the blamable practice of owners or trainers finding the money for any penalty inflicted. Absolute disqualification for a lesser or a longer term, according to the heinousness of the offense, will alone prove a remedy for this shameful disorder; and when the simple and rational plan of walking horses up in a line becomes colonial turf law, then will it be all the easier to spot and punish any offender. These straight remarks are not meant to reflect personally on Mr. R. Rouse for the many failures at the late Randwick meeting, for the Archangel Gabriel himself could not start horses on level terms under the permitted and mistaken system across the border. Both Mr. Rouse and Mr. Wm. Gannon have occasionally given such capital starts as to elicit a burst of praise; but these have mostly been happy-go-lucky incidences rather than from having any personal command over those in the pigskin—nor can it be gainsaid that this very applause shows a satirical display of public surprise. Moreover, in thus animadverting on the New South Wales custom, we do not by any means wish to assert that the Victorian plan is either perfect or correct, for in sober truth it is neither one nor the other. Mr. George Watson is an excellent official, and seldom fails to send his field away on tolerably even terms, but he also breaks the Newmarket Regulations—which the V. R. C. profess to adopt in their entirety—every time he takes flag in hand, as he gives the horses a dead start. The sole secret of the modicum of success he obtains is the power he wields over the professionals, every one of whom he knows personally, and none of whom he spares for any infraction of his orders. Hoping that the A. J. C. will seriously take this important subject into immediate consideration, and that next season may be made memorable by an utter change "from the old to the new," we will now have a chat about the few distinguished horses who took part in the late contests and are likely to be the cracks of the coming season.—*Melbourne Sportsman.*

The following, from the New York *Spirit of the Times* on the same subject, points to difficulties on Eastern courses:

There is nothing more vexatious to the attendance than the long delays before starting, and, in truth, nothing could tend to make the races more unsatisfactory. Such races are seldom truly run. The long delay at the post excites and exhausts the contestants, particularly the fillies. One day without delay they get off and run truly and win, but the next day one of these delays occurs, at which the high-strung winner of the day before frets herself to a lather, and is beaten before the flag finally falls, and up goes a roar from her backers that she has been pulled or tampered with. It may be said that a delay of a half hour at the post will, as a rule, cause a race to be run at least a half second slower than if they got off at the beginning. Thus the running seems "in-and-out," as the saying is, and explains some of the vagaries of two-year-old form, which has proven so expensive to many speculators, discomforting to owners, and exasperating to trainers, who have no excuse to offer on the score of condition.

With all our boasted improvement in racing, we have not reached the system enjoyed by the English. In England they have a man of unapproachable character, employed at a handsome salary; here the starter is changed annually, or semi-annually, at the whim of turfmen, or the ignorant prejudice of the mob. We have hoped to see the day when a starter of probity and experience shall handle the flag at all the Eastern meetings, and under comfortable salary. He should not be a mere stable hanger-on or a pool-room lounger, but a gentleman by birth and education, who understands the line between condescension and familiarity sufficiently to enforce respect from jockeys, and with force of character enough to command obedience without having recourse to bandying words or shouting his commands. A new starter, like a new broom, sweeps clean enough to suit the public at

first. And why? Simply because he is new to the jockeys. He has never promised them a start, only to leave them, he has never fined or suspended them, and they obey his commands. But for how long? In less thau a month one-half the jockeys, trainere and owners have a grievance against him, and a certain element in the attendance will hoot and hiss him. The jockey's grievances will he that the etarter promised him if he could go hack he would not leave him, hut that he hroke his promise; an indifferent start will turn the trainer against him, while the owner will look wise and hiut dreadful things. The confidence of the jockeys is something easily shaken, end, as they have their employers at their backs, they feel a contempt for the starter which should not exist. But exist it does, and existing causes indifference to his commands, and hence the starts gradually become worse and woree; the mob, who have lost a few dollars, now throw the weight of their displeasure into the scale, and the once-popular starter feels like a Cain among his fellow men, hounded as he is from every quarter.

If some honest, competent man were appointed, with no uncertain tenure to his position as starter, it would be a great improvement upon the preseut shifting, unsettled state of affairs. After all, the cheracter of the man wonld enter largely into the tennre, and this fixity in his position eafe from removal at the caprice of owners or the roar of the mob would right all wrong in time. If he were inexperienced at first, he could, if he possessed any of the natural qnalifications, such as calmness and nerve, readily overcome hy practice what he lacked in experience. Another important concideration is that if the jockeys knew that the starter was firm in the possession of his office and not removable for elight cause, they wonld more readily obey him. The weakness of his position at present invites attack. If the jockeys felt that the starter was a gentleman, having the social and official support of the clnhs at his hack, they wonld not dare put him at defiance as they do at present, nor even treat him with indifference. On the contrary, they would find it to their interest to conciliate the starter, and the result would be fewer breakaways, fewer delays at the post, less fines and suspensions imposed, and certainly more even and satiefactory starts. That bad starts would happen is, of course, possible, but they would be the exception. When they did happen, they would be ascribed to accident, whereae now, when the etarter is chauged to suit the whim of every one, a bad start is ascribed to design. Long as has heen the apprenticeship of Mr. McGeorge, the model of English starters, he will not delay a start hy calling the horses hack if oue or two jockeys prove refractory and do not get away. This we have from Hnghes and Fisher, who, while in our office last week, alluded to the snhject of starting, whereupon we asked them:

"Does McGeorge start horses so evenly as has been represented?"

"Yes," replied Hnghes, "but at Lincolu, in March, he left several horses behind. He won't stand any nonsense."

"What do you mean by nonsense?" we inquired.

"Why, I mean that he minds his own husiness, he don't shout and order the jockeys about, and he makes everyone mind his. If anyone hangs hack when the rest are even in getting off, he drops his flag, and the one who loafs is left."

But what a scene such an action would produce here! The etarter would be hissed and groaned, and the jockey, who was prohably the real cause of the trouble, would be encouraged hy the sympathy he would receive. But no one ever questions Mr. McGeorge's starts in England. The reason they do not is, that he is the long-tried and trusted official of the Jockey Club, which will not remove him at the diepleasure of the mob. If the same plan were adopted here, not only the jockeys, hut the public, would soon learn that to make the starter the object of their prejudice was uselese, and that official, no longer annoyed hy such hostile demonetrations, wonld give greater satisfactions in the discharge of his duties.

Hanlan Wins.

The old saying that there never was man so good that a better could not he found is disproven in the case of Hanlan, the oarsman. He shines pre-eminent to day as a scnller, and thongh his opponents have literally raked the four quarters of the glohe for some one to heat him, every euccessive race has only added to Hanlan's laurels and gone to demonstrate the impossibility of finding any man of his own generation able to heat him. Conrtney dared not row him, Trickett from Australia he heat with ease. Robert Watson Boyd, the Lyne terror, was made a laughing-stock hy the Canadian champion, and now comes the uews that the athletic Kennedy was badly heaten. The telegraphed report of the race ie helow. Though uot very technical, it seems to show jnst how easily Hanlan won:

The match race, single sculls, hetween Edward Hanlan of Toronto and John A. Kennedy of Portland, for $2,500 a side, took place Friday afternoon at Point of Pines. The distance was three miles, with a turn. A smoother course was rarely seen on lake or river. The start wae effected at 6:34 p. m. Kennedy took a slight lead, which he kept for the first mile, Hanlan, however, keeping Kennedy well up to his work. It was a pretty race for that distance. There were fears of a foul and indications of hoth men going out of the course. Hanlan apparently first discovered this and therehy gained eeveral lengths. By this time Hanlan had headed Kennedy and turned the stakehoat four or five lengths in advance. After the first mile Hanlan evidently had the race in his own hands, and, after turning the stakehoat, occasionally reduced his stroke to a minimum and rowed at his ease, while Kennedy kept nearly the same stroke throughout. The official time is as follows: Hanlan, 19:04; Kennedy, 19:52, showing that Hanlan won by twenty lengths. Ahout 2,500 people witnessed the race. As the men came up from the water Hanlan was greeted with hearty cheers. He appeared as though returning from a practice spin, rather than from a match race. Kennedy's reception was less enthusiastic. Hanlan, speaking from the hotel balcony, said the oarsman he had rowed against was a perfect gentleman and it was the hardest race he ever rowed.

A Slight Error.

"The horse Slim Jim was sold recently in Sacramento to W. W. Morrow, the owner of Ashley, for $3,000. Less than two years ago Jim was offered in Greenville for $400 and his owner could not find a purchaser for him at that price. Horses, as well as men, are better appreciated abroad thau at home.—*Reno Gazette.*

The Reno *Gazette* makes a slight mietake. Mr. Robert Morrow, not W. W. is the owner of Ashley, and neither Rohert nor W. W. Morrow has purchased Slim Jim for $3,000 or any other price.

On the 9th of June a rifle match will take place at Shell Mound Park, between W. E. Erben and Lieut. H. J. Mangele. The conditions of the shooting are 100 shots each with U. S. Springfield rifles for $100 a side, at a twelve-ring target.

TURF AND TRACK.

The Salt Lake Races.

The epring meeting of the Salt Lake Jockey Club opened on Tuesday last with fine weatber and a large attendance. The associated press reports are too meager to make up summaries, hut the details will he on hand the coming week. The result of the first three days as conveyed by the telegrams is as follows:

Thursday, Inaugural Rush, one mile; Joe Howell won, Ordnance second, Euchre third. Time, 1:48¾.

Same Day, Livery Stahle Stake for three-year-olds, one mile and a quarter; Augusta E won, Tbaby second, Gift third. Time, 2:18¾.

Same day, trotting, 2:30 class; C. F. Samson's Happy won, J. Matthewson's Frank L (formerly Orphan Boy) second, J. L. Wisdom's Lady Faustina third. Time, 2:33½, 2:34, 2:36.

Same day, Club Pnrse, for all ages, half mile; Jim Douglas won, Johnny second. Time, 0:52.

Second day, Cluh House Stakes, for all ages, three-qnarters of a mile; Joe Howell won, Jim Douglas second, Pikes Peak third. Time, 1:17¼.

Same day, trotting 2:50 class; Laster won, Millie D second, Zip third. Best time, 2:42.

Same day, pacing 2:35 class; Blue Dick won, Miesing second, Tommy E and Baruey distanced. Best time, 2:45¾.

Third day, Salt Lake Derby, for three-year-old colts and fillies, one mile and a half. Augueta E won, Lorillard second, Gift third, Beauregard fourth. Time, 2:48½.

Same day, Saloon Stakee, for all ages, mile heats. Ordnance won in straight heats, Fred Collier second. Time 1:46½, 1:48½.

Same day, Railroad Handicap, for all ages, one mile and five hundred yards. Red Boy won, Euchre second, Pikes Peak third. Time of mile, 1:50.

A Great Double-Team Performance.

The most notable performance in the way of trotting during the past week was the driving hy Mr. William Rockefeller over the Fleetwood Park track, New York city, last Thursday, of a mile in 2:22¼, the team which pulled him heing Midnight and Enchantress. Ae the performance is the hest one ever made hy a double team with an amateur driver, and that driver also the owner of the horses, it is worth more than a passing mention, especially as one of the team, Enchantress, has no public record. The facts are that the two very fast teams owned by the Messrs. William and John D. Rockefeller, Cleora and Independence, and Midnight and Enchantress, were sent to the track ahont two weeks ago to he shaped up for fast work. Cleora and Independence were driven a public mile over the same track last fall in 2:21½, having heen hitched together only three times previous to the trial. This year the only preparatory fast work given to Enchantress was a mile to wagon in 2:31½, while Midnight went a mile, hitched the same way, in 2:31. On the day of their fast mile together the team was driven to the track from Mr. Rockefeller's stahle, the trial heing made ahout 5 o'clock, in the presence of twenty-five or thirty gentlemen. The team was eent away rather easily, the first qnarter heing trotted in 0:36, hut from that point the pace was improved, the second quarter being done in 0:35¾, and the last half mile in 1:11, being the fastest last helf mile made hy a gentleman driving his own team, Messrs. Work and Vanderhilt, who have driven their famous teams fast miles over this track, heing credited with 1:11½ and 1:12 respectively.

Midnight, one member of the team, is pretty well known, as he came out several years ago as a phenomenal colt, trotting a mile at four years old in 2:29, and at six years of age ohtained his present record of 2:18¾. He was, during his turf career, a notorious quitter, and ou one occasion, at Cleveland in 1878, was heaten in 2:31 hy Adelaide, after he had won the second and third heats in 2:22, 2:23¾. He is hy Peacemaker (son of Rysdyk's Hamhletonian and Sally Feagles, by Smith's Clay), and out of a mare hy the Drew Horse. Enchantress is a bay mare by Heppy Medinm, and her dam is also of Hamhletonian blood. Both memhers of the team were foaled in 1872, and are consequently just in the prime of a trotter's life.—*Breeder's Gazette.*

The Kentucky Derby.

The following account of this race, run on the 23d ult., is from the *Kentucky Live Stock Record:*

The Derby came next, and the crowd increased up to the time the race was called, and there were fully 10,000 people present. We do not mean any exaggeration, hut at the lowest estimate in our hest judgment that many people wituessed the race. Ascender was the favorite just hefore the start, hnt he failed to obtain a place. We stated early in April that we did not think he would be ready and fit for the Derby, and in selecting Pate's pair, Bondholder and Ascender, to get a place in our last issue, we expected Bondholder to represent the stahle, hut we fear he has gone wrong, as he did not start. We selected Pate's pair, Leonatus and Drake Carter, to furnish the placed horses, with Lord Raglan as an outsider. Bondholder did not start and our other three selectious were first, second and third. We do not douht that the hest horse won, hut we cannot let the occasion slip to say that the Nantnra stallions, Longfellow and Ten Broeck, deserve great honor in furnishing the three placed horses in the Derhy. The track was very heavy in spots, and did not suit Drake Carter from his action, and Kellar, from his swerving on the homestretch, must have heen sore in his hig aud complaining hocks.

At the first attempt the seven went away to a good start, Leouatus in the lead, Raglan second, Cbatter third, followed hy Kellar, Pike's Pride, Drake Carter and Ascender. Before reaching the three-quarter polc Cbatter had taken eecond place to Leouatus, Raglan third, followed hy Ascender, Kellar, Pike's Pride and Drake Carter. There was no change at the stand, and Leonatus was a length in front of Chatter at the qnarter, Raglan third, Carter fourth, Ascender fiftb, Kellar sixth, Pike's Pride last. Before reaching the half Ascender made a spurt and was third, but he soon died away, Drake Carter taking third place. The truth of the whole affair, snmmed up in a nntshell, is that Leonatus took the lead, made all his own running, was never headed, and won it in a hig gallop by three lengths, Drake Carter second, a half length in front of Lord Raglan third, Ascender fourth, Kellar fifth, Pike's Pride sixth, Chatter last. First quarter 0:27½, half 0:54, mile 1:49, race 2:43.

SUMMARY.

Third Race—The Kentucky Derby, for three-year-olds; $100 entrance, half forfeit, $20 if declared May 1, 1882, $40 if declared May 1, 1881, with $1,500 added, of which $200 to second; 1½ miles; 50 entries, 3 void, 1 declared May, 1882, 8 declared May, 1883; value, $4,020.

Chinn & Morgan's b c Leonatus by Longfellow, dam Semper Felix, 105 pounds..... (Donohue) 1

Morris & Patton's b g Drake Carter, by Ten Broeck; dam Platina; 102 pounds..... (Spillman) 2

N. Armstrong's ch c Lord Raglan, by Ten Broeck, dam Catina; 105 pounds..... (Quantrell) 3

R. C. Pate's b g Ascender, by Buckden, dam Ascension; 102 pounds..... (Stoval) 0

George Evans' ch f Pike's Pride, by imported King Ban, dam Lou Pike, 102 pounds..... (Evans) 0

W. C. McCardy's b c Chatter, by Whisper, dam Clarina; 105 pounds..... (Henderson) 0

J. R. Watts' ch c Standiford Kellar, by Great Tom, dam Blondin; 105 pounds..... (Blaylock) 0

Time—2:43.

Betting—Ascender $275, Leonatus $260, Raglan $135, Carter $125, Kellar $41, Chatter $35, Pike's Pride $20.

Leonatus is a rich bay, blaze face, and two white heels behiud above the pasterns. He stands full 15¾ hands high, and is certainly one of the smoothest aud ncatest eous of his distinguished sire. He has a neat, handsome head, stout neck, well inclined shoulders, good middle piece, with great length, excellent hack and loins, and full hips and quarters, on sound, good legs. He is rapid in motion, and keeps legs well under him. He was hred hy Mr. J. Henry Miller, Lexington, Ky., and sold last wiuter to his present owners for $5,000. He is engaged in fifteeu more stakes this year.

Trotting at San Luis Obispo.

Ties at four single hirds:

Butler.....1 1 0 0—2 Havens.....1† 1† 1 0—3

(†) Second barrel used.

After lnnch there was pool shooting, miss and out. Eighteen candidates entered for the first pool at $2 50 each and the money was divided hy Ewing and Butler with five kills each. A second match with similar conditions was won hy Ewing with six kills.

Market Report.

FLOUR—We quote: Best City Extra, $5 60@$6; medium grades, $4 50@$5 25; Shipping Snperfine $4@$4 25 ₱ bbl.

WHEAT—The movement on shipping accouut is almost nominal, while prices seem to bave settled down to about $1 65@$1 67½ ₱ ctl. for No. 1 grades. Choice lots command an advance.

BARLEY—Prices continne to go downward. We quote: No. 1 feed, 95@97½c; good Brewing, $1 offered, bnt no sales.

OATS—Fair Feed, $1 85@$1 95; Good, $2@$2 15; Choice, $2 30@$2 35 ₱ ctl.

RYE—Qnotable at $1 50@$1 60 for fair to good.

FEED—Ground Barley, $23@$24 ₱ ton; Cracked Corn, $36 ₱ ton; Shorts, $16@$17 ₱ ton; Oilcake meal, the oilworks sell to the trade at $35 ₱ ton, less the usual discount; Middlings, $20@$22 ₱ ton for lots at the mill.

HAY—Alfalfa, $10@$14; Wheat, $16@$18; Barley, $14@$15; Wild Oat, $16@$17 50; Mixed, $12@$15 ₱ ton.

STRAW—60c@75c per bale

PROVISIONS—Eastern Hams, 16½@16½c; California, Hams, 15@15½c for plain, 15½@16½c for sugar-cured canvased; Eastern Breakfast Bacon, 16@16½c; California Smoked Bacon 15@15½c for heavy and medium, and 16@16½c for light and extra light; Clear Sides, 15½@15½c; Pork, $18 50@$19 for Extra Prime, $20@$20 50 for Prime Mess, $24 50@25 for Mess, $25 50@$26 for clear and 26 50@$27 for extra Clear; Pigs' Feet, $16@$18 ₱ bbl; Mess beef, $15 50 for bbls and $8 50 for bf bbls; Extra Mess Beef, $16 50 for bbls and $8 75 for bf bls; Family Beef, $18@18 50 ₱ bbl; California Smoked Beef, 13½c.

FRUIT—We quote lots as follows: Apples, new, 75c@$1 ₱ box; Apricots, 40c@65c ₱ box for Pringle and 8c@10c ₱ lb for Royal; Cberry Plums, 75c@$1 ₱ box; Currants, $6@$7 ₱ chest: Raspberries, 10@12c ₱ bskt; Strawberries, $6@8 ₱ chest; Cherries, $6@$9 ₱ chest for poor and $12@15c for good to choice; Gooseberries, 4@6c ₱ lb; Peaches, 8@10c ₱ lb; Lemons, $7@$8 ₱ box for Sicily; California Lemons, $1@$2 ₱ box; Limes, $8@$12 ₱ box for Mexican; Tamarinds, 12@13c ₱ lb; Bananas, 1 50@$3 ₱ bunch; California Oranges, $1@$1 50 for common and $2@3 for good to choice.

VEGETABLES—We quote: Summer Squash, 8@10c ₱ lb; Carrots, 37½c@50c; Turnips, 50@75c; Cauliflower, 25@50c ₱ dozen; Cabbage, 60@80c ₱ ctl; Garlic, 3½c ₱ lb; Celery, 50c ₱ doz; Dried Okra, 20c@25c; Dry Peppers, 10c@12½c ₱ lb; Green Peas, 1@1½c; Rhubarb, 6@8c per lb; Musbrooms, 75c@$1 ₱ box; Tomatoes, $2@$2 50 ₱ box; Cucumbers, 12c@$1 50 per doz.; Asparagus, 65c@$1 ₱ box; Sprouts, 3c ₱ lb.; Artichokes, 10c@15c ₱ doz.; String Beans, 3@6c ₱ lb.; Green Corn, 25c ₱ doz.

POTATOES—$1 50@$1 60.

ONIONS—$1 for good.

BEANS—Bayos, $5; Butter, $3 25@$3 50 for small and $3 50@$4 for large; Limas, $3 80; Pea, $3 50; Pink, $4 75@$4 80; Red, $4 60@$4 70; small White, $3 50; large White, $3@3 25 ₱ ctl.

BUTTER—We quote jobbing lots: Fancy, 23½@24c; choice, 22@23c; fair to good, 17@22c; inferior lots from country stores, 15@17c; firkin old, 20@22½c for choice; new, 22@25c; pickled roll, 24@26; Eastern 17@20c.

CHEESE—Firm. California, 14c for choice: 11@12½c for fair to good; do, factory, in boxes, 14@16c; Eastern, 16@17c.

EGGS—California, 29@30c ₱ doz; Eastern, 23@24c per doz.

POULTRY—Live Turkeys, gobblers, 17@18c; do, Hens, 16@17c; Roosters, $6 50@$7 50 for old and $9@$11 for young; Hens $6 50@$7 50 Broilers, $3 50@$7, according to size: Ducks, $6@$8 50 ₱ dozen; Geese, $1 50@$1 75 ₱ pair; Goslings, $1 50@$2 25 per pair.

GAME—Snipe, $2 25@$2 50 for English and 75c@$1 for common; Hare, $1 25@$1 75; Rabbits, $1 25@$1 50.

WOOL—We quote: Choice Northern Free, 22@24c; Choice Northern Burry, 17@19; Calavaras and middle counties, 20@23; San Joaquin and coast, choice, 16@18c; San Joaquin and coast, inferior, 13@15; San Joaquin and coast, year's clip, 14@18c.

HIDES AND SKINS—Dry hides, usual selection, 16½@17c ₱ lb; culls one-third less, and Mexican Hides 2c ₱ lb less; Dry Kip, 17c; Dry Calf, 17c@22; Salted Steer, over 55 lbs, 11c ₱ lb; Steer and Cow, medium, 9½@10c; light do, 8@8½c; Salted Kip, 15 to 30 lbs, 9½@10c; Salted Calf, 13@15c ₱ lb; Salted Veal, 12@13c; Sheep Skins, 25@30c for Shearlings, 30@60c for short, 50c@90c for medium, and $1@$1 40 apeice for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—Quotable at 8@8½c ₱ lb for rendered and 11@12c for refined, both in shipping order.

MEATS—Following are rates for whole carcasses from slaughterers to dealers:

BEEF—Prime, 8@8½c; medium grade, 7@7½c; inferior, 5½@6c ₱ lb.

VEAL—Large Calves, 7@8c; small ones, 9@10c ₱ lb.

MUTTON—Wethers are quotable at 4½@4¾c and Ewes at 4@4½c ₱ lb, according to quality.

LAMB—Spring is quotable at 6@6½c ₱ lb.

PORK—Live Hogs, 8@8½c for hard and 7@7½c for soft [illegible] do 10½@11c ₱ lb for hard grain hogs.

MULDOON WINS.

Description of the Wrestle—A Grand Display of Muscle, Science and Good Grit.

Trials of strength and skill honestly contested never fail to excite many conflicting passions in the human breast, but for trials of any kind not bona fide there is but one feeling, that of deep contempt. Honest efforts to win receive more liberal rewards in America than any other country because the people have more money to spend and are not afraid to pay liberally to be amused or excited. And so when the genial public got to believe, as they soon did, that the wrestling match between William Muldoon of New York, and Donald Dinnie of Scotland, was for blood, the demand for tickets was enormous. By 8 o'clock Saturday night the main body of the Grand Opera House was well filled, the upper gallery was packed to suffocation and a pile of seats erected on the stage supported the weight of full 400 people. The study of the crowd was as interesting an amusement to while away the time before the wrestlers appeared as anything else. There were all sorts of people there, but the crowd was mainly composed of the "better sort." If Muldoon and Dinnie only knew the small estimation in which professional wrestling was held before their arrival they must have felt highly gratified at the compliment paid to their reputation by the presence of an assemblage of more than 2,000 people, including some of the most prominent merchants and brightest thinkers on the Coast. Captain Short was there in charge of the police detailed to preserve order and to his efforts the press representatives on the stage owe the uninterrupted view they had of the match. The crowd was good-natured and orderly but chafed a little at the long wait before the proceedings commenced and at 9 p. m. when Muldoon and Dinnie were introduced, had begun to wonder a bit whether or not some accident had happened. The entrance of the wrestlers was heralded by Uncle Billy Jordan, who announced the terms of the match. They were to wrestle thirty minutes Cumberland style and thirty minutes Græco Roman style, counting only the time actually consumed in wrestling, Dinnie agreeing to throw Muldoon twice as often as Muldoon threw him or lose the match. The stake at issue was $250 a side, each man backing himself. On Dinnie insisting it was agreed to divide the gate money equally and the house having been sold to speculators for $1,500, each man got $750, win or lose, so it will be seen that the only stake was $500 and that the loser was $500 ahead on the match. Still $500 added to the prestige of victory is enough to induce men to do their best, and in this instance the total absence of betting removed the slightest incentive to fraud.

The apparent odds of 2 to 1 given by Dinnie seemed a large percentage in Muldoon's favor, but in reality the odds of the match were much against him, assuming that Dinnie (as was the case) had a great advantage in the Cumberland style of wrestling, for that style only requires the merest touch of any part of the body to make a fall, while in Græco-Roman the rule demands two shoulders and a hip on the floor before a fall can be counted. One style gives a chance for a protracted struggle on the floor while in the other a fall may be accomplished in a few seconds. Dinnie winning the toss for choice of styles began with a hold Cumberland fashion. The men breasted each other and placing their hands behind each other's backs, one under and one over, firmly joined their hands together and then time was called. Muldoon entered the match in the belief that he stood an equal chance with Dinnie Cumberland wrestling, though he admitted he had no experience in that style; but the first hold undeceived him. Dinnie having the advantage of height, aimed to draw Muldoon up close to him so that he could put his height to good use by bearing his opponent over. Muldoon not understanding the policy of Dinnie's tactics made no resistance to this and the instant the men were locked close together Dinnie by an inside back heel threw Muldoon to the ground. Time, 0:22½. This was as much of a surprise to the spectators as it was to Muldoon, and for some reason the fall did not get the winner the faintest round of applause. Muldoon smiled grimly and Dinnie marched to his chair with a step as proud as bad Rob Roy when marshaling the Clan Alpine. Still another surprise awaited the spectators and that was an announcement by Billy Jordan that between the heats a rest of five minutes would be allowed. This set the boys figuring, and soon they arrived at the conclusion that five minutes wait for every 22½ seconds of work would keep them in the Grand Opera house until 4 a. m.

The second bout was Græco-Roman style and right here Dinnie showed plainly how he intended to win the match. He stood away, warily trying to evade a hold, and as time was taken in this style from the moment the men were ordered up, every second wasted was a second gained by Dinnie. Muldoon was not long in catching on to this idea and went at Dinnie with tremendous dash and vim. The moment he took hold Dinnie slipped to the ground face down, and spreading his legs wide open lay still, passively resisting Muldoon's efforts to turn him on his back. "Ah, oh!" laughed some of the smart spectators, "this Scotchman is too clever for Muldoon, he can lay that way as long as he pleases." But Muldoon had a trick that no one thought of and just when Dinnie had comfortably settled himself for a snooze on the floor, Muldoon's powerful right arm wound itself around Dinnie's neck and then, taking a grip that no human muscular force could break, the arm began slowly to move. Naturally enough Dinnie's head and neck moved too, and like a flash, the Scotchman got the idea that either his body must follow his neck or his neck leave his body. Rather than be a party to a divorce so painful, Dinnie allowed his body to come, and just at the instant when further resistance would have jeopardized his life he rolled over on to his back and shoulders and Muldoon was given a fall. Time, 1:32½.

Dinnie's neck and face presented a frightful appearance when he faced the spectators. A large bruise under his chin showed where the iron muscles of Muldoon's arm had literally eaten into the flesh. The veins on his face stood out like rough twigs and the slow painful way in which he moved his head showed he did not relish the sport. In that respect the spectators differed with him. They had felt pained to see so popular and clever a wrestler as Muldoon balked of a fall by Dinnie's dogged trick to save time, and the sight of Muldoon's preventative to obstinacy was a delightful revelation of the possibilities of wrestling to be rewarded with cheers and hand clapping to the full limit of lungs and palms.

Five minutes spent in waiting and discussing the chances, and then a brief struggle Cumberland style. Muldoon was wary and cautious enough, but his lack of experience was against him and after twice lifting him clear off his feet, Dinnie got the same inside back heel as in the first round and won the fall. Time, 54 seconds.

Round fourth, in Græco-Roman style, was a beautiful exposition of Muldoon's skill. Dinnie acted on the defensive, keeping away as long as possible, but Muldoon was not to be denied, and, boring in, got a fair hold. Then Dinnie, by a quick lock, got Muldoon down, but just as it seemed that Muldoon must lose a fall, he rolled Dinnie over so quickly that no one could see how it was done. Then Dinnie repeated his time-saving tactics and lay spread out on the floor face down. Again Muldoon put his head in chancery and proceeded to twist him over. This time Dinnie's resistance to the fearful grip was less obstinate than before, and in 1:13 Muldoon had won the fall. The falls were now even, but it had taken Muldoon twenty seconds more than twice as long to throw Dinnie as it had taken Dinnie to throw Muldoon, and at that rate Dinnie must be an easy winner. Muldoon, however, had come to the conclusion that, as he could not break nor evade Dinnie's hold Cumberland style, he might as well play for the fall and not act on the defensive. This he did, and in the fifth round Cumberland style got his shoulder under Dinnie, and by a dexterous twist landed the Scotchman on the broad of his back. Time seven seconds, the fastest round of the match. Muldoon's reward for beating Dinnie at the latter's own game was a salute of applause such as is rarely heard in a theater, and was only limited by the physical capacity of the spectators. Dinnie looked a bit chagrined, but still confident.

The sixth bout—Græco-Roman—was very lively. Dinnie worked for a fall and succeeded in getting Muldoon in his arms and lifting him clear off the stage. There he held him, calmly waiting for the seconds to roll by and make his chance of winning better; but Muldoon asserted his right to the title of solid man by forcing his way to the floor, and seeing that Dinnie did not want to take big risks, cunningly offered him his body for a throw. Dinnie caught on, but alas for him that he did so, for Muldoon quietly reached his hand back, got a head grip and planted Dinnie on the floor. Time 1:21.

By mutual agreement a recess of fifteen minutes was had to recruit the energies of the wrestlers and further tax the patience of the spectators. The rest seemed to do Dinnie good, for in the next bout—Cumberland style—he threw Muldoon in nine seconds. From this time to the twentieth bout the work was of a uniform character, requiring no special description. Dinnie threw Muldoon in short order every bout, Cumberland style, and Muldoon threw Dinnie all the Græco-Roman matches. Dinnie in spite of the terrible neck-twisting persisted in his policy of defense and forced Muldoon to resort to that cruel work nearly every bout. In the tenth round Muldoon fairly forced Dinnie back to the reporter's table, then seizing him in his arms ran to the center of the stage where he threw him heavily, falling on top. Dinnie got up very much shaken, and feeling his nose, which was contused. His arm was also bleeding. The thirteenth bout Cumberland, the men went down side by side. Mr. J. J. O'Brien who had been selected as referee gave it "no fall" whereat some of the spectators hissed. Muldoon's face flushed and he told Hallinan, his second, to give up the fall to Dinnie. Then advancing to the footlights he said, "some of you people don't understand how heavily I am handicapped in this match and I don't think you should hiss me for claiming my rights." Cries of "good man," "we did not hiss you," "go in and win," greeted this remark. Dinnie declined to take the fall without the referee's order and that gentleman again repeating "no fall" the pair took hold again and in six seconds Muldoon was down. At 11 p. m. Dinnie was away ahead on time and Muldoon appealed to Hallinan, his judge and second, for advice. Hallinan, who is a shrewd fellow, told him to keep away as far as possible in the back holds, so that Dinnie could not bring his length of back into play. Muldoon heeded the caution and then a change came over the appearance of the match. Dinnie was foiled. His giant frame and skill were of no avail to throw Muldoon so long as the latter's back was nearly at right angles to his hips, and instead of downing him in 9 or 10 seconds, as before it was 1:57 ere the referee gave Dinnie the fall. At this point Muldoon was one fall ahead. Time of Græco-Roman 12:15½, time of Cumberland 5:51. Still the odds were largely in Dinnie's favor, but Muldoon improved on his experience and in the next bout Cumberland style repeated his careful tactics and, try as he could, Dinnie could not budge him. This was beating Dinnie with his own weapons with a vengeance and the spectators entering into the spirit of the sport heartily cheered Muldoon every time he evaded Dinnie's attempt at a lock. At last Dinnie grew weary and, quick as a flash, when he felt his opponent's grip weaken Muldoon rushed in and with a hip lock hurled Dinnie to the stage, shaking him severely. Time, 5:23½, the longest bout of the match. Dinnie staggered to his seat virtually a beaten man. His grand courage and endurance could not avail against the youth and activity of his athletic opponent and for the first time his spirits dropped. He had stood the severe punishment administered by Muldoon without a murmur, he had wrestled to win in a decent albeit a cautious manner, and now that he felt his strength failing and saw that his efforts would be of no avail his heart sank and a look of pain stole over his face. But the old Scotch blood and bottom were not yet ready to give in and when time was called he was up and ready.

The 24th bout was Græco Roman, in which style he had no chance to win a fall. He tried to evade a grip but Muldoon rushed in like a huge panther full of strength and fire and siezing him by the head shook it until the Scotchman was dizzy. Then Muldoon caught him by the back of the neck in a fearful grip and putting his shoulder under Dinnie's chest got a lock that no human power could break nor human skill avoid. "Do you give up the fall," said Muldoon who was loth to hurt his antagonist. "I give up the fall" replied Dinnie and Muldoon unloosed his terrible clutch. Time, 54 seconds. It was well for Dinnie that he gave up, for had he not he would have been thrown clear over Muldoon's shoulder and perhaps off the stage and severely hurt.

After three more falls Muldoon was ahead on time at even terms and sadly Dinnie gave up the match, explaining through Jordan that he had foolishly tired himself out at the Caledonian picnic and was unable to go on, but he would be pleased to meet Muldoon again.

Muldoon told the spectators that he was willing to wrestle Dinnie for $500 or $1,000 a side, agreeing to throw him twenty times in one hour Græco Roman style. He further challenged any two men in the city, which as he remarked was full of good athletes, to wrestle a match for $500 a side, he agreeing to throw each of them ten times in one hour, one down the other to come on.

The times of the various falls were as follows:

First—Dinnie, 0:22½.	Fifteenth—Dinnie, 0:58½.
Second—Muldoon, 1:32¼.	Sixteenth—Muldoon, 0:34½.
Third—Dinnie, 0:54.	Seventeenth—Dinnie, 0:12.
Fourth—Muldoon, 1:13.	Eighteenth—Muldoon, 0:59.
Fifth—Muldoon, 0:07.	Nineteenth—Dinnie, 0:40.
Sixth—Muldoon, 1:21.	Twentieth—Muldoon, 1:28.
Seventh—Dinnie, 1:09.	Twenty-first—Dinnie, 1:57.
Eighth—Muldoon, 1:04.	Twenty-second—Muldoon, 0:59.
Ninth—Dinnie, 0:09.	Twenty-third—Muldoon, 5:23½.
Tenth—Muldoon, 0:57½.	Twenty-fourth—Muldoon, 0:54.
Eleventh—Dinnie, 0:10.	Twenty-fifth—Dinnie, 1:31½.
Twelfth—Muldoon, 1:58.	Twenty-sixth—Muldoon, 2:11.
Thirteenth—Dinnie, 0:12.	Muldoon—15 falls, in 16:35½.
Fourteenth—Muldoon, 0:44.	Dinnie—11 falls, in 13:46.

The judgee of the match were Jack Hallinan for Muldoon and D. A. McMillan of Bodie for Dinnie; Referee, J. J O'Brien; Timekeepers, Fulda, Geiseman and Hiram Cook, all of the Olympic Club.

During the evening Jordan introduced Hogan's "unknown," who is to wrestle Muldoon on Saturday night. He proved to be Jules Rigel.

A Championship Game.

The ninth championship game between the Redingtons and the Woonsocket Club at the Recreation Grounds on Sunday showed a marked improvement in the number of spectators present. The grounds were in admirable condition, the infield particularly, while the arrangements to keep the crowd in check did away with the disagreeable features of former games. The reorganized team did well, and judging from their initial game, they will before the season is much more advanced, prove formidable opponents in the struggle for honors. In the field, they play rapidly, throw accurately and rarely miss an opportunity of making safe plays, and the judgment of the team as to the proper play is excellent. This was especially noticeable in the fourth inning with the Redingtons at the bat, when the latter failed to score by reason of the quick, sharp play of the Woonsockets at first and behind the bat. Lawton, who played catcher, is remarkably cool for so young a player, and his catching is at the same time quite pretentious, barring an ugly habit of reaching for wide balls with one hand. He is ably assisted by Finn before the bat, whose delivery was such as to keep the other side's total of base hits within reasonable limits. The playing of Muller at second was decidedly erratic and out of a total of nine errors, four are scored to his credit. Even the easiest balls were fumbled and otherwise badly fielded. At the bat the Woonsockets developed good strength, but they were unable to overcome the excellent base running of their opponents. It is worthy of note that at the commencement of the games the Redingtons were nnusually weak for a league club and considerable adverse comment existed as to their qualifications, both as batters and fielders, to be entitled to a place. Since that time, however, they have steadily improved, so that they are now able to cope with the other clubs with a fair prospect of success. They are still weak at the bat, but even in this respect they have shown much improvement. Neither club was severely handicapped so far as their strength at the bat is concerned, the totals giving a majority of two in favor of the Woonsockets. Following is the score:

REDINGTONS.

	TB	R	BH	PO	A	E

Earned runs—Redington 1. First base on errors—Redington 3, Woonsocket 7. Called balls—Redington 1. Woonsocket 2. Left on bases—Woonsocket 5. Struck out—Redington 8, Woonsocket 7. Double play—Carroll. Wild pitch—Creegan. Passed balls—Creegan 3, Lawton 1. Time of game, 2:40. Umpire, Charles Gagus. Scorer, J. F. Hennessy.

The question of establishing an amateur league is being agitated again. The arrangements made some two months ago, with this object in view, were abandoned at a time when success of such a venture seemed to be assured. There is an abundance of material for a good amateur league, and it is to be regretted that more spirit is not shown in the matter by those who can make it a certainty. Should matters be definitely settled, the games will be played on the Oakland grounds.

J. F. Hennesy, an old time ball-tosser, has been tendered the position of official scorer. That brings up the question of the official umpires. Where is Delos R. Ashley?

Jack Smith, the excellent first base man of the Knickerbockers, guards the bag for the Californias to-morrow. An admirable selection.

The league clubs contemplate an interchange of courtesies with teams from the interior. Sacramento is the first place on the list.

Frank Smith, formerly short stop for the Californias, is in town but he appears to take little interest in the sport.

The Redingtons go to Napa to-morrow to try conclusions with the Twilight Club of that place.

Embden Geese.

The Embden is uniformly pure white, has prominent blue eyes, flesh-colored beak, bright orange legs, remarkably strong in the neck, and its feathers tend to curl from the shoulders to the head. They are very hardy, and well adapted to this climate. Their flesh is highly esteemed by epicures. It does not partake of that strong taste noticeable in the common kinds of geese, but it is as tender and juicy, when properly cooked, as that of our best wild aquatic fowls, and less liable to shrink in the process of cooking. The Embden originated in a town of that name in Hanover, adjoining Holland, a region including Olenburg and Saxony, noted for the quality and production of geese. The Embdens attain large size; in some instances a pair will weigh fifty or more pounds. They are highly prized, not alone for the delicacy and richness of their flesh, but also for the beauty of their "blossommy" white plumage.—*Poultry Monthly.*

OUR NEW YORK LETTER.

Racing in the East—Yearling Sales—Continuation of the Western Circuit—Etc.

Probably there is no other week of the present year that is franght with such momentous interest to the admirers of the running turf all over the world as the present one. More important events will probably be decided in this country during the course of the coming racing season than the Louisville Derby or Baltimore Preakness stakes, the initial great three-year-old stakes of 1883 east and west of the mountains, or the Baltimore and Louisville Cups, hut none that will be run afterward will possess more general public interest, for the reason of the line they will give to other great stakes in the East and West.

Canadians will celebrate the Queen's birthday with racing, etc., at Woodbine Park, near Toronto, on Thursday and Saturday, while in England and France the two greatest turf events of the year will have been relegated to the past before these lines reach your Coast.

To-day the Epsom Derby drew its usual immense throng, and the British nobility, members of Parliament, tourists from all parts of the Continent, America, Australia, etc., jostled and elbowed with commoners and the "great unwashed" that make up the half-million holiday-seekers covering the "downs," alike anxious to view the horses, riders and result of this, the oldest turf event in the racing world, while on next Sunday Parisians will throng the Bois de Boulogne en route to their picturesquely-embowered racetrack at Chantilly, where the Grand Prix de Paris will be run and won, no Foxhall or other Yankee horse being in this renewal, however. Several are entered for the Paris race, as well as for the Derby across the channel, but their chance is *nil*. Indeed, it is doubtful whether either race saw any of Mr. Keene's or Lorillard's horses at the post; certainly not the "blue and white spots" of your countryman, whose Bolardo and other candidates were all scratched last week, according to a cable message, so this country will not wear the blue ribbon of 1883, which Iroquois so gallantly won for us two years back. The great son of Leamington is engaged in the Epsom Gold Cup on Friday of this week, his weight being 132 pounds, Sachem's 119 pounds. St. Blaise's victory to-day from the smallest field of starters (8) on record was rather a surprise to all but his party, but the colt ran a strong fourth in the Two Thousand, which was not overlooked in England, apparently, for, starting after the Guineas race at 25 to 1 in the betting, he was steadily backed down to 5 to 1, his starting price to-day. Galliard's third was a great disappointment. Giroflé, our favorite filly and sister-in-blood to Iroquois, may, however, emulate on the British turf this fall the deeds of her famous kinsman, and the news of her safe arrival in Albion a few days since was gladly received by her numerous admirers and well-wishers in this city, the mare being a universal pet here.

The eight days' racing just closed at Lexington, Ky., the center of the blue grass region, was a success pecuniarily but a failure from a racing point of view, as very small fields came to the post for a majority of the races, which included a half-dozen walk-overs though fully 200 horses were stabled at and around the grounds of the Kentucky association. The reasons for this state of affairs are a conundrum, for the club is the oldest (1826) and best known in America, and seemingly popular in that section. It has one of the fastest tracks anywhere, and, as a five-years lease of the premises is being negotiated for by Watts & Co. of Louisville, another season will doubtless see more life and vigor infused into the enterprise. Some very notable races took place, however, during the late meeting. Bondbolder, three years, Lida Stanhope, five years, and Farragut, five years, made a terrific finish and great record over the mile and a quarter of ground that constituted the distance for the Distillers' Stakes, worth something more than $2,000 to the winner. The time of this race, 2:08¾, has seldom been equalled and the youngster only beat the mare a head, the namesake of the late naval hero finishing at their hips after being "disappointed" in the stretch. All these three nailers are engaged this week at Louisville, and the colt Bondholder is in the Derby to-day, postponed (for the first time in the history of the stake) from yesterday by reason of a tremendous storm. Bondholder is said to be inferior to Ascender, his stable companion, which makes the chances of the son of Buckden look very rosy indeed, judged by Bondholder's running at Lexington. Lord Raglan, the winner of the Phœnix Hotel Stakes at Lexington in which he beat McCloskey, Violator and others on a very muddy track, is one of the starters for the Derby, and as the going will be bad, be is well thought of. Some fine two-year-olds came out at Lexington, Eva S, Rosary, the Perhaps colt, Admiral, etc. Leonatus, another candidate for to-day's great race, showed up in great form at Lexington, his Blue Ribbon a mile and a half in 2:38½ being a fine race, though he beat a poor field. However, he ran in such easy style that he at once jumped to the position of favorite in the betting, 2 to 1 being hard to get to-day in the city. His party, with Donahue to ride, are backing the colt as if the race was over, and the famous jockey telegraphed to this city yesterday, "Leonatus can't lose it." As he bestrode the colt at Lexington, he ought to know something about his caliber, but the mud to-day is liable to upset many nicely-laid calculations. Vera, a King Alfonso filly, also in the Pate Stablo with Bondholder, Ascender, etc., defeated the famous filly Queen Ban quite easily in the Ashland Oaks at Lexington in a fast race, the mile and a quarter being run in 2:10½. Queen Ban made the running for a little over half the race and then quit as if she had been shot, either from overwork or sexual causes. She was a very warm favorite and her backers fell heavily as her chances for the Derby, which it was thought she would be the first filly to win, look very slim now. Vera is out of Veritas, a Lexington mare, and, as she comes of a staying stock, will doubtless add the Oaks at Louisville to the Lexington trophy.

Lexington closed on Thursday and the next day the yearling sale of Messrs. Bowen & Co. took place at Paris, Ky. The Billets sold well, though the average was rather under last year. The highest priced youngster was bought by the Dwyers. On the following day, Saturday, Spring Station, Ky., was the scene of the most memorable sale of youngsters that ever took place in this country. Between forty and fifty colts and fillies, the property of Dave Swigert, and the get of the Virgil, Glenelg, and the late stallion Monarchist, brought a total of nearly fifty thousand dollars! Shall any one deny the prosperity of the American turf after this? The Dwyers bid $5,100 for La Polka colt, secured the "crack" colts of the lot, and the Monarchists brought good prices, a deserved tribute to the dead Victor over Bassett, Foster and the best horses of his time. The Glenelgs brought high figures, as they always do. Mr. Swigert received many congratulations on his success, and it was some consolation for the loss he sustained by the untimely death of Monarchist last month. Monday the Alexander sale was brought off at far-famed Woodburn, and the prices obtained were the lightest on record. It seemed as if the Elmendorf sale had exhausted the market, for bidders were scarce and only two animals brought fair figures, a decided novelty at Woodburn, whose yearlings generally fetch the highest prices of any of the spring sales. But fashion sometimes rules the market in turf matters, as well as those of other branches of trade, devoted to the fluctuating fancies of the "creme de la creme," and festive "dudes" of our gay metropolis.

Last week's race-meeting at Washington was the first of the Eastern circuit, that goes on to Baltimore this week, followed in rapid succession by Jerome, Sheepshead, Monmouth, etc. The course at Washington is charmingly located, within ten minutes' ride of the city, and fine old forest trees, a beautiful lawn, etc., add a picturesque *ensemble* equalled by few tracks in the East. The racing last week was very fair, and the management derived a pecuniary success, though speculation was exceedingly limited, and the starting abominable, some of the races, particularly the Two-Year-Old Stake on the first day, wearing out the patience of the crowd. Good starters are scarce, Capt. Conner, Caldwell and Sheridan being the best we have. Tom by Ten Broeck, was the winner of the Youthful Stakes, named above, and as she ran the half-mile in 0:50½ she will doubtless be heard from later. Antrim, by Vauxhall, Lizzie Mack, by Alarm, and Fairview, by Legatee (by Lexington), ran very creditable three-year-old races, and of the older horses, Crickmore, five years, Duke of Montalban, five years, Homespun, four years, Hilarity, four years, Jim Nelson, aged, and others ran well, the first-named famous five-year-old coming out in his '81 form, apparently. In that year he was the best three-year-old in the East, barring Hindu, and if his "leg" stands, Gov. Bowie will run some good races with him yet. The Cup, at Washington, Montalban captured from Ella Warfield, Hartford, Compensation, Hilarity and others in grand style, winning the two miles and a quarter in 4:04. Spellman, who rode the Duke, left for Louisville the next day, where he is engaged to ride Drake Carter in the Derby. Baltimore opened the Pimlico course to-day, postponed from yesterday by reason of bad weather. Four flat races and a jumping race came off with eclat, the most noticeable contest being the Rancocas Handicap, which was won by the top-weight, Gov. Bowie's Crickmore, with 120 pounds. He beat a fair field in the wind, giving some as much as thirty pounds, and looks like troubling the best of them this season, if (a rather big "if," too) his three good legs will pull him through.

Jerome Park, throws open its gates on the 30th, and in spite of failure to obtain any relief regarding the unjust embargo in its betting privileges, bids fair to have good racing. several rich stakes and handicaps are to be decided, and the field for the Withers, Jerome, Ladies, Juvenile and other stakes, together with the Fordham, Great Metropolitan Jockey Club and other handicaps promise to be large. Last week declarations were due from the first three of the above-named stakes, and although nearly thirty horses were eliminated from each of them, enough are left to make the struggle very doubtful and exciting. The most notable seceders were the Dwyers' colt Barnes and Mr. Withers' Knight, but both these colts are sound apparently, and are intended for later events. Rivalry runs high between the partisans of Geo. Kenney, Pizarro and Jacobus for the Withers Stakes, to be run June 20, and each is claimed as a sure winner. Kenney and the Dwyers' other horses have been at Jerome some time, and they look in A 1 condition. As one of the other trainers there observed a few mornings ago as Roe's string defiled out on the track for their usual exercise, "they quite overshadow the rest of the horses here." But then the strings of the brothers Lorillard, Kelly, Appleby & Johnson, etc., are yet to arrive there, so the remark of the above trainer must not be construed in too literal a sense.

A good story comes East about Jim Williams, the well-known owner of Checkmate and others. At Nashville's late race meeting he entered in a two-year-old race two of his youngsters, Bob Miles and Laura Gould. He figured out that he could beat all the runners but the favorite Harding, and accordingly went and invested $500 on his filly, Laura Gould, for second place. After instructing the boy on Laura Gould how to ride the race, the flag was dropped and the field went away. But "Jim," with all his shrewdness, had neglected to mention his little arrangement to the boy on his colt Bob Miles. Denouement and interesting finish to all but James, the favorite coming down the stretch, winning easily, and the "black and scarlet" of Williams winning second and third. Everything looked lovely until nearing the wire, when the boy on Miles, with praiseworthy emulation, considering his total ignorance of his employer's speculation, shot his colt ahead and beat his stable companion out, as well as James. The last seen of "Jim" he was looking for a stout club to use on his own person at 9 o'clock p. m.

The Derby at Louisville and Leonatus' victory will be wired to your coast no doubt. Seven horses started and Drake Carter was second, Lord Raglan third, and Ascender, Chatter, Pike's Pride and Standford Keller unplaced. The time, 2:43, was fast for the state of the track, which was deep in mud. The pooling was heavy at Ascender $300, Lord Raglan $265, Drake Carter $255, Leonatus, $250, field $100, and the backers of the favorites thought their choices invincible; but only one could win, and Leonatus, ridden by Donahue, was the lucky one, your correspondent having called your readers' attention to this horse repeatedly this spring.

Romero, the gray stallion from your coast, has been entered by Goldsmith for the July meeting at Washington, D. C.

The trotting horse Moose, 2:19½, domiciled in Ogdensburg, N. Y., is thought to be all right again.

Black Cloud, the black trotting stallion, 2:17¼, has been sold for $8,000.

The feat of Johnny Murphy in driving Mr. Bowen's Pickard a mile at Fleetwood in 2:16½ is exciting great comment in trotting circles, and last week Mr. Rockefeller's team trotted a mile there in 2.22½. Yours, PACIFIC.

New York, May 23, 1883.

The young trotting mare Bronze, record 2:25½ in the four-year-old seven-heat race at Chicago, has just been sold by H. D. McKinney to James A. Lamsly of Lawrence, Kansas, for $15,000. A little more than two years ago Buck Dickerson of Greensburg, Ind., bought Bronze for about $135, and during that year sold her to his brother, Pat Dickerson, of North Vernon, Ind., for $450, the latter considering that Buck had rather "put it onto" him in price. The day after Bronze made her record at Chicago, Pat sold her to Mr. McKinney for $7,500.

John Paine of Gilroy has five horses, from a sucking colt to a four-year-old, which he will trot against any five of same age owned by one man in the State, for $100 a horse.

Although 30,000 paper wheels were in use on 150 different roads last year, but three failures were reported, and none of these were serious or harmed any one.

Dr. C. H. Mack of Walla Walla has sold to E. J. Williams of the same place a yearling by Alwood, dam Lady Lightfoot, by Milliman's Bellfounder, for $300.

ROWING.

The Pro-Amateur Association.

Some of the young gentlemen connected with the so-called Pacific Amateur Rowing association have expressed their displeasure at being criticised for their endeavors to regulate the "rowing interests" of the Pacific Coast. Without entering into an extended discussion as to what are the "rowing interests" which the association is pledged to advance we stated a few weeks ago that the association was at least superfluous and possibly impertinent. Several of the most eloquent delegates of the association pretend to represent clubs which for many years have taken no interest in rowing on this coast, and cannot within six months be induced to enter a single crew in any competition open to men superior to the fourth class. It is somewhat impertinent for the self-appointed representatives of these moribund country rowing clubs or antediluvian aquatic associations of the Sacramento river and the Suisun marsh to step into the ranks of the metropolitan oarsmen and attempt to palm off their fossilized ignorance as valuable knowledge. The association might have had a better standing if its real purpose had been partially concealed. As soon, however, as the association revealed its sinister purposes to "advance the rowing interests" by grabbing whatever prizes the Fourth of July might offer, every intelligent rowing man became convinced of the insincerity of the organization and the uselessness of its existence. The "rowing interests" of the Pacific Coast do not suffer for lack of prizes and no association is needed to drum up trophies. The best evidence of this fact is the impossibility of getting, in the active clubs of San Francisco, crews to compete for the handsome championship cup offered by the BREEDER AND SPORTSMAN. In November last a race was rowed for that trophy and since then the cup has remained in undisputed possession of the winners, who obtained it by an easy victory over one rival shell crew. As long as such a trophy remains uncontested it is ridiculous to talk of the necessity of an association to "advance the interests of rowing on the Pacific Coast" by obtaining prizes. What is needed is an association that shall look for oarsmen instead of prizes, and the way to form it is not by placing the self-styled representatives of moribund marsh clubs in the majority and vesting old professional rowers with the power to define the status of amateur oarsmen and regulate all contests, whether for the money so dear to their grade of athletes or the medals so much appreciated by genuine amateurs.

Hanlan Excited.

It is not often that Hanlan talks disparagingly of his fellow professionals. Those who know him best credit him with a remarkably even and charitable disposition, but when, in exceptional cases, he appears as a critic, he wields his tongue almost as effectually as his sculls. He is said to have made the following comments on a much-bepraised oarsman, and not without a good deal of provocation and justification: "Davis ought not to be rated with first-class scullers, as he never rowed and beat one. I'll bet I can beat him 20 seconds in five miles. I would not say so much about him only his friends have criticised me, stating that I depended on my strength, was not a finished sculler and that Kennedy and his partner were from a scientific school. I think, if the truth was told, that they copied from me, and not I from them. Until Davis rows a first-class man and beats him, he will not be entitled to occupy a place among first-class oarsman." Davis has made an immense reputation as an oarsman and a great deal of money as well by comparatively unimportant performances. His chief claims to notoriety rest on his rowlock, which is only an improvement of an invention which was old before he ever sat in a racing shell.

There is considerable activity among the wherry rowers of Long Bridge, and more than one of the craft regards the next prize for wherry rowers as his. It is not at all unlikely that, as happened last year, some pale stripling from North Beach may row up and knock out the stalwart men of the South End in a style that will make them sad for the next year. Well do we remember how a year ago, when a herculean wherry rower, with knots of muscle on his legs and a back like a scow, was stepping into his boat, he remarked to a sympathetic friend: "If that bhoy from North Beach bates me, I'll ate me boat." The boy did walk his log and the boat is still unmasticated.

The correspondent of the *Turf, Field and Farm* did not see the McInerney-Peterson race very clearly, for he states that the struggle home was for a time a severe one. The fact is, the severity of the struggle ceased as soon as the men passed the ship-yard on their way up the stake-boat. Off the rolling mills McInerney was a beaten man, and his opponent was as sure of winning as a man could possibly be.

The accident to T. Flynn, of the Pioneer Club, was immensely magnified by the imaginative reporters of the daily press. An excited novice in a whitehall boat, who was spurting with a friend, ran into the Pioneer man and slightly bent his outrigger. Being accustomed to the water, the Pioneer man took a dive to save his boat, and hence the lurid description of his being "nearly drowned."

The Ariel Rowing Club, having the champion single sculler of the coast and the champion four-oar-shell crew, is ambitious of the distinction of obtaining the champion barge crew. A fine barge has accordingly been ordered from Twigg, and will be on the water before the 4th of July. The Ariels show a spirit that is worthy of being emulated.

The Canadian amateur champion oarsman Joseph Laing will leave Montreal for Boston in June to compete in the races there. Jacob Gaudaur will row for the professional single scull prize at Pullman, Ill., on June 22. He is training at Creve Cœur Lake, Mo.

Rowing is almost a thing of the past in England. Bubear was compelled to postpone his regatta owing to the difficulty of obtaining entries and by late accounts the chances of the Chinnery regatta not taking place this year were strong.

According to a Canadian newspaper, Courtney is anxious "to meet Hanlan again." That's about all Courtney will ever do—meet the champion as he is coming home from the stake boat.

M. Price has had his wherry repaired. The athletic cutler's broken leg is evidently getting strong again.

A private dispatch from Salt Lake to a gentleman in this city states that E. J. Baldwin's Lucky B, by Rutherford—Maggie Emerson, was taken sick from pinkeye at Salt Lake and will not be able to fill any of his summer engagements. Gano will be sent on East where he will probably [illegible] account of himself.

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion

San Francisco, Saturday, June 2, 1883.

The Sacramento Trouble.

Sadly we undertake the task of reviewing the action of the judges and the attempted reversal of their decision by the Capital Turf Club. It is a duty, however, that cannot be shirked, and, unpleasant though it be, to pass it by without comment would be detrimental to the interests at stake. The trouble originated from drivers attempting to perpetrate frauds, and in one of the cases, at least, the evidence is so conclusive that there is not a shadow of doubt about the guilt of the party. The testimony that has been submitted to us, and the reliability of which is beyond question, is that the driver of Long John admitted that he could have won the second heat, the reason given for not doing so being that he was ordered by the owner to do so, and this was the only justification he offered. The owner denied having given such instructions, although the denial had really no bearing on the case further than, had it been proved, the owner would have been inculpated, and he, as well as the driver, punished. There could not be a plainer case of fraud, and no amount of sophistry will redeem the transaction from the obloquy attending.

There is only one excuse for "laying up a heat," that being when it clearly increases the chances to win. A bad start in a trotting race, a break through which so much ground is lost that it would be dangerous to endeavor to strain the horse to a point that would incapacitate it from trotting in other heats, when the contestants are so nearly equal that it will give the one who does not struggle an advantage in succeeding heats, may be offered in excuse. One of the strongest arguments against races of heats is the opportunity offered for combinations to defeat a particular horse, and the temptations that arise from the varying features to act dishonestly. In racing the substitution of dashes has been of immense service in popularizing the turf; in trotting, heat races are so intimately associated with the sports of the track that it will be difficult to provide other races that will be as satisfactory. There is an entire absence of logical reasoning, not a single excuse for giving away a heat, the winning of which would end the race. It is a clear—absolutely clear—proof of fraud. When the judges had evidence that this was the case, no other course was left than to punish the offender by expulsion. There can be no extenuating circumstances when a horse is deliberately restrained from winning a heat, and the admission of the driver that he lost purposely is such convincing proof, so far as he is concerned, that it would be foolish to reject the confession. There might be a case in which a driver would incur the odium and submit to the penalty to save money wagered, but should that arise, there would be evidence apart from his statement. The expulsion of the driver of Long John was imperatively demanded, and in all fairness it was manifestly proper to declare the pools and bets off. The other points do not figure, and whether the race should be also declared void or the money given to the horse which finished first in the second and third heats has no bearing on the main question. There is ground enough for regrets that a driver should give occasion for punishment it is still worse when a body of men sustains him in the disreputable course, and endeavors to shield him from the penalty the crime entails. The only sure foundation to build upon is honesty. Important as it is in the ordinary affairs of life it is doubly so in connection with turf and track sports. It is the corner stone of the edifice, the key that holds the arch in place. Those who do not recognize the importance must be got rid of, and more than that, there must be a joint effort on the part of all those who are interested to render dishonesty on the turf so loathsome that only the vilest will engage in it. So different has been the estimate that we have heard the culprits boast of the part they played and recount the history of their infamy with a gusto that would lead a listener, unacquainted with the situation, into the belief that they had performed some meritorious deeds. When deserved punishment is followed by equally well-deserved contumely, there will be purification. When the violator is ostracised, when the self-abasement is supplemented with public ignominy, there will be little necessity for the punitive portion of the code, which relates to voluntary losing of races, and more good will be effected than can be done by the severest penalty which does not imply a loss of standing in the community. There are others equally as guilty as the man who carries out the design. Whoever wins with a knowledge that the winning is a prearranged plan shares in the guilt and should share in the ignominy. There is an apathy connected with this phase of the question that is lamentable. Men who would scorn to do an act of dishonesty will seek for "points" to guide them in betting, all the better pleased if they can get "on the inside" when a track robbery is to be perpetrated. The tempters are oftentimes more to blame than the tempted. They make crime remunerative and offer a reward for thievery which without their aid would be barren of spoils. The condoning of grievous offenses before there can be a claim o repentance is also inimical. It encourages wrong-doing by holding out a sure chance of escape and grants an immunity which leads to subsequent encroachments. It makes those who administer justice appear ridiculous, and turns the frowns of Jupiter into the grimaces of a clown. Sympathy for offenders is praiseworthy and to aid in reformation is an attribute of the good. But to flourish a lash in one hand and hold out a reward in the other brings contempt, and the culprit in lieu of changing his course laughs at the simplicity of those who have befriended him and chuckles over the acuteness that has averted the blow. Forseeing that the good nature and kindly feelings of a majority could be so easily imposed upon, the National Association adopted a rule which would obviate the difficulty. It is put out of the power of a "Member" to modify a sentence of expulsion imposed by the judges, and the only method of obtaining a reversal is to follow the course marked out in the by laws and rules. This brings the case before a body of unprejudiced censors who are not swayed by feelings of enmity nor favoritism and who will see that if injustice has been done to the appellant he is granted relief. The club had no right in the first place to indorse the action of the judges further than the indorsement lent a moral support by sustaining them in the performance of a dnty, and thus accepted part of an unpleasant load.

The reconsideration of the vote was simply a withdrawal of that support, a wavering of purpose, an imbecility of intention, as it might be termed, a desire to carry out a sympathetic feeling regardless of the injury which was sure to follow.

That it was done thoughtlessly we feel assured. There could not have a reference to the rules, as the language is too plain to be misunderstood. Section 1, Rule 52 is as follows: "Right of appeal" is the caption, and the wording: "Appeals may be taken to the associate member in cases of suspension by order of the judges of a race or of an officer acting for a member, but members shall not remove nor modify any fine imposed by the judges of a race, *nor review any order of expulsion.*" Article vii., Section 8, of the By-Laws is: "Each of said District Boards shall have jurisdiction on all questions of fraud or other matters relating to the turf, arising in said district."

From these extracts it will be palpable that the penalty still stands, and we sincerely hope that a meeting of the club will be held at an early date in order that the matter may be righted. We feel much interested in the well being of the Capital Turf Club. There was so much spirit and enterprise exhibited by the people of Sacramento in sustaining the sports of the turf and track that anything which will militate against their efforts is a serious matter. In every other respect the meeting was thoroughly satisfactory, and gave promise of a revival of spring racing and trotting that would be of great benefit to the breeders of this Coast. That anything should occur to mar the harmony or interfere with the good intentions is to be deplored, and it is the universal wish of all that the good work so heartily done may not be hindered by an incumbrance which comes from a misunderstanding of the rules, and too much leniency.

There appears also a want of proper organization. The government should be in the hands of an executive committee, board of directors, trustees, stewards or whatever name it is thought best to give the few who have management of affairs. A small body of men would never make such a blunder as to lay the association liable to the National Association by such a palpable infringement of the rules, neither would they be so likely to be influenced by pressure from those who counseled a violation of the laws. In all the associations which we have known this is the only exception, and it will certainly be much better if it conforms to the general custom. With the change will come a more thorough system and a safeguard in having the management in the hands of a few competent men. It will also relieve the members from importunity that at times is difficult to resist and prevent the recurrence of what can only lead to ruin. The reasons for taking the Long John case for illustration are that it is so clearly defined, and that there can be no rebutting testimony which will change the aspect. The action of the judges in the others was, doubtless, based on good grounds, and if one report we have heard is true there was a flagrancy of conduct that cannot be excused nor palliated.

Duties of Trainers.

We are in receipt of a letter from a gentleman who offers suggestions that are well worthy of consideration. Our correspondent and his partner own a stable of racehorses, and these were placed in the hands of a trainer. The trainer took them to a racecourse and after their arrival he made a visit to a neighboring city, a few miles from the course, and did not return for four days. In the mean time the horses were without proper care, and were not exercised at all. They had shown very well at home but the break was fatal to their chances, not only incapacitating them for that meeting but also compelling them to be declared out of their engagements at another. In view of this the query is sent us "whether a rule could not be framed to cover the ground, and that a trainer, when culpably negligent, should be suspended or expelled?" While it is difficult to provide a remedy for such a flagrant violation of trust reposed, through the instrumentality of the Pacific Coast Blood Horse Association, under the present law, there might be a guard which will afford some protection to owners. This would be the granting of certificates to train and ride, and revoking them when the holders were proved to be unworthy. It will not do to base these certificates on capacity, leaving the employers to be the sole judges of that, but let the question of character of the applicant be the ground on which they are granted.

A palpable neglect of duty, such as is complained of, when a charge was made, and substantiating evidence produced, would warrant the revocation, the publication of which would put others on their guard and make it difficult for the party to obtain employment. There are objections, however, to this plan, one of which is that so rigid a censorship might be thought an interference with the relations between the employer and employed. It might open the way for frivolous complaints, and lead to the bringing of petty squabbles between owner and trainer into the association. The trouble would be to draw the line which marked a sufficient dereliction of duty to warrant a charge being made. When a trainer so far neglects the interests of his employer as to leave the horses which are entirely under his care for a period of four days, and that just before the commencement of a meeting in which they are engaged, there can be no question that the severest penalty should follow.

In this instance the horses were at such a distance from the owner that he was without knowledge of the delinquency until it was too late to remedy the neglect, and it is not surprising that he felt very much aggrieved.

In the letter he alludes to the committee appointed, the duties of which are broad enough to cover cases of this kind, and at the next annual meeting there may be some action that will lead to correction. At all events, it is well worthy of notice, as every one who owns racehorses is interested, and the letter of our correspondent may be the means of bringing about a better state of affairs.

This is not the only instance that has come to our knowledge, as there have been several analogous cases since our residence in California. One man of our acquaintance gave up the turf sports entirely from the trouble he had of this kind, and two others have come within an ace of following his example. Should some plan be devised which will compel trainers, of the stamp under discussion, to attend to their duties, it will be a welcome change, and encourage the training of horses that are now idle. There are so few really reliable and competent trainers in this State that employment must necessarily be given to those who do not possess these qualities in unison, and though compulsory good behavior is rather difficult to enforce, the fear of punishment may be more potent in correcting the evil than advice and admonitions.

An Explanation.

Since writing the article on the Sacramento expulsions Cbarles H. Shear paid us a visit and according to his statement, which he says can be completely verified, his case is very different from the accounts that were published in the Sacramento papers. His expulsion was not ordered by the judges of the race, but at a meeting of the club when he did not have an opportunity to defend himself from the charge. The following card was puhlished in the Sacramento *Bee* of May 24, and the appended certificate of the owner of the horse corroborates Mr. Shear's statement :

"In your issue of last Saturday in an article in relation to the races of the previous day there are statements which are incorrect, and being very damaging to me and my son I trust you will allow me a little space in which to set myself right. I drove Shaker to the best of my ability during three heats. After the second heat I requested Mr. Odell, his owner, to get another driver, as I did not think the horse was in condition to win the race. At my request Mr. Odell did get another driver after the third heat, and succeeded in winning the fourth and fifth heats, hut in the slow time of 2:35½ and 2:38. The article published referred to above stated that Mr. Odell had been almost supporting me during the winter. This is altogether without foundation, as I have never received a cent from Mr. Odell in my life. We are friendly and I think he believes I did well by his horse while I kept him. Relative to my being ruled off hy the Capital Turf Club, I can only say that I think the action altogether nnwarranted, as I resigned my seat behind Shaker voluntarily, after having done my best to win. As to my former suspension by the Agricultural Society, it came about through a misunderstanding as to the payment of entrance money; and I was finally reinstated without payment. One word as to my son: The assertion that he attempted to catch hold of or frighten Shaker when he was coming in on the last heat has not a particle of truth in it, as will be shown in dne time. C. H. Shear."

"The ahove statement by Mr. Shear, so far as I have any acquaintance with the facts, is correct. I have no occasion to find fanlt with him. M. M. Odell."

We are pleased to give publicity to the emphatic denial, as it is a much better state of affairs that the club has been hasty in rendering judgment than that a driver had been guilty of practices which justified the sentence. To remedy this may have been the cause of the club reconsidering the vote of the previous meeting without taking into consideration the injury it was doing by revoking a sentence legitimately pronounced, and on evidence that could not be controverted. It has been claimed that, as a member cannot reinstate, it cannot expel. This does not follow. There may he instances of gross fraud when the evidence cannot be obtained until the judges, who officiated, have left the stand, or even so long after the occurrence that they cannot be reached. There is no question that if judges had announced a sentence of expulsion, and, before they had vacated the stand, become convinced that the penalty was wrongfully inflicted, they could countermand the decree and reverse the verdict.

On this ground, if the secretary has not notified the National Association of the expulsion of Mr. Shear, and the reconsideration of the vote of expulsion, and upon evidence submitted it was early shown that wrong had been done, no further action is necessary, and the case stands as though there had been no verdict rendered. This will only apply where the club has acted apart from the judges of the race, and without any action having been taken hy them. Should the secretary of the club have sent the notice of expulsion to the secretary of the National Trotting Association the appeal can only come before the District Board, Board of Review, or, in case of mutual agreement, be arbitrated hy the president of the National Trotting Association. If notices of expulsion and reinstatements have been forwarded the former will only hold good, and in that case there will have to be an appeal to the proper tribunal. We sincerely hope that Mr. Shear can offer such convincing proof of his innocence—so clearly establish that he was guiltless of any attempt at fraud—that his most bitter enemy will acknowledge that he was wronged when the punishment was inflicted, and if the case has to be carried to a higher court place nothing in the way of bis reinstatement. There are numerous instances where drivers and jockeys are accused without a ehadow of proof of guilt, and unfortunately there have been so many well-established cases of fraud tbat it is not surprising that there should be suspicions, and semblances given weight when there is so black a cloud resting upon trotting sports. With a settled and invincible determinatfon on the part of every driver to go straight, the incubus will be removed, and though it will take time to establish confidence, such a course will eventually bring about the desired result. Follow the guilty with inexorable punishment, protect the innocent, are the dutics of every one who is in a position to reward or punish, and the aim of every association.

Bay District Trotting Meeting.

In the advertising columns will be found tho programme of the Bay District Association. The classification is 3:00, 2:40, 2:28, 2:24, free-for-all and four-year-olds and under, and the purses are liberal. The dates fixed are August 11, 15, 18, 22, 24 and September 1. Two of the dates, 11th and 18th, clash with the Pacific Coast Blood Horse Association, and this, we are informed by the secretary, came from a request made hy some of the Knights Templar, and not from any desire to encroach on dates already fixed. There should be plenty of support for such, as at that time there will be eo many visitors in San Francisco that a large attendance is assured. The opportunity offered to gratify a penchant by a choice between racing and trotting will add to the interest, and tbe discussion of which shall be visited will give more prominence than otherwise would be the case. Thus the turn-out may exceed what it would have been, and certainly there will he people enough to sustain both meetings with more than a probability of such being the result. The arrangement of the classes is favorable for a large entry list, and without taking the trouble of going over the records, we think that the figures selected will suit a large number of trotters. The arrangement is similar to that of tbe Golden Gate and State fairs, and will give the horsee a chance to put the polish on for the subsequent contests. Never before has there been such a trotting circuit in California, and from the opening until the close there will be busy work. So far, we do not hear of any animal in its class being so superior as to frighten the others, and as nearly as can be foretold at the present time, the hattles will be fiercely waged from start to finish.

Starting Horses.

Elsewhere will be found articles copied from the New York *Spirit of the Times* and Melhourne *Sportsman* in relation to the starting horses in races, and hoth advance some capital ideas to overcome the serious trouble which is not confined to one section. It is a greater trouble in one place than another, although complete immunity from a portion of the annoyances can never he looked for. According to reporte, published and oral, there is a better system in England than prevails in this country or Australia, and if something can be gained by adopting the rule in force on the other side of the Atlantic by all means let it be tried. Rules are without value, however, unless there is an intelligent enforcement of the provisions, and a firm, sensible man will do better, without any other guide than his natural sense, than a vacillating, good-hearted individual with all the laws in the world at his command. We like the English rule, which is given in the article from the *Sportsman*, and a man with some experience and lots of determination can certainly make starts under it which will be satisfactory in a majority of cases. The main thing is to compel obedience to commands, and if this cannot be done by fines, heavier penalties must be awarded. Tbis firmness is fully as necessary under the English rule, as walking the horses from a point nearly one hundred yards from the starting score will be hard to control if the jockeys, as well as the horses, are inclined to break away. As the articles copied are so plain as not to require elucidation, and also marked by a sound understanding of the requirements, all that is necessary is to call attention to them, and request careful perusal.

The Jersey Herd Book.

The call for a convention of all those interested in tbe breeding of Jerseys, which was puhlished in this paper of the 19th ult., has elicited a response from a larger number than was expected. Among the breeders there is not a dissenting voice, and the benefits that will follow are acknowledged by all those who are engaged in breeding. The interest is not confined to tbose who own herds. There are a great many who own one or two cows who feel just as keenly the importance of having a true registry kept, and this class is increasing more rapidly than many are aware of. There is a constant inquiry for animals for family use, and though the price these people are willing to pay does not come up to the valuation of tbe hluest of the blue bloods, it is liberal enough to encourage the rearing of those which are scarcely "gilt-edged," and yet possessing the qualities that make them so desirable. Thero is no fictitious standard employed when estimating the usefulness of this popular race. The test is ono that can be easily made, and which the owner can give with as much exactness as an expert. So much milk, and of a richness which the churn demonstrates to a nicety; so much cream, and of a flavor which it does not require an educated palate to appreciate, and then the outlay that is required to keep tho handsome machine that turns grass, hay, grain and other articles into the milk, cream and butter that are real, not the mixtures which unscrupulous dairymen offer, or a chemical combination of loathsome ingredients.

The meeting, which is to be held at the Stock Exchange Building, room No. 1, on tho 16th inst., will bring together the main breeders of the coast, and what is done will be eagerly awaited by the large class that have a smaller pecuniary interest, though fully alive to tho importance of the contemplated work.

The Races at Salt Lake.

So far we have only received telegraphic reports of tbe races at Salt Lake. These show, however, a list of victories for the horses from this side, that only one defeat has marred tbe brilliancy of their performanccs. Joe Howell, Jim Douglas, Augusta E, the old veteran and the promising filly being credited with two wins, Fred Collier beaten by Ordnance, and in one of the races won by Howell Jim Douglas was second. The long trip undoubtedly had a bad effect on Collier, as he is easily upset and tbere is wide difference between his performances when "all right," and when he is a "trifle off." This in-and-out running is mainly due to a tendency to "get off his feed." When eating heartily it takes a racehorse to beat him; when mincing his rations one several grades lower will bring him to grief.

Editorial Notes.

A Healing Lubricant.—We are carefnl in recommending anything in the shape of "horse medicine" or articlee which are necessary in etable management unless thoroughly convinced of the value by actual trial. It is easy to test the lubricating qnalities of a compound, and only a short time is neceeeary to prove whether it is worthy the recommendation of the vendor. Bnt the other claims which are made for "Dietz' Axle Oil," that it is a usefnl ointment for cracked heels, sores, etc., take longer trial. Being composed of petroleum, glycerine and neat's-foot oil, there is a good ground to base the claims upon, as the remedial properties of each are well known, and the combination renders them more effective. A bad case of "halter bnrn" gave an opportunity for trial. A oolt got his hind foot over the halter, and thie wae aggravated by driving him on muddy roads. The oil made a speedy cure, and the success in that case led to nsing it on a bowed tendon. Whether the benefit came from the application or not cannot be authoritatively stated, bnt ae there wae an improvement soon after commencing the nse, it is a fair inference that the oil is entitled to the credit. The colt was driven every day, so that it cannot be ascribed to reet, and the diminution of the enlargement was apparent after a few times' application. Thie probably came from the slight irritation caused by the petroleum and the other ingredients prevented inflammatory action. When it is necessary to prodnce a greater degree of vesicular action an addition of a small quantity of spirits of turpentine, say one-fonrth, will effect the purpose. We are so well pleased with what the oil has accomplished in these two instances that we have no hesitation in recommending it as a good application for cases of like character as well as an efficient lubricant for vehicles.

Pearl Jennings has jumped to the lead of the fast ones by running three-quarters of a mile in 1:13¾ at Louisville, and this great rate of speed places her in front of Barrett, Knight Templar and Monarch, all standing in the same notch, 1:14. Barrett compassed the distance with 110 pounds np, steady weight for a two-year-old. Monarch and Knight Templar had the double advantage of another year in age and lighter weights, the first named carrying 91 pounds and the last 77 pounds. The figures set by Pearl Jennings have a wonderful look, but after all we question if the performauce was superior to Barret's. The new three-qnarter track, over which the filly ran last Tuesday, is an air line and elightly down grade. Thie special conrse was built at great expense in defereuce to the desire to see fast time. Rosary won a five-eighths dash over it in 1:01½, the fastest ever run on an Eastern track, and only exceeded hy the performance of Neyella, who is credited with 1:00½, run at Salem, Oregon. As none of the racers over the regular course were phenomenal as to time, the deduction is fair that the straight rnn and down grade had mnch to do with the lowering of the record at three-qnarters of a mile.

Romero won the first heat of the 2:19 class at Cincinnati, after which Deck Wright was successful, captnring the second, third and fourth. The time of each heat was 2:25, and as the track is reported to have been slow, it is not so bad. It ie the firet time that Romero has trotted a race on a half-mile track, and as Goldsmith seems to prefer workiug his horses into condition in races rather than by previous training exercise, it may be that the gray will do better as the season advances. The race at Sacramento last year put on the polieh for Stockton, and that at Santa Rosa made quite a difference in Director, neither of the initial efforts being anything near as good as enhsequent performances.

Since Petereon's victory some lovers of rowing have been of tho opinion that Dan Leahy might abandon the delights of patroling his beat and take once more to the water. It is a certainty, however, that Leahy will never again row a race in a single scull. He has not sat in a hoat for two years past and is completely "out of fix." He turns the scales at 210 ponnds, though in his hest form he rowed at 160 pounds. He is now thirty-one years old.

As Overman has been named in the 2:21 class at Columbus the declaring out of the race at the Gentlemen's Driving Park was doubtless owing to Hickok not having any other engagement on that track, and not attributable to a lack of condition. Eva is also entered in the 2:25, so that the presumption is that the filly is also doing well. The Cleveland meeting commences on the 12th inst. and runs to the 16th.

Last Sunday Mr. Sellers caught seventy-five fi[illegible] most of which measured eight inches and over.

THE GUN.

The Gun Club Shoot.

On Sunday last the members of the Pacific Gun Clnb assembled at Birds Point, Alameda, to hold the regular shoot for clnb medals. The day was remarkably pleasant and the grounds were in excellent condition. Geo. Bird bas made a great improvement in leveling up the dip just beyond the traps so now a low-flying tailer stands a show of getting hit. The shooting was for the clnb's two medals at twelve live birds each, from four plunge traps, eighty-yard bounds. In order to equalize the differences in guns and the ability of marksmen, handicap distances were allowed. The pigeons were a first-class lot and though, like Jacob's coat, they were of many colors, they were all quick flyers. Nine members entered and several crowded each otber pretty hard at various stages of tbe shooting. M. Fowler and A. Schwaren pulled ahead at tbe last and tied on ten out of the twelve. The following shows the scores, bandicap distances and totals, the figures in the first column beiug the handicap in yards:

26—Adams	1	0	1	1	0	0	1	1	0	1	1—	8
24—Precht	1	1	0	0	1	0	0	0	1	0	1	1— 6
21—Stewart	0	1	1	1	0	1	0	1	1	0	0—	7
24—A. Schwaren	1	0	1	1	1	1	1	1	1	1	0	1—10
21—Gonyean	0	0	1	1	1	1	1	1	1	1	0—	9
24—Myers	0	1	1	1	1	1	1	0	1	1	1	0— 9
21—Lingreen	0	0	0	1	0	1	1	1	0	0	1—	6
24—T. Schwaren	1	1	1	1	0	1	0	0	1	1	1	1— 9
24—Fowler	1	1	1	1	1	0	1	1	0	1	1	1—10

The tie between Mr. Fowler and Mr. A. Schwaren was shot off at three pairs of pigeons, 18 yards rise. Fowler killed four and took the first medal, Schwaren killed two and took the second medal as below seen:

Fowler.....10 10 11—4|A. Schwaren.....01 00 10—2

Messrs. R. Renner and Jefcott acted as judges and Mr. Hughes as referee. Hostilities against the pigeons were here temporarily suspended and a general attack made on the lnnch table that Mr. Bird set out for those present. Shooting was resnmed by Chas. Precht and Mr. Gonyean at double birds. Three matches were shot for $5, $10 and $20, Precht winning all three. The scores of the last for the $20 stand:

Precbt.....10 11 11—5|Gonyean.....10 01 00—2

The last match of the day was a closely contested one between Precht and Gonyeau. The conditions were twenty-five pigeons for $20 a side. The shooting was governed by Hurlingham rules. Precht allowed Gonyeau four dead birds to start with. The scores are as follows, the dagger (†) indicating the use of both barrels.

Precht—00 1† 01 11 1† 11 1† 1† 11 1† 1† 10 1† 1† 0 1 1† 0 1† 0—18

Gonyean—1 1 1 1 0 1 1† 1† 1† 0 1 1† 1 1 1† 11001 0 0 1 0 1—18.

As seen, a tie was made on eighteen pigeons so the tie was shot off miss and out. Gonyean led off with an 0 and Precht killed and was declared the winner. A pleasant time was had by all present.

Crockery Shooting.

Last Saturday afternoon the Alameda County Sportsman's clnb held its second clay pigeon match of this season at the Oakland trotting park. The shooting began soon after 1 o'clock and lasted till sundown. The match was for the clnb's first class medal. Before the regular shooting began, several sweepstakes were shot in which Spanlding won two and Tuttle won one. Following is the fifth pool at five clays, 18 yards rise, with the purse divided in two prizes ; as all four tied on three hits, they shot off on the miss-and-out principle, Spaulding and Tuttle dividiug the money as this shows:

	Score.					Ties.	
Spaulding	1	0	1	1	0—3	1	1—2
Taylor	1	1	0	0	1—3	1	0—1
Adams	1	0	1	1	0—3	0	—0
Tuttle	0	0	1	1	1—3	1	1—2

Following this came the club shoot at 12 clay pigeons, 18 yards rise, the use of both barrels allowed. Thirteen members entered. Chas. Tuttle was the only one who made a clean score and he took the medal. Al Havens made a hard fight for a clean score but let two clays get away on his seventh and eighth rounds. Mr. Scholl broke his score, instead of the clay, on his fifth round, and also lost his last. Col. Kellogg's poor score is excusable on the ground that he was using a new gun that he was uot familiar with. The following shows the shooting:

Adams	1	0	0	1†	1	1	0	0	1	0	1	1†— 7
Havens	1	1†	1	1	1	1	0	0	1	1	1	1 —10
Spaulding	1	1†	1	0	1	0	1†	0	1	0	1	1 — 8
Rector	0	0	0	1	0	1†	1	0	1	0	1†	0 — 5
Taylor	1	1	0	0	1†	1	1	1	0	1	1	1 — 9
Jacobus	1†	0	1	1	1	1	1	1	0	0	1	0 — 8
Mayhew	0	1	1	0	1	1	1	0	1†	1	0	0 — 7
Tuttis	1	1	1	1	1	1	1	1	1	1	1	1 —12
Scholl	1	1†	1	0	1	1	1	1	1	1†	1	0 —10
Batchelder	0	1†	0	0	1	0	0	1	0	1	1	1 — 6
Kellogg	0	0	1	1	0	0	0	0	1	1†	0	0 — 4
Williams	1	1	1†	1	1	1	0	0	1	0	1	1 — 9
P. Jacobus	0	1	1†	1	0	0	1	1	0	1	1	1 — 8

† Hit with second barrel.

After this came several pool matches. The first was at 10 clay pigeons, 18 yards, only one barrel used. Mr. Tuttle missed his first but broke all tbe remaining nine and took first money. Nic Williams and Mr. Scboll broke six out of ten and divided the second money. The scorea stand:

Williams	1	0	0	1	1	1	0	0	1	1—	6	
Spaulding	0	1	0	1	1	0	0	0	1	0—	4	
Mayhew	0	0	1	0	1	1	1	0	1	0—	5	
Tuttle	0	1	1	1	1	1	1	1	1	1—	9	
Havens	1	1	1	1	1	1	1	1	1	1	0	0—5
Adams	1	1	0	1	1	1	1	1	0	1	1	0—8
Scholl	1	1	0	1	0	1	1	0	1	1	0	0—6

The next was also a ten-clay-bird pool with the same conditions, and two purses of $5 and $3 for first and second best shots. Mr. Williams pocketed the first and Chas. Tuttle took the accond money as seen below:

Williams	0	1	1	1	1	1	1	1	0—	8		
Havens	1	1	0	0	1	0	1	1	0—	5		
Spaulding	0	0	1	1	0	0	1	1	0	1	1	0—5
Tuttis	1	1	1	1	0	0	0	1	1	1	1	1—7

Trap Shooting at Colusa.

EDITOR BREEDER AND SPORTSMAN: The Colusa Shootiug Clnb is in a flonrishing condition. Although it has beeu organized but sixty days it has a membership of twenty, comprising some of the best citizeus. The clnb has uct for practice (at clay pigeons and glass balls) from time to time, and last Saturday, the 26th, had a shoot for a handsome gold medal. A uumber of ladies were present, and everything passed off nicely. Tbe conditions were: clay pigeons, 18 yards rise. Trap set in last notch from bebind a screen; average height teu feet. Below will be found the score:

	0	1	1	1	0	1	0	1	1	1	1	1	1	0	1	0	1	1—	15		
	1	1	0	1	1	1	0	1	1	1	1	1	0	0	1	0	0	1—	14		
	1	0	1	1	1	1	1	0	0	1	1	1	1	0	1	0	1	1	0	0—	14
Bassford	0	1	1	0	0	1	0	1	1	0	1	0	1	1	1	1	1	0	1	1—	13
Murdock	0	1	0	0	1	0	1	1	1	0	1	0	1	1	1	1	1	1	0	1—	13
Cutler	1	0	1	0	1	1	0	0	0	1	1	1	1	0	1	0	1	1	1	1—	13
Burton	1	1	1	0	0	0	1	1	0	0	0	1	1	1	0	1	0	1	1	1—	12
Totten	1	1	0	0	1	1	1	0	1	1	1	0	1	1	0	1	0	1	0	0—	12
Gilmour	1	0	1	0	1	0	1	1	0	1	0	0	1	1	1	1	1	0	0	0—	11
Jamerson	0	0	0	0	1	1	1	1	0	0	1	1	1	0	0	0	0	1	1	1—	10

Miller	1	0	0	0	0	0	1	1	0	1	1	1	0	1	0	0	1	1	0	—	9
Wilbur	1	0	1	1	0	1	0	0	0	1	0	1	0	0	1	0	0	0	1	0—	8
Bridgford	0	0	1	1	1	0	0	0	1	1	1	0	0	0	0	0	0	1	0	0—	7
Radcliff	0	0	0	0	1	0	0	0	0	0	1	0	1	0	0	0	1	0	0	1—	5
Dejamett	0	1	0	0	0	0	0	1	1	0	0	0	0	0	0	0	0	0	0	0—	3

James Porter won the gold medal; W. B. Dejamett a handsome leather medal.

Mentiou shonld be made of the shooting of young Wilbur. He is a member of the West Butte Clnb, Sutter county, and is but 11 years of age. He handles a gun like a veteran.

Colusa, May 28, 1883. Bow.

THE RIFLE.

The International Match—Personnel of the American Team.

The Board of Directors of the National Rifle Association, at a meeting held May 21, selected the following gentlemen to compose the American team, they having made the best scores in tbe spring practice at Creedmoor:

S. I. Scott of Washington, 541 out of a possible 600. Mr. Scott is a physician in Washington and a member of the Washington National Rifles. He bas never before been elected a member of the rifle team, although he has had a reputation as a marksman for years.

M. W. Bull of Springfield, Mass., 535. Mr. Bull is a member of the Second Massachusetts Volunteers, and is employed in the Springfield Armory, where he holds the reputation of being an expert at rifle manufacture. This is his first venture as a member of the American Rifle Team.

C. W. Hinman of Boston, Mass., 513. Mr. Hinman is a member of Company D, First Massachusetts, and has several times distinguished himself as a marksman, although not as a member of any team.

George Joiner of Brooklyn, 510. He is a private of the Twenty-Third Regiment of Brooklyn, and became a member for the express purpose of practicing for a position on the American Team. He bas no previous team record, bnt is noted as a long-range shot.

Thomas J. Dolan of New York, 510. He is a sergeant in the Twelfth Regiment, and was a member of last year's rifle team. He has held the championship of New York for three snccessive years against all competitors.

Frank Stuart of New York, 510. Mr. Stuart is a private in the Sixty-ninth Regiment, and deserves much praise for his shooting. He had never shot in a long range before his practice at Creedmoor, and wina his position on the team from hia own work as a marksman. He has had no coaching whatever, and is said to be the "coming man" of the team. He is at present a pressman on the *Sun*.

J. L. Paulding of New York, 510. Is a member of the Twelfth Regiment and distiuguished himself in last year's team.

J. B. Van Huesen of New York, 504. Mr. Van Huesen holds the position of sergeaut in the Twelfth Regiment and was a member of last year's team.

Much difficulty was found in choosing the second eight. The gentlemen chosen were agreed upon on their past records and individual knowledge of rifle shooting. They are as follows:

Walter Scott of Oneonta, N. Y., a lieutenant in the Third Separate Company of Oneonta, who has earned distinction as a marksman, although he never has been a member of any team.

W. L. Cash of Washington, a member of the Washington National Rifles.

J. M. Pollard of Washington, also a member of the Washington National Rifles. Mr. Pollard was a member of last year's team.

J. H. Brown of this city, a director in the association and a private in the Seventh Regiment. Mr. Brown is the inventor of the Brown gun, which is at present in use in the city regiments. He has made a reputation as a long-range shot.

John Smith of Hoboken, N. J., is a private in the Ninth Regiment of New Jersey. He was a member of last year's team. He is an old British volunteer and has shot at Wimbledon.

J. Rabbeth of Boston, Mass., a member of the First Massachnsetts, Roxbury City Guard. Mr. Rabbeth is president of the rifle clnb of Boston. He has no team record.

Lieutenant-Colonel E. O. Shakespeare of Philadelphia. Mr. Shakespeare made a reputation on last year's team. He is inspector of rifle practice in Pennsylvania and is an aid in the First Division Government staff.

G. E. P. Howard of Newark, N. J., a member of the First New Jersey Brigade, was a member of last year's team. Mr. Howard is also inspector of rifle practice in New Jersey.

The choice for captain of the team this year fell npon Mr. G. E. P. Howard, who has full authority to fill vacancies that may occur and also selects his own adjutant.

Before the team sails for England a choice of fourteen men will be made by the board of directors of the association, based upon individnal scores at the forthcoming practice.

The team will consist of fourteen members, iucluding the captain and adjutant.

The team will practice three days each week until the 19th of June, when they sail by the Alaska for Liverpool.

Feeding for Exhibition.

An animal to be be valuable should present straight lines, as nearly as possible, alike on back, belly aud sides, and describe an elongated box as nearly as an animal can be compared to an inanimate object. It is a self-evident fact that both nuderfeeding aud overfeeding young, growing animals has a tendency to interfere with the straight lines necessary both for beauty and profit. Apropos of overfeeding, a prominent English breeder says: "The fattening of animals not intended for the show yard bnt as 'decoys' or 'flat catchers' to show at home, bedded up to their knees in nice, clean straw, in the airy aud well-lighted loose boxea of the model farmstead, has largely supplemented the damage done by 'training' for public exhibition. Of late years a reaction against fat animals has been evident at the sales, and the practice of overfeeding for sales is in consequence greatly modified where it is to auy extent continued; yet the influence of a prejudicial opinion, once justly founded upon fact, does not die out in a day." It is an nndoubted fact that improper feeding has much to do in interfering with straight lines, and tends to establish points at variance with proper breeding, creating roughneas and inequalities of surface which in time become fastened on the progeny.

EPSOM DOWNS.

"St. Blaise's Year"—The 104th English Derby.

The following account of the Derby run at Epsom on the 23d ult., is by cable to the New York *World:*

It seems destined that Hermit's Derby and the snowstorm in which tbe race was run in 1867 shall not soon be forgotten. Last years Hermit's daughter, Shotover, nnder the racing livery of the Duke of Westminster, made her backers happy. To-day Hermit's son, St. Blaise, with the chocolate and yellow of Lord Alington and Sir Frederick Johnstone, carried delight to those who fortunately felt confidence that Porter could send up another Derby winner from the famous training grounds at Kingsclere.

The weather was all that could be asked, the morning broke bright and beautifnl, with a temperature somewhat cool, but which gave additional pleasure to those who drove down by the road. From an early hour both by the London, Brighton and Sonth Coast Railway, and the Southwestern Railway, ran special trains which were loaded to their utmost capacity. In fact, considering that it was known that the field of starters would be smaller than any of those present could remember, the attendance was unusually large, many of the streets that are generally crowded at noon presenting qnite a Sunday look.

The foreigu element present was very great, especially that from France and Germany, while as to the Americans, Gillig's Exchange and other resorts were absolutely deserted. Among those present were Mr. L. L. Lorillard, Mr. R. Ten Broeck and tbe "Plunger" Walton.

The royal party, somewhat smaller than of late years, owing to the absence of the Duke and Duchess of Edinburgh, arrived soou after noon, and included the Prince and Princess of Wales, the Duke and Duchess of Connanght, the Duke and Duchess of Albany, and Prince Christian, with their attendants. All looked well, especially the Prince of Wales, who had entertained a large nnmber of tbe members of the Jockey Club at diuuer at Marlborough honse on Tuesday night.

The nnmber of starters was early shown and the list proved smaller than had been expected, only eleven "weighing out," the smallest number since Buckle won with Mr. Udwy's Emilius in 1823, when the same number ran. In fact, eleven starters was once quite fashionable, the Duke of York's Prince Leopold winning out of a field of that nnmber in 1816, as also did the Duke of Crafton's Whalebone in 1810, Mr. C. Bunbury's Eleanor in 1801, Sir F. Standish's Archduke in 1799, also his Didelot and Spread Eagle in 1796 and 1795, the Dnke of Bedford's Skyscraper in 1789 and Mr. O'Kelly's Serjeant in 1784.

A glance at the "korrect kard" showed that the starters included Lord Falmouth's Galliard (the favorite and winner of the 2,000 guineas), Lord Ellesmere's Highland Chief, Lord Hastings' Beau Brummel, Lord Bradford'a Laocoon, Lord Cadogan's Goldfield, Sir Frederick Johnstone's St. Blaise, Mr. C. J. Lefevre's Ladislas and Bon-jour, Mr. G. G. Stead's (an Anstralian) Splendor, Mr. T. Cannon's Sigmophone, and Prince nnder the colors of his new owner, Mr. Adrain.

The betting continued very heavy, and closed with Galliard the favorite at 7 to 2 offered and taken, 5 to 1 each against Prince, Goldfield and St. Blaise, 11 to 2 against Ladislas, 10 to 1 against Beau Brummel, 16 to 1 against Highland Chief, 25 to 1 against Splendor, 40 to 1 each against Laocoon and Bon-jour, and 100 to 1 against Sigmophone.

The eleven were punctually at the post at the honr fixed, whence Mr. McGeorge sent them without delay. Bon-jour, making the running for Ladislas and attended by Sigmophone, was quickly clear of the remainder. In the front rank showed Ladislas, Prince, Splendor and Goldfield, followed by St. Blaise and Galliard, the pace being somewhat slow. As they reached Tattenham corner, the whole field took close order, and the instant they were in the straight St. Blaise showed in front followed by Galliard and Goldfield, the pace being very severe. There was no change at the road, but as they reached the distance (240 yards from the winning post), Webb closed up with Highland Chief and passing both Goldfield and Galliard, a tremendous race followed right to the end, St. Blaise winning by a neck, with Highland Chief half a length in front of Galliard. Goldfield was fonrth and Bean Brummel fifth, followed by Laocoon and the others, with Sigmophone last.

The scene that followed was one of tremendous excitement, the followers of Wood, the successful jockey, being very jubilant. It was his first Derby, the only winners of the great three-year-old races he had previously ridden being St. Marguerite and Elizabeth, for the 1,000 guineas, in 1882 and 1880. The race was timed in 2:48 2-5, 2 4-5 seconds slower than the time in which Shotover won last year, and by 1 3-5 seconds faster than Iroquois' time in 1881. The best on record is 2:43, credited to Kettledrum and Blair Athol, in 1861 and 1864, respectively. The conditions and summary are as follows:

The 104th renewal of the Derby; a sweepstakes for three-year-olds, at £50 each, half forfeit, the owner of the second to receive £300 and the third £150 out of the stakes; colts to carry 122 lbs., fillies 117 lbs.; closed in 1881 with 240 subscribers, of which a nnmber are void by the death of nominators; about a mile and a half.

Sir Frederick Johnstone's cb c St. Blaise, by Hermit, dam Fusee, by Marsyas, 122 lbs. (C. Wood) 1

Lord Ellesmere's b c Higbland Chief, by Hampton, dam Corrie, 122 lbs. (F. Webb) 2

Lord Falmouth's b or br c Galliard, by Galopin, dam Mavis, 122 lbs. (F. Archer) 3

Mr. Adrain's b c The Prince, by Balfe, dam Lady Sophie, 122 lbs. (J. Osborne) 0

Lord Cadogan's br c Goldfield, by Springfield, dam Crucible, 122 lbs. (T. Cannon) 0

Mr. C. J. Lefevre's b c Ladislas by Hampton, dam Lady Superior, 122 lbs. (G. Fordham) 0

Lord Hastings' b c Beau Brummel, by George Frederick, dam Ma Belle, 122 lbs. (J. Watts) 0

Mr. G. G. Stead's cb c Splendor, by Specnlum, dam Bathilde, 122 lbs. (J. Snowden) 0

Lord Bradford's cb c Laocoon, by Lacydes, dam Adversity, 122 lbs. (J. Goater) 0

Mr. C. J. Lefevre's b c Bon-jour, by Rosicrucian, dam Bonnie Katie, 122 lbs. (C. Loates) 0

Mr. T. Cannon's b c Sigmophone, by Young Trumpeter, dam Eau de Cologne, 122 lbs. (S. Loates) 0

Of all the horses that started for the Derby as above, none by winning could have so completely upset as St. Blaise the printed opinions of the large number of contribntors, commissiouers, high touts and low tonts of the English sporting press. From his first appearance at Stockbridge last June St. Blaise has been one of the "in and onters" so common on the turf both in England and America, a horse that, if he is well backed, is just as likely as not to be beaten, while on another occasion when he is not carrying a penny he will run and win like a first-class horse.

St. Blaise was bred by Lord Alington and is by Hermit, ont of Fusee, who was by Marsyas, ont of Vesuvienne, by Gladiator, and who was one of the best distance-going fillies of her day, having won no less than five Qneen's Plates as a three-year-old, all by the middle of May, viz., one at Northampton

and one at Newmarket in April, and one each at Manchester, Salisbury and Chelmsford. Marsyas, her sire, was by Orlando, he by Toucbstone. As Lord Alington is one of the Westminster divison of the English turf, St. Blaise, like Shotover, the winner of the Derby last year, was trained by Mr. J. Porter at Kingsclere.

As a yearling St. Blaise became the joint property of Lord Alington and Sir Frederick Johnstone, both nominating him for various stakes, in some of which, as for the 2,000 Guineas, he ran as the property of Sir Frederick Johnstone. This was easily done, for the colors of the two gentlemen are the same, "chocolate with yellow sleeves."

As a two-year-old St. Blaise made his debut at the Stockbridge meeting on June 21, where on the Bibury Club day he won the Stockbridge Biennial, carrying 124 pounds, having started an even money favorite, the reputation he brought up from Pimperine, in Dorsetshire (where he was trained privately), being that he was very nearly first class. In fact, so good was his reputation that on the second day after he secured a "walk-over" for the first heat of the Troy Stakes, but meeting Macheath the same day for the Hurstbourne Stakes and being beaten by four lengths, the reputation was somewhat dimmed.

St. Blaise was next seen at Goodwood where on the last day of the meeting he ran a "dead heat" for the Molecomb Stakes with Mr. Gerard's Elzevir (by Salvator) to whom he was giving seven pounds. St. Blaise was then given a long rest, not running again until the Newmarket Houghton meeting, when, with odds at 3 to 1 against him, he started second favorite for the Dewhurst Plate, over the last seven furlongs of the Rowley mile. He failed to be even placed, Ladislas winning by two lengths with Goldfield second, closely followed by Acrostic. This defeat was a severe blow to those who claimed Derby honors for St. Blaise, especially as he only won the second running of the Troy Stakes next day after a hard drive with Mr. Carrington's Pebble, at a difference only of three pounds, which ended his running as a two-year-old with a credit of £2,210, made with two wins, one "walk-over," one division after a "dead heat," one second and one unplaced.

As a three-year-old St. Blaise did not run until the 2,000 Guineas, when, with the odds at 25 to 1 against him, he finished fourth, two lengths behind Galliard, Goldfield and The Prince, they running out a head and a neck apart. In its notice of the show before the start the *Sportsman* said: "St. Blaise appeared to be short of work, which may be easily accounted for, seeing that it was only at the last moment that Sir Frederick Johnstone made up his mind to run the son of Hermit and Fusee." In a review of the 2,000 Guineas and its bearing on the Derby *Bell's Life* said: "Nothing gave more promise of improving during the next few weeks than St. Blaise, whose racing-like appearance was rather overlooked until he had run well in the Two Thousand, when it was recognized by everyone."

The recognition seems to have been followed up, for on the night of the 27th ult. St. Blaise was backed for the Derby at 10 to 1, although two weeks later (May 12) the quotations showed that he had gone back to 100 to 7.

The week following, however, saw an improvement, and last Saturday he was quoted at 7 to 1, while on Monday night and Tuesday morning 5 to 1 was offered and taken.

With the credit of having placed Lord Alington or Sir Frederick Johnstone's name for the first time on the roll of Derby winners St. Blaise's future will be well watched. Unfortunately he has very few engagements. At Ascot he is only in the Prince of Wales, the Derby and Rous Memorial, at Stockbridge he is in the Biennial and at Winchester he is in the Winchester Biennial, which are all his English engagements up to the present time. He is, however, in the Grand Prix de Paris next Sunday.

FISH.

I speak from the experience of thirty years, and I never saw anything equal this. Take the neck and head of a red fowl; cut the neck off down to the breast, and save the skin with the feathers on. Do not remove them until you want to bait your hook; then cut a strip like a worm and remove the feathers, but do not remove the little, bright, glistening hairs. When on the hook it is a most enticing bait, and being tough, hangs on well and looks bright. I have caught a basket of trout with one bait. Sometimes you may want a bait like a bug or grasshopper, or a large miller; this you can closely imitate by leaving on one or two feathers. Sometimes by cutting from the wattles, near the bill, with a feather or two, or a piece of the comb and a piece of the little feathers attached, will lure a trout when nothing else will. Thirty years ago I used to save two or three necks of fowls by placing them in the pickle in the pork barrel in the fall, so that I could have them in the spring, when 'twas difficult to get worms. They are so much better than worms, but a fresh neck is somewhat better than a salted one.—*George Willis in Forest and Stream.*

A number of ladies and gentlemen on Friday last left this city for a visit to Monterey and on the following day started for a fishing excursion on the Butano. The party was on the ground early, and before evening had caught over seventy-five average-sized trout, two of them measuring upwards of eight inches. The evening was spent in camp, and on Sunday morning another batch of some twenty trout was hooked. J. A. Thompson, who accompanied the party, states that the creek is by no means as bad as has been reported.

Bay fishing grows more monotonous every day and beyond the usual catches of tomcods there is little worthy of note. Good or bad luck seems to have little effect upon ambitious anglers who are content with the delusion afforded by holding a line from dry land.

It is stated on reliable authority that permits are being given to fish at the Crystal Springs reservoir. An impression prevailed that they would be withheld so as to give the striped bass ample time to propagate.

Charles Gough, an amateur from Hayes Valley, returned from a visit north on Tuesday and reports good sport at the Garcia river above the mills.

J. P. Chadwick has received a beautiful lot of Japanese flies, some of which are gorgeously gotten up.

Cows should have as large a variety of food as possible. The more kinds of food given the greater the amount eaten and the larger the product of milk and butter. Families that keep but one cow usually have one of superior quality, and in many cases its superiority is mainly due to the amount and variety of refuse fed. Potatoes and apple parings are greedily eaten, together with many odds and ends that in a larger dairy would be wasted or thrown into the swill barrel.

THE KENNEL.

New York Bench Show.

A list of prize winners at the New York dog show would hardly be interesting here, but it will be valuable information to all sportsmen to know which dogs were successful in the sporting classes:

English Setter Champions—Leicester, not for competition; first, Plantagenet (Dashing Monarch—Petrel).

English Setter Bitch Champions—W. B. Shattuc's Dido II. (Druid—Star).

English Setters, Open, Dog class—Thirty-eight entries. Royal Ranger first, Prince of Vernon second, Don Juan third.

English Setters, Open, Bitches—Lady May first, Petrel III second, Dashaway Belle third.

English Setters, Open, Pups—Prince Royal first, Ted second, Bush, H. C.

Black and Tan Setters, Champion Class—T. Forman Taylor's Turk (Colburn's Dash—Pryor's Belle).

Champion Bitches—Garrett Roach's Lady Gordon (Gronse—Belle).

Open Class Dogs—Glen first, King Dan second, Bruce third.

Open Class Bitches—Perley first, Patti second, Belle third.

Open Class Puppies—Don first, Puzzler second.

Bitch Puppies—Alga first, Topsy second.

Champion Irish Setters—John S. McIntosh's Biz (Dash—Champion Flora).

Champion Irish Setter Bitches—John S. McIntosh's Lady Clare (Elcho—Rose).

There were thirty-four entries in the open dog class, from which Wilson's Dash, Snap and Guess were selected for the three prizes. V. H. C. was given Chief II, Chip, Rory O'More Jr. and Garnet, four good ones. Red Dash II, Wexford, Vash, Zig, Rexford, Elcho IV and Bruce were given H. C., and C. was given Don and Guy. The bitches were hardly as good as the dogs. First went to Trip, second to Noreen II, and third to Mamie. Lady Bridget, Lulu II, and Nellie each deserved the V. H. C. they received; so did Moy, Meg and Hazelnut the H. C. given them. Ilka, a fair looking bitch, was given C. Pearl and Gay, with puppies, were withdrawn. Reeta and Cusbla were absent. The two best puppies in the dog class, Hyperion and Lord Wellington, were respectively first and second. Glencho II, Elcho V and McLellan were close up with V. H. C. Tara and a Spy-a Rose puppy, got H. C. Ruth and Ruffle were absent. The bitch puppies were not as good as the dog puppies. Spider, first, and Lady Editb, second, are both good ones, but the rest were ordinary, except Susie, which got V. H. C.

In the champion class for heavy pointer dogs the competition was narrowed to King Bow, Croxteth and Don. King Bow won. Water Lily was alone in the champion class for heavy bitches and won. The open class was a poor one. Perth, the winner, was decidedly the best, and Tally Ho a good second. Third went to Duke of Bradford. Lord Sefton and Neversink got H. C. The open class for heavy bitches was poorer than the dog class.. First went to Nan, third to Lady Gleam. Second was awarded to Vision, but being under weight, the prize was withheld. Moonstone was absent. The light weight dogs were better. Bravo was awarded the prize in the champion class. Shot and Donald were absent. Pretty little Rue was first in the champion class for bitches under fifty pounds. She was sold during the show for $1,000. She was well bought at that figure. The open class for dogs under fifty-five pounds had in it four good ones, Ross, Match, Rowell and Random, respectively first, second, third and V. H. C. Between the two first there was really no choice. Sank was overweight. The open class for small pointer bitches was better than the dogs. Luck was clearly entitled to first and Belle second. Third went to Nellie, a very nice looking bitch, and V. H. C. to Lotta, the best of the balance. Prudence, Lill, Belle of the Glen and Lallah Rookh were about even in point of merit, and received each H. C. Lallah Rookh is no doubt the best of those which received H. C., but as she was suckling puppies she did not show at her real worth. Belle, Rose, Romp II and Daisy, good-looking bitches, each got C. Plover, Nina and Miss Merriman were absent. The dog puppies over twelve and under eighteen months were not good. The best was Drake, a really well-made, promising young dog, but he was not in good condition. Second went to Bramble, a fair young dog. Of the balance Pride was the best, and received H. C. Snipe got C; Hamlet was absent. The bitch class was a trifle better. Reine, decidedly the best, was first, Clio second, Jilt, V. H. C. and Lady Croxteth, C. Some fair puppies were shown in the class for puppies under twelve months old. Lady Whistler and Susan Jane, first and second, were the pick; Katie B, nearly as good, was V. H. C.; General and a Rush-Nan puppy got H. C.; and two Rush-Nan puppies were each given C.

There was a very nice show of greyhounds; quite as good if not better than any previous exhibitions of the club. Don II, a very excellent dog, won in the champion class for dogs. In the bitch class, the only entry, Clio, was disqualified on account of having had a broken leg. Friday Night, a splendid specimen, won in the open dog class, and Slingsby got second. V. H. C. went to Ben, H. C. to Doubleshot, and C. to Leo. Fan, the winner of first in the bitch class, was closely pressed by Dorotbee, second. Coquette got H. C., and Mollie Jackson C. In the puppy class Honor Bright, a splendid looking ten months puppy, was first. Second was withheld.

Most of the foxhounds on exhibitions were of the large, heavy, English type. In the champion class Coiner was alone and received the award. Vinegar, Warrior, Vanity and Cardinal, four good-looking hounds from the Essex County Hunt, were first, second, third and V. H. C. Dorimant was H. C.; Rosamond, absent.

A few good beagles were shown. Melody was awarded the champion prize. King Charbe was first in the open class for dogs, and Frank was second. Myrtle and Daisy, two good bitches, were first and second. In the puppy class Daphne won.

There was but one good Irish water spaniel shown, and that was Dan O'Connor, a fair dog, the winner in the open class. There was but one entry in the champion class, and that one, Polly Wog, was absent. Mollie McGuire was placed next to Dan O'Connor in the open class, and Bruno received H. C. Irish Chief was absent.

The field and cocker spaniel classes were very well filled, and the specimens were generally very good. In the champion class for field spaniels over twenty-eight pounds Benedict was alone, and received the award. Black Prince won in the open class. Dash was second, Judy and Bean H. C., and Imp C. They were a very nice lot. Shot was absent. Hornell Dandy won in the champion cocker spaniel class. Hornell Ruby was absent. In the open class for cocker spaniels, other than black, Alma was first and Charley second. Of the balance the judge gave Lena V. H. C., Teddy Ban H. C., Powder and Conquest C. Charm was absent. In the black or black and white class, Hornell Dineb was first, Ben Lachine second, and Floss H. C. In the puppy class were a number of very fine specimens. Black Silk was the best and received the award, but it is doubtful if she could beat her sister, Black Gem, second, when the latter is in condition. Suanee, V. H. C., is also a good one. Benedict's Boy and Hornell Blade got H. C.; Dan II, Agie and Hornell Beulah C. Fur was absent.

The above notes and comments come from the *American Field.*

English Field Trials.

The English National Field Trials for pointers and setters were held on Tuesday, April 24, and the two following days, on Sir Vincent Corbet's estate, near Shrewsbury. The first day's running was at Shawbury White Gates, and began at 9:30. The weather was unpleasantly cold and raw, and the scent appears to have been poor. The pointer puppy stakes, which were run first, proved disappointing, for the dogs were a medium lot, and did no especial credit either to their breeding or their breaking. The winners in this race were: First, Mr. J. R. Lloyd Price's Bribery (Lord Lieutenant—Professional Beauty); second, Prince Albert Solm's Jilt II. (Darwin—Young Jilt); third, Mr. C. J. Cote's Di Vernon (Garnet—Vi); fourth, Mr. Edwin Bisbop's Maggie May (Don of Devon—Fairy). When the Setter Puppy Stakes were run, on Wednesday, the weather was much pleasanter, and either for this or some other reason, the dogs did well, and far outdid their predecessors. Twenty-four dogs ran, and some of the work done was excellent. The awards were as follows: First, Mr. Elias Bishop's black and white Little Bess (Blue Boy—Maud); second, Mr. C. J. Cote's black, white and tan Dashing Rose (Dash II—Countess Rose); third, Mr. R. K. Armstrong's liver and white Fan (Diamond II—Slut II); fourth, Mr. Thos. Armstrong's black and white John Anderson (John o' Groat—Wise). The first business of Thursday was the competition for the cup for the best puppy of both breeds. Little Bess represented the setters and won over Bribery, but neither was conspicuous for good work. The Cloverley Stakes came next, and, after some excellent and exciting work by both pointers and setters, the awards were: First for pointers, Mr. Barclay Field's Young Dick and Sable; first for setters, Mr. Purcell-Llewellin's Dashing Bondhu and Sable Boudhu; special prize for the best brace of both breeds, Mr. Purcell-Llewellin's Dashing Bondhu and Sable Bondhu; second prize, Abbott's pointers, Drab and Mat. A feature of this race interesting to Americans is the fact that, as stated last week, Bang Bang, the Westminster Kennel Club's new pointer, ran in it, and was beaten by the bad work of his brace mate.

A Valuable Dog.

Mr. William Hearst has a penchant for handsome and thoroughbred dogs, and being possessed of plenty of means as well as intelligence, finds no difficulty in gratifying his taste. Visitors to the dog show cannot fail to remember his beautiful skye terrier bitch Blue Bonnet, Music—Punch, imported from England and which was the only pure specimen of the breed that is known to have been brought to San Francisco. In order to secure a suitable mate for Blue Bonnet Mr. Hearst applied to the owner of a prize winner at several English shows to purchase one of his champions. With much difficulty and only on condition that the dog should never be returned to England, Mr. Hearst was able to secure the dog he wanted, and last week it arrived in this city by Wells, Fargo & Co.'s express. The price paid for it was £100 in England to which must be added about $125 express charges. The new arrival is a dark steel blue pepper color and has all the points of the true breed. Among a dozen fine dogs he would look handsome but out here where such dogs are virtually unknown he cannot fail to elicit admiration from every one who sees him.

A meeting to inaugurate a great Dane club was held in London, April 14. A notice was forwarded to the Kennel Club requesting them to alter the name in their schedules, stud book, registration forms, etc., from boarhound to the great dane. Prince Albert Solms having invited Mr. Frank Adcock to attend a meeting of the continental breeders, to be held at Berlin, to discuss the description of points to be followed by English and continental amateurs in the breeding and judging of the great dane, the members desired Mr. Adcock to represent them at such meeting, and obtain the adherence of those gentlemen to the points formulated.—*Forest and Stream.*

Mr. R. M. Conway, Peakes Cross Roads, Va., writes to say that his greyhound bitch Minnesota, by Max Adeler out of a granddaughter of General Custer's brindle dog, was killed while chasing a hare last week.

The Chester Cup.

This race, run May 2 at Chester, England, has been run for since 1511; prizes then, a silver bell and bowl provided by the Sheriff. The Chester *Curant* gives the following history of the Chester Tradesman Cup: "William Lister, mercer, then being Mayor, and Robert Amery Sheriff, got made three silver cups—two for first and second horses, third to be run for by gentlemen on St. George's Day. Each running horse's owner to put in money value of cups. Winner to keep money, bells only for twelve months. In 1623 Josepb Brereton, innholder (Mayor), sold the three cups, and collected more money, and so had one good silver cup of the value of £8. The winner to keep it forever, the race to be beyond the New Tower, and so to run five times from that place round about the Roodee. The poet Davies made speeches and 'poetical verses,' delivered at the High Cross before the Mayor and Aldermen, and he caused a man to go on the spire of St. Peter's church, at the same time sounding a drum and displaying a banner on the top of the same spire, and this was the origin of St. George's race. In the British Museum is a copy of 'Amercies Triumph,' a splendid pageant being got up in 1610 to inaugurate England's first patron saint, St. George, wherein we read: 'If any reader shall desire to know who was the author of this pleasing show, let him receive advertisement hereby a Sheriff late of Chester, Amerie did thus perform it, who for his reward desires but love and competent regard.' In 1629 the companies contributed to the St. George's race to make up a sum of money. In 1640 a piece of plate was given by the Sheriff of the value of £13, 6s., Sd., to be run for in the lieu of the Sheriff's breakfast of calve's heads and bacon, which it was previously customary for the Sheriff to shoot for on Easter Monday. In 1745 from the Westminster *Journal* of the 4th of May, it seems the races were extended to four days, one race each day. The first Tradesman's Cup was in 1824. The largest number of subscribers to the Plate was in 1853 and 1859—216 in each year. In 1852 the greatest number started, namely, 43.

A Chapter on Geese.

The Tonlonse geese are the largest variety in tbe world, weighing at maturity from thirty to forty ponnds a pair. Goslings of this variety will weigh from ten to thirteen ponnds apiece at three months, but they do not reach their full weight until three years of age. They are easy to raise, have fine feathers and lots of them. Full grown Toulouse geese will yield nearly half a pouud of feathers at a pickiug.

The Emhden, or Bremen geese as they are sometimes called, do uot grow so large as the Toulouse, but are quite as hardy and easy to raise. In color they are pure white, and in some markets white geese feathers will bring a better price than the colored. Good judges pronouuce the flesh of this variety superior to that of the Toulouse.

The White Chiua geese are, as their name indicates, pure white. They are not so large as the Tonlouse and Embden varieties, but in other respects are fully equal to the larger birds. The China geese are said to be better layers tbau auy other variety.

Those who have tried it say that no fowls can be so cheaply raised as geese. I am acquainted with several people who raise large nnmbers of geese for market, and they all declare that they fiud the business very profitable. They live in New York, New Jersey and Penusylvania, and market their geese in New York city; but I see no reason why raising geese should not he equally profitable in Ohio. Two weeks ago western geese, dressed, sold in New York for 13 cents a ponnd, and had the quality been up to that of the Maryland, Delaware and New Jersey geese they would have sold readily at 15 cents. Live Jersey geese sold as high as $2 75 per pair, but the Western went at $2 a pair. Now any one can see that a yonng goose that would weigh ten or fifteen pounds dressed, aud wonld sell for fifteen cents a pound, would pay. If some of the farmers' daughters who have time wonld raise a hundred or so of geese for market every year they would find it quite as profitable as school teaching and not half so wearing on the nerves. And if some of the farmers' wives would make fewer cakes and pies, put a few ruffles less on the children's clothing, and devote the time tbus gained to raising geese, tbey would have a a bigger supply of pocket money and better beds and pillows—to say nothing of the health and strength gained by being ont of doors. Now mind you, I do not advise everybody to raise geese—only those who have a pasture containing a pond or stream of water. Geese can be raised with only plenty of water to drink, and a trough or tub full for batbing, but those who know most about it say that it would not pay.

Breeding-geese should not be kept fat, neither should they be half starved. Turn out to pasture as soon as the snow is gone, and after the grass is well up they will need little or no grain. Geese commence laying anywhere from the latter part February to the middle of March, and lay from twenty to thirty eggs before offering to set. Three geese can be mated to oue gander.

Mr. M——, who raises large numbers of geese every year, raises all his goslings with hen-mothers, and batches from the middle of April to the first of June. Goose eggs need about the same care during incubation as turkey and dnck eggs; that is the bottom of the nest should be of earth and the eggs should be sprinkled with water every other day during the last two weeks.

When the goslings are out they should be provided with a warm, dry coop, and for the first six weeks of their lives they must be sheltered from dew and rain. Goslings when young are subject to cramp, aud one good drenching with dew or raiu will often kill off half a brood at once. After the dew is gone off the grass the mother hen and her goslings may be allowed their liberty until night; but sbould a sudden storm come up you must turn out and get your infant geese nnder shelter. Should any get chilled take them to the house and warm them tboroughly before returniug to tbe mother hen. Youug goslings should he fed bread crumbs, scalded corn and oat meal mixed with onion tops, or the leaves of early cabbage, turnips, etc. When six or eight weeks of age they may be turned out to pasture and the rations gradually reduced to one meal a day. They will live and grow on grass alone after the first two months, but if you desire them to do their level best it will pay you to give them scalded meal once a day.

In some localities there is a demand for "greeu geese" just as they come from the pasture; but most geese are sold in the winter, and these should be fed (after the supply of grass is cut off by frost) with boiled corn and potatoes, cooked oats and harley meal, with rowen soaked in warm water and sprinkled with meal. Of course they must at all times have plenty of water to drink. The greese that are to be kept over for breeding stock—and the same stock can be used for several years—may be fed on corn aud other grain with plenty of water and green food.—*Ohio Farmer.*

Timber Fires.

People who contemplate camping trips to the mountains this summer will do well to tuck away in one corner of their miuds the following official circular from Commissioner McFarland of the General Land Office:

"The attention of the public is called to the fact that large quantities of the public timber are annually destroyed by forest fires which, in many cases, originate through the carelessness of hunting, prospecting and other camping parties; while in some instauces they occur through design. I take this method of warning all persons that hereafter the cause and origin of all forest fires will be closely investigated, and where the fire is ascertatned to have originated through either carelessness or design, the parties implicated will be prosecuted to the full extent of the law. Special timber agents are hereby directed to proceed against all offenders under the local laws of the State or Territory, relating to the unlawful setting out of fires, in which the same may occur. The public generally are requested to aid the officers of the Government in its efforts to check the evil referred to and in the punishment of all offenders.

We hear considerable complaint from farmers' wives, that they have to churn for hours, and in some cases the butter will not come. Now, one-half the time or more will be saved in churning by followiug these directions: After the milk is strained, set the pan over some boiling water in an ordinary iron pot on the stove, and heat the milk until the cream rises slightly. Whenever the surface begins to show wrinkles, it is done; set it away to cool before you put it in a close place. If served in the above way it will make more butter and will be sweeter and keep longer. We have seen cream served in thia way that took but ten minutes' churning. It will pay for the small trouble of scalding the milk. Try it, farmers' wives, and let us know through the *Mirror* if it did not work well.—*J. L. Hersey in Mirror and Farmer.*

Those Complaining of Sore Throat, Hoarseness, or "taking cold," should use BROWN'S BRONCHIAL TROCHES. The effect is extraordinary, particularly when used by singers and speakers for clearing the voice.

A CARD.

W. H. DAILY, THE FIRST SWIMMING teacher on the Pacific Coast, is manager of the San Jode Swimming Baths. A rare opportunity is thus offered the citizens of San Jose and Santa Clara to acquire that health-giving and life-saving art. Have your children learn swimming from Prof. Daily.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trottiug statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY

Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There ars in use at Fairlawn over one hundred HIGHLY-BRED BRGGDMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and training fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, mads in 1881; another with a record of 2:23½; another with a record of 2:26, madein 1882; another with a record of 2:28¼, and a grandson with a three-year-old record of 2:23½, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20¼ to 2:30, a larger nnmber than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:18½ to 2:27½. No son of Ryasdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallab; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23½ to 2:28½, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 bad eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaugbter to drop into ths 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¾, by Happy Medium Jr.; and Carrie B, 2:28¾, by Elijah G, son of Aberdeen. The stallions on our breading farm in America have made such a showing in 1882.

These stallions will be permitted to servs

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address

WILLIAM T. WITHERS.

2-13y1 Lock box 392, Lexington, Ky.

ASHLAND PARK

TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is dons, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

2-17y1 **B. J. TREACY**, Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Solitude, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TO

Sportsmen & Pleasure-Seekers,

TH

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abonnd in its waters, notably Salmon, Rock Cod, Barracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have mads Monterey a paradise for sportsmeu.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT OOMS

connecting for individual baths, with douchs and shower facilities.

THE FAVORITE RGUTE to tboss well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ

IS VIA TH

Southern Pacific Railroad,

(Brosd Gauge),

Ths S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this lins. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are hut a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggageman. Train Baggagemen are instructed to issne CHECKS for all dogs received in Baggage Cars.

☞ In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt Agt.

SOLE AGENT FOR THE PACIFIC COAST.

WHITMAN PARK SADDLE.

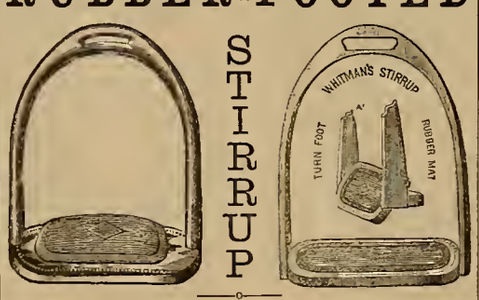
EASY AND SAFE

Riders or those who intend to become good riders should try these saddles. In conjunction with the WHITMAN COMBINATION HALTER-BRIDLE and the WHITMAN RUBBER-FOOTED STIRRUP these are the most stylish and comfortable outfits in use. They can be finished to suit any taste at from $15 upwards.

JOHN A. McKERRON,

230 and 232 Ellis St., Sole Agent for Pacific Coast.

WHITMAN'S RUBBER-FOOTED STIRRUP



THESE STIRRUPS ARE VERY HANDSOME AND THE RUBBER MAT A GREAT CONVENIENCE AND COMFORT TO THE RIDER, AS THE SLIGHT AMOUNT OF ELASTICITY PREVENTS SHOCK, WHILE THE ADHESIVE PROPERTY OF THE RUBBER HOLDS THE FOOT IN PLACE WITHOUT EFFORT.

No person ofter once using them will use any other.

JOHN A. McKERRON,

230 and 232 Ellis Street, Sole Agent for the Pacific Coast

ANTEEO.

6th " Reality, by Sir Archy.
7th dam—By imported Medley.
8th " By imported Centinel.
9th " By Mark Anthony.
10th " By imported Janus.
11th " By imported Monkey.
12th " By imported Silvereye.
13th " By Spanker.

See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.
Will make the ensuing season, 1883, from February 15th to June 15th, at the Oakland Trotting Park. Terms $50 the season.

JOSEPH CAIRN SIMPSON.
Oakland or 508 Montgomery street, San Francisco.

THOROUGHBRED STALLION

X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

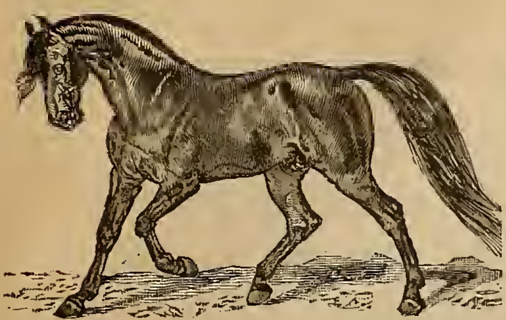
X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam, Columbia, also by imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland,
or 508 Montgomery street.

Mares intended for either of the above stallions, and sent by Donahue, Petaluma, Sacramento or Stockton boats consigned to J. W. Morshead, City Front Stables, will be received, good care taken of them and forwarded to Oakland

STALLIONS.

UNDERMAN.



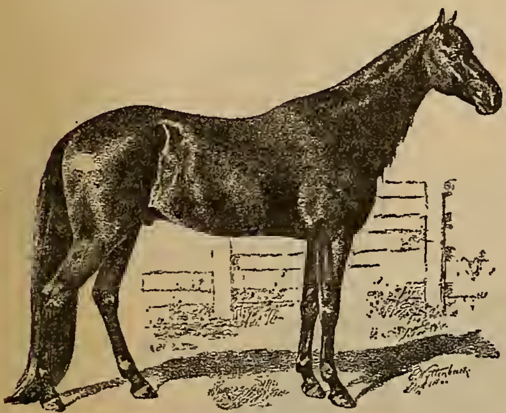
SIRED BY ELMO, DAM BY TOM HYAR SON OF OLD Belmont, will make the season of 1883 from March 1st to July 1st at the Bay District Track, San Francisco.

Underman is a dark chestnut, with blaze face and left hind foot white. Coming six years old, 15¼ hands high and weighs about 1,100 pounds.

Terms, $20 for the season. Mares not proving with foal can be returned next year free of charge. No responsibilities assumed for accidents. Apply to

FRED BENNETT.
Bay District Track, San Francisco.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2:21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Colnmbus. Woodford Mambrino by Mambrino Chief, his dam Woodbine by Woodford, a thoroughbred son of Kosciusko.

Woodford Mambrino is recognized to be the best son of Mambrino Chief. His own record is 2:21½, and there are a large number of his get in the 2:30 list. Among them: Abbottsford, 2:21½; Convoy, 2:22¾; Magenta, 2:24½; Lady McFatridge, 2:29; Dacia, 2:29¾; George A. Ayer, 2:30.

Besides those having public records, he is the sire of the two celebrated mares owned by Robert Bonner—Manetta and Malice. Manetta, with a running mate, and harnessed to a road wagon, trotted two miles in 4:27½, and Malice trotted a trial, on the same track, a mile in 2:19¾. Woodford Mambrino is also the sire of Princeps, the sire of Trinket; record, 2:14. Woodbine is also the dam of Wedgewood, record, 2:19. Young Columbus, the sire of the dam of Abbottsford, has nine of his get in the 2:30 list, so that on both sides of the honse there are notable performers. Abbotsford is a rich rosewood brown, 15¾ hands, and of very high form. His get are very promising, his daughter Jasmine having won the Embryo Stake for yearlings in 1881, and every one which has been put in training has shown good speed.

TERMS.

Seventy-five dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

LOCATION.

Abbotsford will make the ensning season, 1883, on the ranch of S. B. Whipple, Esq., San Mateo, season commencing February 15th and ending June 1st, 1883. For full history see the issue of BREEDER AND SPORTSMAN of Angust 5th, 1882.

GEORGE BAYLIS, Agent, San Mateo, Cal.

MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,260 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

☞ George Wilkes has twenty representatives in the 2:30 list, of which 10 have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.

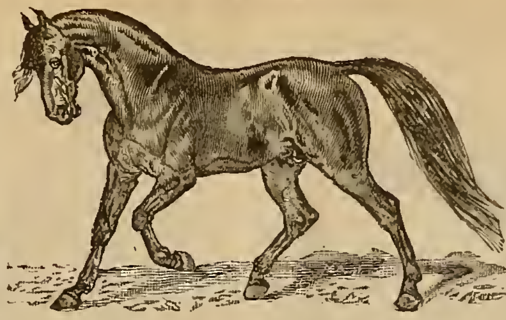
Will make the ensuing season, beginning February 1st, 1883, at STOCKTON.

In putting the price by the season at the low figure of $40 the owner does not acknowledge, thereby, any inferiority on the part of this horse to any other sire of Trotters.

IRVIN AYRES.

STALLIONS.

TROTTING STALLION



Eugene Casserly.

SIRE OF SWEETBRIAR, 2:26¼; NAPA QUEEN, 2:38¼; ROCKwell, 2:39; Bill Woodward, 2:40; Smoothbriar, two-year-old record 2:57; May Day, two-year-old record 2:59½. Will make the season of 1883 at Oakland on Thursdays, Fridays and Saturdays and at Walnut Creek Sundays, Mondays, Tuesdays and Wednesdays. He was sired by General Taylor, dam Jennie by Lexington. Terms $30 for the season. Good pasturage at reasonable rates, No responsibility for accidents or escapes. Address

THOMAS S. BREMNER.
Seventeenth street and Telegraph Ave.,
Or J. M. Heinold, 1428 San Pablo Avenue, Oakland.

THE CELEBRATED TROTTING STALLION

ERWIN DAVIS

WILL MAKE THE SEASON OF 1883 AT OAKLAND TROTTINO park.

DESCRIPTION.

Erwin Davis is a beautiful mahogany bay with very black points and one hind foot white ; 15 hands high ; of superior good disposition and fine trotting action.

PEDIGREE.

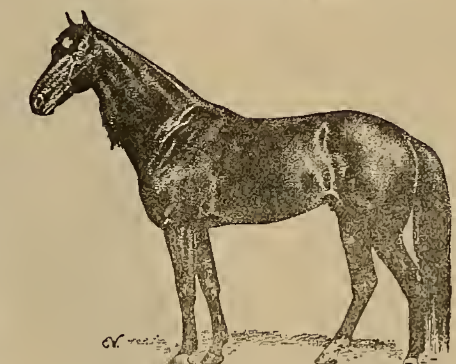
Erwin Davis was sired by Kentucky Hunter (Skenandoah) by broken-legged Kentucky Hunter (the sire of Flora Temple) by Ferguson's Kentucky Hunter, by old Kentucky Hunter, by Highlander. Erwin's dam was Lost Diamond, by Vermont Hambletonian.

TERMS.

Twenty-five dollars fort he season, payable at the time of service. Good pasturage at $5 per month. No responsibility for accidents or escapes. For particulars apply

JOHN ROGERS,
Oakland Trotting Park.

THE TROTTING STALLIONS



SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMING SEASON, FROM Mach 1st to July 15th, 1883, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

PEDIGREE.

Singleton is by Willie Schepper, a son of Rysdyk's Hambletonian, his dam Lightfoot (the dam of Pride) by Flaxtail, a son of Pruden's Blue Bull.

DESCRIPTION.

Singleton is a dark brown horse, tan flanks and muzzle, a little touch of white on hind feet and one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was bred by Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

Fifty dollars the season. Mares not proving in foal will be bred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner their owners desire, at reasonable rates. There is every convenience on the place, boxes, paddocks and plenty of shade and water.

LA HARPE

Will also make a short season at the above place on private terms. La Harpe is by Fame, a son of Alexander's Belmont, his dam Prairie Bird by Flaxtail, the dam of Flight and Prompter. Address

J. T. McINTOSH, Chico, Cal.

STEINWAY.

TWO-YEAR-OLD RECORD 2:31¾; 3-YEAR-OLD RECORD 2:25¾.

TERMS

WILL SERVE MARES THE PRESENT SEASON AND ENDINO July 1, 1883, at the stock farm of the late Daniel Cook, Danville, Contra Costa county, Cal., at $100 for the season, payable before the animal is removed. Mares not proving with foal can be returued free the next season. Pasturage at $6 per month, and extra pains taken with mares in attendance, but no liability for accidents or escapes. Mares sent in care of of McCleverty & Noblett, Fashion stable, Oakland, S. J. Bennett, Martinez, or D. S. Smalley, Haywards, will be forwarded immediately to the farm,

DESCRIPTION.

He is a rich bay ; 15¾ hands high ; long, flowing mane and tail; two white hind ankles ; remarkable style and lofty carriage ; has a good, resolute head, set on a stout neck ; his shoulders are of the Hambletonian form—do not mount very high at the withers ; has great length and capacious middle piece ; plenty of bone and substance, and his gait is big and square.

PEDIGREE.

Steinway was sired by Strathmore.

First dam Abbess by Albion, tho sire of Vanity Fair, with record of 2:24.

Second dam by Marshal Ney, by imported Emancipation.

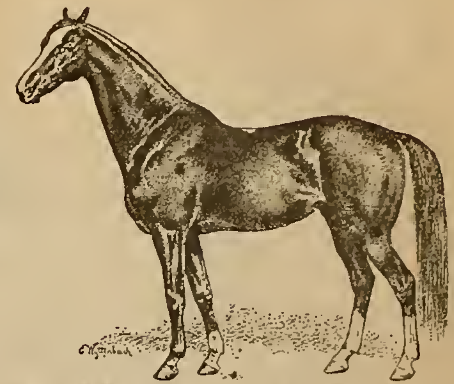
Third dam by Bertrand, by Sir Archy.

Steinway's dam is the dam of Solo with five-year-old record 2:28½, and also the dam of W. S. Buckner's colt Currency that trotted as a yearling last fall in 2:46. See N. Y. "Spirit of the Times of November 18, 1882. Strathmore is the sire of Santa Claus 2:17½ ; Chestnut Hill, 2:22½ ; Steinway, 2:25¾ ; Alice Stoner, four years old, 2:24 ; Nannie Talbot, four years old, 2:29 ; Solo, five years old, 2:28½ ; Monitor, five-year-old record 2:29 ; by Rysdyk's Hambletonian, the sire of 35 in the 2:30 list, Address

SAMUEL GAMBLE,
Danville, Contra Costa Co., Cal.

STALLIONS.

THE THOROUGHBRED STALLION



WHEATLEY

WILL STAND THE ENSUING SEASON, ENDING JULY 1ST, 1883, at the Oakland racetrack.

TERMS—$50, payable at the end of the season. Satisfactory arrangements can be made for pasturage near the track for mares from a distance,

PEDIGREE AND DESCRIPTION.

Wheatley is a golden chestnut, 15 hands 3 inches high, and of fine style and appearance, and is by War Dance.

First dam sister to Pryor, by imported Glencoe.
Second dam Gipsy, full sister to Medoc, by American Eclipse.
Third dam Young Maid of the Oaks, by imported Expedition.
Fourth dam Maid of the Oaks, by imported Spread Eagle.
Fifth dam Annette, by imported Shark.
Sixth dam by Rockingham.
Seventh dam by Baylor's Gallant.
Eighth dam by True Whig.
Ninth dam by imported Regulns.
Tenth dam imported Duchess.
Eleventh dam Grisewood's Lady Thigh by Croft's Partner.
Twelfth dam by Greyhound.
Thirteenth dam Sophonisba's dam by Curwen Bay Barb.
Fourteenth dam D'Arcy's Chestnut Arabian.
Fifteenth dam by Whiteshirt.
Sixteenth dam Montague mare.

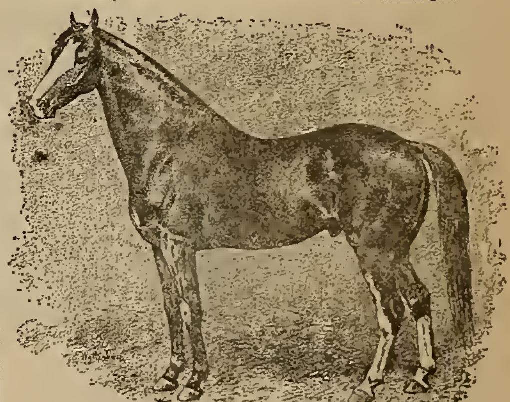
War Dance by Lexington.
First dam Reel, by imported Glencoe.
Second dam imported Gallopade, by Catton, the sire of Trustee.
Third dam Camillina, by Camillus.
Fourth dam by Smolensko.
Fifth dam Miss Cannon, by Oroville.
Sixth dam by Weathercock.
Seventh dam Cora, by Matchem.
Eighth dam by Turk.
Ninth dam by Cub.
Tenth dam by Allworthy.
Eleventh dam by Starling.
Twelfth dam by Bloody Buttocks.
Thirteenth dam by Greyhound.
Fourteenth dam Brockelsby Betty, by Curwen's Bay Barb.
Fifteenth dam Mr. Leedes' Hobby Mare, by the Lister Turk.

For further particulars apply to

MATT STORNS, at the Oakland Racetrack.

Or to Jas. B. Chase, 900 *Front St., San Francisco.*

THE THOROUGHBRED STALLION



JOE HOOKER,

BY MONDAY.

First Dam Mayflower, by imported Eclipse.
Second dam Hennie Farrow, by imported Shamrock.
Third dam Ida, by imported Belshazzar.
Fourth dam Gamma's dam, by Sir Richard.
Fifth dam by imported Eagle.
Sixth dam Bet Bosley, by Wilkes' Wonder.
Seventh dam by Chanticleer.
Eighth dam by imported Stirling.
Ninth dam by Clodius.
Tenth dam by imported Silver Eye.
Eleventh dam by imported Jolly Roger.
Twelfth dam by Partner.
Thirteenth dam by imported Monkey.
Fourteenth dam imported mare from the stud of Harrison of Brandon.

TERMS—$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at $4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento on the Freeport road.

This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN Jan 20, 1883.

Vol. II. No. 24. NO 508 MONTGOMERY STREET. SAN FRANCISCO, SATURDAY, JUNE 9, 1883. SUBSCRIPTION FIVE DOLLARS A YEAR.

Tips and Road Work.

Ed. Breeder and Sportsman: I was much interested and instructed by your answer to my queries as published in the Breeder and Sportsman of June 2. I noticed an article in your issue of May 26, from a gentleman signing himself "A Corbin Jr.," in which he says, "I am fully satisfied that for road or turf work, tips, intelligently applied to a colt's foot from the time any protection or balancing weight is required, will not only serve every essential purpose heretofore supplied by shoes, but will result in maintaining the soundness of and perfection of the foot."

I subscribe to the above as far as turf work is considered, but for road work I disagree with the gentleman. I am prepared to admit that, if a colt be shod with tips and worked upon a good track, his feet would probably be in better condition than if shod with full shoes, especially after the expiration of some years. But were he driven upon the hard, gravely road, I consider the shoes to be preferable.

Again, it would I think be necessary to have the colt shod from the first with tips, as after a horse has become accustomed to shoes he cannot go without. You do not exactly coincide with that statement, I am aware; but I will offer my reasons for your consideration:

For instance, take an old horse used to being continually shod, and pull off his shoes, and how long will he stand road work? My experience is that in four or five days his feet will become so tender that it is painful for him to go even slowly.

I have a mare, sired by "Nigger Baby," who can go for from two to three months without being shod, but her sire had peculiarly hard feet. All of his get are noted for their black, hard, fine-grained feet, resembling nothing so much as gutta percha. However, there are not many such. I consider a horse's foot in its natural state viz.: upon a grassy plain or undulating prairie, to be capable of withstanding the usage it would receive in such state without the aid of shoe, and perhaps being the better for it. But the horse in his wild state and in captivity is quite a different animal, and must be treated differently in order to attain the best results.

Your argument tends to the belief that they can be educated up, gradually, to going without shoes. All my trials in that direction show conclusively that if a horse be shod for a number of years, the longer he is shod the more tender and brittle his feet become, and the more necessary shoes seem to be.

Again, you admit, I believe, that it is an advantage to work toe-weights on young trotters. The prevalent idea seems to be that weight in front is necessary to make a colt "reach out." If that be true, of course toe-weights are an essential. If it be true, then, that a colt will trot faster with toe-weights than without, how do you reconcile the fact to your statement that you believe a horse or colt can trot faster barefooted than with shoes or when weighted?

Again, suppose I own a colt which I desire to make a fast roadster. He may not be fast enough for a racehorse, but can be made to trot, say inside of three minutes. Now if I educate that colt on the track, by the use of toe-weights, and afterward work him on the road, I must have a continuation of weight if I establish his gait properly.

A person could not conveniently work toe-weights on a road horse, and, consequently, he must be weighted by shoes, as tips would be too light.

It is claimed that Smuggler, Col. Lewis, Grafton, Sensation, Defiance, Albemarle, Swigert, Allie West, Loafer, King Philip, Maud S, Benedict and scores of others that have beaten 2:30, were made trotters by the use of toe-weights.

If, then, weight be an essential to fast trotting, why do you consider a horse can trot faster without weight, and go into detail to prove that every ounce a horse carries on his feet is detrimental to speed?

There are few colts, I have been led to believe, that are natural trotters, and have the correct way of going when they are young. If, then, by the application of weight to the feet, a colt is made a trotter that would otherwise be but a good carriage horse, the theory of weight must be good. But if a person were desirous to work a colt as a roadster, the necessary adjunct could only be conveniently propitiated by the use of full shoes, and full shoes you condemn.

I do not consider that I know as much of this subject as yourself, but I am bent upon investigation, and I would like to see the subject fully ventilated. H. W. P.

Healdsburg, June 4, 1883.

Notwithstanding the fears that have been entertained of the scarcity of the salmon supply, large catches are reported from the coast canneries. Quite a canning business is being done in Alaska. Near Seattle many people have had good sport catching salmon with a line.

The Novato Ranch, a Garden of 15,000 Acres.

The Novato ranch, twelve miles north of San Rafael, is a place to delight the eye of any agriculturist. The ranch embraces about 15,000 acres, largely valley land, nearly surrounded on three sides by protecting hills, the apex of which form the boundary lines. On the occasion of the dissolution of the firm of Sweeteer & De Long, a few years ago, the half interest was disposed of on a basis of a valuation of about $400,000 for the whole, but don't go there to buy it at that figure. You cannot do it.

The property is owned and managed by F. and F. C. De Long, father and son, and so thoroughly systematized that the vast estate is as carefully cared for as if it were only a private gentleman's dooryard or garden. There are ten or twelve tenants on the subdivisions, yet no leases, and no man pays a specified rental. The tenants do everything at the halves. The owners furnish the land, the stock and the permanent improvements; the tenants do the work, and get one-half the proceeds—half the money from butter, grain, or any produce. The tenant must be a careful manager, industrious, honest and reliable. To such there is no limit to occupancy. Men remain there years and decades of years, and never think of changing any more than if they held the land in fee simple.

The good care secured by this system to every rod of the great tract is simply wonderful. There are no neglected spots. The vast pasture fields are as nicely kept as an orchard, no acre is overfed, no thistles or weeds are allowed to thrive, no fences are permitted to crumble with age; everything is kept trim and in order. The lumber bill last year, for additions and repairs, all furnished by the owners, amounted to the snug sum of $10,000. This system of renting on shares seems to work well in every respect. It not only secures this excellent care for the property, but it results in a much higher rental than would otherwise be realized. Thus the 1,220 cows milked on the ranch last year netted to the owner from $27 50 to $30 each—a much higher figure than large holdings in this county, where an arbitrary rent is paid. There is never any bickering about terms, rentals, prices or results. The best of feeling exists between owners and tenants. No changes are ever made except for cause, and no tenant leaves the ranch, except in very rare cases. Here is a good illustration of the co-operative system, such as is sometimes adopted by large manufacturers, who give the laborers a share in the profits. It establishes exactly the same relation between capital and labor. Each shares in the profit, and each has an interest in securing the highest results. There are ten dairies on the ranch, milking this year 1,220 cows, or an average of 120 each. Seven acres is the minimum allowance of land per cow, yet from the abundance of feed it is clear that less would do, at least for several years. But the DeLong theory is that it is cheaper to keep the virgin vigor in the soil than to exhaust it. The tenants are Mr. Ginbini, 100 cows; Frank Lewis & Co., on a new dairy, 600 acres of which is land just reclaimed on the marsh, milk 80 cows, and next year they will milk 200; Louis Devoto, 140 cows; Leslie McDonald, 100; A. and D. L. Hayden, 250; Geo. S. Haven, 120; A. E. Benedict, 125; E. W. Hayden, 150; John Preira, 90; Manuel Gomez, 65. Next year the cows will be increased to 1,340. Mr. Ginbini came to the ranch a young man. He worked on the DeLong home some time, then married a fair young woman from the house staff of girls, secured the first vacant ranch, and now both he and his wife sing at their pleasant labor, while their children play at the door. The Novato orchard occupies 250 acres in the heart of the valley. It is, we believe, the largest bearing orchard in the United States. Four-fifths of it is in apples, and the product of this crop alone, in marketable apples, vinegar and cider, is $30,000 a year, or $150 an acre. The apricot patch of 1,700 four-year old trees last year produced seventy-two tons of green fruit, which was sold at three cents per pound. The apple yield this year varies a good deal. Some of the hardy varieties, as Yellow Newtown Pippin and Roxbury are producing very heavily, while some of the more delicate families, as White Winter Pearmain, bear very lightly, having been nipped by frost. The Bartlett pears will be scarce, while the peaches are very abundant. The apricot trees were very closely pruned last year, yet they will produce three-fourths as much as before. The vine culture has taken a great start on the Novato Ranch. This is an industry which will realize no profit in less than five years, yet many of the tenants are putting in large vineyards on shares, the terms being the same as on other products. Another illustration of the stability of the tenantry. Men owning the land could forecast the future no further than they. By next spring A. and B. L. Hayden will have 100 acres in vines; E. W. Hayden will have thirty acres. Portions of these vineyards are already planted, and the vines are rooting for the rest. There will be at least 30 acres in vines next year. Some men think it probable the wine and raisin interests are likely to be overdone in California in the next few years. Possibly, but two million acres of vines in France have died, and the Viticultural Commission of that country has reported that one and a half millions more will die within the next two years. The United States is the only country that can replace that loss, and this State is the most favored one for wine growing in the Union. Marin county bids fair to do her share in supplying the loss of the French product.

The ranch will send to market this year about 6,000 sacks of grain. Thirty hands are employed steadily on the DeLong homestead, and about sixty more on the dairy ranches. The hospitality of the DeLong home, presided over by Mrs. F. C. DeLong, is as free and hearty as generosity and good taste can make it, and the visitor is impressed by the fact that the grand and beautiful valley of Novato is in worthy hands.—*San Rafael Journal.*

FISH.

The Boss Fish Story.

Below is the boss fish story up to date. It is supposed to have been written by Jim Gordon Bennett and appeared in the *Herald*. Can any reader of the Breeder and Sportsman raise it some?

"A stout, portly looking gentleman stood in the midst of an attentive group of friends in a Cortlandt street hotel yesterday afternoon. He was evidently whipping the trout streams of his imagination, for he waved his cane above his head with the rhythmic motion of a leader of an orchestra. After making several superb casts he evidently hooked a specter trout and landed him with great applause. Encouraged by his success he began to tell of an unusual capture made by him, the novelty of which caused the most profound impression. 'You know, gentlemen,' he said, 'that the usual method of catching a trout is from the bank of a stream or out of a boat. Once, however, I captured a very big trout while on a train of cars. I was going up to Pike county, in Pennsylvania, fishing, as was my custom for many years. The conductor of the train was a brother angler, and I rode with him in the baggage car, chatting over the fish we had taken. The conversation turned to those we had not secured. My friend said: 'General, we will soon come to a narrow stream which the road crosses, where resides an ancient and remarkably wary trout. For thirty-six years I have endeavored to hook him without avail. Men have grown thin digging worms to catch him. He dwells under an old log, just beneath the bridge, waiting for the fragments of lunch which fall from the cars.' An idea at once occurred to me. I took my rod from its case and put it together, adjusted the reel, and tied on a favorite cast, which, by the way, was given to me by Sir Morton Peto when he visited me in this country. I said: 'I'll try the old duffer. Don't stop the train, but slow up when you come to the stream.' In a few minutes the train went rumbling on the bridge. The baggage master exclaimed, 'Here we are,' and rolled back the door at the side of the car. I made my cast, gentlemen, and had him, by Jove! It weighed over four and one-half pounds. It was a he one."

United States Fish Commissioner George H. Moore visited Peoria May 23, and the next day planted 5,500,000 young shad, and 850,000 herring fry, in the Illinois river, two miles north of the city. After completing the plant, Mr. Moore left for Havana, forty miles south, where a similar quantity will be planted. Some amateur pisciculturists believe that shad will not thrive in the Illinois river, while others believe they will do well. Time will tell the story, and the result will be awaited with interest.

To-night the steam yacht, Edith Capt. Gage, will leave the sea-wall at 12 o'clock with a fishing party for the Farallone Islands. The last trip out there the steamer drifted over a bank of coral which was very destructive to lines and caused the loss of many lead sinkers. The coral bank is situated near the north island and is of a coarse red variety, as some was brought up on the hooks. This is the first coral discovered in this vicinity.

Last Sunday was the poorest day for fishing along the Sausalito shore that there has been for some time. Quite a number of our city fishermen were over but they came home without any fish to speak of. The favorable condition of the tides and other influences considered, good fishing [illegible] expected to-morrow and for a few days following.

ATHLETICS.

MULDOON WINS AGAIN.

He Defeats Rigal after Wrestling Nearly an Hour.

Jules Rigal, who claims the title of champion Græco-Roman wrestler of France, met his Waterloo in Union Hall on last Monday uight, when the great American wrestler, William Muldoon, twice in succession placed him on his back, to the huge delight of some 2,500 people there assembled. A hotter night than Monday is seldom felt in this wind-swept city, and it was fortunate for the spectators that the absence of ladies from the hall made possible the removal of coats. Had the same degree of heat prevailed in the Grand Opera House, there is no knowing what might have happened, for there access to the har is difficult—well-nigh impossible—but in Union Hall not only is the bar right at one's elbow, so to speak, bnt a number of waiters brought refreshments to the spectators on the floor. Iced drinks were needed to make existence supportable iu the body of the hall, and it would have taken a whole iceberg to make the temperature pleasant enough to suit the perspiring wrestlers on the stage. It was nearly 9 o'clock before the match began. Prior to that time Uncle Billy Jordan, without whose presence as master of ceremonies no trial of skill or strength would be considered complete, announced the terms of the match and read for the edification of the spectators the rules of Græco-Roman wrestling. The winner of the match was to receive two-thirds of the gate money and the loser one-third. Muldoon had chosen for his judge his friend Jack Hallinan, the ex-Nevada sport, who has figured in this city as the promoter of several athletic events. Rigal had for judge a compatriot named Duret, and the pair chose Louis Gerichten, the Olympic Club teacher, for referee. The crowd was orderly, though impatient for the match to begin. Before the start a little incident occurred that came near causing trouble. A certain captain of police, together with some friends, relying on the force of their exalted offices, had taken some reserved seats in the front of the hall, and which had been purchased by some gentlemen, who, when they came in and demanded their seats, were met with a point-blank refusal. For some time the intruders held the fort in defiance of right and good taste, but on the appearance of the manager they gave way. It was just at this moment that the men appeared and were introduced to the crowd. Muldoon was in fine condition except that a festering sore on his left elbow made every motion of that arm painful. Rigal's appearance was a sure indication to any good judge of condition that he stood no chance against the American, for his paunch wobbled and shook its redundant fat as he walked across the stage. His limbs were round and altogether his appearance was more of sleekness than of strength.

The instant the men came together for a hold it was evident that Rigal did not propose to take any chances. He is shorter than Muldoon by several inches and his aim appeared to be to tire Muldoon out by boring his head into Muldoon's breast. Five minutes was spent in sparring for a hold and then Muldoon tempted his opponent to make play by slipping down on his knees and hands and offering Rigal his back. Rigal took hold around the waist and tugged and tugged but was unable to budge Muldoon. While in this position Muldoon reached back to get a neck grip on Rigal but the latter's head appeared to be set right in his shoulders and Muldoon's arm could find no holding place. Then the men broke and played for holds for some time. Muldoon suddenly rushed in seized Rigal by the waist and threw him in the center of the stage. Rigal struck on his head and by a clever twist managed to avoid a fall. Again Muldoon offered his body to Rigal. This time Rigal took hold and played for a fall by trying to twist Muldoon over. Just when he had Muldoon balanced, that gentleman, by a dextrous twist, reversed positions, and would have thrown Rigal, but the latter seeing his danger, managed to avoid a fall by slipping from the stage. Muldoon laughed and when Rigal got up he went for a neck hold. He got the desired grip but Rigal managed to slip out as before. Again Muldoon gave Rigal a body grip and the pair wrestled on the floor. Then for the first time a San Francisco crowd saw the possibilities of science in Græco-Roman wrestling. Rigal bored Muldoon over on his head and feet. Using his head as a pivot, Muldoon, with his legs spread out like a huge spider, crawled rapidly around and over his opponent, and breaking the latter's hold, came within half an inch of winning a fall. But Rigal knew a few tricks himself, and just when it seemed impossible for him to escape, he slipped through Muldoon's arms and gained his feet amid hearty cheering. They had wrestled about twenty minutes, and their bodies were literally bathed in sweat, making them so slippery that it seemed almost impossible for either of them to take a hold. Rigal still continued his evasive tactics of boring into Muldoon with his head, and the latter's blood began to get up. He rushed at Rigal with a force that could not be withstood, and drove him to the seats on the right hand side of the stage. Rigal was cornered and could retreat no further. Then Muldoon clasped him around the body, lifted him about two feet from the floor and ran with him to the center of the stage. Holding Rigal poised for an instant, Muldoon made as though he would throw him to the right, and in that direction Rigal fixed his eyes. This was what Muldoon wanted, and like a flash he threw Rigal to the left, where the latter did not expect to fall, and consequently he was not prepared to turn. Rigal fell heavily on his head and shoulders, and amid loud cheering Muldoon was given the first fall. Time 21:58½. The actual time was two minutes longer, but a deduction was made for the time Rigal was off the stage.

A rest of twenty minutes was taken, and Jordan beguiled the tedium of the wait by reading a challenge from Donald Dinnie, who offered to throw Muldoon ten times Cumberland style in less time than Muldoon could throw him five times Graeco-Roman style. The proposed stake was $250 a side, and the time set at two weeks hence. Muldoon caused it to be announced that he would accept the challenge, provided Dinnie would wrestle not later than Wednesday next, as he is engaged to go to Denver with Modjoska on Thursday next.

It was about 9:48 before the men took hold for the next fall. The second bout was a very one-sided affair, and all in favor of Muldoon, who did all the wrestling and purposely put himself into Rigal's clutches many times for the mere pleasure of showing the spectators how easily he could break all the Frenchman's grips. He gave Rigal a neck hold several times, and shook himself clear as easily as one would throw off the grip of a boy. He lay down and allowed Rigal to take any hold he pleased, and then, with apparently small effort, got loose and commenced again. Then Muldoon got an arm hold, and threw Rigal squarely over his shoulder, but no fall resulted, Rigal turning as he fell. Rigal was badly winded and evidently lacked the strength needed to cope successfully with a man like Muldoon. He kept on boring his head into Muldoon's breast until the latter got annoyed and pushed him sharply away with the back of his hand. At last Muldoon got Rigal's head under his arm, and, twisting his shoulder under Rigal's breast, threw him over, his heels going high in air. Rigal fell on his neck and shoulders, turning like a flash. Muldoon's judge claimed a fall, and it seemed as if a fall it really was, but the referee decided "no fall." The time during which Rigal's shoulders were in contact with the floor was but a second, and it was easy for anyone to be mistaken. The remainder of the wrestling was rather tedious, both the men doing their work on the floor. At last Muldoon got Rigal on the floor and by main strength turned him over on his back. Rigal arched his back to keep his shoulders off the ground, but gradually Muldoon forced him down and won the second fall. Time, 32:36½.

All in all, the match was moderately good. Muldoon displayed much science and his opponent showed resources of skill no one expected him to possess. There was no betting on the match, and no doubt but that it was a genuine contest. Muldoon's arm was very sore at the end of the match and still worse next day.

Professional Foot-Racers.

After enjoying nearly a year's immunity from pedestrian frands San Francisco has again become the rendezvous for a number of unscrupulous professional foot-racers and more are on the way. Soon there will be matches and rumors of matches and as of yore the sessy-going public will lose its money on events which are arranged solely with a view to raking in the largest possible amount of outsiders' coin. Cortez Thompson is in town. He is a most estimable young man but one who believes in opening the pecuniary oyster by running behind whenever more money can be made by losing than by winning. His reputation in Nevada, Montana, Salt Lake, Idaho and this State is not such as a scrupulously honest man would be proud of. He is looking for a match and when he finds one the public will suffer. Archie McComb is supposed to be in this neighborhood somewhere. He is a nice, pleasant young man, a good runner, but, according to his own confession, would as soon win $20 by a trick as $21 on the square. Archie's favorite scheme for moneymaking is to visit the interior towns and there in the guise of a sheepherder, wood chopper, or some other honest calling "lay for a match" with the local champion. Once he gets a match the possibilities for fraud are illimitable. With the aid of a confederate he can control both the betting and the result; win or lose, according as the coin is bet, and as a last resort will give the boys a "double chuck," that is, will promise to lose, and when all the money is bet against him, quietly run the race out and rob not only the public but his own confederates. Harmon is not far away and is ready to swoop down on a country fair or a city race at a day's notice. Harmon is about the fastest short distance man in America, and when he loses it is because he finds losing suits him better than winning. Gibson is still in the state, and Gibson is a man who can make things very lively for a granger; in fact, Gibson's best hold is working the interior. The mysterious stranger who has recently "worked" the southern portion of the state answers well to Gibson's description. Kittleman is expected here soon from Denver or Kansas. He wants to run a match with Harmon, but demands a start of two yards in 100. It is generally thought that Harmon can beat Kittleman a 100-yard race, but how much start he can give him is not so well known. Davis, who under the name of Cameron recently won a Sheffield handicap, is expected back here soon, and everybody knows that Davis would not enter into a job race unless it paid him well; though to do him justice it must be confessed that the jobs he puts up are generally for himself to win. Altogether, the outlook for a lively season of professional foot racee is immense.

The Occidentals Win.

The game of cricket, so popular in England and her colonies, has never gained much of a foothold in San Francisco, though there have been one or more cricket clubs in existence here for many years. One of the reasons why cricket has never been a success is that it is too slow and ceremonious a game to suit the rapid ideas of young America and another reason is the general apathy shown towards amateur sports by the young men of the State generally. Base ball has a few patrons here among the young men and they are also beginning to take a little interest in football, but as a rule the patrons and participants in athletic games are all middle aged persons who brought their athletic tastes with them from the East. These remarks are called forth by the very slim crowd that attended the cricket match played at the Recreation grounds last Saturday between the Occidental and Merion cricket clubs. The Light Cavalry band was on the grounds to furnish music between the waits. The match was only one inning, and, being the first of the season and without any special preparation partook largely of the character of a practice game. B. and J. Benjamin of the Merion club went first to bat. One was caught by and bowled Anderson for nine and the other caught by O'Reilly for fifteen. Only two of the team were bowled, the remainder being caught out. Bristowe of the Occidental club made a good stand, but was surpassed by O'Reilly, who ran up a score of thirty before his bails fell to a twister by Benjamin. The Occidental Club won the match easily.

Olympic Boxing Tournament.

The boxing tournament to be given by the Olympic Club on June 29 is expected to bring out pretty near all the talent in the club. Up to date the list of entries includes Dave Eiseman, W. C. Brown, D. F. Dillon, J. B. Leighton, V. C. Driffield, L. P. Ward, Eugene Van Court, Jeff M. Martin, and T. McCord. There appears to be some doubt about McCord's entry for that gentleman, being a professional ball-player, come within the rule which excludes those who practice athletics for money from all amateur competitions. Dave Eiseman a most industrious and persevering athletic, determined at all hazards to capture a medal for boxing. His name appears among the entries as heavy weight, middle weight and light weight, and no doubt he would have gone in to contest feather weight honors with Martin and Van Court but for the fact that his too-solid flesh refuses to come below 138 pounds. Dave has been in constant practice for some time past and has had the gloves on so often with Jack Hallinan and other experts that he feels able to meet Sullivan or any other man, but the trouble is Sullivan is not an amateur and therefore Dave is debarred from the pleasure of showing his friends how little the champion knows about sparring.

A foot-race between Ross of Gilroy and Charles Smiley of Salinas, for $500, is being arranged to come off at the San Jose fair ground in the near future. Ross has the best mile record in the State.

Farm Machinery.

At this time of the year farmers purchase new implements, and the high price of labor makes it advisable to obtain the latest inventions. The old-fashioned method of farming cannot exist any longer. When the sowing and harvesting seasons straggled over several months each, the crops were mostly of an indifferent character if they could not be sown or reaped or mown in proper time. The whole surrounding conditions of the farmer have been changed in this competitive commercial age, and he must be at his best at all times, or he will be beaten in the struggle for existence. Only by the aid of efficient implements and machinery can he be master of the work.

The use of labor-saving implements and machinery is one of the most remarkable developments of the age, and farmers are by no means behind persons in other industries in availing themselves of the ingenuity of inventors. This ingenuity is constantly strained to invent new and to perfect old machines. They ever vie with one another to make the most complete and efficient appliances. In fertility of invention they are not superseded by any manufacturers. Simplicity of construction and durability of the material employed are among the chief points aimed at by them, and they have succeeded to a marvelous degree. The competition between them is keen and spirited. They are ever studying the wants of agriculturists, and diligently searching for new applications of labor-saving implements. The requirements of farmers, forced by the tariff to pay enormous wages, stimulate the inventore to increase production. With praiseworthy energy and enterprise they push their latest inventions and improvements into the uttermost parts of the earth, wherever there exists an agriculture suitable for the introduction of their implements and machinery. Their labor extends wherever civilized agriculture is practiced, and the beneficial influence they exert on civilization itself is incalculably great.

The American farmer fully appreciates the value of machinery, although he does not have to pay so much as the British farmer does in stocking his farm. There are, however, expensive implements, and they but slowly though surely repay for the outlay. Moreover, they require constant repair and renewal, for wood is perishable and iron and steel not indestructible. Such valuable instruments require care in their preservation, but they are too commonly neglected, and then the repairing expenses become heavy. There should be no lack of paint, especially on all woodwork. The working portions of the machinery should always be kept well lubricated to prevent waste of material by friction. Besides, many farmers leave valuable implements for days and weeks together exposed to the destructive influences of the weather. Sheds of ample dimension for the reception of implements not at work should be provided. In these mowers, reapers, tedding machines, and other valuable machinery should be protected from the sun and rain.

The great enemy of farm implements, however, is the borrower. Men who call themselves Christians, good citizens, and kind neighbors, do not hesitate to borrow a reaper or a mowing machine, and to leave it out of doors exposed to the destructive influences of the weather, or to send it back broken by the carelessness of some boy. I have made it a rule for twenty years past never to borrow an agricultural implement of any description. It is an old maxim, but a true one, that the borrower is worse than the thief.—*American Cultivator.*

Timber.

No other country has so large a percentage of its cultivable surface spread out into broad, treeless plains as this. Throughout our extensive prairie regions wood for fuel, for fencing and for building purposes is at once expensive and difficult to be obtained; whereas, in our forest wilds the timber resources of the country are most recklessly wasted. At our present rate of careless use and wanton destruction we shall at an early period in the next century be as badly off for timber as any of the European countries are at present. Even now our Northern States obtain a large portion of their lumber from Canada, and the increase in price since the war indicates clearly enough that we should adopt a new lumber policy. To "woodman, spare the tree," we should add, "farmer, plant the tree," and between sparing and planting we should soon make practical advances in forest science. In forestry the Germans are far in advance of all other peoples. They commenced it in the days of Charlemagne, and have ever since regarded it as an important branch of their rural economy. It is clear that forest culture should be made a branch of our agricultural studies, and as trees cannot mature in a day or year, that we should take time by the forelock in order to prepare for the wood demands of the future. This conviction is already making headway in the West, and forests are springing where they never before were known. The United States has given large encouragement to the planting of forests on the public lands, and the States should now exempt from taxation for twenty years at least all forest plantations.

A writer says that to destroy lice on live stock he has found nothing better than strong carbolic soapsuds. The soap usually sold under the name is not strong enough for the purpose. It may be easily prepared and at any degree of strength that may be required. Get a pound of carbolic acid crystals, which may be had at any wholesale druggist's. I get them in Boston at a cost of sixty cents per pound. Take ten pounds of common bar soap, put in a pan with a little water and heat until dissolved. Take out the cork from the bottle containing the acid, and set it in hot water, which will cause the acid to become fluid; add this to the soap and stir well. Set away to cool and you will have a soap at small cost which will be strong enough to kill any vermin which infest domestic animals, and which will cure harn itch and any cutaneous diseases to which they are liable. It is good to cleanse and heal sores, and a wash of it will be found good where animals are hide-bound and the skin out of condition; it will be found good to wash the inside of poultry houses to render them sweet, and kill and prevent vermin. It is a cheap, safe and sure remedy, and should find a place in all well-regulated premises.

Mr. T. Christy, F. L. S., of London, writes that, for the floor of the poultry house, the best plan is to get it quite level and then slant it to the front, just to cause a slight fall in case of wishing to wash it out at any time. Then put on a coating of cement and sand; when quite dry fill in two inches of dry earth that has been sifted. As the droppings fall on this they are easily raked off and the ammonia is absorbed. It is a great point to have dry rune for all poultry, and the birds appreciate the dry dust for ridding themselves of vermin. If young chicks are kept upon dry earth they will stand cold in the most singular manner, but they soon succumb if they get into the damp.

HERD AND SWINE.

Milking Qualities of Polled Cattle.

In McDonald & Sinclair's "History of Polled Cattle," we find that from time immemorial "the polled stock was the dairy cattle of the north;" and again: "Half a century ago the north polled cattle were noted for their great milking powers; and we find Youatt mentions polled cows of Buchan giving as high as seven gallons of milk a day.

Such was the stock from which the Aberdeen Angus cattle spring, and in spite of the fact that little or nothing has been done to develop, or even to keep up their milking qualities, they are still worthy of their ancestors and true to their record as milkers.

In 1879, Lord Airlie, of Cortachy Castle, Angusshire, Scotland, wrote: "I have at present seventeen pure polled Angus cows in my dairy. The greater number of these give from twelve to fourteen, and sometimes sixteen, Scotch pints a day, for a considerable time after calving. The milk is admitted to be much richer than that of either the Shorthorn or the Ayrshire. As regards the length of time for which they will continue to give milk, my cow, Belle of Airlie (1959), used to be milked all the year round." And in a letter to Mr. F. B. Redfield, some three years later, he says: "I have now some cows that are giving twelve Scotch pints a day, although three months calved." (Twelve Scotch pints is equal to about twenty-one and a half of our quarts; fourteen to twenty-five, and sixteen to almost twenty-nine of our quarts.)

Mr. A. B. Matthews, of Kansas City, under date of April 25, 1883, writes as follows: "I have no hesitancy in saying that for quantity and quality of milk combined, no beef breed equals them. I have never seen a cow of the breed (Augue) that would not raise her own calf, and I have seen many a Shorthorn that would not. My experience is, as a rule, they give a fair quantity of milk, and occasionally there are exceptionally good milkers."

Mr. J. J. Rogers, of Abingdon, Ill., under date of April 22, 1883, writes: "Relative to the milking qualities of Augue cattle; as far as I have tested them, they are good. We have at least 100 Shorthorn cows, and have had for two years. We always let the calves run with them until weaning. We also have thirty Aberdeen Angus females, which we use the eame way, and we have to milk the Angus the longest before the calves can take all the milk. I will venture to say that if any ecientific old milk-maid would select ten cows out of our entire herd of all kinds, for milkers, they would be mostly Angus. Our farm will he stocked enough with thoroughbreds and grade muleys this fall so we can sell all the horned cattle off. We have tried the Angus every way, enough to fully conclude to handle no other kind while we handle cattle. They are good feeders, mature early, and are good milkere, very hardy, kind and gentle, do well on grass, no better formed cattle, and will make more beef with less feed, than any other cattle we ever had on the place."

Mr James Anderson, of Anderson & Findlay, Lake Forest, Ill., under date of April 20, 1883, writes: "Our Pocahontas (5,021) is giving twenty-two quarts of very rich milk daily; ehe is only four yeare old. She comes down poor when giving milk, hut when allowed to dry up will fatten very fast, and keep fat very easy. We have many good milkers in our herd, and jnst now have nine calves on six full-breed eows, and they are all doing finely.

Mr. T. NcCrae, Guelph, Canada, nnder date of April 23, 1883, writes: "I have been amoug Galloway all my daye, and have had a great many under my care. In Scotland eome well-attested cases of large yields, hoth of milk and butter, were brought under my notice. I am more familiar with the Galloways than the Angus, but what I say ahout the Galloways I believe to apply equally to the Angus. So far ae my experience goes they will hold their own with any pure breed.

Mr. F. B. Redfield, Batavia, N. Y., under date of April 24, 1883, writee: "My cows (Aberdeen Angus), have raised their calves in every instance."

In Mr. Redfield's introduction to his stock catalogue, June, 1881, we find: "I am one of the many engaged in stock-raising in this country, who predict for the Angus doddie a great future in America. Ranking with, if not surpassing, the Shorthorn in size and early maturing qualifications, the doddies, by very far, excel that valuable breed in hardihood, ease of keep, docility, and the superior quality of the beef. Ae milkers they excel all other beef breeds." And again: "The milkiug qualities of the hreed are of a high order."

Weaning and Feeding Calves.

About the first day of January I hought a cow and calf, the latter three weeks old and had sucked the cow up to that time. I at once took it away to feed hy hand; found it stuhhorn for a day or eo, bnt huuger "eoon bronght it to terms." I commenced at once feeding it with skimmed milk and hay tea, strengthened with abont a tahlespoonful each of oil meal and coarse flour for each feed. These additions were increased gradually nntil at about 6 weeks we gave a teacupful of each, including the eame proportion of bran. We found the best way to add these ingredients was to mix them and make a porridge in advance, to he stirred into the milk and tea when warmed.

The tea we made by packing a wash-hoiler full of good timothy hay and cooking it for two hours over a moderate fire, then pouring out into jars; thie would last several daye.

On the 6th of January I bought another calf of a milkman; it was about four days old. Fed it at once part new and part ekim milk, with tbe addition of about the same quantity of coarse flour and oil meal, increasing these additions gradually, and in ahout a week fed only ekim milk; at two weeke commenced giving a little hay tea, a pint or so at first, increasing regularly, so tbat when one month old the feed was half hay tea and half ekimmed milk, with an increased portion of the other ingredients.

On the 20th of January, I hought another calf 6 days old, which was treated in the same way. By the middle of February I found we could feed another without any difficulty, but could not get snch a one ae I wanted, and have not heen able to since; so have but three now, but found I could add another one every month and feed them well, by good management, all from the milk of one cow (from 3 to 4 gallons per day), besides farnishing a small family with milk, cream, and butter, and a surplus of 3 or 4 lbs. a week to sell, of the latter. I should have said that I kept hay and corn fodder hefore them all the time, and occasionally gave a feed of bran, corn and oil meal mixed dry. Now I have got three as nice, sleek calves as ever I raiecd, without any great trouble or expense. The only trouble I had was when the eecond one (a grade Devon) got to eating too much bran and was "loose" for a day or two, hut two feeds of new milk straightened him right up, and he is the best of the three now—the others being grades of Jersey and Shorthorn.—*Cor. Ohio Farmer.*

Stock Feeding.

There is no suhject, perhaps, that gives rise to more discussion, at agricultnral meetiugs, than the proper feeding of stock, and none ie of more importance to the farmer iu an economical point of view. Every man is prone to consider hie mode of feeding as the hest, and that his knowledge ou the suhject is mnch greater than his neighhor's. These friendly contests are well, for by bringing out each man's experience they tend towards the elucidation of tbe truth. In the feeding of stock, there are essential points to he borne in mind, according as we have in view the development of muscle, the laying on of fat, the production of huttcr, or tbe increase of milk without regard to quality. For the proper understanding of these points, the farmer should understand something, at least, of the phyeiological laws which govern them. He should have a knowledge of the "proximate principles," as tbey are termed; i. e., the suhstances entering into the composition of the animal body, and into the various kinds of food; of the manner in which these proximate principles are introduced into the system, as well as the kind, quautity and quality. He should nnderstand the process hy which they are digested and assimilated, and the hest means by which he can attain the end tbat he has in view. The proximate principles may be divided into two classes—those which are inorganic in their nature, aud those which are organic and have a definite chemical composition. Of these, the most important are water, salt, potash, lime, soda and magnesia. These are introduced with the food, and are taken up by the animal tissues exactly ee they exiet in nature. They undergo no essential chemical change iu becoming compouent parts of the system. Water not ouly enters largely into the composition of the hlood, hut eerves also for the introdnction and discharge of materials which, beiug solid, must become fluid in order to pase into the animal frame. It is conveyed into the system in the act of drinking, but it also enters as an ingredient of the different kinds of solid food. Its importauce to the economy is greater than any other substance, and should he supplied with constant regularity. It is a well-established fect that all animals can go much longer when deprived of food than when deprived of water. Salt enters largely into the tissues and fluids of the body, and therefore ie of great importance to the system. Althongh it occure in both animal and vegetable food, the amount is usually small, and hence the necessity of eupplyiug the want. Herhivoroue animals iustinctively crave this suhstauce, and, in the fattening of swine, experiments have shown that the assimilation of the food goes on better if salt is given to the animals. Phosphate of lime is also found in the tiesues and fluids of the body. It gives to bones, teeth and cartilages their solidity. When not supplied in snfficient quantity, a softening of the bony tissues takes place. This euhetance, aud as the potash, eoda and meguesia, are usually found in sufficient amount in the food, or they are formed in the body by the decomposition of other ealts.

The proximate principles that are organic exist as ingredients of organized hodies. They are starch, sugar, fat, albumen, fibrin and caseine. The last three are known as nitrogenous suhstances, as they contain nitrogen, while the first three do not contain thie element. Starch enters largely into the composition of the various grains, corn, wheat, rye, oats. It exists also in potatoes, peas, beans, and in most vegetable substances. Starch is easily converted into sugar, and thie always takes place in the process of digestion. Sugar ie also derived from both animal and vegetable sourcee. Thus we have milk-eugar and liver-sugar, which are produced in the mammary gland and in the liver, as also sugar of honey, prepared by the bee. Under vegetable sugars, we have the cane, grape and sugar of starch. The fats are also derived from both animal and vegetable suhstancee. Certain kinds of food favor the production of fat more than others. This is particularly the case with those containiug large quantities of sugar. It is a well-established fact that the negroes, as well as the animals, employed in sugar-growing countriee, grow remarkably fat during the season of sugar-making, and lose this condition when the season is finished. But saccharine materials are not sufficient for thie purpose, as ie shown when swine are fed on suhstances containing abundance of starch, which, as we have seen, is easily converted into sugar by the process of digestion. Fatty or oily matters must also he supplied. Pigs fed on hoiled potatoes aloue, which contain much starch, fatten much more slowly than when greasy substancee are also given them in some form with the food. The nitrogenious substances, albumen, fihrine, and caseine, differ from the other proximate principles, in that they coagulate, undergo putrefaction, and excite fermentation in other suhetances. These enter largely into the animal tissues and fluids, and yet experiments sbow that, although highly nutritioue and necessery as food, if given alone, animale become after a time enfeehled and actually may die of starvation. No one class of proximate principles can be sufficient for the nutrition of the hody, bnt the food to be nourishing must contain all of them, and must he mixed together in the proportions best suited for the different kinds of animale, and for the purposes in view, whether the growth of muscle and strength, the increase of fat, or a great amount of the milk secretion, without regard to its quality. In a word, that our animale may thrive well, tbere must be a variety in the food given. Steaming or cookiug the food under certain circumstances may render some articles more palatable, and poesibly more nutritioue and more easily digested, hut tbere is no economy in giviug to animals, from whom we expect anything in return, poor food of any description, especially if we are ohliged to disguise it and convert it into a heterogeneous mass. Let the food be good, and the amount depended upon the age, condition, ohject in view, and amount of exercise. Feed with great regularity and let there be a variety, remembering that in the young animal, flesh, etrength, and fat are to be formed.

Sheep entrails, long used in the manufacture of so-called "cat-gut" strings, and for "skins" of Bologna sausages, bave found a demand in a more recent manufacture—that of helting for propelling machinery. A contemporary tbus describes the process employed hy a manufactory recently established at Oakland, California: The entrails are first cleaned and immersed in briue for some days. From tbis they are wound on bobbine, after which the process is about the same as making rope, if a round helt is required, but where a flat belt is wanted a loom is employed, and the strands of gut are woven as in the manufacture of ribbons. Round belts vary in size from 1-16 of an inch to 1½ inches in diameter; flats are made of any required widtb. Three-quarter-inch belts, it is claimed, will stand a strain of seven tons, and last more than twice as long as a hemp rope of equal size.—*Breeder's Gazette.*

There is a large scope of rich agricultural and fine timber lands along Grande Ronde river, and the line of the railroad, which will be taken up this summer.

TURF AND TRACK.

"No Time" Races.

As the trotting season has now fairly hegun, end the practice of competing in races where it is understood beforehand hy tbe owners of horses aud the management of the track on which the race takes place that time shall he suppressed will be indulged in by some unscrupulous persons, it ie important that the recent action of the Board of Review at its meeting in Chicago, May 15, should be given the widest possihle publicity. On the docket at this meeting were a number of "no time" casee which had heen continued from the preceding meeting, and in its decision of tbem the board ruled as follows:

1. In any public race wherein the time has heen suppressed, either hy omission or hy false timing, each horse that wou a heat, or made a dead heat, shall thereby and thenceforth be held to be disqualified, under Rule 41, from any right to enter or compete on tbe grounds of members of this associatiou, until such horse shall he relieved by an order of the board or of the president, ecting under his authority in tbe premises. And if any horse shall bave been awarded a premium on the grounds of our members, during the time of euch diequalification, such premimm sball he forfeited for redistribntion to other horses in the race entitled thereto.

2. In any case wherein a horse bas won a heat or made a dead beat, in a race wherein the time was omitted or falsely announced, if it shall he established that the owner or person controlliug such horse was implicated in any manner in procuring the time to be so omitted or faleely announced, such person shall therehy and thenceforth be held to be disqualified, under Rule 41, from all right to participate in the privileges and usee of the coursee and grounde of our membere, nutil such person shall he relieved by order of the board or of the preeident, acting under hie authority in the premises.

3. In any case arising under Rule 41, wherein a person ie charged with heing implicated in procuring the time to be omitted or falsely announced, if such person, having been notified to answer before the board in respect to the matter, shall ask for a continuation, for the purpose of defense, the case as to him shall be continued; but, in the meantime the horse or horses of such person which are affected by Rule 41 shall remain disqualified on the grounds of our members until relieved by order of the hoard, or of the preident acting under his authority in the premises; and if any premium has beeu awarded to such horse or horsee on the grounds of our membere, during the time of such diequalification, such premium shall he forfeited for redistribution to other horees in the race entitled thereto. And in like manner there shall he continued those cases wherein it does not appear that the person charged has received notice to answer.

4. If in any case arising under Rule 41 the person charged with being implicated in procuring the time to be omitted or falsely announced shall estahlish that he did not intentionally disregard the rules, the case ae to such person shall he dismissed, and the horse or horses of such person which are affected by Rule 41 ehall be relieved from future disability by operation of that rnle; but if any premium has heen awarded to euch horse or horses, on the gronnds of our membere, during the time of disqnalification, such premium shall be forfeited for redistribution to the other horses in the race entitled thereto.

5. When no answer has been filed, hecanse the residence of the party could not be learned, bnt the ommission of time has been ascertained, and the horse has not won a premium on membere' grounds to be returned under the preceding rulings, the horse shall be suspended nutil further order of the hoard, and the case as against the person shall he temporarily dismissed.

6. When, in either of the cases recited in the five preceding rulings, it shall appear that the horse has heen awarded any premium on the grounds of membere, which, under said rulings, ie required to be forfeited, the seme shall he returned to the treasurer of said association for action of the boerd, and such horse shall he suspended until that requirement is complied with.

7. When it shall he satisfectorily shown to the president that any party or horse is, or has heen, unjustly suspended or disqualified under the six preceding rulings of the board, he, the president, mey grant temporary reiustatement to such person or horse until the next meetiug of the board, provided than any premiums won by such horse on the grounds of membere and returnahle under such preceding rulings, shall first be returned to the custody of the treasurer of this association, subject to the action of the hoard.

Races at Pleasanton.

H. G. Cox, proprietor of the Pleasantou Driviug Park, will give two days racing over his track on Tuesday and Wednesday, July 3 and 4. The programme is as followe:

First day, running, mile and repeat; open to all horses now owned in Washington and Murray townships. Purse $100, $75 to first, $25 to second.

Same day, trotting, free for all horses in 2:30 class. Purse $200; four to enter and three to start; $125 to first, $50 to second, $25 to third.

Secoud day, runniug, half mile heats, three in five. Purse $150; free for all, four to enter and three to start; $100 to first, $35 to second, $15 to third.

Same day, trottiug, free for all horses owned in Washiugton and Murray townships, Nos. 1 and 2 of Contra Costa county. Purse $100; $75 to first, $25 to second.

Entrance ten per cent. National rules to govern. Entries close with Wm. Napier, Senate saloon, Pleasantou, June 20.

Trotting at Petaluma.

The first trot of tbe eeason over the Petaluma track occurred on tbe 29th ult. Tbe result is summed up as follows:

AGRICULTURAL PARK, PETALUMA, May 29, 1883.—Sweepstakes of $20 each, mile heats, three in five, owners to train and drive.

T. Biggs' b m Kitty Sawyer	1	1	1
A. Morse's g g Sid Sperry	2	2	2
Ben Edwards' s m Nettie Bennett	3	3	3
D. Misner's b m Fannie Wilson (pacer)	4	4	4
W. P. Fine's b m Fox	dis		
W. D. Freeman's s m Countess	dis		

Time, 2:48, 2:52, 2:54½.

The bookmakers and scratch bettors had a benefit at Baltimore on the 24th ult. In the race for a club purse for all ages, one mile and a furlong, the brown gelding Hostage, by Hurrah, was an unexpected winner, beating Colonel Sprague, Camillus, Haledon, Jim McGowan and London. The bookmakers were delighted, for they had not written H[illegible]ge's name once, so little was he thought of, though they [illegible] 15 and 20 to 1 against him. They won the [illegible] Five-dollar tickets in the mutuels paid $361 75.

Thora's Last Race.

The contest for the Louisville Cup on Saturday, May 26, will long be remembered by a large multitude. Lida Stanhope, John Davis and Thora were the only contestants out of sixteen nominations. Prominent among the non-starters were Blazes, Freeland, Appolo, Boatman, Mistral and the veteran Checkmate, all of which were on the ground in good racing condition. The announcement that Thora would start appeared to terrorize the great majority. It was the story retold of the downfall of other famous racers. The trio came to the post, Lida Stanhope in superb condition, and John Davis, as his owner, Col, Chas. L. Hunt expressed it, "fit to run for a man's life." Thora showed the finish and form which are the results of highest skill and science in training. All three gracefully cantered to the starting point, cheered by the partisans of each in a manner so hearty that only those that have been on a Kentucky race track can appreciate. The contestants, once at the post, were quickly assigned their positions. Thora had the inside and John Davis the outside of the track. At the first time of asking the flag was dropped to a perfect start. John Davis, with his wonderful turn of speed, piloted by Dan Sparling, following his instructions, shot to the front and set the pace, closely attended by Thora, while Isaac Murphy on Lida Stanhope, in his usual masterly style of riding, trailed two lengths in the rear, the gap being gradually increased to four open lengths as the leaders finished the first mile and straightened themselves. Without change of position they passed the stand for the second time amid great cheering. Thora was neck and neck with Davis, apparently moving with great ease. Upon reaching the quarter pole the contest began in earnest, for down the back stretch Thora was allowed to extend herself, and with Davis making a tremendous effort to maintain his lead, Brophy gradually forced the red and blue colors almost a length ahead of the polka dots, but the triumph was only momentary. Suddenly the great mare faltered in making the turn near the half-mile pole. Davis regained the lead, closely pursued by Stanhope. Brophy realized the hopelessness of the contest, eased Thora and virtually dropped out of the race. Murphy on Lida Stanhope meanwhile had gradually closed the gap on John Davis, and when half way down the stretch passed the game gelding, winning the cup with comparative ease by fully three lengths. Time of race: First quarter, :25¼; half, :52; three-fourths, 1:18½; mile, 1:45; 1¼ mile, 2:10: 1½ mile, 2:37¾; 2 miles, 3:34; race 2¼ miles, 4:00¼. The track was fine and fast.

Thora pulled up quite lame. The hind tendon of the right fore-leg was sprung sufficiently, in the opinion of her owner and trainer, to unfit her for racing, and so Mr. Reed will at once have her sent to Fairview, his breeding farm in Tennessee, to be mated with imp. Fetcher. May her days of motherhood add to the lustre of her name.

Thora, by Longfellow, dam Susan Ann, by Lexington; second dam Roxana, by imported Chesterfield; third dam Levia, by imported Tranby; fourth dam Tolevia, by imported Contract; fifth dam Diamond, by Turpin's Florizel; sixth dam by Lewis' Eclipse, out of Minerva, by Melzar, etc. Thora started eleven times at two years old, and won four races. Saratoga, won purse five furlongs in 1:04½, beating Bonnie Lizzie and nine others. Same place, won Day Boat Line Stakes, three-quarters of a mile, in 1:17¼, beating Hindoo, Bonnie Lizzie and three others. Baltimore, Md., won Merchants Stakes, one mile, in 1:44¾, beating Crickmore, Spark and Ripple. Same place, won club purse, one mile, in 1:47½, beating Compensation and three others. As a three-year-old, started fifteen times and won eleven races. Sheepshead Bay, won spin of three-quarters of a mile, in 1:16, beating Victim, Checkmate and six others. Won Mermaid Stakes, one mile and a furlong, in 1:57, beating Spark, Aella and two others. Monmouth Park, won Monmouth Oaks, one and a quarter miles, in 2:14½, beating Aella, Spark and others. Saratoga, won the Alabama Stakes, one mile and a furlong, in 1:59¼, beating Bonnie Lizzie and Bramhaletta. Won club purse, one and a half miles, in 2:49, beating Boulevard, Eole, etc. Won Clarendon Hotel Stakes, one and a quarter miles, in 2:11, beating Valeria and three others. Won the Relief Stakes, one mile and five furlongs, in 2:51, beating Crickmore. Won the Baden Baden Handicap, three miles, carrying 99 pounds, in 5:25¼, the fastest race to that date ever run, beating Ella Warfield (4), 92 pounds. Monmouth Park, won West End Hotel Stakes, one and a half miles, in 2:53¾, beating Bona Fide. Jerome Park, won handicap sweepstakes, one and a half miles, in 2:39½, carrying 113 pounds, beating Fair Count (5), 126 pounds, and Sir Hugh (3), 97 pounds. Baltimore, won Pimlico Stakes, two miles and a furlong, in 3:49¼, a capital good race. In her four-year-old year she started brilliantly, and won the first eight races in which she started. The Washington Cup, two miles, in 3:40; Baltimore Cup, two and a quarter miles, in 4:00, beating Glenmore and Greenland; the Winchester Cup, two and a quarter miles, in 4:12, beating Grenada; Sheepshead Bay, walked over for purse, one and three-quarter miles; Saratoga, won the Excelsior Sweepstakes, one and one-quarter miles, in 2:20, beating Crickmore and Bend Or, track muddy; won Saratoga Cup, two and a quarter miles, in 4:05½, beating Carley B and Alta B; won purse, one and five-eighths miles, in 2:51, beating Frankie B and John Sullivan, and walked over for a purse one and a half miles. Sue ran secound to Bend Or in Summer Handicap, one and a half miles, in 2:35½, he 118 pounds, Thora 122 pounds. She then went amiss and lost her form and was beaten in five other races. She commenced the present season by winning a club purse at Nashville, one and an eighth miles, in the mud, in 2:06½, and the Rock City Stakes, one and a quarter miles, in 2:12, beating Checkmate, Pearl Jennings and Blazes. The unfortunate accident of her breaking down in the Louisvill Cup loses to the turf one of the grandest racemares of any day.—*Turf, Field and Farm.*

Romero's Introduction.

The following is the turf, field and games report of the race at Chester Park, Cincinnati, on the 24 ult., where Romero made his first essay before an Eastern audience:

Monroe Chief, Minnie R and J. B. Thomas were the absentees in the 2:19 class, which left Deck Wright, Romero, Alexander and Troubadour as the contestants. It took four heats to decide it, each of which was trotted in exactly the same time, 2:25. Deck Wright and Alexander had about an even thing of it in pools at the start, but the former soon developed as the favorite, and brought $25 to Alexander's $10, and $5 for the field.

The horses were sent away on the third attempt to a fair start. Around the lower turn Alexander went off his feet, and by the time he was pulled down was far in the rear. Romero held the pole and made the race down the backstretch, with Troubadour lapping at his wheel. Their was no change in their positions in the last half-mile, although as the horses swung around the upper turn into the homestretch, Troubadour moved up and challenged the leader for first place, and for quite a distance was neck and neck with Romero. The race was a very pretty one, and elicited considerable applause from the spectators. Troubadour, however, broke up very badly as they came near the stand, and the California stallion won hands down in a jog, Troubahour second, a length behind, with the favorite, Deck Wright and Alexander far in the rear.

Romero's performance sent his stock up in the pools, but Deck Wright still ruled the favorite at $20 to $14 for Romero and $13 for the field. After a provoking number of false starts, the word "go" was finally given, and the horses got off, Romero the pole horse, in the lead. They whirled around the first turn nearly abreast, and as they wheeled into the back-stretch the California stallion went off his feet and Deck Wright collared the lead by two lengths. Romero and Troubadour worked hard for second place, and were on nearly equal terms around to the stand on the first half. As they came to the lower turn of the second time, Alexander, who had been traveling in the rear, began to pick up, and when they entered the back-stretch was lapping Troubadour's wheel. As the trio swung into the last turn, Romero, Troubadour and Alexander were trotting abreast for second place. Coming down the homestretch the last named made a magnificent spurt and passed his competitors, and came under the wire second, close upon the wheels of Deck Wright, Troubadour third and Romero last. In the next two heats Deck Wright was never headed, Alexander finishing second in each.

SUMMARY.

Purse $1000, for 2:19 class.

J. Knauber's b g Deck Wright, by Hinsdale Horse, dam by North Briton	3	1	1	1

J. A. Dustin's blk g Troubadour, by Revenge, dam Illinois Maid, by Black Donald	2	3	4	3

Time, 2:25, 2:25, 2:25, 2:25.

Hereford Cattle.

It is no task of mine to run down any other breed—let them all have a fair field and no favor—but I maintain that Herefords will live, thrive and get fat where other cattle will barely exist. I would here state, however, that every white-faced cow, although it may have Hereford blood in its veins, is not necessarily a pure Hereford, and a poorly-bred Hereford can't be expected to feed as well as one descended from a carefully-selected line of ancestors. American purchasers are not sufficiently careful in the selection of animals bought in England for exportation. As long as they are entered in the herd book they take it for granted they must be "right," and so they probably are as far as fulfilling the rules of entry; but what were their ancestors? That is the question. Few buyers ever ask, except when they are buying stock by some noted bull, how the animals are bred so long as they have "looks."

The folly of buying for pedigree alone has been amply demonstrated in the Shorthorn trade; but if good feeding animals are required, that will fatten quickly and pass on their good qualities to others, it is absolutely necessary to find out whether these are inherited. Occasionally you may find a beast bred "anyhow" transmitting good qualities to his offspring, but, generally, he only transmits the bad ones. Since the Hereford trade sprang up in America, "pedigree" herds have sprung up in England; the entries in the herd book are increased in proportion, and every "white face" is now dubbed a Hereford. This is a most serious loss to those who have been carefully breeding and recording their herds for years, waiting for the "good time coming," and it is as serious a loss to those who purchase from the new herds without carefully considering how they have been bred. At any rate the value of the old herds and new should have a marked difference. Breeding from short-pedigreed animals is very much the same as breeding from grade Herefords, of which there will soon be plenty in America. These will, no doubt, improve common cattle wonderfully; but those who are breeding thoroughbreds will do well to give great consideration to those herds of old standing and of carefully recorded pedigrees, which carry their breeding on "their backs" and in their quality of flesh and handling, in the selection of breeding animals. The attention of intending purchasers should be directed to the entries in the first nine volumes of the herd book, or even to the tenth, which is the first under the Hereford Herd Book Society), and let them look who entered their cows then and let them look at those who do so now. Surely the old herds speak for themselves.

Another loss which Hereford breeders and purchasers will eventually experience will result from the exportation of moderate and short pedigree animals; they are as sure to bring discredit to the Hereford breed of cattle as the exportation of good ones is certain to increase its reputation. A great fault in many Herefords of modern growth is a bad touch and hard, thick hide. In a great measure is the result of the popular fancy for dark reds. In my experience, and I believe I shall be borne out by many old breeders, the despised old yellow-reds, with occasionally a pied black or a few white marks on them, are always of good quality and feed faster than the others. I like a good color, but not too dark, and would never discard one of the yellow-reds if it was a good animal. An eminent writer has said that "the red and white-faced Hereford has obtained much of its good qualities from the old grey Hereford," and I know by experience that such is the case. There are a few greys left now. "It is only fair," says the same writer, "that they should be strengthened by a cross of the red and white-face." The greys will be seen more of before long and will then speak for themselves. Some of the best, and, without doubt, the purest-bred Herefords, often have more white than is fashionable; but my advice is, be careful before getting rid of it. It comes, if pure, from far-off grey ancestors, to own which is an honor instead of discredit.

I was told the other day by a farmer who had been more accustomed to Shorthorns than Herefords, but who had tried both as grazers: "The only advantage in Herefords is that they feed so fast." What possible praise could be given to a beef-making breed greater than this! Graziers want a quick return for their money; let them buy Herefords and they will have it.—*Senex in Breeder's Gazette.*

ROWING.

Figuring for the Fourth.

There is a wonderful amount of figuring among the Long Bridge oarsmen on the money to be donated for a Fourth of July Regatta. The Ariels, who are dead sure of winning the shell race, want a prize of $150 for that event, and the other clubs, who feel reasonably confident of carrying off trophies, desire to have them enlarged for their especial benefit. The Regatta Committee of the Fourth of July Committee will do well to regulate the size of the prizes by the number of entries. Any rowing man can tell now just how many entries there will be for each event. Of course a four-oar shell race should be rewarded by a more valuable prize than a barge race, the entries being equal, but a contest between two shells should not draw as good a prize as a game struggle between four barges, or half a dozen single-scullers. The programme of last year was a very fair one and might be the basis for the awards this year. If in some events there will be more entries the prizes might be increased. There will probably be more scullers this year than last, as several new men have come up and want a chance. There can also be a good race in ships' boats, as the race on Decoration day excited the skippers and was a most enjoyable contest, beside being remarkable for having been started at the time announced. It would be a good idea to strike out the lap-streak race, which is an ancient and effete style aquatic event. The lap-streak is a boat difficult to classify and in these waters is neither one thing nor the other. The barge is a boat that can be classified. The shell is the best boat. Barge races and shell races are sufficient in the way of four-oar racing and the "lap. streak," so called, is superfluous. The committee can however be relied on to give a fair programme and an enjoyable day's sport.

Denis Griffin of the Golden Gate Rowing Club is losing a lot of flesh in this hot weather running round asking authorities on rowing whether they think Fred Smith would dare row him. The easiest way for Denis to find ont whether the Ariel man stands in awe of him is to ask Fred himself. If it will be any comfort to Denis to know that his powers are held in such humble repute that Smith could be backed against him, we can inform him that Al Tobin has repeatedly and publicly expressed his faith in Smith's ability to defeat any local sculler, bar Peterson, over the two-mile course. Mr. Tobin is a good judge of rowing and once before backed Smith to beat a man who had a better reputation than Griffin and Smith won. It is not unlikely that Mr. Tobin would again risk a matter of $250 on the Ariel man. Try him, Denis, and don't waste any more time consulting the oracles.

President Greening, of the Ariel Club, is booked for his maiden race, and will make his grand debut in Dobbins' wherry on the Fourth of July. The auburn-haired sculler of the South End will meet a tough antagonist in Tom Murphy, of the Potrero, who has secretly revised and corrected the lines of his famous wherry—The Merrimac—and in the gray dawn of each morning can be seen flitting up to San Bruno and back (16 miles). He is ready to bet two to one that he beats any Pioneer wherry rower that may enter in the Fourth of July regatta. This is a palpable thrust at Mr. Lyne, who walked Thomas' boy last year, and got walked in turn by a slim boy from North Beach.

McInerney has not yet started for Lowell. He spends a good deal of his time on Long Bridge, and has been considerably edified by the doings of the oarsmen thereof. The practice of chaining up the shells, so popular with certain South End clubs, has been a source of wonderment to the Eastern sculler who never before saw boats so fast as to need tying up to keep them from flying over the course. In the Pioneer club house, which boasts half a dozen scullers, the boats are all chained to the wall, and look so much like a row of bull-dogs that visitors keep a respectful distance from them, and nervously inquire why the ferocious looking crafts are not supplied with muzzles as well as collars?

Bob Gohle, mine host of Long Bridge, has discovered a rising sculler in the person of a young boatman who works for him. The undeveloped champion takes a spin in Bob's old shell every afternoon and keeps Coroner Livingston's assistants in a painful state of suspense. It is reported that since the new man first ventured out in the old shell a deputy coroner, with a boat-hook, has been stationed night and day at the rolling mills, but, so far, the doomed waterman has met with no more serious accident than the breaking of an outrigger.

The Pioneer Rowing Club will enter a four-oar-shell crew for the Fourth of July regatta. The crew will, in all probability, be T. Brennan, stroke, Lyne and Crowley, waist, and Al. Tobin, bow. This is a pretty good crew, and will render a fair account of itself if it should get sufficient practice—which is unlikely.

Treatment of Jersey Calves.

J. H. Walker, in an article in the *Country Gentleman* on the above topic, condemns in strong terms the high feeding of calves designed for dairy stock or any feeding beyond what will keep them in a fair, thrifty condition. He says:

The younger the animal is when this bad habit of making flesh and fat begins, the more controlling it will be, and the more likely the animal will be to transmit the habit to its offspring.

Nothing should be fed to bulls more stimulating than good hay, and at times a few oats, shorts, or both, with coarser food. Plenty of coarse hay, straw and flat grass even should be given at times. The digestive organs of a butter-bull, especially when young, should be taxed and distended precisely as those of a female designed to produce butter. Heifers should be fed nothing but skimmed milk, grass, rowen, good hay, coarse hay, flat grass, straw, corn stubble, in fact everything to distend and tax their digestive organs, and with nothing more stimulating, before they drop their first calf, than oats or shorts, or similar food. The rule for keeping heifers to make good cows is rather extravagantly expressed by saying: "A heifer should have a paunch large enough to turn itself around in." Unsightly as they are in such a condition, such heifers make the best cows. * * * The rule is to feed just enough of such things as are found necessary to keep the animal in a thrifty, growing condition and no more—the less, the better—and never allow a milk or butter animal to lay on fat. Experienced dairymen never go into herds that are fat and sleek for their cows. They know that the feeding necessary to produce such conditions in milk and butter animals impairs their power to accomplish the thing for which they are to be kept, namely, the making of milk and butter. Meat, not milk or butter, is what they will ever after make. They will "take better care of themselves than of their owners."

Fleeces of American Sheep.

The following is from the Sydney *Mail* of April 7. The sheep mentioned were taken down to the colonies this spring by L. R. Martin of this city:

Through the courtesy of a gentleman who is most enthusiastic and painstaking in the important matter of sheep-breeding, we are enabled to place before our readers some facts regarding the fleeces of the American sheep sold recently at the quarantine station, Shark Island. It will be remembered that, when describing the sheep soon after their arrival, we wrote of the fleeces as being, like those of the Vermont sheep with which we were familiar, very heavy in yolk, or, in other words, as "heavily conditioned." The bulk of the tip was specially mentioned. Since the sale two of the rams have been shorn, and the fleeces scoured. One ram, which we will term No. 1, is a six-tooth; the other, No. 2, is but a 2-tooth. The fleece of No. 1, which was of full growth, weighed, just as removed, 29 lbs. No. 2, which had been shorn the October previous, gave a fleece which weighed 20 lbs. 12 oz. The wool was then scoured. It proved a very difficult task; but sufficient was done to bring the fleece of No. 1 down to 7 lbs. 8½ oz., and that of No. 2 to 4 lbs. 12 oz. Thus, No. 1 fleece lost 74 per cent, and No. 2 77 per cent. After this the dry wool was submitted to the examination of a few experts. An experienced scourer gave the opinion that if thoroughly scoured the loss would have been at least four per cent more than the figures mentioned. The fleece of No. 1, after such cleansing, would be worth 16d. per lb. No. 2 would be less valuable by some pence. The mean value was set at 14d. per lb. Adopting this valuation, No. 1 fleece would bring in this market about 8s. 9d; No. 2 about 5s. It is almost unnecessary to add that these amounts are much below the average obtained for the fleeces of stud sheep bred in Australia. The Scone flock, of 6,000 sheep, has afforded of scoured wool an average of 4 lbs., and this wool realized about 3s. per lb. But the Scone flock does not afford heavy weights in grease, an average of 11½ lbs. being heavy. In the matter of value, the American wool stands very low. In weight of fleece in grease, however, it holds sway. For instance, we are told that the California ram, Colchis, has a record of 52½ lb. for one year's growth. This doubles the best record of this colony; but if the rival fleeces were placed in the scouring tub, according to the recent washing, the Australian fleece would come almost level in the matter of weight, and would be a neck or so in advance at the "sale post." These defects, however, may be outweighed by perfections which the breeders who are about to use the sheep may discover. We have proofs that Vermont sheep have done service in New England, and it is reported that a Victorian flock has been much benefited by the introduction of a few California sheep. If the recent importations can increase the size of carcass, and afford length and weight to the staple without lowering its quality, the prices paid for such factors are not too high. Experiments of the kind should be encouraged. It would afford us pleasure to find the trials in course in the two countries. There are defects in the Californian flocks which the merinos of Australia might remove.

Poultry.

From a paper by P. H. Jacobs in the *American Agriculturist* we quote the following hints:

An acre can produce $600 in poultry, and the capital required returned by the poultry in a short time with profit. With a syatematic method of cleaning and feeding, more profit, with less labor, can be derived from poultry on one acre of land than, from the best regulated dairy under the soiling method. An acre, devoted exclusively to poultry, will return a greater profit, with less cost in labor, than ten acres of wheat or any cereal crop. The poorest and lightest of sandy soils are more suitable for poultry than the best pastures, as they are freer from disease. That yards free from grass, and clean to every corner, are better than grass runs, has been demostrated; but shade of some kind shonld be supplied. No poultry-house can be kept absolutely clean without a board floor. In setting hens, the nests should be in warm, dry locations in cold weather, and in cool, moist places in summer. In selecting for breeding purposes, plumage and points of markings should give way to robust constitution, vigor and activity. Feeding steeped clover hay and linseed meal assist in the formation of the white of eggs, by supplying nitrogenous matter. The houses should be freely ventilated in summer, and warm in winter. All soft food shonld be freahly mixed. Yellow-legged fowls sell better than those with dark legs. All non-sitters lay pure white eggs. No male should run with over twelve hens—a less number is better. Eggs from two-year-old hena are preferable for setting purposea. Exercise should be furnished by throwing a small quantity of corn into a bundle of loose straw or hay, for fowls to scratch. Keep a good dust-bath always. Spade up the ground as often as possible. When a rain is threatened, see to the young chicks. Early-hatched pullets are the winter layers. Keep no fowls for beauty, if profit is the object. Use pure-bred males slwaya. Large males bred on small hens produce legginess in chicks, but small males on large hens produce closer bodies and shorter legs. Never use a male with his own offspring. It is a saving of time to let a hen sit, in preference to breaking her, as hens lay but few eggs when deprived of sitting, and go at it in a week or two. Breed your own fowls, and never bring them to your yards from other places. Hens lay as well when not in company with males as when with them, and such eggs keep fresh longer. Young chicks, when feathering, undergo severe natural drain on the system, therefore never omit a meal. Use only the freshest egga under aitting hens. Hot white-wash, containing carbolic acid, liberally applied, will kill or keep off vermin. The rough scales on fowls' legs are easily removed by a mixture of lard and aulphur, or coal-oil. Finally, be as attentive to fowls as to horsea, cattle, hogs or sheep, and be in your yard from morning until night.

A Portland Boat Race.

Last Saterday a matchrace, two miles with turn, waa rowed Between two crews of the Portland (Or.) Rowing Association in paper shells. Messra. Teal, Wallace, Quackenbush and White formed one crew, and Coffee, Malarkey, Henderson and Shindler the other. The boats were dead even to the turn, and on the home stretch were almost abreast until the last eighth of the course waa reached, when Teal's crew put on a spurt rowing aa high as 47 strokea to the minute. By the hardest kind of work they got the lead and won the race by a bare length. Time, 13:01½. Thia is remarkably fine time for a local organization, and have rarely been beaten by Eastern clubs of medium strength.

The board of Directors of the Olympic Club has decided to hold an out-door athletic meeting in Jaly. The ground's committee has charge of the details.

A Spanish Yacht Club.

Spain at last has a yacht club which shows how far the love of yachting has spread. In France yachting has within the last half dozen years increased to a marvelous extent, and although, as yet, yacht-building has not become a national business or profession with the French, there is little doubt but that in a few more years French-built yachts will be numerous. The newly-formed yacht club of Cadiz—"Circulo Nautico de Cadiz"—is, we believe, the first of its kind ever founded in Spain, and it promises to be prosperous and well managed. The organization of the club is as follows: President, His Excellency the Vice-Admiral Juan de Dios Ramos Izquierdo; Vice-President, Mr. Robert Soto; Vocales, Messrs. Eduardo Guerra, M. M. Juau Salas, Jose Salarar, Augusto T. Arcimas; Honorary Secretary, Mr. George Soto. Club burgee, red, with two white fishes; ensign, the same as the military marine, but with a crown in the center instead of the national arms. Honorary members will consist of the actual ministers and other high officers of marine. The sailing rules adopted are those of the English Yacht Racing Association, and it is intended to bold two large regattas each year, the more important of which is to take place in August and will be international. There are only small yachts at Cadiz, and not a numerous fleet, but no doubt they will soon increase both in number and size, and ere long the club just founded will probably take an important position in the yachting world. In order to make its international regatta a success, however, it might be prudent to alter the date proposed to a later one, so that English and French yachts might call at Cadiz and take part in the sport when en route for the Mediterranean. Thus, unless there are local reasons why this should not be the case, we would suggest that the regatta of the new Spanish club should take place in October, and if this was done, and liberal prizes given, there is no reason why the yachts proceeding to the Mediterranean regattas ahould not race at Cadiz also. Every year the number of yachts cruising in the Mediterranean increases, and the liberal prizes offered at Nice and elsewhere will without doubt attract genuine racing vessels also ere long, and if a series of regattas were held at the various ports on the west coasts of France and Spain, after the English racing season was ended, many vessels would attend tbem instead of being laid up in their winter quarters. The experiment tried this year, of giving prizes for long ocean races, cannot be pronouuced successful, nor do we think that such matches will ever become popular or attract large entries; but we believe that such a series of regattas as we propose would prove a great attraction, and if the French clubs and the new Cadiz one would work in concert the thing might easily be done.—*Land and Water.*

Breeding for Sex.

From time to time I have noticed articles iu the *American Field* on the subject of breeding for sex, and have read carefully what your correspondents have had to say. From the varied experiences, together with my own, I have come to the conclusion that it is all nonsense to attempt to breed for sex. I have tried the strength of all the signs and theories that I though would bring about the desired result. I have bred my bitches from time to time every day during heat, breeding aome on the first and second day, others on the second and third, others on the third and fourth, and others again on the fourth and fifth. The first in tne next heat on the eighth and last day. Some litters would have a majority of dogs; others a majority of bitches. Of the last six bitches that have whelped, I bred them the instant I noticed them in use, allowing the dog to be with each one twice only, with the following result: Breeze, five dogs; Burlesque, six dogs and five bitches; Waddy, six dogs and four bitches; Polly Belton, six dogs and two bitches; Buckeye Belle, eleven dogs and two bitches; Bonny II, four dogs and two bitches. Previous to the last time the bitches were bred, I bred some on the first days and some the last days of use, with the following reault: Breeze, four dogs and one bitch; Burlesque, four dogs and five bitches; Waddy, four dogs and six bitches; Polly Belton, three dogs and five bitches; Buckeye Belle, eight dogs and six bitches. I am inclined to think that the success of breeding more dogs than bitches lies in the health and general condition of the dog and bitch, and that a vigorous young dog will get a larger percentage of male puppies than an old and weaker one, particularly if he has been much used in the stud.—*K in the American Field.*

Paid Under Protrst.

Among the other things passed upon by the Board of Review of the National Trotting Association at its late meeting in Chicago was Mr. Hickok's controversy with the Scranton, Penn., Association. In that case the following order was entered on the minutes: Lackawanna County Agricultural Association, Scranton, Penn., vs. O. A. Hickok, San Francisco, Cal., and the ch g, Overman. By order of the applicant the respondent and ch g Overman were suspended for nonpayment of entrance fee, which, being brought to the notice of the respondent, he alleged that the suspension was erroneous, and that he was not liable for any such entry as that alleged, and he promised to produce evidence in support of allegation. Being informed of this answer, the applicant forwarded the original entry addressed to its secretary, and signed by Mr. Hickok. Upon these facts there appeared no excuse why Mr. Hickok should not pay the entrance fee, and the board ordered that he must do so before competing again on the grounds of members, which order being notified to Mr. Hickok he immediately provided for the payment through the secretary of the Chicago Driving Park, but did so under protest, alleging that he would at another time satisfy the board that he should not be held responsible for the entry.
